The Bookkeeping class has started work on their second practice set. This includes all the business transactions of a hardware dealer for two months.

We have just finished the chapter on "Electricity" in Physics.

JUNIOR HIGHLIGHTS

Well, here we are again with another six weeks test paper laying before us. This will be the last six weeks test for the seniors and I know that not to many of them are at all happy about it.

The Juniors are a pretty busy class now and will be until school is out. We have now started to work on our banquet and committee chairman have been named. Donald Franklin and Beulah Goll are in charge of decoration. Donna Heivlin is in charge of the menu and La Vonne Beier is in charge of the entertainment. Its up to all of us Juniors to work together and make this banquet a big sucess.

All of the Junior classes have been the same Oh dear, am I glad I'm not a teacher. But I must say newspaper men can certainly give speeches, yes, Bud Montgomery it was good.

Former Klemme Boy To Marry Waterloo Girl

Larry Van Syoc, student at Iowa State Teachers College at Cedar Falls, son of Mrs. Roy Smock of Waterloo, formerly of Klemme, and Miss Virginia Ruth Oren of Waterloo will be married at Waterloo on May 25th.

WARNS OF DANGER AHEAD IN PRICES

Iowa farmers may find it profitable to adopt a cautious attitude toward the future of farm prices, believes Carl Malone, Iowa State College farm economist.

In this week's outlook letter, Malone warns that a considerable break in farm prices may be in the making, though it may be some months away. He says a return to 1944 prices, for example, would be a real slump but indicates that no real depression in the offering

Malone explains his outlook for a downward shift in prices by pointing out that the present postwar inflationary boom has been built on a temporary foundation. This foundation now shows signs of giving way to the more permanent foundation of peacetime prosperity that lies beneath.

Buying Power

The clue to this outlook is the fact that the buying power of the public is decreasing. Malone explains that there is a tendency to overlook this fact because of the continued rise in total national dollar income. That's been true of farmers as a group whose income and buying power have gone up during the past year

This condition does not alter the fact that buying power is shrinking, Malone says. Buying power is shrinking because costs of living are rising faster than natonal income. From 1945 to the last three months of 1946, prices paid by consumers rose 18 percent. The rise in dollar income rate for all individuals was 10 percent. But the total money paid out in salaries and wages actually declined 2 percent.

War I Pattern

In many respects the economy is following the same pattern as the one established during and after World War I. This time, however, we have had a greater rise in buying power and have done a better job of controlling the cost of living. The recent shrink in buying power of the public has had little attention But it is shrinking. In 1946, shrinkage in salary and wage buying power was largely offset by expansion in the use of credit redemption of U. S Saving bonds.

Malone feels that the chances of a gradual adjustment of prices to buying power are growing slim There are more indications that the break will come suddenly.

Experiment Of Local Farmer To Be Continued At College

BEN GREIMAN'S SOYBEANS WILL BE USED BY MINN. UNIVERSITY

J. W. Lambert, Asst. Professor, Division of Agronomy and Plant Genetics, of the University of Minnesota wrote Ben F. Greiman: "Your soy bean selection from the Richland Variety was planted in an observation row in 1946 It looked promising and will be placed in some of our yield trials in 1947."

Mr Grieman is receiving orders from all over the state for his soy bean seed. He has sold several hundred bushels and has some seed left for sale. He plans to grow a larger amount for seed next year as there is a big demand for it.

Auxiliary Will Hold Annual Conference At Boone

The local American Legion Auxiliary have been invited to attend an eighth district conference at Boone, Aprl 22 at the Municipal Building.

Business and entertainment will be on the program, closing with a banquet at the Moose Hall and a dance at the Armory.

Many Iowa farmers like rolled oats as a starting mash for pigs.

Late Spring Will Hold Back Honey Production

Iowa farmers, delayed by the late spring in seeding, aren't the only ones put on the spot by the weather. Hawkeye beekeeping also has suffered a severe setback, says Floyd Paddock, Iowa State College bee specialist.

The reason, he points out, is that the unfavorable weather also has extended well into the South, which normally supplies a majority of Iowa customers with bees Many of the orders this spring already have been cancelled. And those that are filled will be late.

The delay may mean that crops which supply the honey flow, such as the clovers, will be through blooming before the bees are ready.

Because of this danger, Paddock urges Iowa beekeepers to do everything possible in the way of good management, to overcome the handicap. That means giving the bees plenty of room, feed and pollen now or as soon as they arrive. Such steps will help insure that colonies will be increased from 3 to the 12 pounds needed by the time crops are ready .

Goodell Farm Home Gutted By Flames Monday Morning

LET PASTURE GET AHEAD OF CATTLE

Best to Wait Until Grass Is 3 to 5 Inches Tall to Start Using It

When warm weather and warm rains bring pastures that are nice and green, it's a big temptation to turn the cows out to graze Farmers are busy with the spring work and tired of cleaning out the barns

But pastures that are not at least 3 to 5 inches tall do not furnish much feed, warns Floyd Johnson extension dairyman at Iowa State College By waiting until the grass is sufficiently tall, farmers will be well repaid for the extra efort.

In the first place, Johnson explains, early grass is not very nutritious. It tastes good and the cows like it, but it's watery and they won't produce much milk from it.

Hard on Pasture

Another reason the cows should be kept off early pasture is that any grazing which reduces the growth above the ground will be reflected later in a reduction in the quanity of pasture grass, Johnson says. Many of the pastures, especially bluegrass, are greatly increased in value if cows are kept off until the grass is 3 to 5 inches tall

When the grass is tall enough so the cows can be turned out to pasture, it is a good idea to make the process gradual. The first day they should be turned out for only 2 or 3 hours, then they can be turned out for a half day for a few days and finally turned out all day Otherwise they may eat so much grass they won't eat much dry feed

Reduce Dry Feed

After the cows have been turned out, Johnson says their dry feed should be reduced by half the first day If the cows won't eat the half ration of grain, take it all away for a week or 10 days, but give the cows some dry hay at night so the better producers can keep up their production.

Johnston says that if the pasture is good—3 to 5 inches tall—a mixture of 2 parts of corn and cob meal and 1 part of ground oats by weight, or equal parts of corn and cob meal and grounds oats can be used It should be fed at the rate of 2 pounds grain to each gallon of milk produced per day, And if silage is available, 15 to 20 pounds a day can be fed after the cows have been on pasture 3 or 4 weeks. Later on some dry hay can be fed if available.

Study Group Met At Mrs. Geo. Schoenwetter's

The Methodist Study Group held their April meeting in the home of Mrs. Geo Schoenwetter. History of the hymn "Blessed Assurance Jesus Is Mine" written by a blind women, Fannie Crosby

The devotions were ably given by Mrs. Roy Jacobs.

Duet "Life's Railway To Heaven" was sung by Mrs. Daisy Lemke and Mrs. Wm Ax.

Folio 6 of "Portrait of a Pilgrim" was told by Mrs. Roy Arnold The Piano Solo "Meditation" was played by Mrs. Harry Gibbs Mrs. H. E. Harvey was in charge of the questions.

Mrs. Gerald Koerner sang "A Perfect Day."

Get well cards were signed by everyone present to be sent to Mrs. R. W. Elder and Mrs. A. G. Koerner.

A delightful lunch was served by the hostesses Mrs. George Schoenwetter and Mrs. Art Schoenwetter.

There were 33 ladies present.

Cute birth announcements at The Times Office.

MERLE AVERY HOME EAST OF GOODELL BADLY DAMAGED

Cause Unkown; Interior Of House Gutted By Flames

Fire of unknown origin gutted the two story frame farm house of Mr. and Mrs. Merle Avery, four miles east of Goodell Monday morning. Flames were first discovered coming through the roof about 9:00 o'clock.

The Goodell fire department arrived on the scene in a few minutes but the roof was then nearly consumed by the blaze. The fire departments of both Meservey and Belmond arrived to assist in fighting the blaze.

Household goods were removed from the first floor, but the household goods on the second floor were consumed in the blaze.

The interior of the house was burned and damaged clear down to the first floor. However, the walls are standing .

It is thought that the blaze started either on the roof or in the attic of the house.

FOUR TOWNSHIPS WILL VOTE ON PURCHASE OF FIRE TRUCKS

Trustees and other officials from Ell, Liberty, Concord, and Garfield townships met at the courthouse in Garner to discuss rural fire protection and service. Petitions had been circulated and the group voted to call a special election in the four townships to authorize a tax levey for this purpose. The election will be held in the respective polling places in the 4 townships on May 27 with the polls open from 12:00 o'clock noon to 8:00 p. m.

Ellington, Madison and Bingham townships have voted such a plan and now have the plan in service.

Farmers Here Already Have Fire Protection Service

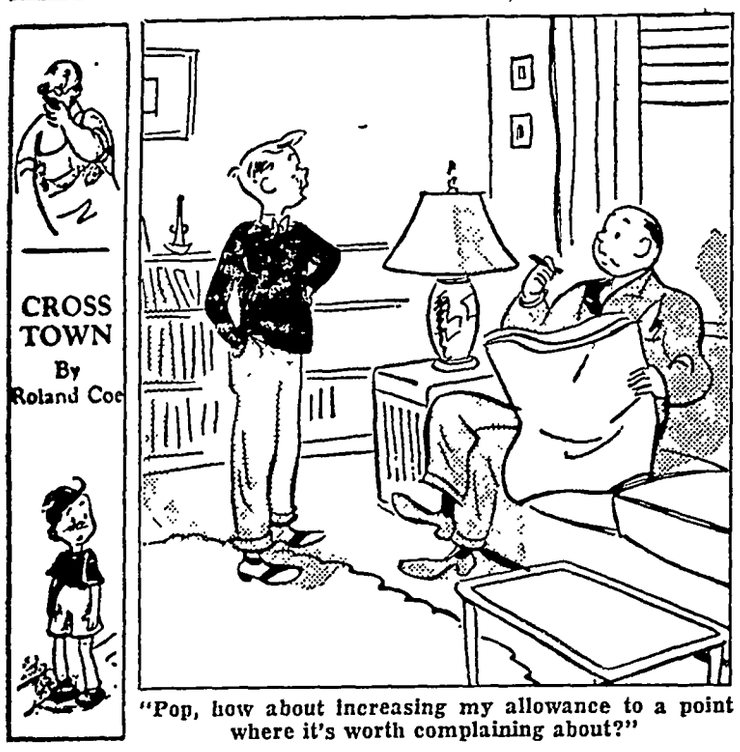
At the meeting officials of Ell, Liberty and the Mayor of Klemme, pointed out that farmers in this area have had this service for about nine years. A completely equiped truck is housed in Klemme. This fact remains more or less of a problem in the south half of Ell and Liberty. These farmers have this service now. They have invested in the truck in Klemme. This will also hold true in part of Avery and Twin Lake. As we understand it, an agreement was then made that half of the funds that would eventually be raised in Ell and Liberty would go to improving the service in Klemme. This will probably lead to the purchase of a high speed chemical outfit in addition to the fine truck now housed in Klemme. Farmers in the south half of Liberty and Ell felt it would not be just if all the funds went to house a truck in Garner, as the Klemme truck is now servicing these farmers, and has been for over 8 years, and they are all well satisfied with the service they have received.

ALL KLEMME GRADE CHILDREN ATTENDED SHOW AT KANAWHA

Three bus loads of Klemme grade school children went to Kanawha Thursday afternoon to see "Pinocchio" the Walt Disney full length feature cartoon picture. Manager Pulley of The Tall Corn Theatre treated the kids to popcorn which they enjoyed on the way home.

The children enjoyed the picture very much and were thrilled also to have a ride on the bus, as many of the town children had never ridden on a bus before.

CROSS TOWN
By Roland Coe



"Pop, how about increasing my allowance to a point where it's worth complaining about?"

BOBBY SOX
By Marty Links

"It's in celebration of Dad's new raise!"

Dangerous Desire

A group of married men were discussing automobile accidents recently, and counseling one another on the various safety measures to observe while driving, when someone introduced the query: "What tendency do you find hardest to overcome while driving your car?"

Answers to this important question were vouchsafed by every man present save mousy little Hector Jones.

"Give us the lowdown, Hector," someone demanded. "What's your most troublesome tendency while driving?"

Hector blushed and hung his head.

"Well, if you must know," he stammered; "it's the desire to talk back to my wife."

REVENGE AT LAST

The scientist had perfected a process to bring inanimate objects to life. He decided to try it out on the statue of a Minute Man of '76 in a nearby park. It worked and after some minutes of creaking, the Minute Man stepped down from his pedestal. As he hit the ground, he cocked his long rifle and turned to the scientist.

"One side, Bud. I'm going to shoot about two million pigeons."

Filled a Need

Sometimes the most amazing philosophy can come out of a barroom. Last week I overheard two pleasantly glowing gentlemen quietly reviewing their respective marital problems

The oldest one was approaching the saturation point. Gulping down his shot of rye, then clanging the empty glass on the mahogany, he growled: "Well, George, ol' fellow, look at it this way—if m'wife didn't drive me t'drink, what th' heck good would she be?"

Kitty, Kitty!

Then there was the pompous looking woman who was holding forth at a club meeting and telling of the dream she had had the night before.

"It was terrible," she explained. "I dreamed that all the animals that went to make up my furs were standing right there at the foot of my bed."

One of her listeners turned to another woman and said, "How silly of her to let a few alley cats frighten her."

Expert Knowledge

A thrifty man went to a lawyer for advice. After the interview the man ran into an acquaintance and told him about it.

"But why spend money on a lawyer?" asked the other. "When you sat in his office, did you see all the law books there? Well, what he told you you could read in those law books."

"You're right," admitted the advice seeker, "but that lawyer—he knows what page it's on."

NO HAT NEEDED

A crowd of admiring friends had gathered around the owner of a horse who had come in first at Santa Anita, Belmont and Jamaica race tracks.

"Will you race him in the derby?" asked one.

"No," was the reply. "He'll run bareheaded like the rest of them."

Why Complain?

Pat and Mike were having dinner together. Pat helped himself to the larger fish and Mike said:

Mike—Fine manners, ye have, Pat. If I reached out first, I'd take the smaller fish.

Pat—Well, ye've got it, haven't ye?

Get a Nail

Visitor—Hey, look, the thermometer's falling!

Native—Tsk, tsk, probably wasn't nailed up right.

And He Blubbered

Friend—So your father was an oldtime sea captain?

Fred—Yes.

Friend—Did you ever make any whaling trips with your father when you were quite a young boy?

Fred—You bet—out to the woodshed.

Unwilling Listener

Friend—Your wife is a brilliant talker—I could listen to her all night.

Husband—I have to.

CTION Corner

Late Visitor . . By John Paine

The lights flashed up and Rand smiled into the flushed face of his wife.

Y across the darkened Arlington Rand paused. was extended to find the he table lamp. After a esitation he withdrew it d his steps to the apart- "Come in, darling," he e's no one here. I told had left me. If it weren't d be alone tonight, and hat's more than I could

turn on the lights just t to talk to you first— y It'll be easier if you don't see my face. Come, let's sit down. Give me your hand, I'll lead you."

He arranged two chairs in the light that sifted dimly through the curtained windows and sank wearily into one of them.

dly fair to you, Elinor, but talk to someone tonight ere always a good lis- eed- t say anything if ant to. And it'll be better et what I say I know I'm f tonight I feel as if I ering from shock—post- shock, that's what it is. er been operated on to eart removed—or have One feels stunned at hen you know that you've as though the stream of ld make the blood stop t—"

voice ceased for a mo- be sa' brooding, staring ckness of the floor t so bad tonight during he went on. "As long as the stage I was someone then I had to come back n thoughts— But you're darling, you're helping a being here It won't take you here I can talk it out ld and then I'll be free. I mean Peggy, of course. m to say that name casu- rsonally Peggy who used wife. You know, it's hard 've been married to a girl than a year to realize sud- t you will never see her If you do, it will be as a Ard Peggy's such a child. If she's all right now. She s needed someone to look , someone to see that she gh rest and has all the ings she needs—pepper- nstance

hat's not what I wanted to ay I wanted to prove to it's all for the best I guess d to be a parting of the etter now than later. I have done it myself. No logic could have made me eggy But as soon as she was going, I saw she was

had never known an actor e married me My world oreign to her as Broadway n Street. She came of good people, but that's just the trouble, they were too good They were narrow, bigotted, intolerant. She married me against her better judgment, expecting the worst, and she has been discovering it ever since Every time I was late getting home from rehearsals she knew I'd been unfaithful. She didn't know the meaning of the word trust. Why, if she were to come in right now she'd think this was cause for divorce

"But tonight's different. She's gone now, and there's no chance of her ever coming back You know better than anyone that there's never been cause for suspicion before. And yet you, Elinor, were the very person she raised the roof about. The scenes she's made about you! Why, you wouldn't believe it.

"She never could realize that she was the only thing in the world I really cared about.

"I'm sorry, Elinor. I've hurt your feelings again. And you've been such a brick to sit here and listen to me. A real pal. Well, I'm through now. Through with Peggy Almost as completely as if I'd never known her. I have only as much recollection of her as a mountain lake retains of some bird that was mirrored once for a moment in its depths and never seen again."

He paused once more, as if listening. "She left me and it's the best thing that could have happened," he went on. "You can see for yourself I was getting dependent on that girl. There was something awfully sweet about that kid—if only she hadn't been such a little fool

"That's better, isn't it? A little fool. I can think about her like that now.

"But now let's talk about us, darling. There's no percentage in holding post-mortems over a dead love. Come closer, Elinor, one chair's enough for both of us. You'll help me to forget, won't you, darling?"

"Help me all you can because Peggy's listening and I hope she gets an earful.

"No, darling, I don't mean figuratively She's behind the bedroom door not missing a trick.

"LISTEN carefully and you'll see how I know Do you get it? You can't hear Peggy—she's probably holding her breath right now—but you can hear a little popping and rustling in the wastepaper basket. I heard it as soon as I came in. It sounds like fire, but it's not. It's heavy cellophane that's been crumpled up into a ball. Originally it was around a package of peppermints.

"Peggy was sitting here in the dark, waiting to see whether I'd come home alone Well, now she knows. And now she'll go for good. That leaves the whole world for us, darling."

The lights leaped up, and Arlington Rand smiled into the flushed face of his wife "Welcome back," he said.

"Where is she? Where have you hidden her?"

He allowed a look of bewilderment to cross his face "Oh, you mean Elinor Chilton? She's in bed probably Tonight you were my only audience And listen, sweet, you can divorce a husband for talking to himself"

3 MINUTE FICTION

Nixey Awakens

By Harold Monroe

JIM VARDON, ex - boatswain's mate second class, United States Navy, luxuriated on the end of his spine and the back of his neck in the old arm chair, lugged out there on the porch especially for his comfort by his dad.

Mom was looking down at the foot of the steps where Nixey, the dog, stretched in the sun, and Jim could see that worry or something was clouding her pleasant face. He stirred and his mother turned to face him.

"Jim-Jimmy, Dear." She blinked her kind grey eyes. "Jimmy, are you happy—really happy I mean."

He grinned at her. "Happy? Why of course I am, Mom." He went over and gave her a hug, then stooped down to towsle the dog's ears. The old dog hardly opened his eyes, and Jim went back and dropped heavily into the arm chair.

Presently a soft glow began to warm him. He was recalling his boyhood and he thought of the time Nixey had followed him into Fowler's Funeral Parlor where the high school band practiced on Sunday afternoons. How the dog managed to sleep through all the tootings and squeakings and blarings of the ambitious and youthful musicians he would never know, but Nixey had.

And the time when, instead of going into the big hall at the Masonic Temple where the high school was giving a reception and dance for a visiting basketball team, some of the gang had slipped off into one of the smaller lodge rooms for a secret game of craps, and prim

The old time was back.

Miss Halsey, the English teacher, had barged in on them The rest of the gang had beat it safely before the teacher had had a chance to recognize them individually, but Jim knew it was all off with him when, as he ran, he heard her say: "I didn't recognize any of them, but here's old Nixey, James Varden's dog, asleep in this corner, so at least we know James was one of them."

Mom was still there in the swing with her knitting and between every few knits and purls her eyes would stray toward Jim. Suddenly she said "Say, Jimmy, your gun is out in the garage Why don't you go hunting sometime? It would do you good."

JIM didn't feel that he particularly wanted to go hunting. He just didn't seem to want to do much of anything, it seemed. But Mom was trying so hard to be helpful he didn't have the heart to say no.

"OK, Mom." He got up and sauntered around toward the garage. "Come along, Nix!" The old dog just rolled his eyes under drooping lids and went back to sleep.

The shotgun rested on some pegs on the back wall of the garage. He lifted it off, broke it down and squinted through the dusty bore. Rummaging around through a drawer, he found his ramrod and ran a rag down the barrel.

He took his hunting jacket from a hook and dusted the cobwebs off it. In one of the cavernous pockets he found several shells. He slipped the coat over his shoulders, picked up the gun and strolled back through the house, dipping into the bulging cookie jar while in the kitchen. Mom was still on the front porch.

"I guess I'll go out to the lake and use up these shells," he told her.

"All right, Son," she said, and added just as she always had done when he was still a kid. "But be careful, won't you."

Nixey rolled his eyes, then lifted his head, and the next instant he was all over Jim, licking his face and scampering madly about. Joyful little yelps punctuated all his actions.

Jim gulped back a knot that was sliding up into his throat. "Mom, he knows me for sure now!" He rumpled the old fellow's ears. "Lookit him, Mom!"

Tears were in Mom's eyes. "I-I'd hoped the gun and your jacket would wake him up. Three years is a long time for you to be away, even for the rest of us, but for old Nixey it was much longer. . . ."

"Yeah," Jim agreed. He cradled the gun under his arm and strolled off. Nixey skipped along lively at his heels. And Jim Varden thought that he had never felt so happy and carefree in his life before.

It was the needed touch for the old time to come back.

What to Do About the 'Blues'

One woman I know has two personalities Talk to her one day and you are impressed by her cheerfulness, her wit, her wisdom, her sincerity You are charmed by these positive qualities, because they are qualities you like Wherever you find them, they are charming qualities

See her the next day and you will hardly believe that it is the same person you are seeing. For instead of being joyous she will be downcast, instead of being light-hearted, she will be plunged into despair; instead of being interesting, she will be dull and colorless and forbidding.

She is one of the large number of human beings who is subject at frequent or infrequent intervals to periods of depression which go under the name of "the blues."

Having these periods is not unnatural or a sign of abnormalcy. It's natural for everyone to feel depressed at times. But wise men and women, realizing the danger of showing their depression, get out from under the influence of the blues as soon as they can.

The best way to overcome this unhappy condition when it overtakes you is not to shut yourself off from everybody and brood it out.

It's better not to shut yourself off at all. The antidote is to get your thoughts away from yourself, from your misfortunes, from your shortcomings, from your misgivings—turn your mind outward to other things.

That's the reason why the company of an alert, cheerful person is the best method there is. Seek out a person with positive rather than negative emotions. Let him talk. Don't talk yourself. Let your mood catch its cue from his.

Another good way is to work off your depression by undergoing some form of vigorous exercise. As an old doctor said to me, "No form of depression has ever been able to survive a three-mile walk in the open air or an hour at the woodpile."

I think you'll agree with me that it's also foolish to let a little thing like the blues get you down. If you go after them in the ways I have suggested here, you can get the blues down, and it won't take you long—just a few minutes to do it.

Sportlight by Grantland Rice

THIS is supposed to be the season when baseballs are thudding into gloves and bats are thudding against baseballs. But, apparently, football now covers the entire 12 months.

It might surprise you to know how many football coaches, scouts and players are seeking the sun, or holding spring-training south of the Mason and Dixon line, as well as above And they already have started talking about next fall, including the 12 or 15 bowl games that will open the campaign of 1948.

Grantland Rice

There will be one of the wildest shifts of coaches this season that football has ever known. There are new men at California, Alabama, Northwestern, Cornell, Mississippi, San Francisco university, Ohio State, Pittsburgh, Maryland—too many to mention But a big part of the old guard is still standing pat.

We have been taking a vote of these sun-seeking wanderers, here in Florida, to get an early line on what might happen from September to November. We first ran into a well-known eastern coach, one of the best, who had this prophecy to offer:

Navy vs. Pennsylvania

"The college battle in the East should be between Navy and Pennsylvania. They have the two strongest squads coming up. Columbia and Yale can be close. Yale especially so, if Howie Odell can dig up another line Both Yale and Columbia will have fine backs. Cornell can be strong—and probably will be. The eastern race will be a good one, one of the best in many years. Army? A guess No team can lose nine of its best starting team, especially such men as Blanchard, Davis, Tucker, Foldberg and Poole, and have too much left. This should be Navy's year, as far as West Point and Annapolis go. Army won't be bad, but none too good. It may lose four games.

"South—Georgia loses Trippi and others. Look out for Alabama, Tulane and Tennessee. Tulane can be extra good. So can LSU. And don't overlook North Carolina with Charlie Justice. Duke is still a guess."

"Just a minute," another scout cut in. "If you leave out Georgia Tech you are crazy. This will be the team to beat in the South."

On the early evidence, it seems that the South again will face one of its big seasons, with at least 8 or 10 strong teams.

Moving to the Midwest, the vote went to Michigan in the Big Nine roundup, with Notre Dame heading the country's list, East, West, North or South

"Frank Leahy's Notre Dame squad should be even stronger than it was last season," one traveling scout reported. "Notre Dame has most of her veterans back, most of her stars, plus some young backs who will be brilliant. The squad again will be two or three deep As Leahy happens to be one of the game's ablest coaches, you can see what this means. A South Bend gallop all fall."

Michigan is rated highly in the Big Nine, without an early Army-game pressure to set her back this time. Ohio State and Minnesota both will be dangerous Illinois loses several of her best men, including Agase and Buddy Young. Missouri, Nebraska and Oklahoma are rated well

In the ever-hustling Southwestern conference, Jess Neeley's team at Rice is given a good chanco to repeat. The battle for conference leadership is so fiercely fought in this section that early predictions are useless.

UCLA Leads in West

"What about the West coast?" I asked a wayfarer from California.

"UCLA should still be the strongest squad," he said. "I know how terrible they looked against Illinois, but they are a far better team than that game showed. When the Army game was called off, the spirit of the squad took a heavy drop. UCLA still has a strong nucleus left, a bunch that will be keen to wipe out that Rose Bowl showing.

"Stanford will be improved. So will California and Southern California. I don't know so much about the Northwest."

I have a feeling that the pressure will be lightened, this next fall, in the way of salaries and recruiting. This doesn't mean perfection. It means that the effort, on the side of amateur play, will begin showing early effects. The game was undoubtedly getting out of hand.

* * *

Tiger Pitching Best

The Tigers may miss lank Hank Greenberg's busy bat, but they still expect to beat out the Yankees for second place. They also expect to crowd in much closer on the favored Red Sox, and perhaps move into the front spot.

The answer to this is pitching. The Tigers have the best pitching staff in both leagues. The one team that might argue this point is the Cardinals.

Monks in Tibet

There are so many monks in Tibet principally because it is so hard to make a living and raise a family there. Monks make up one-fifth of the population of Tibet. Every year thousands of young men enter monasteries instead of marrying, for it often takes as many as six husbands to make enough money to support one wife, and most women have at least three husbands at one time.

A wife may dismiss a husband whenever she feels like it, and this brands him as a social outcast.

Gas on Stomach

Relieved in 5 minutes or double your money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

HOUSEHOLD HINTS

Obtain a piece of window pane the size of your cookbook. Bind the edges by gluing a half-inch strip of thick cloth around it. Then, when following a recipe, open your cookbook and place the glass over it. Recipe can plainly be read through the glass, and the glass also prevents the book from closing while it's being used.

—•—

Use precaution when selecting a lining for your jacket or coat. It should last as long as the garment.

—•—

Knives and other kitchen gadgets with painted handles should not be allowed to stand in water. The wood under the enamel will absorb water and cause the paint to chip off.

—•—

Cut off the buttons before throwing an old garment away. Slip a fork under the button and cut thread with scissors or razor blade.

—•—

Iron rayon jerseys lightly and don't pull the garment. Avoid having the iron too hot or the result may be disastrous.

SNAP! CRACKLE! AND POP! SAY...

Kellogg's RICE KRISPIES

P.S. Be sure you get America's favorite rice cereal, the one and only *Kellogg's* Rice Krispies!

Time on Your Hands?

Would you like to have more spare time—to spend with your children, attend meetings or for your hobbies?

Well, just try using Red Star *Active* Dry Yeast the next time you bake. You'll find that this new, different yeast reduces rising time, makes kneading easier and saves precious minutes. You'll be delighted, too, at the improved flavor, texture and crust color.

Ask your grocer for Red Star, the dry yeast that needs no refrigeration, that keeps fresh and active on your pantry shelf for weeks.

KAY ROGERS SAYS:

"Try Red Star Yeast with your old recipes and be assured of good results. If however, you'd like me to send you my new recipes, simply write me in care of Red Star Yeast & Products Co., Dept. WN-4, Milwaukee 1, Wisconsin."

QUICK RISING RED STAR DRY YEAST

BELATED SPRING WORK GETS UNDER WAY IN HANCOCK COUNTY

Sunshine and drying weather moved in Saturday and Sunday and on Monday some fields had dried off sufficiently so that farmers could prepare the soil for seeding of oats.

Spring is late this year The past three weeks have been cold and wet and no field work was done at all in this part of the state.

Farmers will be busy the next few weeks catching up on field work and the rush will carry them into corn planting time They are hoping for a continuance of good weather, plenty of sunshine and warm days.

...lections Due In '47

...l tax collections which ...in Hancock County for ... 1946, payable in 1947, ...o $872.61 This is an ...of $97,757.61 over the ...year and is made up of an increase in the Road accounts of about $48,000 00. The schools of the County all show an increase. There were very few increases in any other funds. The County Fund does not show any increase.

Tax collections have been very good during the months of January, February and March, and the total collections for the first quarter amount to $469,550 64, or about 57 percent of the total for the year due to a good number paying in full; also, most of the personal taxes are always paid in full in March.

The collections in the several Drainage Districts have been very heavy Our total collection in the Drainage District amount to $26,246 00, these are always due in the spring as the money has to be ready for disbursement when the work is done. Some districts have outstanding warrants that will be called at this time

Hancock County now has 145 Drainage Districts, many of which are active at this time, several new ones having been formed during the past year and on which work will be done this spring

We have just finished the apportionment of the money for the past three months and find that the following checks for the different departments have been sent out

To the schools of the county, checks for $305,431 73.

To the Corporations, $34,359 00

The schools of the county receive about 64 percent of the total tax collected.

We have a new source of revenue which is going to help in construction of roads in the towns and county This is the 1 percent gas tax that has been in effect since July of 1946 and the county has been paid to date on this tax $60,477 04 This amount has been paid in during the first three months of this year as it had been held up in the courts until this time

"Bill" Johnson have returned home from Florida, where they spent a greater part of the winter at Tampa where they lived in a house trailer which they purchased They enjoyed it very much while there and were in the same trailer court with Mr and Mrs. Ted Dutheridge, their neighbors in this community

WINTER NOT OVER; SOME SNOW HERE TUESDAY

Fine weather revailed here over the week end, but turned cold and wet Tuesday with a little snow The sun was out again today, but a lot of warm weather is needed by the farmers to catch up on work

AT LAST
Help For The Hard Of Hearing

Officers of the ROCHESTER HEARING AID CO., one of the largest distributors of hearing devices, announce the introduction of the most amazing discovery in a way to hear ever developed

At long last THE NEW INVISIBLE TYPE can be almost completely concealed

Never before such clear undistorted sound no noisy scratchy head splitting static, nothing but what you want to listen to.

Whether you now own an old hearing aid a comparatively new one, or none at all, you owe it to yourself to know about this great new development

In any case write at once for the surprising facts and how to obtain a demonstration in your own home with out riskig one cent

Jolly Workers Club Meets

The Jolly Workers club met at the home of Lois Schlichting on Wednesday, April 9th. Sixteen members were present and answered the roll call by giving thier favorite magazine Our vice-pesident, Bessie Marshall, took charge of the meeting. White elephant gifts were exchanged by the members Songs were sung and Happy Birthday was sung for Lois Schlichting Two boxes of needy clothing was packed to be sent to Holland. Luella Boelman read the minutes of the March meeting and it was decided to exchange a plant for the next roll call meeting.

Bingo was played for recreation A delicious lunch was served by Lois Schlichting and Verbelle Gilpin as co-hostess.

The May meeting will be at the home of Anna Ausborn with Luella Boelman as co-hostess.

Now is a good time to put fresh gear lubricants in the transmission or final drive of farm tractors.

Custom Spray Operators

trained and qualified in the control of

Insects and Weeds

IN THIS TERRITORY

Dean Thornbury, Britt
Paul Houston, Corwith
Aaron Wille, Klemme
Robert Hartzell, Klemme
Bernard Bachman, Belmond
Roy Hanson, Kanawha
Ivan Anderson, Wesley
Luverne Smith, Woden

Your Mullins Custom Spray Operator has been thoroughly trained in the use of insecticides and weed-killing chemicals. Training has also been given him in the use of the equipment needed to apply these chemicals properly to assure you of a complete and inexpensive method of killing flies, insects and weeds at home or on the farm. He is ready to cooperate with you and your community to make your community fly-free through the use of modern spraying techniques.

A fly and weed free area is a more profitable and more healthful place to live and work.

FLAX GROWERS ATTENTION!

Weeds in your flax fields can now be controlled. Take advantage of the high flax price by planning your weed control program now. Grow flax the profitable way by controlling the profit-stealing weeds. Your Mullins Custom Spray Operator will gladly work out arrangements for you.

AND AGAIN IT'S . . .

Clean-Up Time

IN YOUR HOME AND AROUND YOUR PREMISES!

We have a good stock of the following "Clean up" items for your home and yard . . .

Cleaning Brushes of all kinds

New Foreign Policy Foreshadowed

Marked Historical Import Attached to Aid Program

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON.—One of the hardest things to recognize is history in the making. We often live through moments of catastrophic and cataclysmic significance, yet while the vital seconds are ticking off, our only immediate impression is the limited effect on ourselves or on our close surroundings.

We have all lived through a period which has been filled with some highly significant events, beginning — say — with the outbreak of World War I We celebrated the Armistice on November 11, 1918; we watched the progress of the peace conference, and then came the train of international events which culminated in V-E and V-J Days and the founding of the United Nations.

Baukhage

All this was background for another event which took place as the ides of March, 1947, approached. I refer to the enunciation of a new American foreign policy — which may prove to have far greater historical significance than any of the other happenings I mentioned.

As one observer put it: "If the President's message (urging aid for Greece and Turkey) is implemented to the full of its implications, it may be another Monroe Doctrine foreshadowing a pax Americana with a hundred years peace—such as the pax Britannica provided—or, it may be a declaration of World War III."

Either eventuality would make it the most important event in modern history. If it should establish a hundred years of peace, it could easily foreshadow permanent peace. If, on the other hand, it signalled another World War, it would mean the twilight, if not the sunset, of civilization.

President Truman and his advisors felt the policy must be enunciated. And far-seeing people realized that America must shoulder the major responsibilities that Britain had carried so long as the most powerful of the English-speaking family of nations, and which she no longer is able to carry.

True, we have started to create an organization—the United Nations—which is supposed to make it impossible for any single nation or group of nations to disturb the peace. But to carry out its job, the United Nations must have an international police force Until the United Nations has the force to back up the will of the majority, that single nation which can muster such power will decide the course of the world.

We have that power. Potentially, so has Russia.

The proposed American foreign policy has behind it only one idea. That is to keep the power for peace in the hands of what we call democracy.

There has been doubt expressed by some as to whether the program outlined by the administration would serve this objective. The majority of leaders in both parties however seem to be convinced that there is no better method presently at hand; that if we are to maintain our democratic way of life until the United Nations has become an effective organization, we have no other course to pursue. If we take no action, we simply turn the world over to Russia. That would mean war eventually. Implementing the Truman policy may avoid it.

I heartily believe in the United Nations, and I feel positive that if a major conflict can be put off long enough, the United Nations eventually can be made strong enough to outlaw aggressive warfare effectively.

Pledging our wealth and sinew to protect Communist-threatened countries seems our only hope.

Saving of Primitive Area Urged

Now facing Uncle Sam's Chief Forester Lyle F. Watts is a question almost as hotly disputed as German reparations at the Moscow conference As guardian of the nation's great national forest wilderness areas, he has to give a yes or no answer fairly soon.

Watts' headache concerns the San Gorgonio primitive area in Southern California's San Bernardino National forest—one of America's few remaining remnants of honest-to-goodness wilderness which conservationists hope to preserve for future generations.

For several years, the skiers who like to ride up-hill so they can get the most out of their down-hill sport have fixed their sun goggles on the fine snow slopes deep within this primitive area Not all skiers, mind you—some like San Gorgonio as is—the deep, cool woods, a large green meadow, Dollar and Dry lakes, icy streams, a challenging vista of Mt. San Gorgonio and the lofty summit of the peak itself—and they like to ski there. But others prefer a touch of civilization—ski-tows, a highway into the place, a hotel-resort near by. So the California Ski association, with help from the National Ski association and the California State Chamber of Commerce, sponsored a proposal to build the highway and accommodations for a big ski resort. It looked as if San Gorgonio would be about as primitive as television and cooking with electronics.

But the Forest Service was keeping an open mind. After all, it might be better to devote San Gorgonio to more primitive skiing So last December the service announced a 90-day intention of changing the area's classification as "primitive." This cleared the way for going ahead with the skiing developments. The Forest Service principle is "the greatest good for the greatest number in the long run," and most of those who knew about the issue concluded that, based on such a thesis, this bit of the primitive was gone with the mustache cup and the Model T.

The service called a public hearing in San Bernardino which turned, somewhat to their surprise, into what Variety calls a "boff" performance. So many people showed up that the civic auditorium had to be engaged for two days instead of one — and as in congress, the sessions lapped over until evening. Supporting the skiers' proposal were the California State Chamber of Commerce, the California Ski association and 18 ski clubs. That was about as expected.

It was the determined opposition that raised eyebrows. The opposition included the skiers who like their sport in the raw, along with church group representatives with summer camps at the edge of the primitive area; spokesmen for water companies who wanted the area kept in wilderness so as to conserve its watershed values for orange growers down the valley. In between were the hikers, the sportsmen, women's clubs, nature lovers, natural science groups (the area has six forms of plant life that grow nowhere else) and civic clubs.

Then there were the letters pouring in from all parts of the country—so many that the Forest Service both in its California office and in Washington had to resort to the mimeograph machines to answer them. The letters voted overwhelmingly against civilizing the area via ski-tows and hotels. Now it's up to Watts.

"We think now that the primitive area will surely be preserved," says Howard Zahniser, editor of the magazine, "The Living Wilderness," "and with a victory in this issue we shall certainly be all the better able to muster support for the Forest Service in guarding other threatened areas in our national wilderness system. But we have no quarrel with skiing. We want to see it develop further. We hope that San Gorgonio will become even more attractive for wilderness skiing than it is."

There was never a good war nor a bad peace, said Franklin, but unfortunately it's not a case of the worse the war, the better the peace.

AGED STUDENT . . . The old saying that one is "never too old to learn" is an actuality for James George Nicklen, 79, former plumber and seaman, who is now a student at San Francisco junior college. Bespectacled and gray-bearded, Nicklen attends classes in anatomy and chemistry, although he is from 55 to 60 years the senior of the majority of his classmates, three of whom are shown here with him.

NEWS REVIEW

New Atom Board Urged; Red Menace Spotlighted

REDS:

Threat to America

More so perhaps than before, eternal vigilance is the price of freedom, FBI Director J. Edgar Hoover warned the nation in describing the Communist threat to the American form of government.

Addressing the house un-American activities committee, Hoover declared that the Reds in this country constitute a small but closely knit group seeking to overthrow our democracy and substitute an iron-clad dictatorship denying the principles of religious worship, political freedom and economic opportunity. He pointed out that only 25,000 Reds worked the Russian revolution in 1917 and there is a larger proportion of Communists at present in the U. S.

Hoover called for relentless prosecution of the Reds found violating the laws of this country. Putting Americans on their guard, he said the Reds were unceasing in their efforts to subvert labor unions; spread Communist doctrines in the schools, and prey upon foreign language groups.

Besides infiltrating established radio channels, they also are trying to set up outlets of their own Under direction of party leaders, they are prolific letter writers and expert at organizing pressure campaigns for some cause favorable to leftism.

Since 1935, they have been especially active in the movie industry, Hoover said. In addition to trying to take over Hollywood unions, they have sought to get a foothold in the writing and productive ends of the business.

ATOM CONTROL:

New Plan

As congressional conservatives continued their fight against appointment of David E. Lilienthal as chairman of the national atomic energy commission bills were introduced for the creation of a new board to be headed by Secretary of State Marshall.

Under the plan introduced in the senate by Senator Malone (Rep., Nev.) and five colleagues and in the house by Representative Jenkins (Rep., O.), other members of the new board would include the secretaries of war and navy and two persons named by President Truman.

Conservatives seized upon the critical international situation to attempt to sidetrack Lilienthal, former TVA chairman who has been accused of countenancing the presence of Communists in the power agency In proposing establishment of the new board to govern all phases of domestic atomic production, Republicans, joined by southern Democrats, declared that the Greek-Turkish crisis indicated the need for close political and military control over nuclear energy for national security.

MOSCOW:

Future Reich

At odds on most phases of post-war politics, the U. S. and Russia came to grips again in Moscow on the future pattern of the German government.

Boiled down, the differences amounted to U S. proposals for a system of strong state governments working through an adequate central authority and Russian recommendations for a strong central government with the states subordinate.

The U. S. proposals advanced by Secretary of State Marshall are designed to give the German people a closer check on their government through the state level and diminish the possibility of a strong central authority like the Nazi regime assuming full, controlling power. In this respect, the U S plans embodied American principles of states rights and state representation in congress through the senate.

'GRANDMA SARGE' . . . Probably the only grandmother in the U. S. women's army corps in Japan, Mrs. Minnie Barber, who holds the rank of sergeant, has eight grandchildren, a son and two daughters. Sgt. Barber is a mess checker at the Mitsubishi main building in Tokyo.

OPTIMISM PREVAILS

Large Crop Acreage Predicted

WASHINGTON.—Optimistic over soil conditions and improvements in the farm labor and machinery situation, farmers are planning the largest acreage of crops this year since the wartime peak in 1944, the crop reporting board of the department of agriculture reports.

If favorable weather prevails during the growing season, recent record production of many important crops is expected to be broken this year.

Although slight decreases are expected in acreages of wheat, corn and potatoes, higher acreages are indicated for soybeans, sugar beets, beans, peas and other crops, the crop reporting board says.

The aggregate acreage of crops now planned would exceed the acreage of last year by 2,300,000 acres and that of 1945 by nearly 1,000,000 acres. It would, however, be 7,400,000 acres below the wartime peak in 1944.

The country's corn crop will be grown on 2,400,000 fewer acres than last year, according to growers' March 1 plans. The total of 87,599,000 acres farmers intend to plant to corn this year is down 5,300,000 acres from the 1936-45 average. Except for 1941, it is indicated to be the smallest since 1894 when the nation's corn acreage still was expanding.

A record-breaking wheat crop may be in the making, it was indicated. Although the acreage planted to spring wheat is expected to be slightly less than last year, this will be offset by a near record acreage of winter wheat sown last fall.

Shifts in wheat acreage in important states almost balance to indicate prospective plantings of a slightly smaller acreage of all spring wheat.

The greatest decreases in oats are shown in the Northern Plains states, Minnesota and Texas, with smaller decreases in Michigan, Ohio and New York.

In the North Central states, the main barley producing area, the acreage is expected to increase 3 per cent. Wheat has tended to replace barley in the Southwest and the southern part of the Corn belt.

Sharp flaxseed acreage increases are indicated for all the important producing states. In the North Central area, where 85 per cent of the 1946 crop was produced, farmers intend to plant 71 per cent more flax than last year.

Acreage increases in soybeans are expected in all important producing areas. Largest increases are reported in states and local areas where soybeans are grown mainly to be harvested for beans.

THE WASHINGTON SCENE

Special Committees Circumvent Intent of Reorganization Act

(Editor's Note: This is the seventh in a series of articles dealing with new congressional committees and their chairmen.)

By WALTER A. SHEAD
WNU Washington Correspondent.

WASHINGTON.—Although the merits of the reorganization act, designed to improve congressional efficiency, are being tested for the first time in the 80th congress, various loopholes already have been discovered to circumvent the intent of the measure.

One of the most obvious of these is in regard to special committees. Intent of the act was to prohibit all special committees except by a two-thirds vote in an emergency. The act specifically gives the standing committees appropriations and personnel with which to conduct special investigations.

Despite this fact, resolutions have been introduced in this congress to create a dozen odd special committees and to retain others which were operative during the preceding congress.

In addition, there have arisen several heated rows regarding jurisdiction over some controversial legislation. Withall, however, standing committees have assumed greater importance under the terms of the reorganization act.

The list of standing committees in the house together with their chairmen follows:

Public Lands

RICHARD J. WELCH (CALIF.) heads the public lands committee, which replaces the former committees on public lands, territories, irrigation and reclamation, mines and mining, insular affairs and Indian affairs. Through his continuous service in the house since 1926, Welch had become ranking Republican on the committees on labor, merchant marine and fisheries, and insular affairs. His choice of the public lands chairmanship probably was dictated by western interest in this field, since he is the only Republican with much seniority west of Kansas.

Welch

Nominally a Republican, Welch is a political independent, who voted with the majority of his party on only 11 per cent of the controversial roll calls in 1946. He has had both Republican and Democratic nominations for some years. Many of Welch's few floor speeches have been on subjects in the fields of labor and merchant marine, but he also has spoken on public land policies.

Welch, who is about 70, has long been a political figure in California He was a state senator from 1901 to 1913 and a member of legislative bodies of the city and county of San Francisco from 1921 until he was elected to fill an unexpired term in congress in 1926. He has been returned each succeeding election by large majorities.

The 5th California district which Welch represents is entirely within the city of San Francisco. It is chiefly residential, with a sprinkling of light industry. Both CIO and AFL are well represented in the population and both back Welch, who was one of the few Republicans to have PAC support in the last two elections.

Un-American Activities

J. PARNELL THOMAS (N J), who heads the un-American activities committee, has been active in its work since the days of its predecessor group headed by Martin Dies He has assailed a number of organizations, including government agencies, for alleged Communist domination. He has declared that, although the committee under his leadership will concentrate on Communist activities (particularly in Washington and Hollywood), it will spare no individual or organization that seeks to destroy the American form of government, specifically mentioning the Columbians, Inc., of Georgia.

Thomas

Thomas voted with the majority of his party on 96 per cent of controversial roll calls in 1946 He was vigorously opposed to the McMahon atomic energy bill. His opposition was based in part, he said, on the "totalitarian" nature of the proposed atomic energy commission and partly to the alleged Communist tendencies among scientists on the Manhattan district project which produced the atomic bomb.

Thomas, who is 51, was born in Jersey City and is now a resident of nearby Allendale After attending University of Pennsylvania, he served with the AEF in France Later he became a bond salesman and now is a partner in a firm of insurance brokers. He was mayor of Allendale from 1926 to 1930 and member of the New Jersey house of assembly from 1935 until his election to congress in 1937.

The 7th New Jersey district has three counties which are primarily agricultural. There is a large foreign-born population, principally Irish and Polish. In Hackensack and other industrialized parts of the district are located large textile mills, apparel manufacturing, and some iron and steel plants.

Ways and Means

HAROLD KNUTSON (MINN.), chairman of the powerful ways and means committee, which handles tax bills, has been in the house longer than any other Republican. Elected from the 6th Minnesota district in 1916, he has been returned at every subsequent election.

Knutson long has been convinced that the government costs too much and began early in the 79th congress to predict lower taxes if the Republicans gained control. Knutson voted with the majority of his party on 19 out of every 20 controversial roll calls in 1946. He was strongly anti-OPA. Himself a union member, he voted for the Case bill and for overriding the veto of this measure.

Knutson

Knutson, 66 years old, lives in Manhattan Beach, Minn. He learned the printer's trade as a boy and became editor of the Wadena (Minn.) Pioneer Journal, which he now owns. Head of the Republican party organization in Minnesota, he is beginning his 16th term in the house.

The 6th Minnesota district consists of 16 rural counties northwest of Minneapolis and extending up to the edge of the iron range. The area is completely rural-agricultural, with only one city, Brainerd, over 10,000 population in 1940. There is a thriving and well-organized dairy industry Organized labor has no strength.

Because of the tax angle, the ways and means committee has jurisdiction over tariffs and social security. It also handles matters relating to the public debt, the deposit of public money and revenue measures relating to insular possessions.

Rules

LEO E. ALLEN (ILL.), new chairman of the rules committee, becomes by virtue of that job one of the most important men in congress. With rare exceptions, no legislation can be considered on the floor of the house without prior approval of the rules committee, which also dictates the conditions under which it is to be debated and the type of amendments to be allowed.

Allen is a regular Republican who constantly votes with his party. He is 48 years old. He was graduated from University of Michigan in 1923, taught school for a few years and then served as a court clerk. He began the practice of law in 1930 and is now a member of the law firm of Allen and Heer in Galena, Ill. Allen was elected to congress in 1932 despite the Democratic landslide of that year, and has been consistently re-elected ever since.

Allen

The 13th district of Illinois, which Allen represents, is made up of six counties in the northwestern corner of the state and had a population of only 186,433 in 1940. It is predominantly rural and agricultural, a typical midwestern Republican stronghold. There is a small iron and steel industry, but organized labor has little strength. In the last election, Allen carried every county in the district and had a plurality of 34,471 out of 62,000 votes cast. Appointed a member of the house campaign expenditures investigating committee last year, Allen resigned before the election in protest against what he called the committee's "do nothing" attitude.

Veteran Protests but Pay Continues

NEW YORK.—For a year, John G. Scott, war veteran, has been trying to get the government to stop sending him disability checks, but he has succeeded only in getting the amount raised from $35 to $42.

When Scott was discharged from the army, he signed a statement ostensibly to the effect that he had been a patient in an army hospital. A short time later the unwanted checks started coming in as monthly payment for a disability of the right eye, a condition Scott said he had before entering service.

Scott, who says he doesn't need the checks and that his eye does not interfere with his work, wrote Veterans' administration that he didn't want the payment. His only acknowledgment was to get the amount raised from $35 to $42. The checks are still uncashed but VA has refused to take them back.

WORLD OF ICE . . . While the thin-hulled vessels of the central group of the Byrd expedition e Antarctic wait in an open water area, the coast guard's Northwind returns to them after scouting gh the pack ice in quest of a "lead."

ST PHOTOGRAPHS OF YEAR . . . Winners in the fourth annual Encyclopaedia Britannica Book of the r news photography contest have just been announced. Some of the winning photographs are shown re. One of the winners in the feature and pictorial photographs category was by Howard Shirkey, Inter-tional News Photos, showing little boy inquiring for his lost pet. Harry Hall, Associated Press photogra-r, won an award in sports category for photo of 1946 World Series action, when Red Schoendienst collided h Johnny Pesky. William J. Smith, Associated Press, was a winner in news contest with his picture, lent John Lewis."

EEDS FOR ROMANIAN CHILDREN . . . Jean Gay and John Garcia, etroit, Mich., members of the American Junior Red Cross, lend a and with packing $22,575 worth of seed being sent to Romania where ildren will plant and tend school gardens designed to help alleviate e food shortage in that country. The Junior Red Cross in the United ates had previously sent to Romania 2,450 bars of soap and 3,234 made garments, a project of home economics classes throughout the untry.

BEST DRESSED . . . Mrs. George C. Marshall, wife of the secretary of state, who was judged by the New York Fashion academy as the "best dressed woman of the year in public life." She is shown wearing a native Chinese costume.

RANKLIN INSTITUTE MEDAL WINNERS . . . Karl P. Billner, left, Philadelphia, who has just been announced as winner of the Frank P. Brown medal by Franklin institute in consideration of his invention of a practical process for treating concrete and development of equip-ment, Edgar H. Dix Jr., New Kensington, Pa., right, was awarded the Francis J. Clamer medal in consideration of his meritorious con-tribution to development of high strength corrosion-resistant aluminum.

TOPSY-TURVY . . . Baseball does not seem to be topsy-turvy enough for Jackie Price, when it is played according to the rules. Here he it hanging from his heels and banging away at a few pitches at Tucson, Ariz.

SERMON IN PICTURE . . . Dramatically portraying the theme of National Sunday School Week, this illustration will be the focal point of window displays and exhibits throughout the country during the week of April 14-20.

CALL TO CHURCH

Sunday School Week Stresses Value to Youth

Marking the annual observance of National Sunday School Week, parents of the country's 30 million children of all races and creeds between the ages of 6 and 16, will give their offspring a last-minute grooming and send them off to neighborhood churches during the week of April 14 to 20.

Sponsored by the Laymen's National committee of New York, a non-sectarian, non-profit patriotic and religious organization, National Sunday School Week was established three years ago to stimulate church school attendance and to utilize religious training as a basic method of combatting juvenile delinquency.

As in past years, National Sunday School Week has been proclaimed by mayors throughout the nation as well as by the governors of the 48 states. Civic, educational and fraternal organizations with national memberships have signified their support of the week-long religious training period.

To permit hospitalized children and those invalided at home to join in the observance, the Laymen's National committee has arranged with radio networks to conduct special religious programs during the week.

Further amplifying the endeavors of National Sunday School Week, Rear Adm. Reginald R. Belknap (USN, Ret.), World War I naval hero and chairman of the Laymen's National committee, declared, "Constant religious training that is begun early in the life of every child will be instrumental in thwarting juvenile delinquency. A broad concept of God and the teachings of the Bible will aid our youths in readily distinguishing between right and wrong. Early religious training is the responsibility of every parent.

"It is time," Admiral Belknap said, "to popularize the fact that a boy or girl who regularly attends Sunday School and who is obedient to his parents and teachers is not a 'sissy,' but a real American."

Army Check Places Sergeant in Dither

PITTSBURGH, PA. — For two cents, Edward Wilson, former army sergeant, won't cash a check

Wilson received $475 in bonds and a check for two cents from the government as his terminal leave pay. Army officials explained the two-cent check was the only means of satisfying the law, which requires that as much as possible must be sent in bonds, the balance by check.

If Wilson cashes the check in a bank, he must pay 10 cents. Wilson balked at returning the check because it would involve a three-cent stamp.

Modern Jesse James Pays Taxes in Nickels

ROCKHOLD, KY. — A Whiteley county citizen has two claims to distinction—his name, Jesse James, and the fact that he pays his taxes with nickels. For more than 13 years, James has paid his taxes with nickels taken in for candy and soft drinks at his service station. Again this year he counted out 457 five-cent pieces, took a receipt and went home to start saving more nickels.

"Off We Go" AVIATION NOTES

AIRPORT CONSTRUCTION

Airport construction in the fisca year beginning July 1 will require an outlay of 85 million dollars, accord ing to an estimate of Civil Aeronau tics administration.

The funds, to be provided by congress, would be made available to local sponsors on a matching basis under terms of the federal airport act. No recommendation for federal airport aid was included in the budget for the 1948 fiscal year submitted to congress by President Truman since the CAA had not completed its survey of airport needs in time.

The CAA survey recommends con struction of 4,431 airports in the nex three years, although, because o cost, administration officials stated that program probably will require considerably more time for completion. The federal airport act approved last year limits federal funds to be provided in any one year to 100 million dollars It authorizes a total expenditure of 500 million dollars over a seven-year period.

Grants approved for the current fiscal year, ending July 1, 1947, total 45 million dollars, with construction scheduled to begin this spring. These grants include only the three smallest classes of airports.

• • •

NO MALNUTRITION

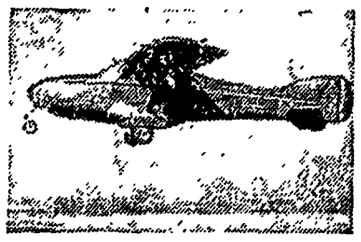
If the Brooklyn Dodgers weaken in this year's National league pennant race, it won't be from malnutrition. The Durochermen, while limbering up in sunny Havana, had juicy American steaks flown to them by Pan American Airways Clippers. The top sirloins, obtained from a Miami meat dealer at $1.50 a throw, were imported because of Cuba's dearth of prime beef.

• • •

STRAW HANGAR

Not even a shortage of building material could prevent H. H. Forney and Son, ranchers near Lakeside, Neb., from building a hangar for their light airplane. Unable to procure materials, they resorted to baled straw for the side walls of the hangar, coating them with cement and covering the structure with metal roofing.

• • •



ANNIVERSARY MODEL . . . Test flights have been completed on Waco Aircraft company's Aristo-Craft, which marks the 25th anniversary of the building of the company's first plane. The four-place plane is designed to meet demand for a fast and roomy plane for business and pleasure.

• • •

'FRIENDLIEST GREMLIN'

A revolutionary new aircraft instrument which precludes the possibility of a pilot stalling his airplane inadvertently has been developed by CAA. The device, which shines a red light and blows a horn when a stall is imminent, has been termed the "pilot's friendliest Gremlin" by experienced flyers who have operated planes equipped with it. The warning device, which is mounted on the instrument panel, is actuated by a small tab of metal or "vane" protruding through the leading edge.

News Behind the News

By Paul Mallon

Released by Western Newspaper Union.

PEOPLE'S INTEREST TURNS TO RELIGION, PHILOSOPHY

WASHINGTON.—Three or four of us were sitting around chewing the fat, and an ex-marine said right to my face he wondered if people were really interested in reading columns any more. He said the old Washington chit-chat about who was fighting whom, or prophesying dire things which never happen—well that sort of stuff did not seem to be wanted by so many people in these perilous times. I failed to blush, but put on my best puzzled expression. He went on to say he had dropped past a bookshop, and had found the window filled with literature about mental health and happiness, and how to get along in the kind of world we live in—get along pleasantly as we can by our inspirations and thoughts, religions, ideals. Philosophy was what the people wanted, he said, good, simple every day reasoning on the plain philosophy of life. They all looked at me.

My philosophy is to keep quiet about such matters and profit in my own thoughts by what others say, but they were in earnest and troubled about questions such as whether there will be another war, whether the unions have captured the Republicans, or vice versa, and where is it all going anyway, so I suggested we get together to see if we could agree on a recipe for the troubled ex-serviceman. We started with questions and answers.

HOW ABOUT WAR?

Q.—Will there be another war?

A.—Wars arise from the desires of men Within each man normally there is a desire to get ahead, to excel and conquer. Now man has not been able to civilize these desires within himself to an extent where he can live in peace at home. How can he do on an international scale what he cannot do on a national, state or local scale? We agreed wars always have arisen, the last few from weak nations but many from strong nations, and it would be impossible to prevent wars by simply making strong nations weak or weak nations strong. We agreed that, yes, there always will be wars.

Q.—Is education essential to happiness for man?

A.—The questioner was nearly shouted down. Of course not. The happiest people most frequently are the least educated people. One fellow said he never had seen a discontented cow. But we also agreed that education enables man to attain higher appreciations of life, to enjoy more things.

Q.—What is the best religion?

A.—This stumped us for a while. We finally agreed that it was whatever religion you believed in. If you were born in it, you would very likely seek in its realm for your inspirations and spiritual solace. But one of our group held out against a unanimous decision without reservations (in a way like the Supreme court, which writes three concururing opinions). He said he believed in the religion of nature.

GOD AND THE UNIVERSE

Q.—What in the world is the religion of nature?

A.—The theory of God as manifested through Christ and the scriptures, but not necessarily by any particular church. It is the theory that God created the universe in which there exists the spirits of both good and evil. Nature itself is a struggle for survival, a struggle for existence in a well balanced conflict. It is a test, you might say. Its elements are both good and evil. In man himself there are both good and evil inclinations. Thus nowhere in this world is there perfection, only a conflict of these simplest forces in which every man must be tested.

Q.—But is this a religion or simply an observable philosophy?

A.—It is the foundation of all religion, except anti-religions like atheism which teaches that man is god. Therefore all religions are philosophically good and teach a sound philosophy of life urging man to improve himself. We all agreed man must believe in something or he will lack inspiration totally. If he believes man himself is god, or in a religion of self alone, he will lack any greater inspiration than himself that would only answer the yearnings of ego, which is a dangerous thing, whereas religion answers the yearning of man for a greater inspiration.

RUSSIA HAS COLLECTED

The American news dispatches from the Moscow conference said our delegation was "embarrassed" and "the Americans shifted uneasily in their seats" when Molotov pulled from the secret files of the past, the Yalta agreement, promising Russia half of 20 billion dollars reparations from Germany. There was no valid reason for any reasonable person to be embarrassed. The truth is Russia probably has taken more than her allotted half already.

Beauty and Health By Simple Exercise

Sagging Bust

WHAT type of exercise is helpful in slimming the waist and midriff? The main thing is to get those lazy muscles working again, so concentrate on brisk stretching or twisting exercises.

• • •

Whatever your figure problem, our Reader Service Booklet No. 90 can help you. Exercises for slimming hips, waist, bust, legs, neck, back. Send 25 cents (coin) for "Beauty and Health Through Simple Exercises" to Weekly Newspaper Service, 243 W. 17th St., New York 11, N. Y. Print name, address, booklet title and No. 90.

JUST KIDDING

Still a Bargain

"What do you think of the high cost of living?"

"It's worth it."

A modest woman powders her face because she has no desire to shine in public.

Forgery, Begorry!

Casey and Murphy were asked to witness the signing of a will. Casey duly signed, but, being unable to write, put an X.

"Begorra, Casey," Murphy exclaimed, seeing this, "you've gone and signed my name!"

Out of Sight

"I know I'm not really much to look at," admitted the fiance.

"Oh, well," philosophized his bride-to-be, "you'll be at the office most of the time."

Pull the Trigger on Lazy "Innards"

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards" and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

From where I sit ... *by* Joe Marsh

A Great Bunch –Those Ex-G.I.'s

Willie Wells and a bunch of the boys from our town went to Pound Ridge Saturday to a reunion of their old regiment.

There were about two hundred and fifty boys who came from miles around to a good old feast in Farmer Collins' barn. I expect they seemed a lot different to each other out of uniform. But they had a great time, spinning yarns, drinking beer, and talking over the old times in South Africa and Italy and the Aleutians.

I went over to cover the meeting for the *Clarion*, and one thing that sure impressed me was the good behavior of those boys—their preference for a moderate beverage like beer—their friendly spirit.

From where I sit, our ex-G.I.'s are making as good a showing in peacetime as they made during the war. And they're setting a mighty good example to the rest of us—in tolerance, and moderation, and good fellowship.

Joe Marsh

FERTILIZER IN HILL MOST ECONOMICAL

Gives Larger Corn Increase Than To Broadcast And Plow It Under

The farmer who wants to get the greatest return from the commercial fertilizer he ues on his corn will put it on with a planter attachment. This is pointed out by Iowa State College agronomists. They say that small amounts applied with the planter attachment will give larger yields than when applied by other methods.

If planter attachment isn't available, the fertilizer can be broadcast. But twice as much will be needed to be applied

Deep as Corn

Whatever method is used, it's important to get the fertilizer worked in to the same depth as the corn is planted. If the fertilizer is broadcast, disking the soil thoroughly will help put the material down where the plant roots grow.

Fertilizer attachments manufactured within the last 10 years are recommended over older equipment. Some of the earlier attachments put the fertilizer in the hill rather than in bands beside the seed Injury to plants often resulted

With Cultivators

In general, the agronomists don't recommend plowing under fertilizer because larger quantities are needed to get the same results. Applying the fertilizer with a cultivator attachment also is generally inefficient, but it is a good way to apply nitrogen and to put potash on high lime soils.

Detailed information on grades of fertilizer and rates of application is available at the county extension director's office.

Ell Township Farm Bureau Discuss Fly Control

The Ell Township Farm Bureau group discussed fly and weed control at their regular montnly meeting held Thursday night. April 17 at School No 6 Miss Marjorie Hartbeck and her pupils presented a very good program Aaron Wille discussed his spray service program and how it fits into the state wide Fly Control Campaign Moving pictures were shown by Paul Henderson, County Extension Director. The film was furnished by the Ed Jacobs Hardware of Klemme and was produced by the makers of Pestroy and Weednomore Mr Scull, representative of Lowe Bros. Co. made some comments on the film and the Fly Control campaign Charles Jackson, County Organization Director, invited the group to the Victory Meetng and gave the group some facts on the Farm Bureau Insurance.

Farm Bureau Victory Party At Britt Friday Nite, April 25

The annual Farm Bureau Victory Party for Farm Bureau members and their families will be staged at the Britt High School Auditorium Friday nite, 8:00 p m., April 25th. T. C. Peterson, former Hancock County agent, will be the speaker. Happy Johnny and the Higgins boys, KXEL radio entertainers will keep everyone in a jovial mood all evening They feautre: Kip Hoover, ace accordionist, acclaimed by many to be the best in the east and midwest. 1947 FARM PLAN MUST BE SIGNED BEFORE MAY 1ST

Alfred V Josten, Chairman of the Hancock County AAA, wishes to call to the attention of the farmers and landlords that on April 30th, only a few days away, is the closing date for signing 1947 Farm Plans

"No matter how much soil conserving you do, you will not get credit if you have not completed and signed your Farm Plan this spring," Mr Josten warned Failure to show an interest in this program, even though the direct payment in dollars is small, might mean the loss of all the gains agriculture has made since 1933

The health and strength of all our people depend upon the productivity of our land We must keep our fertility bank account solvent to insure prosperous farmers, well-fed consumers, and a strong America

Farmers may either call at the County office to complete their farm plans or may complete and return the copies of the plans that have been mailed to them

AVERY SUNBEAMS 4-H CLUB MEETING HELD

The Avery Sunbeams 4-H Club met at the home of Doris Gruis April 12. Six members were present Plans were made for a tea party for the girls' mothers. Spring cleaning was discussed by Doris Gruis. The discussion topic was "Fabrics" and "Cleaning Fabrics." The club contrbuted $5 00 to the Red Cross.

MR. AND MRS. EUGENCE KLUCKHOHN ENTERTAIN AT PARTY

Mr. and Mrs. Eugene Kluckhohn entertained a group of young people at a party at their home south of town Sunday evening.

Court Whist was played with high scores being won by Mrs. Ray Jorgenson, Jr and "Bud" Neuberger. Low scores were won by Mrs. "Bud" Neuberger and Cecil Katter.

Mr. and Mrs. Kluckhohn served a nice lunch after the games.

MRS. PATTERSON HOSTESS TO SATURDAY CLUB

Mrs. Wesley Patterson was hostess to the Saturday club at her home Saturday eafternoon. Contract bridge was played and Mrs. Orville Bridges won high score, with Mrs. Sumner Trumbell winning second high.

Mrs. A. H. Dulmes, Mrs. R. A. Jorgenson, Sr. and Mrs. A. J. Kudje were guests.

SEVEN BOY SCOUT TROOPS TO STAGE ANNUAL CIRCUS

Will Be Held At Garner On Fridey, May 9th

The seven Boy Scout troops, two Cub Packs and Explorer Scout Post of Hancock District, Boy Scouts of America will offer to the public, a big Boy Scout Circus in Garner at 7:30 p. m Friday, May 9th, 1947.

Dr Harold R. Morgan of Britt is to be in charge of ticket sales and has on his committee, Dick Hart of Woden, Henry Myhr of Crystal Lake, Ray Jorgenson, Jr. of Klemme, Kenneth Boughton of Britt, Bob Hartwig of Garner and Harry Maw of Corwith Scouts and Cubs will be the salesmen and will try to give everyone an opportunity to buy a ticket from them. Tickets will be sold at the door.

In the opening event, all the Cubs, Scouts and Senior Scouts in the district will be on the floor at one time In the next two events, the Cubs will demonstrate why they are always happy, game and fair.

Then the Scouts take over and will give practical demonstrations of life saving, first aid and signaling They will show how the outdoor activities of Scouting help them to keep physically strong, mentally awake and morally straight.

On the closing scene, troops will set up troop camps on the gym floor and will hold a Court of Honor around the council camp fire

The whole show will be preceded by a concert by one of the high school bands in the district.

LARSON BUILDS ADDITION TO HIGHWAY SERVICE STATION

Carold Larson, proprietor of the Larson Highway Service just west of Klemme, is improving his place of business by building an office on the north side of his service shop. The new addition is 14x18 and will house his office equipment and also will have a parts supply department.

Mr Larson has made several improvements to his service station since he purchased it a few years ago.

SEEK ANSWER TO CORN PRICE RISE

Supplies Large As Compared With Amounts Needed For Livestock

It's hard to explain the reason behind the recent sharp rise in corn prices, says Francis Kutish, Iowa State College farm economist.

In reviewing the situation, Kutish points out that corn supplies are abundant in relation to livestock numbers. There is an 11 percent smaller fall pig crop than a year ago. While Corn Belt farmers had 4 percent more cattle on feed on January 1 than a year ago, many of these cattle have been marketed after a relatively short feed There are not as many chickens on the farms as last year

Export, Inflation

A part of the explanation may lie in the export picture. While the export goal of 100 million bushels of corn is not large when compared to the total supply, the monthly allocations compete for cash corn on the terminal market.

Perhaps a more logical explanation, Kutish says, is that corn prices rose along with the general inflation psychology affecting wheat. The fact still remains that the man who holds corn for the long pull is gambling on a short corn crop plus a continued high level of business activity or a continued inflationary price rise.

Kansan Agrees

Kutisn is not alone in his appraisal of the corn price situation George Montgomery, outlook specialist at Kansas State College, says "Granting that farmers will hold large reserves of corn until they are assured of new crop supplies and also granting that they want to have adequate stocks of corn to expand hog production, it appears highly improbable that the current or higher level of corn prices will be maintained into the summer months"

Tore Down Barn And Builds A Modern Garage

The past week George Schoenwetter and son, Homer, have taken down the old barn at the Schoenwetter residence and with the material salvaged have built a modern two-stall garage This makes a nice improvement to the Schoenwetter property

Will Demonstrate Contouring On Farm Near Klemme

CONTOUR SCHOOL IN AVERY TWP. APRIL 29

A contour school has been scheduled for Tuesday morning, April 29th, at 9:00 on the Mrs. C A Arnold farm in Avery Twp. 2 miles south and ½ mile east of Klemme The purpose of the school is to demonstrate the laying out of contour guide lines and explain contour farming All persons attending the school will be give given an opportunity to use a hand level in laying contour guide lines.

GUIDE LINES KEY TO SUCESS WHEN CONTOUR FARMING

Hancock County farmers who are planning to put their intertilled crops on the contour for the first time this year will find that the contour guide lines the key to field operations on all contour-cultivated fields.

This is pointed out by Paul Henderson, county extension director, who says a back furrow should be thrown to each line before starting to plow the field Instructions for laying the initial lines are available both at the county extension office and the soil conservation office at Garner.

When the back furrows have been turned, sharp turns can be eliminated by plowing inside the curve.

For successful planting on the contour, Henderson makes these suggestions:

(1) Check the planting rate. The same number of kerenls should be planted per rod when drilling as when the corn is checked Drilling 1 kernel every 14 inches gives the same number as planting 3 kernels on a 42-inch check.

(2) Start planting by straddling the top guide line and planting to the top of the field.

(3) Next, plant down about two-thirds of the way from the first line. Then go to the second line and plant up until the rows meet. Point rows that develop may be planted by going around and around the unplanted area.

As planting proceeds, sharp turns may develop. These should be rounded out and fill-in rows planted, Henderson says.

KLEMME INDEPENDENTS START BASEBALL SEASON MAY 4

The Klemme Merchants, independent baseball team, will open their season of play on the local diamond on Sunday, May 4th against the Clear Leke Independents. The game will start at 2:30 p. m.

Observe Public Health Nurse Week In Iowa

EXPECT ADEQUATE FARM LABOR SUPPLY IN IOWA

Both farmers and farm workers are becoming definitely more particular about the jobs now open on Hawkeye farms, says John Fitzsimmon, head of the Farm Labor Office at Iowa State College This attitude is expected to characterize the farm labor picture throughout the year.

Farmers are looking for workers who will stay with them for a long period of time. And workers likewise are more anxious to get settled permantly in a good place than was true during the war.

Housing continues to be the big stumbling block in the farm laber situation, particularly in the case of married couples. Otherwise, Fitzsimmons believes the supply of labor will be adequate to meet the normal demand this year.

The labor office reports that 1,049 farmers requested workers during the last week of March with the average wage paid during that period set at $5.25 per day without board.

Because of the relatively long apprenticeship required and because farm wages are now unusally good, Fitzsimmons points out that this is a particularly good time for the young man who is interested to gain farm experience.

FRED KOTHENBEUTEL'S CAR DESTROYED BY FLAMES

Fred Kothenbeutel's Buick was destroyed by fire on Highway 69 about one mile south of Garner Friday evening at about 8 30 o'clock.

Mr. Kothenbeutel, who was driving north, came upon two cars also going north. One car was being pushed by another and Mr Kothenbeutel did not see the cars until he was very close and in order to miss them swerved his car off the concrete and the soft shoulders along the road caused his car to leave the highway and turn over, catching it afire Mr Kothenbeutel was only slightly injured The car was completely destroyed

Birthday Dinner

Mr. and Mrs. Mitchell Bock entertained to dinner Sunday Mr and Mrs. Wm. Bessman and Harry of near Dows; Mr. and Mrs. Arthur Meyer and Mr. and Mrs. Ivan Meyer and Eugene of Latimer, and Mr and Mrs. Ervin Meyer and Lawrence of near Alexander.

The dinner was in honor of Mrs. Ervin Meyer's birthday She is a sister of Mrs Bock.

St. Olaf College Male Viking Chorus Will Sing At Belmond

The 31 voiced St. Olaf Male Chorus, directed by Dolph Bezoir will sing at the Belmond High School auditorium, Sunday, April 27th at 3:30 P. M. There will be no admission charge, but a free-will offering will be lifted.

The chorus will also appear at Forest City April 27 at 11:00 a m and Clear Lake at 8.00 p. m

Goodell Ladies Aid Installed New Modern Stove In Kitchen

The ladies Aid of the E. U. B. Church at Goodell are very proud of the improvement they made in the church kitchen when they installed a large 12-burner, 2-oven gas range.

The new equipment was paid out of funds which they raised when they served their famous chicken dinners at the church.

Is your subscription paid in advance? Check your date, please.

HANCOCK COUNTY HAS COUNTY NURSE SERVICE

"Public Health Nursing Week" Opened April 20th

Sunday, April 20th marked the opening of Public Health Week in Hancock County and the nation. It is a time set aside to remind us we are fortunate to have in our community a service dedicated to helping all of us find the way to better health. This special "week" will also mark the 70th anniversary of public health nursing in the United States.

Originally established to give part-time nursing to the "sick-poor" in their homes, public health nursing still includes that important service. But it has also gone far beyond to wider objectives. Today public health nursing is a true community service, helping everybody regardless of income levels. The public health nurse of 1947 works just as hard to help prevent sickness as she does to cure it. She draws on new developments of medical science and every community resource to lead families out of sickness into health, the best health possible within their biological inheritance.

Since the public health nursing service was introduced into Hancock County in July 1946, 220 visits have been made to patients' homes, and patients have made 85 visits to the nurse's office. These visits have covered all the fields of health, communicable disease, tuberculosis control, maternity service, infant and preschool hygiene, school hygiene, health classes, meetings, sick calls and crippled children service.

Cold figures cannot adequately tell of the work of the nursing service. It can more adequately be measured in human terms, by the crippled boy who can now walk more normally, by the young mother who has learned to give her baby a healthy start in life, by the tubercular young man who has shown the importance of getting a medical checkup, by the elderly bedridden women to whom the visiting nurse's skilled hands bring so much comfort.

Physicians, public health nurses and other health workers can have a responsibility in building health and making Hancock not do their work alone. We all County one of the healthiest areas in the state and nation. Public Health Nursing Week is a good time to start working toward this objective. Let's make it an occasion for finding out what each one of us can do to help our health authorities and public health nurse.

NIGHT CRAWLER DAMAGE TO LAWN EASY TO STOP

A night crawler on the end of a fishhook is a mighty fine thing. On your carefully-tended front lawn he's a different matter.

Not only does he damage the lawn, but eager fishermen in search of bait are apt to come tramping through the yard, and that doesn't help things either.

When harassed householders began to write Gunderson, Iowa State College entomologist, about this matter, he had an answer.

Use lead arnsenate, he said, on the bases of one pound to every 100 square feet of surface. It can be spread dry or mixed with water.

That should keep the earthworms away, and control white grubs, too, for a period of 1 to 5 years, depending upon the soil characteristicts and the amount of rainfall.

It ought to discourage the nightcrawler hunters for a similar period.

A light application of a complete fertilizer about 2 to 3 weeks after the lead arsenate is sometimes advisable, Gunderson says.

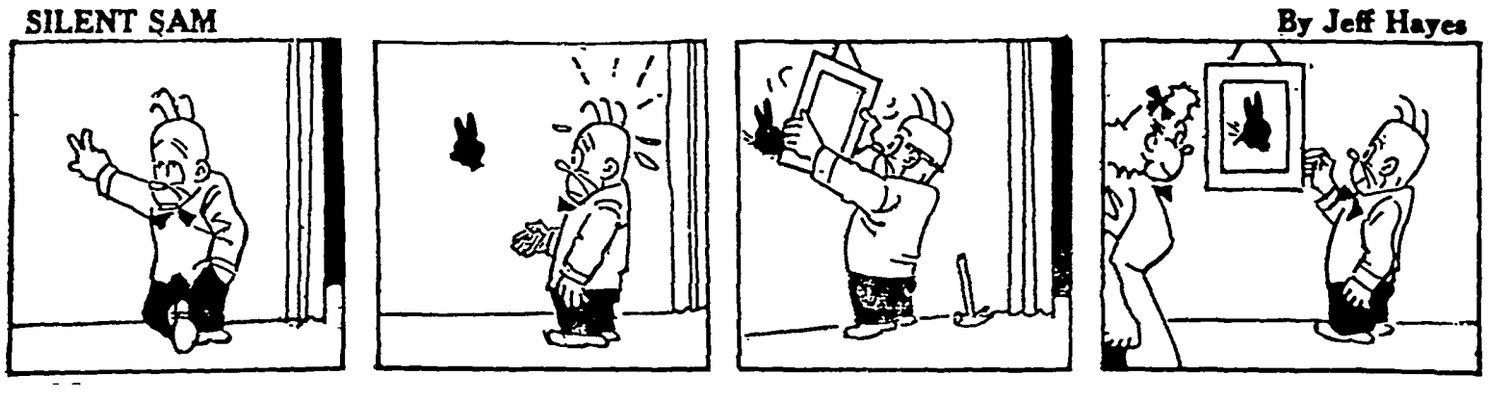
SILENT SAM

By Jeff Hayes



Sportlight

by GRANTLAND RICE

IT MAY interest you to know what various ball players, scouts and managers think about the next two pennant races. Taking a general consensus, here is the vote in both leagues

In the National league, the Dodgers are sure to be an improved team, with more experience and greater consistency in pitching Youth rides faster from midsummer on. But the Cardinals are also much stronger than they looked to be a year ago—especially with George Munger and Johnny Beazley back to help out Pollet, Breecheen, Dickson and others

M. Cooper

The Cardinals look to be the class of both leagues They have a young hustling star catcher—a great pitching staff—the best infield in baseball, with Musial, Schoendienst, Marion and Kurowski, and one of the best outfields. They have class and spirit. They are not getting any younger and there are still a few "ifs" connected with Terry Moore's knee, the arms of Kurowski and Slaughter, Marion's back and Johnny Beazley. But so far, these highly important cogs seem to be grinding smoothly.

The serious experts I've talked to pick Billy Southworth's Braves as the serious threat.

"If Mort Cooper picks up where he left off last year," one scout told me, "the Braves can challenge the Cardinals and Dodgers Cooper is a great pitcher—not merely a good one Southworth is two deep Elliot will help a lot. The Braves can be a tough club to handle any time."

Cubs for Fourth Place

The Spring vote for fourth place goes to the Cubs. After that, it is anybody's scramble, with the Phillies, Giants, Pirates and Reds in a hard drive to head the second division. But the experts are cagey enough to suggest that one of these might reach the first division.

The Cardinals are the pick. "By all odds, the best all-around team in baseball," one veteran told me. "Only savage ill luck can let them down. They are all class. The Dodgers will hustle, but they won't outhustle this Cardinal team—not on the ball field, where they win and lose games."

The Dodgers are packed with "ifs" —Branca, Barney, Head, first base, third base and Pete Reiser. The only Cardinal "if" is a few removed, and replaced, bones.

The consensus in the American league circuit leans strongly to the Red Sox.

I know the Tigers think they will beat out the Yankees. They don't think they can beat out the Red Sox —but they figure there's a chance with better pitching, which they might get. And better pitching can pick up a lot.

Yanks Need DiMaggio

The collapse of Yankee hitting last year, plus the type of spring training they have employed, won't be any big help. Both the Red Sox and Tigers will leave Florida much better conditioned teams. The injury to Joe DiMaggio has been a hard blow Joe is the Yankee spearhead. There will have to be a terrific upward lift on the part of the Yankees to beat out either Red Sox or Tigers —possibly to head off the Indians. At this moment, the Yankees are not in any too high favor as pennant people. Russo could make a big difference.

Yankee pitching can be O.K., as it was last year, but there must be a big change in Yankee hitting, Yankee spirit, and Yankee hustle. This refers to the Yankees of 1946, not the squad getting ready for 1947. But the 1947 Yankee squad must know by now how many games it lost last year through this wrecking fault. A few transfusions of Cardinal blood could help more than a trifle. You can bank on Bucky Harris, Chuck Dressen and Red Corriden to handle more than their share of the plot, but they are not out on the field winning games.

A Yankee revival could make a big difference. but this means practically the entire team must play better ball outside of Spud Chandler, who is still their best pitcher after some nine years of major league service.

Cleveland Has Hurlers

The vote we have picked up gives Joe Gordon a good year, possibly a big year, with Cleveland pitching always dangerous. The Cleveland outfield, however, is below par. The Tiger infield isn't any too hot, although Kell is close to being the best third baseman in the league.

The main job, of course, is suppressing the Red Sox, with Ted Williams, Tex Hughson, Bobby Doerr, Dom DiMaggio and Johnny Pesky.

The vote, at this moment, is Cardinals vs. Red Sox. The next vote is Dodgers vs. Red Sox. The third vote is Cardinals vs. Tigers.

But after all, there is a hot summer on ahead, plus the grind of the stretch.

AVIATION NOTES

AIRPORT CHATTER

Rochelle, Ill., airport has been designated and approved by the state as a Class 1 airport. When completed, the field will have two gravel runways, 2,200 feet long, and a third of turf, 2,600 feet long . . . Montana's first airport to be constructed under the CAA program will be located at Shelby. Construction of the two-runway field, estimated cost of which is $230,000, will start about May 1. . . . Fort Dodge, Iowa, voters approved a $200,000 airport bond issue by a margin of 703 to 389 at a special election. . . . Plans for a "country club type" airport are being advanced in Council Bluffs, Iowa. J. A. Fergus of Wichita, Kas., is promoting the 360-acre airport plan, which would be closer to downtown Omaha than the Omaha airport. Estimated cost of the project is $180,000. . . . The latest thing in wolf hunting was staged at Verona, Mo., by C. E. Atterberry and Glen Calhoun. They have bagged 18 wolves from an airplane since the first of the year. . . . The "Flying Ices," pioneer South Dakota aviator family, lost their first lives to aviation recently when Jess Randall Ice, Inland - Western Airlines co - pilot since 1943, and his wife crashed to their deaths near the Rapid City air base as they returned from a mail flight to the northern Black Hills. Jess Ice was a son of Clyde Ice, veteran private pilot.

* * *

When state game wardens apprehend a violator of game laws, the usual procedure is to confiscate his gun. But they were almost baffled when a man near Scottsbluff, Neb., was charged with hazing birds in an airplane, illegal in that state. He had no gun. Solution: They took his airplane.

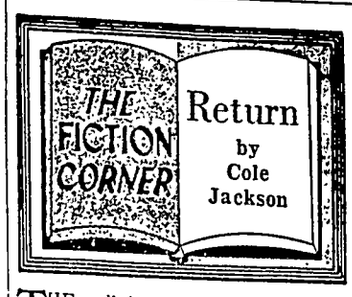
IN THE CARDS

By experimenting with a deck of cards, a Civil Aeronautics administration engineer has worked out a new and inexpensive method of marking small airports. The "segmented circle" system utilizes panels of metal or any weather-proof composition. The plan is to put such markers in unused portions of airfields. The windsock, ordinarily hard to find from the air, would be spotted easily in the center of the circle, together with an L-shaped figure showing the traffic pattern.



Return

by Cole Jackson

THE pallid, cold-eyed man sidled up noiselessly to the kitchen door He cast a furtive, searching glance over the lonely mountains, and down the trail winding through pines to the distant canyon road He leered at the back of the plump woman, comfortably peeling apples not three feet away

"Know me, Ma Peters?" he whispered.

Know him! By the creeping chill, by the sickening thud of her heart, she knew him. The shiny paring knife stabbed through a golden green peel. She turned, slowly. Sunlight touched her white hair and the soft wrinkles in her brown, placid face

"Bill Dodd! You're home?"

"Yeah," he sneered "Don't tell me it only seems like yesterday It was ten years, Ma Peters." Hate grated in his voice He planted his big feet on the doorstep, and crossed his arms stiffly His wide, muscular shoulders cut off the sun

This Week's Best Fiction

She thought He wants to talk about it Get it off his chest. She said "Set down, Bill, right over there"

"And tell you all about it, I suppose," he rasped.

He sniffed deeply of apples and cinnamon and pitch pine fire "Bakin' a apple pie? I like 'em Remember?"

"I remember" She smiled placidly, but her heart struck a quicker, harder beat "I've thought of you often, Bill"

"Yeah I've thought of you" His sullen mouth twisted wryly His cold eyes glittered. "Stared at iron bars, and thought of you Et rotten grub, and thought of you You've smelled wild plum blossoms in the canyon, ever smell buckets and disinfectant? Stars come up peaceful behind the mountain, ever watch the lights go on through a cell door?"

His rising enraged voice dropped to grating bitterness "I was twenty-five then Thirty-five now Yeah. I've thought a lot about you"

MA PETERS' plump hands trembled Maybe if they were busy, they wouldn't shake She hitched the chair half around The table supported her arms She wielded the paring deftly Golden green peel traced curlicues under her fingers

"You was makin' a apple pie that day," he recalled

"I've made them for more years than you've lived, Bill" she answered gently

"Years!" He snarled as if only he could hurt her His cold eyes fastened on her throat and he had to tear them away Yeah you was peelin' apples and doin' this door Yeah you was obey hold up the Shell Road Then when I dropped in here you pulled the black handkerchief from my hip pocket

"Because it was such a mournful color for a young fellow"

"You seen the eye holes in it and made out like you didn't You fed me pie And then told the sheriff—"

"I should have let it go, because you ate here" she snapped

"They wouldn't have caught me, if it hadn't been for you"

"Well?" she asked, with spirit

"Well" he grinned "here you are all by yourself on a lonely mountain Greery boy comes once a week Nobody else comes regular"

She was suddenly aware of being fat and old and slow She never had felt lonely, with automobiles like toys on the road below, with deer coming in to drink, and a visitor for supper every few days. She felt lonely now . .

"Won't be no cowboys or Rangers for some days, Ma. A ripsnortin' forest fire's runnin' t'other side the Range I started it. Started it for a purpose"

If ever she stopped the apple peeling, something would snap. She had stabbing pains behind her ears, and emptiness deep in the pit of her stomach

"Took me a long time to figure out how to give you ten years of hell in a few days You'll be in the attic, tied and gagged. Long about tomorrow, you'll see springs startin' and waterfalls laughin' but you won't drink—till you die"

She thought she could force the paring knife into his throat, if she got close enough "I won't try to stop you, Bill. I'm finishing a good life"

"A swell life!" he sneered "Givin' me ten years—"

She started to get up, in her slow, heavy way Then she saw why his arm was stiff He drew a tire iron from his coat sleeve

Bill Dodd knew how to hit. She wouldn't be out long.

When Bill Dodd returned from the attic, he walked on the flagstones to the grass under the pines. The grass was a carpet all the way to the canyon road

HE DROVE away leisurely, and took his time driving forty miles out of the mountains He paused to watch deer grazing, halted to eat a hamburger, slowed to mark the river holes where trout jumped.

Where the canyon opened on the plain, he ran into a small gas station

A gray, heavy set man in black Stetson and wrinkled clothes leaned on the open car window "Howdy, Bill"

"Hi, Sheriff." Hearty greetings, to show he held no ill feeling. "Thought you'd be over the mountain to the fire."

"Fire fightin' ain't for me any more. Old folks ain't the match of you young whippersnappers."

Bill smiled broadly. The smile faded.

The sheriff's eyes were as hard as cell bars and his face had set in grim lines.

"Git out, Bill." The sheriff opened Bill reached for a gun. An iron vise of a hand clamped on his wrist from the other side of the car The gas station attendant took the gun.

"I stopped by Ma Peter's place to tell her you were out," the sheriff drawled. "Your name and 'attic' were written in apple peel on the table Ma Peters can do wonders with an apple. Come on, Bill. Get out!"

THE END

"You fed me pie, then told the sheriff."—She knew if she stopped peeling, something would snap.

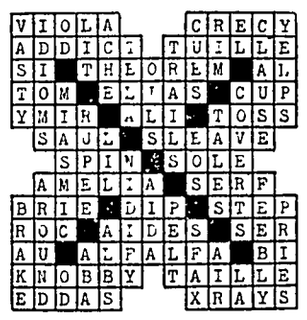
Answer to Puzzle Number 9



Series H-47

How to Overcome Your Shyness

She had come in to see me because she thought I could help her with a problem that had been making her life unpleasant for a long time Now that it was growing worse, this thing in her life, she thought she had to get outside help

Her trouble was merely shyness Always she had been a shy person but never so shy as now, for now she even dreaded meeting friends Was there nothing she could do to overcome shyness?

What causes you to be shy? The answer is this: Self-consciousness Shy people are completely possessed by their own feelings, and when they are with strangers they suffer from what amounts to mental paralysis

But if you're shy now, take heart. You don't need to be There is a simple psychological trick that will enable you to overcome your shyness, not a week, a month, a year from now, but immediately.

An eminent New York psychologist, Dr. W. M. Marston, has used it effectively on a number of shy people, so you see it has substantial psychological background. What it does is break the emotional barrier that keeps the shy person tongue-tied.

The trick is this: whenever you feel self-conscious, say the first thing that comes to your mind, no matter how trivial it may be. Say it. Say it boldly.

One shy young girl, advised by Dr. Marston to do this, later met a celebrated actor and blurted out: "Oh, your tie is crooked. Here—let me fix it for you."

That broke the ice. The actor was charmed by the girl's ingenuous personality. That one experience forever cured the girl of her shyness.

People who were once shy and use this method for overcoming it get the reputation for having original and charming personalities. In society they become favorites They build their personalities on a handicap that previously held them down—and when you build that way you build solidly. Try it.

SEWING CIRCLE PATTERNS

Two-Piece Dress for Young Girl Figure-Paring Date Frock Smart

With Wing Sleeves

AN ADORABLE two-piece dress for the six-to-fourteen miss. Brief wing sleeves are cool—the tiny peplum flares ever so gently. Nice for school, too, in the puffed sleeve version with pert Peter Pan collar.

* * *

Pattern No. 1614 comes in sizes 6, 8, 10, 12 and 14 years. Size 8, 2½ yards of 35-inch.

Charm Unlimited

LINES to flatter a young figure highlight this super date frock. The side-swept closing is smart, and note the soft gathers topped with bright buttons on the right hip. It's charm unlimited—designed to win you compliments at each wearing.

HOUSEHOLD HINTS

A defective drainboard at the sink can be repaired by sawing a narrow channel in the front face of the board and inserting a thin strip of sheet copper or lead in the groove. Then bend it over the sink. Use brass screws. They do not rust.

—•—

A new sashcord should be well stretched before it is installed.

—•—

Corduroy is a graceful fabric for windows, furniture coverings and bedspreads, we mean the lightweight type, of course. It has both pattern and plainness and takes to wear and cleaning easily. The narrow-waled kind looks best for interior work. Colors are generally soft.

—•—

When pressing net or chiffon place it between tissue paper.

—•—

A discarded purse makes a dandy first-aid kit for the car. Put in the purse the few medical supplies that will suffice in emergencies and keep it in a convenient place. This will keep you prepared for when an emergency arises.

—•—

To get a more powerful twist from your screwdriver, place the claw of the hammer over the blade. Then use the hammer handle to effect leverage.

—•—

A vegetable brush really works better than a dish-cloth for washing dishes. It removes sticky spots and is easier to keep clean and sweet.

—•—

Draperies of plain or small patterned fabrics look best against a figured wall. On the other hand, figured fabrics go best with a plain wall.

—•—

Should you make an error when writing with ink, dip a match stick into a bleach solution and rub over the spot. 'Tis erased in a jiffy.

Absolute Pitch

The sense of absolute pitch, or the ability to identify any musical tone when sounded alone, is possessed by less than 5 per cent of all musicians, singers, conductors and composers.

FALSE TEETH

To hold your loose uppers and lowers comfortably secure all day—and every day, try dentist's amazing discovery called STAZE. Not a "messy" powder! STAZE is pleasant-to-use paste. Get 35c tube at druggist today! Accept no substitute!

STAZE Holds All Day or Your Money Back!

DO CLEAN JOB PLOWING UNDER ALL CORNSTALKS

It's an all-around good practice to plow those cornstalks under in a clean manner, say Iowa State College agronomist.

First of all, such practice is one of the best ways to get rid of the corn borer When the stalk in which it lives is plowed unface These, lack of feed on clean ground and natural enemies, such as birds, soon make an end to him.

But there are other equally important benefits from plowing under cornstalks. Cornstalks are a source of nitrogen, phosphoric acid and potash.

Stover from an acre of 60-bushel corn has about $9 worth of these food elements at present price Of course, agronomists point out, the cornstalks recompose slowly and are not as quick and efficient as commercial fertilizer Yet the value is there, and it doesn't seem right to waste it, they argue.

Just as important for the long-run welfare of the soil is the fact that crop residues, including cornstalks, are important in renewing organic material in the soil One ton of cornstalks is estimated to be as effective as three-quarters of a ton of fresh manure for organic matter.

Cornstalks shouldn't be burned because all the nitrogen is lost by that method, even though some of the other plant foods are retained Besides, the ashes are of little value in replacing organic matter in the soil.

Furthermore, accordng to the Iowa State entomologists, unless every last stalk is entirely burned, there still will be plenty of corn borers around Such complete burning is almost impossible, the say.

W. S. C. S. MEETS MAY 1

The Klemme Methodist W S. C S will meet Thursday, May 1 with Mrs Edwin Josten as Leader of Worship, and Miss Irene Marshall as Leader of the Program

The hostesses are Mrs. E. J. Arnold, Mrs. A G. Koerner and Mrs. Martha Bredbenner.

Buys Farm Near Goodell

A deal has been closed whereby Harry Carpenter of Goodell, and his sister, Mrs. James Trees of Belmond, have purchased the A. C Carpenter farm 2 miles north of Goodell on Highway 69.

Fifty-Fifty Party

Mr and Mrs. Clifford Montgomery entertained the Fifty-Fifty class of the Methodist Church at a party at their home Tuesday evening.

New Marshall At Goodell

Carl Madison has been hired as marshall and care-taker of the fire station and community hall at Goodell and also as sexton of the Amsterdam Cemetery east of Goodell.

Test Soybeans For Germination Before Planting

The scarcity of good soybean seed this spring and doubtful quality of some of the seed available makes germination testing particularly important, says Paul Henderson, county extension director.

Seed can be tested easily on the farm, Henderson suggests filling a shallow wooden box with sand which has been sterilized by heating in an oven at medium temperature for about 3 hours.

A counted number of seed can be placed in the box and the box and the sand moistened. Generally the older the seed, the less vigorous the seedlings.

Once the farmer gets his test results he can vary the seeding rate so that poorer germinating seed will still tend to give a normal stand.

Tests also can be made by sending seed to the County Farm Bureau office. Germination and purity results can be obtained in about 2 weeks.

No matter where the test is done, getting a good representative sample is important, Henderson says. If the seed is sacked, a small portion should be taken from each bag If in a bin, the sample should be gathered from several different spots.

From where I sit ... by Joe Marsh

"As Homelike As a Barn"

Cy Hartman finally got his new barn painted, but plenty of folks had a hand in it. Whenever someone got a free day, or a little extra time, they'd come over and help out with paint and brush.

And Cy, to show his appreciation, held a big "barn warming" Saturday—for all the folks who'd helped him (but not barring those who couldn't). Ma Hartman supplied sandwiches, and Cy rolled out a mellow keg of beer.

You'd never think of a barn as "homelike." But with those lanterns hanging from the rafters; makeshift tables spread heavy with food; and Ed Carey's fiddle playing while the folks enjoyed the beer—Cy's barn was sure a mighty hospitable-looking place!

From where I sit, it's just about as appropriate to have a barn warming as a housewarming . . . if only because it's another chance to get neighbors together in the spirit of good fellowship.

Joe Marsh

How Fast Will He Get To Market?

Getting a pig to market in a hurry is a mark of good farming. It's also the best way to make a profit on pork production.

The sure way to get your pigs on the market early is to feed a good balanced ration This means your own home-grown grain balanced with protein and minerals. There are a number of good protein supplements on the market today, but we believe we have one of the best. It's a good idea to order your supply and feed FELCO PIG FEED.

Hancock County Coop. Oil Association

HANCOCK COUNTY BOARD PROCEEDINGS

9TH ADJOURNED JANUARY MEETING

Garner, Iowa
April 3, 1947

The Hancock County, Iowa Board of Supervisors met in session pursuant to adjournment on above captioned date with Supervisors F J Schoun, John Chambers and Geo. Th Gerdes present

The minutes of the last meeting were read and approved as read

On motion and second the quarterly reports of Fred C Missal, County Auditor and Fern Peck Katter, County Recorder, are approved.

On motion and second the application, permit and bond for a Class B beer permit is approved for Higdon's Hamburger Hut

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 118, Main and DD No. 102, Lateral No. 150

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 118, Main and DD No. 102, Lateral No. 150.

Supervisor Gerdes is appointed a committee to investigate and cause repairs to be made in DD No. 41, Main.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in DD No. 86

On motion and second the report of C. F Merten, Engineer on the cleanout of the Main open ditch in DD No 1 and 2, petitioned for by Chris Gilstrap, et al, is laid over for further consideration

On motion and second the petition and consent for a highway between sections 28 and 29, Twp. 94, Range 21 West, of Lloyd Cline, et al is laid over for further consideration.

On motion and second the resignation of Valetta Jurgensen Schlei, Deputy County Treasurer, is appoved effective April 1, 1947

Whereas the Town Council of Goodell, Iowa, has recommended that the delinquent taxes on lots 17 and 18, Block 6 Original Town of Goodell, be cancelled, and whereas, title to said property is vested in the Robbins-Christenson Post No 129 of the American Legion

Be and it is hereby resolved by the Board of Supervisors in and for Hancock County Iowa that the request of the Town Council of Goodell be and the same is hereby granted and said delinquent taxes be and the same are hereby cancelled and held for naught

On motion and second the borrow pit agreements with Henry Buz ky and Tlach are approved

This being the 3rd day of April A D, 1947, a date heretofor fixed for a letting on 80 tons of stoker coal for use at the Hancock County Home, to be delivered on track at Duncan, Iowa, the hour for said letting having arrived, the proof of publication being on file and the Board being fully advised said letting was held as scheduled The Chairman proceeded to open all bids on file and after duly considering all bids on file, the bid of the Farmers Co-op Society of Garner, Iowa, was found to be the lowest and best bid therefor

Be it therefore resolved by the Board of Supervisors in and for Hancock County, Iowa, that the bid of the Farmers Co-op Society of Garner Iowa, be and the same is hereby accepted as the lowest and best bid for the delivery of 80 tons of oil treated stoker coal F O B track, at Duncan, Iowa, for use at the Hancock County Home and they are hereby awarded a contract to deliver said coal as such times as the Steward at the Hancock County Home may designate All other bids are hereby rejected

Be it Resolved that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized and ordered to draw on the various County Funds of Hancock County Iowa, in payment of such claims in amounts set opposite each claim

County Auditor
JOHN CHAMBERS,
Chairman

HANCOCK COUNTY BOARD PROCEEDINGS

REGULAR APRIL MEETING

Garner, Iowa
April 7, 1947

The Hancock County, Iowa, Board of Supervisors met in regular session on above captioned date as directed by law with Supervisors F J Schoun, John Chambers and Geo. Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

On motion and second the bond of C. F Merten, drainage engineer on DD No. 144 is approved

On motion and second the quarterly report of Ruth Hughes, Clerk is approved.

This being the 7th day of April A D., 1947, a date heretofore set for a hearing on the proposed establishment of DD No. 145, Hancock County, Iowa, petitioned for by V. A. Cook, et al, to be established in sectiones 21, 22, and 23 in Township 94, Range 23, West of the 5th P M., the hour for said hearing having arrived, the report of the engineer recommending said establishment and the proof of publication of the notices being on file and the Board of Supervisors being fully advised, said hearing was held as scheduled.

All objections oral and written to the said proposed establishment were duly considered by the Board and after such consideration it was deemed conducive to public health, welfare, convenience and benefit that said district be established.

Be AND IT IS THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of DD 145, Hancock County, Iowa, petitioned for by V A Cook, et al which district is to be established through lands listed in the preamble hereof be and the samo is hereby established in accordance with the plans, specifications, profile and report of Engineer, which are on file as commanded in Chapter 455, Code of Iowa, 1946, and the hour of 1 30 P M on the 5th day of May A D., 1947, is hereby fixed as a time for the letting on the construction thereof Said letting to be held at the Courthouse in Garner, Iowa.

The County Auditor be and he is hereby directed to cause a notice of said letting to be published in the Klemme Times a newspaper of general circulation published at Klemme, Iowa, which notice shall request bids on labor and material for the construction of said district, set the time for commencement and completion, the approximate amount and kind of work to be done, that the the Board reserves the right to waive technicalities, and to reject any or all bids, all in accordance with Chapter 455, Code of Iowa A D., 1946

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor Gerdes, whereupon the Chairman, John Chambers, in the chair placed the motion of its adoption and upon roll call the vote thereon is, F J Schoun, John Chambers and George Th Gerdes, aye, Nays, none

Whereupon the Chairman declared the resolution duly adopted.

On motion and second the Board adjourned to April 21, A D., 1947, at nine o'clock A M.

ATTEST.

Organ Dedicated In Memory Of Lt. Dorance Grange

An electric organ was dedicated in memory of Lt. Dorance Grange, son of Mr and Mrs. Paul Grange at the Wesley Methodist Church at Mason City Sunday evening

Lt Grange lost his life while serving in the Air Corps as an instructor during the war. The organ was presented to the church by Mr and Mrs Grange.

Mr. and Mrs. Benn Coobs of Klemme attended the services.

3RD OF HANCOCK OATS IS SEEDED

About one-third of the oats were seeded in Hancock county the past week in spite of cold weather and wet fields.

Progress of spring work has been very disappointing but due to the lateness of the season farmers are doing a good job under very adverse circumstances.

Much of the oats acreage will be transferred to corn or beans. The cold weather has retarded the growth of grass in meadows and pastures.

More contour farming will be practiced in Hancock county this year than ever before with demonstrations on such pratices being held in several communities.

We have a few 4 qt.

News Conferences Net Few Leads

Truman's Press Confabs Lack Color of FDR's

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON — President Truman held his 100th White House press and radio conference recently

He said he had enjoyed them all The reporters, he said, had been fair, had reported the facts.

Thank you, Mr President.

"How have I been?" he might have asked us, but didn't.

On the way back from the White House that windy 100th day, some of us discussed the question That 100th conference was the first since his Florida trip which began when the Sacred Cow winged its way from the national airport, some 30 minutes after Mr Truman left the chamber of the house of representatives where he had delivered his historic message

Baukhage

Meanwhile, the new declaration of American policy had wakened thousands and thousands of words, spoken and printed in every nation and in almost every newspaper in the world. Diplomats, generals, statesmen, people big and little, had quaked or exulted. So we naturally looked for something very hot to write about as a result of our first White House conference thereafter. We didn't get it.

We did hear former Ambassador to Poland Arthur Bliss Lane's blast against Communism; we found out that the President was a left-handed bowler (he had just been presented with a bowling alley); we were assured that he was concerned about rising prices, we listened to him express the hope that industry would see "the handwriting on the wall" and stop an upward spiral which would bring forth renewed wage demands; we asked for but got "no comment" on a number of bills "in the works" because the President won't talk about "pending legislation"—and he applied the same rule to the Greek-Turkish affair.

We also were handed a good laugh out of comment on the famous faux pas made by Gael Sullivan, deputy chairman of the national Democratic committee while the President was away. Sullivan almost disrupted "bi-partisan foreign policy" by writing to the Republican national committee chairman and asking for a joint statement supporting the Truman plan on Greek aid.

When somebody asked if Sullivan was thinking of resigning there was considerable gaiety.

There were a number of other questions which elicited some minor stories but no screaming headlines

of type that almost always appeared after a Roosevelt news conference.

We wondered why Looking back over the hundred conferences with Mr Truman, we agreed they had been pretty good. But of late, we agreed, it required a bit of digging to get the news. Roosevelt usually gave us something which, even if it wasn't news, had a strong human interest appeal. Even if it were only a striking simile like the one Roosevelt used in connection with lend-lease.

(You may remember, he said that if a neighbor's house was on fire, you naturally would lend him your hose if his weren't long enough, not only to help him save his home but also to keep your own from catching fire. And you wouldn't demand payment for its use. After the fire was out the neighbor would give back the hose or pay for it with whatever he had to offer in return.)

Even the anti-Roosevelt papers would have to report stories like that, whether they agreed with the idea behind them or not.

And if Roosevelt hadn't any specific comment on the important news of the day, he frequently would make use of a parable or give us a homily, which showed us how he was thinking on the subject, something that managed to get his ideas over and furnish us with the background we needed to interpret the daily happenings.

We talked the 100th press conference over, lamenting that nothing had come out of it which would clarify the Greek-Turkish aid program. We regretted that President Truman hadn't injected a little more of himself into the meeting. It would have been to the advantage of the news folk, the program itself, the people who were trying to get support for it.

Of course, there was reason for Mr. Truman's reticence. He had been criticized early in his administration for answering some questions too glibly. He had suffered from spontaneous replies. As a result he is now perhaps leaning a little too far backwards.

The White House press and radio conference is a great institution. It provides a medium for bringing the people and their government nearer together than any other medium which exists, except perhaps the rarer "fireside chat." Nothing like it exists anywhere else in the world. But it is not an easy thing to handle. The correspondents are there to get every scintilla of news which they think will interest their readers and listeners The President is there to reveal only what he thinks is his duty to release in the public good. And he is also there to present his side of all questions so that his administration appears in the best light.

President Roosevelt was a past master at the art. He seldom refused to answer a question, for that just meant "no news." He preferred to feint and dodge in a manner that produced some kind of an answer which would suit his ends President Truman has chosen to go into a clinch rather than feint or risk a wild haymaker.

Newspaper men and radio casters crowd eagerly about President Truman in one of his 100 press conferences.

Here's Point for Better Roads

Last year, some 34,677,000 tons of milk were hauled over rural roads on the journey to milk plants and dealers, according to a report from the Public Roads administration cited by Charles M. Upham of the American Road Builders' association.

Figures show the nation is using 13 billion pounds more of milk and various dairy products at present than in prewar years. During the prewar years, 1936 to 1940, the average yearly tonnage of milk going over rural roads was 21,287,000. In 1945, 101.5 billion pounds of milk were sold from farms, returning $3,070,380,000 to our farmers, a good percentage of their annual cash income.

The highway plays the major role in the transportation of milk from the farm to the plant or dealer—and to the customer, Upham points out. Forty-nine of our large cities receive every drop of milk by highway, as do 54,000 communities that depend upon the highway for their entire food suppl-

NEWS REVIEW

German Miners Strike; British Draft Extended

GERMANY:

Strikes for Food

Coal miners in Germany's Ruhr area are striking for larger food rations for themselves and their families. This region is in the British zone. More than 300,000 miners have been off the job at various times in demonstrations against what they consider inadequate food allowances. Most of the Ruhr's 170 mines have been idle at some time or other during the past two weeks. The Ruhr is the heart of industrial Germany, containing coal and iron mines, steel mills and other heavy industries.

British authorities have been appealing, for the most part futilely, to the miners to remain on the job. The situation has been getting worse for some time, largely as a result of British inability to obtain and transport large enough quantities of foodstuffs to maintain a minimum subsistence diet. Heavy workers feel the lack even more acutely, and trouble has been brewing all winter.

Curtailment of coal output has serious consequences, not only for Germany, but for 13 European countries now receiving 10 per cent of the German coal production. Electric power reductions soon will become necessary in these nations, it is feared. In an effort to ease the situation, British authorities are rushing all available food from other parts of their zone.

BRITAIN:

Peacetime Draft

Recognizing the threat to peace that the Russian foreign policy presents to Britain, as well as to all the world, the parliament passed a peacetime conscription bill, distasteful as this is to the Labor government. A curious alignment combined to force passage of the bill as Conservatives joined with Laborites to vote the act through. There was embarrassment on both sides, for many of the Labor party members had voted against conscription at the beginning of the war. The Conservatives, led by Winston Churchill, reluctantly favored a bill sponsored by the party they ardently dislike. Liberals and certain pacifist Laborites voted "no" on bill. The national service bill extends the present conscription laws for five years beyond January 1, 1949. It provides for 18 months of active service for all men 18 to 26, and five and a half years of part-time service.

COAL MINES:

Closed as Dangerous

Five hundred and eighteen government-operated soft coal mines have been closed down as unsafe by Secretary of the Interior Krug. They will remain closed for an indefinite period, until inspections indicate that they are "reasonably safe." Representatives of miners' unions also will pass on the safety element in each mine.

About 40,000 miners are employed in the 518 dangerous mines. The greatest risk, Secretary Krug said, is from explosive gas and dust. The other 2,013 mines under federal control have reopened. It is estimated that coal output has been reduced about one-sixth by the closing order.

John L. Lewis, who was testifying before a house labor subcommittee when Secretary Krug issued the order, commented,

"I point out that Secretary Krug is doing now what he should have done ever since the safety code became effective. He's started to enforce his own code after 111 deaths."

ICELAND:

Ash Ruins Farms

Ashes from the furiously erupting Mount Hekla are ruining pastures in a large area around the cone, which is situated in southern Iceland. The volcanic dust is three inches thick, and constantly getting deeper. It is feared that 17 farms, 20 to 30 miles from the volcano, will be ruined.

Three main volcanic craters are active. Streams of lava two miles wide and 48 feet high are flowing from the mountain. Boulders hurled into the air explode like artillery shells. Farmers are slaughtering their livestock and moving out of the ash-coverd area.

RADAR:

Tests are being made at the Washington, D. C. and Chicago airports to determine how practical the ground approach control method is for commercial aviation. This method, found successful by the army and navy air corps, employs radar to guide planes to a safe landing.

Experiments will be conducted also at New York and eventually at other leading airports. The test period will continue, according to Civil Aeronautics administration officials, until it is determined to what extent radar could be used to supplement or substitute for instrument landings.

GENEROUS GIFTS

American Money Flows Abroad

WASHINGTON.—As evidence of the huge amounts of American money being poured into foreign countries, the commerce department estimates that residents of the United States sent $296,900,000 to friends and relatives in other countries during 1946. In addition, gift parcels valued at $125,500,000 were sent abroad last year.

The actual money sent was $10,500,000 more than in 1945 and $100,000,000 more than in 1944, the department said.

Nearly half of the 1946 money, or $143,800,000, went to Europe, while $86,500,000 went to people in Canada, Mexico and Latin America; $1,900,000 to Africa; $60,000,000 to Asia, and $4,700,000 to Australia and other Pacific ocean islands.

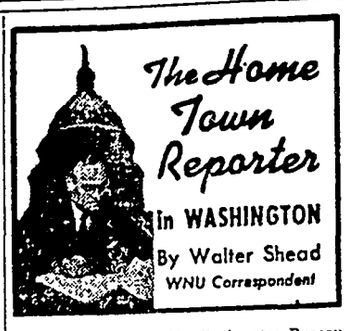
Among individual countries, Mexico got the largest sum, $44,000,000. Much of this represented money earned in this country by Mexican workers—largely engaged in farm work—and sent home to their families.

Other large sums went out as follows:

Italy, $26,000,000; China, $20,000,000; Hongkong, $24,600,000; Great Britain and Northern Ireland, $17,400,000; Bermuda and other British dependencies in the Caribbean, $12,200,000; Canada, $11,700,000.

Persons in Greece, for which congress now is considering loan aid, got $11,000,000 from people in this country. The sum of $10,800,000 went to Switzerland, $10,700,000 to Sweden, $10,300,000 to Spain and $4,300,000 to Palestine.

United States residents sent $600,000 to Russia and the same amount to Egypt, the smallest sums recorded for any place listed in the report.



WNU Washington Bureau. 1616 Eye St., N. W.

Anti-Communist Policy Offers Us Stern Choice

The impact of President Truman's new doctrine of American destiny . . . his new policy embracing the principle of freedom as opposed to forces of disruption in the world . . . continues to have a sobering effect upon this nation's capital as the magnitude, the awesome aspects and the grave import and implications of his words are studied and digested.

As a matter of fact, President Truman's message did not contain or advance any new American doctrine because such statements as America's interest in the freedom-loving peoples of the world, our support of world democracies, has been advocated and applauded for years, particularly during the war years. What the President's message did do, however, was to accompany these laudable words with a policy to be translated into action.

Those high in government circles are aware of exactly what is entailed by support of the action. They accept it—Senator Vandenberg, Senator Lodge, Senator Morse, Senator Aiken—all agree that the President's action and his policy must be supported and carried out, a policy which places this nation in the breath-taking position of assuming its rightful place as a world power and the champion of all the downtrodden peoples of the earth, starting with a 400 million dollar loan to Greece and Turkey.

This tremendous responsibility, the aftermath of war, strikes at the very security of every man, woman and child in America. It is, in fact, a new call to arms, for as a result of this new definite American policy these developments are likely to happen, and if we are to follow through on this policy, must happen.

Means Risks, Sacrifices

The people of the nation in every hometown in the land must be as united, as single of purpose, as we were in fighting a victorious war; the people must be ready to back up and accept compulsory military training; they must be willing to spend not only the 400 million dollars but in all likelihood, billions of dollars in the next few years; they must be willing to forego some of the luxuries of a hard-earned peace, for sharing dollars means sharing food and other goods. It may possibly mean a return of some government controls; it means there likely will be no big tax reduction this year, or maybe next; it means that American ships and American men may be sent to seats of trouble throughout the world, it means a risk of war, it means that we oppose the spread not only of Communism, but also of fascism or any other ism which threatens "attempted subjugation by armed minorities or by outside pressures"; it means unqualified support of the Four Freedoms and the principles of the charter of the United Nations, it means that for the moment we bypass the United Nations in the matter of furnishing money, for as yet they have no money and are not set up to function; it means continued full production of agriculture and industry; it means that a strike in any large industry would again be against the national interest; it is a must for labor and management to get together and settle their differences immediately; it means that government will remain in the market as a large buyer of food and other commodities for export relief, it means that prices may remain high; it means a continued bi-partisan approach to all questions relating to this new foreign policy in congress; it means that this new policy, daring in its conception, will go down in history much like the Monroe Doctrine but expanded to world-wide proportions It very well may mean more sweat and tears without the blood, but it very well may mean blood too.

No Middle Ground Left

So this tremendous new concept of the responsibility of this nation as a result of this last war must be either accepted wholly or rejected wholly by the American people; there can be no half-way measures. We must either take on the responsibility fully and with all our power and resources, or we must shut up shop in Europe, in China and elsewhere, close our doors and let Russia do what she will with the rest of the world. Those are the alternatives.

There is every reason to believe that insofar as this nation can, without running smack into the Russian veto power, our action will go through the United Nations and that the Security Council will be advised in advance of every move made in carrying out our announced policy. And that's as it should be, for it scotches the criticism that the President's policy abandons the United Nations when, to the contrary, he declared his action was in the spirit of the U. N. and he upheld it as the hope of the human race . . . perhaps the only hope.

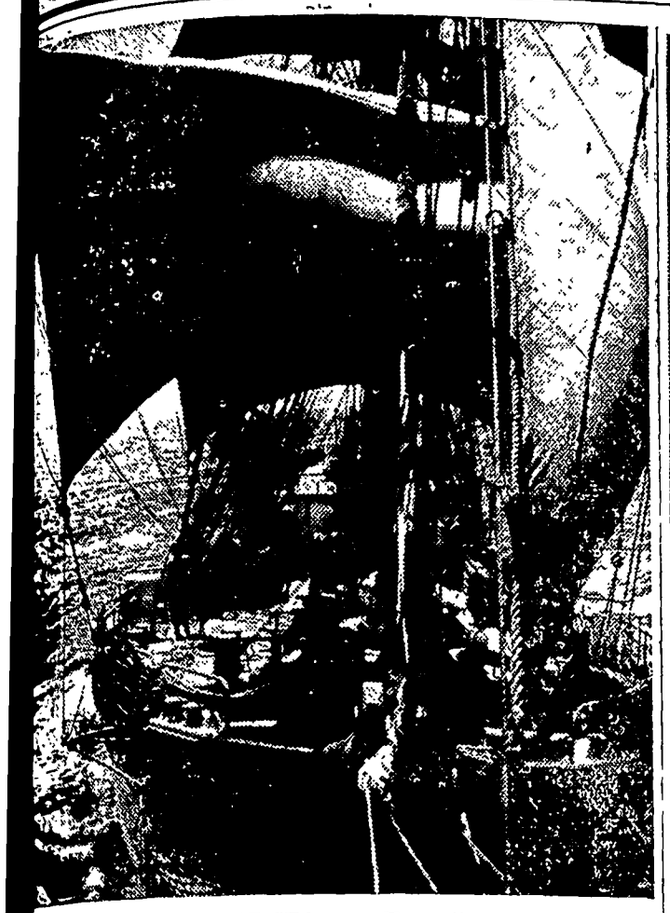
When Your Back Hurts
And Your Strength and Energy Is Below Par
It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.
You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.
There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. It is better to rely on a medicine that has won country-wide approval than on something less favorably known. *Doan's* have been tried and tested many years. Are at all drug stores. Get *Doan's* today.
DOAN'S PILLS



COAST GUARD SCHOOLS AT SEA . . . From the bowsprit of the coast guard cutter Eagle, new training bark for cadets of academy at New London, Conn., the ship exhibits its manifold. The Eagle came from Bremerhaven, Germany, where she was taken over from the defunct German navy. During World War II the ship was the German training vessel for naval officers and was named the Horst Wessel.

BACHELOR WANTS BRIDE . . . "Uncle Dan" Young, 103, South Bend, Ind., states he is willing to consider matrimony—providing he can find a suitable woman of his own age. The bachelor has lived in the same South Bend house for 65 years.

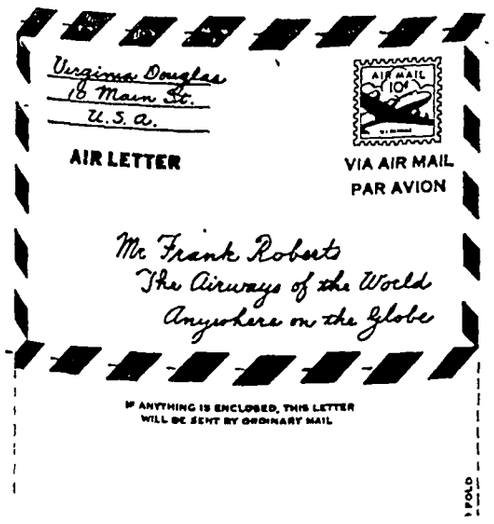
SAVED THEIR LIVES . . . Bridget Pugliese, 8, Brooklyn, center, who received an award of $60,000 for injuries she suffered when struck by a trolley car after pushing two playmates to safety, is shown with the two girls she saved. The twins Rose Marie, right, and Jean Gabriel, left, were crossing an intersection when a trolley bore down on them. Bridget rushed to their side and shoved them clear only to be struck down herself.

NEW CHICAGO MAYOR . . . Martin H. Kennelly, Chicago businessman and Democratic candidate who administered decisive defeat to the Republican machine.

FRENCH COUNCIL PRESIDENT . . . Gaston Monnerville, who recently was elected president of the council of the French republic. Monnerville was formerly a member of the French underground during the German occupation and was decorated by General De Gaulle.

ASSUMES THRONE . . . When death struck down King George II of Greece, his 46-year-old brother, Crown Prince Paul, was sworn in as his successor. The two brothers were without Greek blood and are descendants of Britain's Queen Victoria.

STEALERS CAUGHT BLACK-HANDED . . . When the body is cold and miserable, the sense of distinction between "mine" and "thine" becomes nonexistent. Small wonder then that in coal-starved Europe the stealing of coal is no longer regarded as reprehensible. Shown here is a raid by women and children on coal cars at a siding near Frankfurt, Germany.



AIR MAIL AROUND THE WORLD . . . The postoffice department has announced that "air letter" service to all foreign countries will be inaugurated April 29. Designed for the purpose of world-wide mailing for 10 cents, the "air letter" sheet is 8½ by 12 inches unfolded, and when folded forms an envelope. Messages are written on the inner side of the sheet. If anything is enclosed the letter will be sent by ordinary mail and not by air mail. For safe handling, when anything is enclosed a regulation envelope should be used.

BABY WITH TEETH . . . Chubby Paul Strecker, 10 months, has 16 sound and shiny ivories. His Dad, Henry, a Chicago baker, says Paul now tips the scale at 26 pounds, a gain of 16 pounds.

THE WASHINGTON SCENE

Bi-Partisan Sessions Engender Good Will Among Legislators

(Editor's Note: This is the last in a series of articles dealing with new congressional committees and their chairmen.)

By WALTER A. SHEAD
WNU Washington Correspondent.

WASHINGTON.—Faced with the first Republican congress in 16 years, President Truman has instituted a series of bi-partisan meetings of congressional leaders during the 80th congress as a means of creating good will. The President's strategy has proved effective in promoting cooperation between the executive and legislative branches of the government.

At the meetings, which are an innovation of Mr. Truman's and not called for under terms of the reorganization act, the President gives an off-the-record view of pending controversial legislation. GOP congressional leaders, of course, are not bound to carry out any of the proposals discussed.

Carrying out his announced purpose of calling the conferences at periodic intervals whenever the White House deemed it advisable, Mr. Truman has resorted to the bi-partisan meetings several times during the present congress.

This article concludes the series on the congressional committees, winding up with the speaker of the house and the majority leader:

Public Works

GEORGE A. DONDERO (MICH.) heads the public works committee which takes over functions of the former committees on flood control, public buildings and grounds, rivers and harbors and roads.

Dondero, who has been ranking Republican on the rivers and harbors committee, was active in the debate on the 420 million dollar rivers and harbors authorization bill of 1946, from which he succeeded in eliminating the Big Sandy river project in Kentucky and West Virginia and a senate increase in funds for the Arkansas river project. Dondero was one of five representatives to introduce bills for a St Lawrence seaway, none of which was reported by the committee.

Dondero

Dondero, who is 63, has practiced law since 1910 in Royal Oak, Mich. He held various city offices from 1905 until 1932, when he was elected to congress He also was prosecuting attorney for Oakland county in 1918-19

The 17th Michigan district, which Dondero represents, includes part of the city of Detroit and of adjoining Oakland county It is heavily industrialized, and the CIO Auto Workers union has considerable strength Dondero, however, has been outspoken in his opposition to CIO-PAC and to alleged Communist domination of labor unions.

Speaker of House

JOSEPH W MARTIN JR. (MASS.), new speaker of the house, has been active in Republican politics since he was elected to the Massachusetts legislature in 1912.

A former chairman of the Republican national committee, Martin has been in congress since 1924 and ranks eighth in seniority among Republicans in the house. He is 62 years old, publisher of the North Attleboro Evening Chronicle, and also proprietor of an insurance company.

As minority leader in the house since 1939, Martin has been able to keep his party in line in opposition to most of the administration's policies. But although six Republicans are recorded as voting with the majority of their party 100 per cent of the time on recent controversial roll calls, Martin sometimes has split with his party and voted with it only 85 per cent of the time. One of these times was when he voted to override the presidential veto of the price control bill last summer. Martin also voted to override vetoes of the Case labor bill and the bill renouncing federal claims to tidewater lands

Martin

On foreign policy, Martin in recent years has followed his colleague, Sen. Arthur H. Vandenberg (Rep., Mich.), in supporting the policy of international cooperation. In the early days of the Roosevelt administration, Martin went straight down the line against New Deal measures.

An advocate of economy in government, Martin has endorsed GOP plans to cut personal income taxes and to balance the budget. He opposes universal military training and introduced a resolution in the last congress in favor of the United States taking the initiative in a move towards world disarmament.

Martin's district (the 14th Massachusetts) includes Bristol county and parts of Norfolk, Worcester and Middlesex counties in the east central part of the state.

Organized labor has considerable strength in the district. However, the backing of several unions as well as the PAC failed to help Martin's opponent in the 1946 election, and he continued to increase his plurality as he has for several years.

When he was minority leader, Martin had no committee assignment and, of course, continues to have none as speaker.

Majority Leader

CHARLES A. HALLECK (IND.), majority leader of house Republicans, was unanimously elected to his job after several other candidates withdrew in the interests of harmony. Halleck's candidacy for the job previously had been endorsed by Gov. Thomas E. Dewey of New York.

Halleck is one of six Republicans who voted with the majority of their party on 100 per cent of controversial roll calls in closing months of the 79th congress. Halleck has not been particularly active in floor debate However, in the 79th congress, he spoke against the anti-Petrillo bill as written, although he voted for it after his own amendment was defeated.

Halleck

Halleck was born in Jasper county, Ind , in 1900, and has lived there all his life After service in World War I he received a law degree from Indiana university and began practice in Rensselaer, where he now lives. He served five terms as circuit prosecuting attorney and was elected to congress at a special election in 1935. Halleck's 12 years' service makes him one of the youngest members of the Republican leadership from the point of view of seniority.

Halleck's district (the second Indiana) spreads over 12 counties in northwestern Indiana and had a population in 1940 of 253,952. It is primarily rural and agricultural.

Halleck was chairman of the national Republican congressional committee, working for the election of Republicans to congress, during the campaign last year.

Odd Traffic Signal On Rural Highway Prevents Mishaps

NATURAL BRIDGE, VA.—Situated on a stretch of highway in a strictly rural area and far remote from any intersection, a red traffic light amazes motorists speeding north over Highway 11 through Virginia's Shenandoah valley.

The light warns of the approach to the 90-foot span of the Natural Bridge of Virginia across a 215-foot gorge. Just before crossing the natural span, the highway twists sharply on a steep downgrade to present a dangerous traffic menace.

The light was erected two years ago after a series of serious mishaps. The result, highway department engineers contend, has been "highly satisfactory"—no smashups at a point where there had been 28 in 10 years, with 12 fatalities and injuries to 53 others.

If the motorist approaches the light at a speed greater than 25 miles per hour, it flashes red. Moreover, the light won't turn green until the driver slows down. If the motorist doesn't slow, he will have to stop at the red light, but when he does stop, the light flashes green.

The light is controlled by a complicated sequence of electronics, rigged with underground wires to a detector arm imbedded in the highway 280 feet from the light.

Elated over success of the rural blinker, the highway department is planning to install similar lights at other danger zones.

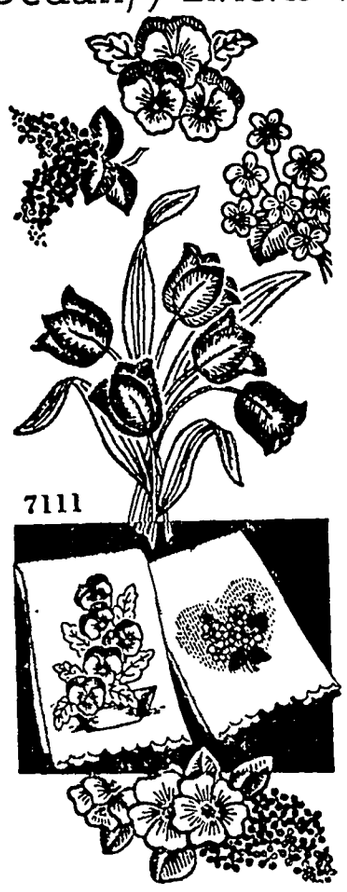
'On the Seventh Day They Rested'

MADISON, CALIF.—People the country over bemoaned the housing shortage—but the Clarks came from Missouri. They bought a vacant lot, worked six days and on the seventh put the finishing touches on their modern cottage home.

Otis Clark, who needed living accommodations for his family, called on his uncle, Noah Clark, of nearby Winters, for help. The two poured a foundation for a new home. Then Otis toured all lumber yards and hardware stores from Sacramento to Woodland, from Winters to Madison, and other communities in the area for lumber and building supplies. In the meantime, Noah hammered and sawed. Eight days later the Otis Clark family moved into their completed home. "You can't let grass grow under your feet," Noah insisted in commenting on the speedy project.

NEEDLECRAFT PATTERNS

Beautify Linens With Gay Flowers



7111

HERE are 18 ways to beautify linens or clothes! Tulips, pansies and other gay flowers for vivid, spring-like embroidery.

* * *

Gay designs for important frocks or linens Pattern 7111 has transfer of 18, 3 by 3¼ to 6¼ by 7¾ inches.

Our improved pattern — visual with easy-to-see charts and photos, and complete directions—makes needlework easy.

Due to an unusually large demand and current conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

A General Quiz

The Questions

1. What are the four cities referred to in the railroad nickname "The Big Four"?
2. When Caesar crossed the Rubicon, which man did he declare war upon?
3. What is a digamist?
4. The favorite daughter of Mohammed was called what?
5. Which city is rated the windiest city in the United States?
6. How many traveling carnivals are there in the United States?
7. How many Englishmen have occupied the papal throne?
8. There's one street car or auto bus for every how many persons in the United States?

The Answers

1. Cleveland, Cincinnati, Chicago and St. Louis.
2. Pompey.
3. If you have married for a second time after decease or divorce of your spouse, you are a digamist.
4. Fatima.
5. Buffalo, N. Y.
6. About 300.
7. One (Adrian IV, 1100-1159).
8. Every 1,500 persons.

Worshipers in Egypt Pray To Their Martyrs' Bones

Every Coptic Church in Egypt possesses the bones of five or six martyrs, each set being preserved in a leather container about two feet long and shaped like a golf bag, says Collier's. These reliquaries are usually kept in a box from which any worshiper may remove his favorite in order to pray to him.

During their prayers, the men prostrate themselves before the bag, whereas the women fondle it in their arms as they would an infant.

Columbus Brought Cattle

The first cattle brought to the United States came from Spain. Columbus brought them to the West Indies on his second voyage. From there, Spanish colonists, in their exploring expeditions along the Gulf of Mexico, introduced the cattle to the mainland of America.

There are authentic records of cattle being present in Mexico by 1521.

END CONSTIPATION THIS NATURAL WAY!

Millions Now Take Healthful Fresh Fruit Drink Instead of Harsh Laxatives!

It's lemon and water. Yes—just the juice of 1 Sunkist Lemon in a glass of water—first thing on arising.

Taken first thing in the morning, this wholesome drink stimulates bowel action in a *natural* way—assures most people of prompt, *normal* elimination.

Why not change to this *healthful* habit? Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B_1 and P. They alkalinize, aid appetite and digestion. Lemon and water has a fresh tang, too—clears the mouth, wakes you up!

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

KLEMME HIGH SCHOOL Notes

Coach Patterson's baseball squad resumed spring training last Monday, April 14, when thirty-four boys reported for practice. Many of the boys are uncertain as to the position they wish to play, but it looks as if there are several prospective pitchers. After a few more practices each will find his place. All in all it looks like another good year for the Shamrocks, and they will be ready for their first game, April 23, with Garner.

Had Fire Drill

When the fire alarm bell rang Wednesday morning all classes proceeded to leave the building orderly and calmly. In fact, we were all so calm that we failed to empty the building in the required time. We promise to do better next time, George, and we do not mind fire drills at all when the sun is shining.

Junior-Senior Banquet

The plans for the Junior-Senior banquet, which will be held May 9, in the gym, are now underway. Committees have been chosen and are now in action. Next week will be devoted to the planning of decorations for the gym.

Had Pictures Taken

Excitment ran high among the Seniors Friday as they had the opportunity to see themselves as others see them, and as they will be remembered through the coming years by their classmates. The pictures are really fine.

Study Old English

In English class, the Seniors have been studying the history of English Literature, and the growth of the English language from 55 B. C. up to the present time We find it would be difficult to read our native language that was written in Middle English and altogether impossible to read some of the Old English

Class Play May 1

The Senior Class is elated over its class play, "Just Ducky." The play is an hilarious comedy, and it promises to give the audience many a chuckle. The parts of Wilbur and Hercules, played by Roger Ridder and Francis Sherwood, respectively, will bear much of the brunt of the comedy. Betty Lou, a 14 year old, and her friend, Bernadine, play a role of two young troublemakers; these parts will be played by Peggy Coobs and Dorothy Ellingson, respectively. Meet the rest of the cast at the gym, May 1. Don't miss seeing "Just Ducky" for it is "Just Ducky."

Fifth And Sixth Grade News

—Mrs. H. G. Voetberg, Teacher.

We had four days of perfect attendance this past week.

The following fifth graders had perfect scores in spelling this week.

Richard Baack
Delwyn Brede
Ronald Karsjens
Dennis Ridder
Roger Terhufen
Tommy Waddingham
Mary Ter Hark

Those in the sixth grade having perfect scores in spelling were:

Galen Gruis
Neva Ann Anderson
Margaret Boland
Eunice Helps
Elaine Neuberger
Miriam Priebe

In the sixth grade history we are enjoying our work on the Exploration Period. We have outlines that we fill in each day.

The fifth grade in language class has been writing stories in which conversation was used. Many of us disccovered the placing of quotation marks required some careful thought.

Seventh and Eighth Grade News

—Clara Smith, Teacher

We have completed our unit on "The Work of Builders" in the seventh grade. Several in the class have made very interesting illustrations of homes throughout the world. These show the simplest types of homes in contrast with our modern homes of today.

Next week we expect to learn some facts about newspapers in our eighth English. After trying our hand at writing editorials, feature stories, and news items, we shall probably edit our annual paper.

BOARD DEFERS HEARING ON DRAIN DISTRICT

Hancock county supervisors Monday adjourned a hearing on the establishment of drainage district No. 146 to 1:30 p m on May 2. The district has been petitioned for by Vincent Kopacek et al, and is to be established in Erin township. The continuation of the hearing was for the purpose of giving objections and proponents more time to study the necessity of the establishment of the district.

Reformed Ladies Held Annual Cleaning Bee At Parsonage

A group of the younger ladies of the Klemme Reformed Church last week took over the housecleaning at the Grosshuesch parsonage. New wall paper was hung and the house giving a spring cleaning.

The ladies said it was a real treat for them, as they enjoyed some fine meals prepared by Mrs. Grosshuesch.

Held District Brotherhood Dinner And Meeting Here

About sixty men from Klemme, Liberty and several surrounding towns held a district meeting and dinner at the Klemme Methodist Church Monday evening.

Dinner was prepared and served by the ladies of the Klemme church.

Poor Grades? Poor Meals?

Nutrition is an important factor in how children feel and how they grow, and equally important in how they learn

Malnutrition Is Accompanied . . . .

1. Degeneration of the Nerves.
2. Dulling of the Senses.
3. Loss of Ambition.

All of which undermines the child's ability to learn. Perhaps more often than we think poor grades are due to poor nutrition.

The measurers which promote health and well-being should be equally as compulsory as education. A good lunch at home or at school can do much toward ensuring the right to health and equal opportunity which all children should enjoy and which are essential to our national security

THE KLEMME TIMES

Volume 52. KLEMME, IOWA, APRIL 30, 1947 Number 24.

Klemme Couple Honored On 25th Anniversary

R AND MRS. ED. JACOBS MARRIED APRIL 25, 1922 AT CLEAR LAKE

vent Celebrated Friday Even- g With Dinner At Country Club

Mr. and Mrs. Ed. Jacobs were onored on their twenty-fifth edding anniversary by a large umber of friends at a dinner iven at the Veterans Center at e Clear Lake Country Club Friday evening, April 25th

The east dining room of the lub was the scene of the dinner mall tables, decorated for the ccasion were all lighted with ilver candles. Two couples were eated at each table. A larger able near the center of the oom was centered with a three- er decorated wedding cake. At his table were seated Mr. and rs. Jacobs and their three child- en, Elwyn, Dean and Lois; Mrs. hris Jacobs, mother of Mr. Jac- s, and Mrs., Louise Wistey other of Mrs. Jacobs.

The three-course dinner was tlerspread with a program con- isting of a bass solo by Dean acobs, who sang "We've Gone Long Ways Together," and an ncore.

Rev Calvin Grosshuesch acted s master of ceremonies for the ccasion. Supt. Leo Esbeck, of Ventura gave a humorous history f Mr and Mrs. Jacobs, using as is theme, "Enter A Search ight." Other numbers includ- d a pantomine "Courtship In he Good Old Days" presented y Junior Larsen, Frances Sher- ood, Eddie Grosshuesch and ois Ann Jacobs. This depicted horse drawn surrey (with a ringe on top) showing Ed call- ng on Myrtle for a Sunday date. Eddie took the part of Ed. and ois Ann the part of Myrtle. The orse was Larsen and Sherwood.

Between courses the group ang "Let Me Call You Sweet- eart" and "Smiles" lead by Mrs. C. G. Waterman.

Mr and Mrs. Jacobs were pre- ented a beautiful plus-lined ilver box in which were arrang- d silver dollars in the numeral 5. Rev Grosshuesch made the resentation for the group and Mr. and Mrs. Jacobs both re- ponded graciously.

Later in the evening ice cream, ake and coffee was served and he party closed with the singing f "Blessed Be The Tie That inds."

Myrtle Wistey and Ed. Jacobs ere united in marriage at the Wistey home in Clear Lake on April 25th, 1922 by the Rev. Peterson. After a short honey- oon trip they came to Klemme here Mr Jacobs was in the ardware business and they liv- d here ever since.

Mr and Mrs. Jacobs are the arents of three children, Elwyn, student at Iowa State Teachers College, Dean, a senior in the Klemme High School, and Lois Ann, a grade school pupil.

The Chris Jacobs family came to Hancock County along in about 1914, and settled at Gar- ner. The first young man Ed. got acquainted with at Garner, was the Editor of this paper. It was on a Sunday evening when we met Ed. on the street and he looked like a good scout so we introduced ourself and as was the custom in those days the young men all went to church on a Sunday evening. (Not especial- ly to soak up religion, but to look over the crowd and see what girls were there! After church a couple of girls were then pick- ed out to take home.) And thus Ed. soon became acquainted with the young people of Garner as did his sister, Ethel, now Mrs. Papousek of Belmond, who was present with her husband and son at the dinner Friday night.

For a time Ed. was employed at the Viken Hardware Store at Garner and it was there he met Myrtle Wistey, who came to Garner occasionally to visit with her uncle and aunt, Mr. and Mrs. Viken. These visits became quite frequent later as this writ- er recalls.

Ed. came to Klemme and pur- chased the Gruetzmacher Hard- ware Store and took possession on August 14th, 1919. The writ- er had come to Klemme a year earlier.

In 1937 Ed. built a fine double- front brick building to replace the wooden building which was destroyed by fire. His fine new store burned to the ground on Armistice morning, 1941 A tem- porary building was erected in January 1942 where he is still located as the war interferred with plans to rebuild a new double-front building on the corner. Mr Jacobs has plans to rebuild his fine store in the future.

Fire seems to be associated with the Jacobs family on im- portant dates. On the morning of February 1, 1926 when the Klemme Hotel was on fire and burned to the ground, their first child, Elwyn, was born.

Just before the war, Mr and Mrs. Jacobs built a nice brick home on the north side of the park, where they now reside

Both Mr and Mrs. Jacobs and their fine family have contribut- ed much to the good of the com- munity and they are to be con- gratulated on their twenty-fifth wedding anniversary.

CLEAN-UP HELPS FLY CONTROL

Annual spring clean-ups going on in many towns and rural areas right now can help might- ly in controlling this summer's crop of flies, was the reminder this week by Paul Henderson, county extension director.

Eyesores around the farm or home are glaringly apparent right now, and a lot of them are fine for breeding flies. Rubbish heaps, manure piles, collections of rotting vegetables are good hatching spots, he says.

Some areas have been report- ed as using neighborhood san- itary teams to check individual premises, and to report their findings to the owner as well as to health authorities. They are using check sheets to report on privies, septic tanks, cesspools, garbage disposal, condition of livestock and livestock pens, general individual sanitary con- ditions.

Residents are cooperating by remedying conditions called to their attention.

The campaign to make Iowa fly-free this summer rests on a basis of cleanliness, Henderson says. Use of DDT and other modern fly-killers won't do the whole job The fly has to be attacked from all angles, he points out.

The U. S. is fast overtaking China as the world's largest soy- bean producer, according to a recent report from Washington.

HELLO, FOLKS!

Mr. and Mrs. John Swalve have joined the honorable ranks of proud grandparents as their son and wife, Mr. and Mrs. Har- old Swalve are the parents of an 8 lb. 2 oz. baby son born Thurs- day, April 24 at the Mercy hos- pital at Mason City. He has been named Douglas Craig.

Mr. and Mrs. Leslie De Merritt are the proud parents of a baby girl, weight 8 lbs. 8 ounces, born Sunday morning, April 27 at their home. They are also the parents of another girl and a boy. The new arrival has been named Marcille Darlene.

TO DEMONSTRATE PROPER SPRAY METHODS

Proper methods of spraying for fly control and weed con- trol will be demonstrated at Ma- son City, 10 00 a. m at the Han- ford Hotel according to an announcement made this week by Paul Henderson, county ex- tension director.

Nine such schools are being held at various key points in the state to acquaint spray opera- tors, farmers and others with the proper methodis of applying D DT in insect work, and for using 2,4-D in weed control.

The schools are being conduct- ed jointly by Extension Service at Iowa State College, the U S. Public Health Service and Iowa State Department of Health.

Spray outfits will be used in actual demonstrations, Hender- son says. In addition, experts with the crews will explain fly born diseases, methods of sanita- tion, how to prepare DDT for use and where to use it, and the use of various types of equipment for DDT and 2,4-D.

Especially invited to the meet- ing are those participating in the organization of the Hancock County fly control campaign, commercial and non-commercial spray operators, vocational agri- culture instructors, druggists and hardware men.

Here is the complete schedule of the training schools:

May 5 — Nevada
May 6 — Mason City and Char- lton.
May 7 — Spencer and Fairfield.
May 8 — Denison and Cedar Rapids.
May 9 — Red Oak and Waterloo

The team of experts to appear at the towns first mentioned after each date will include F B Paddock, entomologist at Iowa State College; Maj John Rowe, U S Public Health Service; and E. P Sylwester, plant pathologist at Iowa State College At the towns named second after each date Harold Gunderson, Iowa State College entomologist, and a district sanitary engineer will appear on the spray school pro- gram.

Birthday Party Held

Mrs Clifford Montgomery in- vited several couples Saturday evening to surprise her husband on his birthday Court Whist was played at several tables with Mrs. Geo. Stille and Carl Finders winning high score prizes and low scores going to Mr and Mrs. Verner Priebe

Clifford received many nice gifts. Lunch was served at the close of the evening.

Couple Honored At Reception And Dance Thursday Evening

Mr and Mrs. Melvin Schlei, who were married recently, were honored at a reception and dance held at the Community Hall on Thursday evening. About five hundred people attended. Mr. and Mrs. Schlei received many beautiful gifts from their friends and relatives who attended.

Construction Started On New Home In Klemme

Friday Frank Schultz had two crews of men, operating a drag line and trench digger, at his lot just south of the Mrs. Henry Helps residence, excavating for a basement and digging and lay- ing water pipe, tile and sewer pipe to the basement of his pro- posed new house.

Mr. Schultz will start build- ing immediately.

American farmers paid their hired help more wages last year than at any other time on record.

Celebrate Silver Wedding

Mr. and Mrs. Ed. F. Jacobs of Klemme

CRAPPIE SEASON TO OPEN EARLY IN 15 LAKES

The State Conservation Com- mission has opened crappie fish- ing 30 days early in 15 Iowa lakes. Biological investigations in these waters reveal extreme- ly heavy populations of crappies, and by administrative order of the Commission they will be open to fishing May 15 instead of June 15 as set by statute. The lakes affected include: East and West Okoboji lakes in Dickinson County; Lake Manawa in Potta- wattamie County; Storm Lake in Buena Vista County; Clear Lake in Cerro Gordo County; Black Hawk Lake in Sac County; Lake View State-owned Gravel Pits and Arrowhead Lake in Sac County; Hartwick Lake and Backbone Lake in Delaware County, Upper and Lower Pine lakes in Hardin County; Blue Lake in Monona County; Brown's Lake in Woodbary County; and Noble's Lake in Harrison County.

Crappie fishing in all other inland waters opens June 15 as set by statute.

Moss Discusses Soil Conservation Farm Plans At F B Meeting

Vernon Moss, Hancock County Soil Conservation Technician discussed the farm plan and its importance in good farming at the regular Garfield Township Farm Bureau meeting Tuesday evening, April 22 The group was well entertained by programs given by the schools. Chas. F. Jackson, County Arganization Director, discussed the service program.

Contour farming is one of the easiest conservation measures to use, says Frank Mendell, state soil conservationist.

Klemme Girl Won First Rating In State Contest

Gloria Haefner won a division I rating with her piano solo at the state music contest at Spen- cer last Saturday. Gloria is a ninth grade pupil in the Klemme School. She was accompanied to Spencer by her piano instruc- tor, Miss Marjorie Benzler of Britt. A division I rating is the highest anyone can receive in the state contest and entitles her to compete in the national con- test which will be held in St. Joseph, Missouri, May 8, 9, and 10.

Pupils Who Will Write 7th and 8th Grade Examinations At The Klemme School

8th Grade

Mary Ann Blumer, Margaret Buckley, Frederick Goll, Brad- ley Jenison, Arthur Knoke, Ruth Lacey, Alvin Meyer and Billy Roths.

7th Grade

Genie Albers, Harlan Ander- son, Shirley Beier, Glenn Blum- er, Larry Fjetland, Roger How- ard and Mary Panhoff.

Each pupil should plan to be at the writing centre by 9 00 o'clock at which time directions will be given, following when time the pupils will start to write the examination.

Make some arrangements for noon luncheon as hot lunches are no longer served in the schools

Bring a good eraser and two soft lead, sharp pencils.

Teacher should check with their students to make sure they have a way to get to the writing centre.

Turkey production is expect- ed to be reduced about 16 per- cent this year.

Funeral Services Held For Klemme Farmer Saturday

LOCAL FARMER DIED IN BELMOND HOSPITAL

Funeral services for Peter Lackore, 75, were held Saturday at 2 p. m. in the Goodell E. U. B. church with the Rev. C. F. Spen- cer in charge. He died Wednes- day afternoon in the Belmond hospital where he had been a patient 2 days. He had been in failing health the past few months Interment was in the Goodell cemetery.

Pete Lackore was born Feb. 25, 1872, in Forest City. He moved to Goodell in 1900. Four years later he was married to Emma Christenson of Goodell and to this union 2 children were born He has farmed in this vicinity the past 45 years. His wife died a year ago.

He leaves his daughter, Mrs. Vere Jenison of Belmond, and son, Gage, at home, 1 sister, Mrs. Cora Steeneker of Lisbon, N. Dakota, 3 half brothers, and 2 half sisters.

Mr. Lackore resided on the Fred Bachman farm southeast of Klemme.

Stenus Harms Honored At Birth- day Dinner At Alexander

A family gathering was held Sunday at the Ernest Harms home at Alexander to celebrate the 64th birthday of Stenus Harms. His children and their families were present for the event.

Those present were Mr and Mrs. Carl Heginger and family of Klemme; Mr. and Mrs. Reno Harms and family of Garner; Mr. and Mrs. Henry Steenblock and Dixie Lee of Belmond; Mr. and Mrs. John Bell and family and Herman Harms of Clarion; and Aage Jensen and Grace Harms of Hampton.

A lovely lunch was served and Mr. Harms received many nice gifts.

Auxiliary and Legion Meeting

The Auxiliary and Legion will meet Tuesday, May 6th at 8:00 P. M. Hostesses will be Mrs. E. J. Arnold, Mrs. John Chambers Lydia Bock and Martha Bred- benner.

John Albers Home Leveled By Flames Thursday

SENIORS WILL PRESENT "JUST DUCKY" THURSDAY EVENING, MAY 1

What makes teen-age girls do the things that they do? That is a question What should be done about them? That is a problem. Betty Lou Maxwell and Berna- dine Smith are a couple of ques- tions and problems rolled into two They are always up to something, and, gee whiz, there's just no stopping them But after all, girls will be girls.

Little brother Wilbur, and his pal, Hercules, contribute to the zest of family complications. Just spend one day with the Max- well family and you will sympa- thize with Mama and Papa Max- well in their struggle to raise a family.

A farce-comedy that is all new; all different The seniors will be on hand to entertain you at the high school auditorium, Thursday evening, May 1, at 8.00 o'clock.

GOODWILL INDUSTRIES HELPS THE DISABLED

Your Discards Provide Time- Cards for Such as These!

The old shoes, furniture and clothing that is given to Good- will Industries is turned into wages for disabled people. Last year it was possible to pay out over $39,000 to workers.

We can use the following articles: Bedding of all kinds, feather beds, pillows, blankets, matress- es (except straw or excelsior) We are glad to take everything "as is."

Clothing of all kinds. Good or just pieces of cloth We can take it "as is" if you cannot laun- der it We cannot get too much of this material This includes everything made of cloth of all kinds (No greasy rags account of fire)

Story books for children or fiction stories (Not school books.)

Chairs and other furniture where all parts are there and needs only carpenter work to put together.

Dishes of all kinds, kitchen utensils, pots, pans, silverware of all kinds. No limit on how much we can use.

Phonographs if spring is not broken, electric radios (not just cabinets.)

Fur coats and fur of all kinds.

Organs and pianos may be taken if in fair or good condition.

Shoes that can be repaired. Tie pairs together (mouldy shoes are no good.)

We cannot use the following articles: No jars of any kind, iron or wooden bedsteads, springs, davenports or sofas, sanitary cots, willow furniture, paper, books or magazines or tin cans.

Please phone our representa- tive Rev H E. Harvey or Mrs Martha Bredbenner for informa- tion, empty bags to fill, or for the truck to call.

Our truck will be in Klemme on Tuesday, May 6 to pick up materials you may have for us.

HANCOCK COUNTY FARM BUREAU VICTORY PARTY

The Victory party, celebrating the reaching of the membership quota, was held in the Britt High School Friday nite, April 25. It was a big success with approx- imately 950 in attendance Happy Johnny and the Higgins Boys were very popular in both sing- ing and acting. T. C (Pete) Peterson, Madison, Wisconsin, formerly of Garner, was the guest speaker His subject was "Your Farm Bureau", and he brought out the point that the more each member puts into the Farm Bureau the more benefits he will derive out of it. And with 1457 members, the largest membership on record, the Farm Bureau is a strong organization in Hancock County.

NO ONE AT HOME WHEN FLAMES WERE FIRST SEEN

Entire Household, Most House- hold Goods Were Total Loss

Fire completely destroyed the large, beautiful farm home of Mr. and Mrs. John Albers on their farm in Liberty township, four miles northwest of Klem- me Thursday afternoon.

No one was at home when the fire, of unknown origin, broke out and gained such headway when discovered by a neighbor working in his field had turned in an alarm.

The Klemme and Garner fire departments were called but were unable to save the house because of the intense flames. However, a few neighbors who arrived soon were able to get out some pieces of furniture. The fire de- partments concentrated their efforts to save nearby buildings which were already smoking from the intense heat. No other buildings were damaged.

Flames were first seen shoot- ing from the roof in the north- west corner of the house, above the kitchen downstairs and the bathroom on the second floor.

Mr. Albers and family lost all of their clothing and had only what they were wearing at the time. Mrs. Albers was at her sister's home, Mrs. Fuller, while Mr. Albers was hauling oats. Their son was in high school.

This was the third major fire in less than two weeks in this part of the county. Previous fire losses were the Merle Avery home in Avery township and some over a week ago fire de- stroyed a large barn and silo on the Leon Griffen farm in Liberty township.

MERCHANTS TO PLAY AT BELMOND INSTEAD OF CLEAR LAKE

The Klemme Merchants, inde- pendent baseball team, made a slight change in their schedule. They will open the season at Belmond on Sunday, May 4th in- stead of here.

The first home game will be on Sunday, May 11th when they play Kanawha here. The game originally scheduled with Clear Lake here for the opener has been postponed.

RURAL WOMEN'S DAY, MAY 6

Would you like to see Martha Duncan in person? Thats fine, she will be in Britt to speak to us when we meet at the Memor- ial Hall there May 6 at our Annual Rural Homemakers Day Program. Registration starts at 1:30 p. m.

Don't bring too many with you or they will eat all the candy— on the other hand, however, you'd better fill your car up with people or you won't get the candy, since the township with the larg- est attendance gets a box of candy to eat for lunch; also the township whose people have driven the most miles to get there gets a recognition along with others.

We have a good program for you and the committee will serve tea following the program. We promise to be through early so you will be home in time to feed the chickens and get hubbies supper.

Will be seeing you Tuesday, May 6 at 1:30 sharp.

Mrs. Ed. Jacobs Entertained The U-Delt-Em Club

Mrs. Ed. Jacobs was hostess to the U-Delt-Em Club at her home Thursday afternoon.

High scores won at each table were made by Mrs. R. A. Jorgen- son and Mrs. A. H. Dulmes. Mrs. Sumner Trumbell and Mrs. Ray Jorgenson, Jr. were guests.

A delicious lunch was served by the hostess.

LURE TO TRAVELERS . . . As its bid for the postwar traveling trade, the railroad industry is introducing sleek streamliners embodying a wide variety of improvements designed for passenger comfort, relaxation and safety. Typical of the new trains is this scale model of the observation lounge car of the Train of Tomorrow.

PALACES ON WHEELS

Improved Service Is Keynote Of Railroads' Bid for Trade

WNU Features.

Faced with the keenest competition in their long history from the modern automobile, bus and airplane, American railroads are leaving no stone unturned in their all-out bid for passenger preference, if the new streamliners now entering the transportation picture are any criterion. These new streamliners, sleek and beautiful in their exterior appearance, are modern palaces on wheels inside.

Determined to replace outmoded rolling stock, the railroads are adding equipment at an ever-increasing rate, as builders slowly recover from a wave of postwar strikes and work stoppages that have kept strategic supplies of steel, roller bearings, air-conditioning and certain electrical appliances, hardware and other materials coming into their plants in a mere trickle since V-J Day.

Traffic and revenue reports on America's first four postwar-built trains constructed by Pullman-Standard Car Manufacturing company show that the public not only is showing great interest in the new trains, but also is backing it up at the ticket window The new equipment is bringing improved service, and the public is responding with increased patronage.

Stress Comfort.

Postwar railroad coaches are designed from end to end for passenger relaxation and comfort.

One of the greatest postwar improvements is in seating. Coach seats of the Sleepy Hollow type provide the ultimate in comfort. This seat, so spaced as to give ample leg room and provide a wide range of adjustment of back and foot-rest position, was developed as a direct result of studies of 3,867 persons who were measured by a university scientist to determine the sitting requirements of the average passenger. This reclining seat is adjustable to 10 different positions and the foot rest has four positions.

In the main seating compartments of the new postwar cars, a new type of lighting affords a high degree of reading comfort and convenience. The reading lights, installed in the overhead baggage rack, are equipped with two lenses over each cross seat, one to give light for the window passenger, the other for the aisle passenger. Each light has an individual switch to permit a passenger to read without disturbing his neighbor.

The new trains are particularly interesting from a color standpoint, inasmuch as the new color themes are set by the route of the train. In an effort to have these streamliners express in color the characteristics of the countryside through which they pass, colored pictures are taken and studied by the builders. As a result, interiors are strikingly pleasing to passengers, for the rock formations furnish the inspiration for the tans and browns, the foliage provides the greens, and the skies and lakes set the interior color tones for the blues and grays.

Further decorative effects are obtained through use of colorful fabrics for shades and chairs, and mirrors in flesh or gold tones are used for bulkhead ornamentation. Tinted murals also have made their appearance in postwar equipment, done in special monochromatic coloring, matching or contrasting to the wall tones.

No Spilled Coffee.

A new postwar diner, with diagonally placed seats and tables, has made its debut. This diner seats its patrons at the sides of the car at square tables, which are placed diagonally along the car wall. This modern arrangement permits patrons to pursue a direct conversational attitude at the tables; permits serving from between tables instead of from the aisle, and obviates the necessity of reaching in front of one patron to serve another, as is the custom in the conventional diner.

Although the railroads and equipment builders have emphasized beauty and comfort in the new postwar train, no compromise has been made as to safety features, for here, too, new ideas have been incorporated into the finished product.

Basically, the streamline train must be lighter in weight than the old conventional equipment. It must be sleek of surface but strong enough to meet rigid requirements of the railroads.

Development of new materials for construction of lightweight cars created many new problems, and the choice of car-building materials and processes came as the result of intensive investigation by welding engineers and other research agencies. It is the conclusion of the nation's largest car-building plant that the so-called low alloys of steel, of high tensile strength, and the strong alloys of aluminum—together with the advantages of girder type construction—offer the combination of qualities most suitable for the building of modern lightweight passenger train cars.

Extensive testing and service use, and experience with severe forms of shock, have confirmed the soundness of these selections of basic car-building materials and designs.

No Rude Awakenings.

Postwar cars are equipped with the famous titelock coupler, which offers maximum safety by making virtually impossible the accidental uncoupling of cars and also adds to the riding comfort of passengers by permitting no slack between the cars to cause jolts in starting or stopping.

Double pane, shatter-proof glass is used throughout the new lightweight equipment, assuring insulation not only against frosting and steaming of windows but also against outside noises. Special materials control temperatures and reduce outside noises.

On some of the new equipment, fool-proof electric impulses are replacing the deft hand of the locomotive engineer in stopping high-speed passenger trains. Engineers on these streamliners merely press a button when they wish to stop and a robot electrical "aide" makes all the decisions from there on.

This new system results in smoother and faster stops because the maximum of efficient braking is applied automatically at each speed range. Loss of efficiency in stopping, which takes place when train wheels slide, is eliminated by a decelostat.

Yes, the postwar transportation battle is on, and it all adds up to the best deal the traveling public has yet been offered.

SOLID COMFORT . . . Ultimate in comfort is afforded coach passengers in the new streamline trains now reaching the nation's railroads. The chaise-longue chair shown above provides full-length relaxation.

Woman Lives in Same Hotel 90 Years

CARLYLE, ILL.—"Aunt Clara" is a woman who likes to live in a hotel. "Aunt Clara" is Miss Clara Truesdail, 95, who has lived in the same hotel here for 90 years.

Her hotel home is the Hotel Truesdail, a family institution, which was built by her father in 1857 when she was five years old. For many years Miss Truesdail helped operate the hostelry, but it now is run by a third generation of the Truesdail family.

A glass case in the hotel lobby is a matter of civic pride to residents of Carlyle. It contains an old register bearing the names of Horace Greeley, James Gordon Bennett, Stephen A. Douglas, Lymann Trumbull and other distinguished guests.

Miss Truesdail hopes to celebrate her 100th birthday anniversary in five years—in the hotel, of course.

And the Little Boy Barked

By Marguerite Carriere

Y JONES was in Grade Two
he could bark better than
else in the class Teacher
sen him for the part in the

is exuberance, Jimmy opened
outh and yelped.

mmy," exclaimed Miss Bates,
cked tones without turning.
rest of the afternoon passed
but finally dismissal came.
Carrots," whispered Eddy,
d boy of the class. Jimmy
ed him.

raid, huh?" he was taunted in
loakroom. Jimmy dropped to
ands and knees He playfully
a pair of woolen legs "Scared
rk, I mean," sneered Eddy.
opened his mouth and sharp
tumbled into the air.

mmy," came the teacher's
"go into the classroom."
great dignity cloaking a
heart, Jimmy walked stiffly
the classroom "I'm not
," his chin trembled softly.

acher came into the room. Jim-
felt her steady brown eyes
through his red hair

ell, Jimmy," she stated softly,
never had to scold you before

my said nothing, but he felt
the teacher could hear his
pounding. His mind started to

ry well," Miss Bates contin-
"I know what you'll have to do
You'll have to make a big
ke. One that you will keep all
me. You must not let anyone
that you can bark. If you do,
cannot be in the play. Do you
rstand?"

my's mind stopped saying
rk.

ll tell you what," the teacher
d now. "The play will be a big-
rprise if you keep your word
ever bark in front of anyone at
or at school. Think how sur-
d your mother will be Will you
ise?"

s, Miss Bates."

the way home Jimmy was a
A big yellow one He ran
d telephone poles, growling
ly. He remembered his prom-
e did not bark. But he knew
He pretended he was on a charg-
d whipped his horse home. He
d up the stairs and buzzed the
ell. The secret code ring. One
three trippy ones.

ello," smiled his mother, her
t face happy to greet him,
e a nice day?"

ep," answered Jimmy.

O, Jimmy," exclaimed his fa-
ther, at dessert time. "I hear
school is having a concert

re you in it?" his mother ques-
d.

mmy opened his mouth to say
" but closed it.

on't you know?" she asked,
ed by his reaction.

"Nope," he answered. Then he added, "S'prise." He knew that they would not ask him anything more because they never made him tell his secrets.

"How about slipping over to the hospital to see Grace?" his dad asked his mother.

"Well, I'd like to, but what about Jimmy?"

"Oh, we'll be gone only an hour. Jimmy will be safe and sound."

A thrill of pride went through the boy. They thought he was grown-up. Wait until they saw him at the concert. He longed to yelp loudly and see them look surprised. But he remembered his promise. He didn't want to lose his part.

"But, Jimmy," his mother turned to him seriously. "Don't open the door if anyone comes unless it's friends. Look out the window first. We'll leave the verandah light on so you can see."

For a while after they left, Jimmy bounded around the room. "Arf, arf, arf," he barked loudly.

The doorbell rang. Jimmy tiptoed to the window The woman from downstairs What did she want? Should he let her in? No, she was no friend. Furthermore, he would bark and scare her "Arf, arf, arf," he yelped in his sharpest dog tones

Suddenly he remembered his promise He cut his last bark short. He peered out of the window. The neighbor was starting to leave with a queer smile on her face.

It was a week later "A lawyer's letter for you, dear," said Jimmy's mother in a puzzled tone as she kissed his dad hello.

"Breach of promise from some old girl friend," retorted Dad. "Humph, Anderson and Anderson, attorneys."

His father ripped the envelope open and scanned the letter.

"Ann, take a look at this," he exclaimed.

She took the letter and studied it.

"Dear sir;

"We are informed you are keeping a dog in your flat. As you are aware, your lease forbids this. Unless you rid yourself of it immediately, our client, your landlord, Mr. Stillman, intends to take steps to have you evicted."

Jimmy forgot the silence he imposed on himself whenever he wished to know anything interesting. "What does it mean?" he asked.

"They think we have a dog, dear." His mother smiled at his serious face "Have you told anyone we have a puppy?"

"Nope, but," Jimmy thought a minute, "but, maybe I'm the dog."

His mother burst out laughing, and even his dad grinned in spite of his annoyance.

JIMMY RECEIVED careful instruction always to be quiet when in the house, because that woman downstairs wanted to make them move. But he reasoned that barking was not noise, since he had to practise And he could only practise when his mother was out.

Jimmy was a dog. A big yellow one.

One evening, just after his mother had returned from shopping, the doorbell rang, imperative as a police knock. It was their neighbor

"Mrs. Jones," she wheedled, "how are you?"

"Very well, and how are you?"

"I dropped up for a moment, just a moment."

"Come in," Ann invited coolly

"And how is Jimmy?" cooed the voice

"Excuse me a moment, Mrs. Dale." Ann hurried to the kitchen to remove her apron.

Jimmy watched the neighbor out of the corner of his eye. Then he began to wonder if Mrs. Dale were looking for things to steal. She was peering underneath the table, and through into the living room But when his mother returned, she leaned back in the chair.

Just then it occurred to Jimmy why the woman had come. He threw his sweater on the floor, and walked to the middle of the room. "We ain't got no dog," he stated flatly.

The woman gulped and her chins wobbled "Well," she stammered, "well." Then her manner changed. "I see you have trained your child, Mrs. Jones." She stalked out of the house.

THE day of the concert came. Jimmy was in a frenzy of excitement. At five o'clock, he asked for his supper "You'll just wait, young man," replied his mother firmly At six he choked down some bread and salad.

"Hold it, Jimmy," cried his father, as the boy dashed for his clothes

"But I have to go early for my costume"

"Your costume?"

"I'm important," he said briefly, and in his hurry did not pause to explain, but ran out into the frosty night.

At last, bundled in his dog outfit, he stood in the wings of the stage, blinking before the strong lights. Miss Bates nodded her head. He dropped to his hands and knees. He thrilled to the sound of his own barking and exulted in his fierce growls. Yes, he was the best dog in the whole world.

Then it was over and he was going down quietly to the audience. He carried the dog mask that Miss Bates had given him. Yes, as he wriggled through to his parents, he could see they were proud of him, just as he had hoped. But they kept laughing. Jimmy couldn't figure that out because his part had not been funny.

Another strange thing was that Mr. Stillman came over and shook hands as soon as the concert was over. "Sorry about the letter," he apologized, and grinned with small wrinkles around his eyes.

But the strangest thing of all was that Mrs. Dale bustled up quickly. "Please forgive me," she kept repeating.

"Of course," smiled Jimmy's mother, and her dimple appeared. Then all of them, Mr. Stillman, Mrs. Dale and her husband who was shrivelled like an old lemon, came over to his house. His mother and dad served them tea, in the best cups, too.

"Yes," exclaimed his mother, "Jimmy can have some lunch, too, as a special treat for an actor."

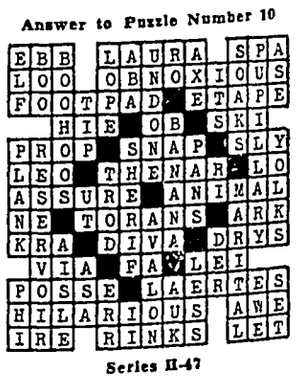
Answer to Puzzle Number 10



Series II-47

Sportlight

by GRANTLAND RICE

JUST how important is rhythm and timing in sport? A short while back, my friend and critic, former Gov. James M. Cox of Ohio, suggested this subject as a timely theme.

It was the governor's idea that rhythm is an important factor, not only in sport, but also in every detail of life. The testimony seems to bear this opinion out completely.

Gov. Cox

We first put the matter up to Eddie Dyer, the Cardinal manager, also a former football star.

"Rhythm," Dyer said, "is hard to explain. But it is certainly important. Important in football—just as important in baseball. I would say that it meant the team play between mind and muscle, as far as sport goes. You must think and act in one direction. You can't think one way and act another.

"Certainly, such ball players as Musial, Marion, Moore and Slaughter all have rhythm. They have almost a perfect blend of brain and action — what you might call the split-second variety There is never any sign of being jerky or jumpy in what they do.

"I would say the first move must come from a clear, untangled, smooth-thinking brain. Then the muscular side must take over at once."

To round out the advice, I switched the debate to my friend Frank Crowninshield, a patron of all the arts and of most sports, one of the most direct thinkers I have ever known. Crowninshield is better known as an editor, writer, critic and collector of art. But for over 50 years, he also has been one of the keenest of all sporting fans and followers Everything that happens in the world is his stage.

Rhythm in Everything

"Have you ever thought," he writes me, "that the two prime essentials in sport are rhythm and timing? And they belong together. But they are just as dominant in the arts, poetry, dancing, music, architecture, painting, acting and singing.

"Absence of rhythm and timing," he writes, "is just as fatal in all the arts as it is in baseball, shooting, bowling, fishing, running and all the others. Did you ever watch Bobby Jones? Did you ever watch a bird dog in the field? Did you ever read Shelley's 'Ode to the Westwind,' or Keat's 'Ode to a Nightingale?' They all have the same basic qualities—perfect rhythm. Nothing hurried, nothing rushed."

We passed the problem on to P Hal Syms, card and sport expert.

"Rhythm," he told me, "is the basis of any golf stroke. It is also the basis of winning bridge It is the foundation of everything you do well, in sport, business, art or cards.

"What is rhythm? It must begin, of course, in the brain. You must set your plans in advance. You must be ready for whatever happens. There should be no room left in the brain for panic or hurry, for overconfidence or despair.

"Every part of life is competition —competition against yourself and your opponent. But you must be set and ready for whatever happens. You must never be caught off guard. Again, I say, this belongs to the brain.

"It is from the brain or the mind that rhythm starts. If you are prepared here, you are then able to send your message from the brain to your nerves and your muscles When they respond, as they should if you are in good physical condition, you have what I call rhythm. I still say this applies to golf, baseball or football, just as it does to bridge.

Bridge and Boxing

"I have had nights at bridge where I saw that I was running on a low rhythmic scale. I knew my coordination was poor. On such nights, I cut out of the game as quickly as I could to wait for another night."

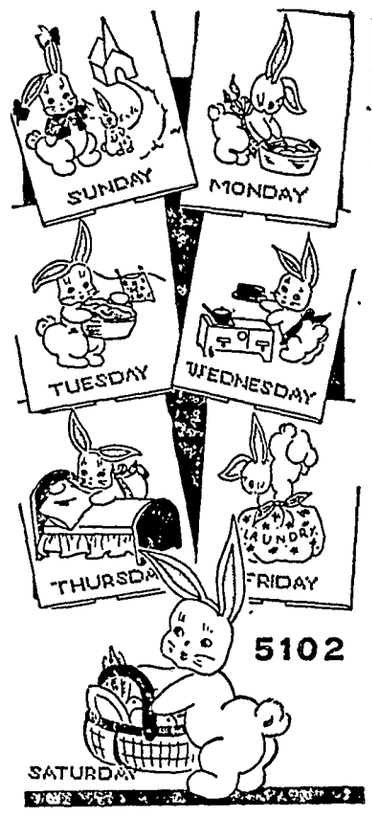
"I put the same problem up to Jack Dempsey. 'I see what you mean,' Dempsey said. 'But I can't explain it. We call it reflexes. When you are young, you see an opening and you let fly. Split second. When you are older, you see the same opening but you get there too late. When I was around 24 years old, my mind and fists worked together. They were a team, I guess. Maybe that's what rhythm is. Maybe you might call it smooth action between the mind and the fists—or whatever you use in certain games.' "

I can't think of a better description of rhythm. Any poet must have rhythm in his brain and soul. But poets don't have to blend this factor with physical action. There can be no set definition of rhythm as applied to sport, art, business, music, poetry or anything else.

In my opinion, rhythm means smoothness of action, the team play, the coordination of mind and muscle, where the directing force is mind or brain.

NEEDLEWORK PATTERNS

Kitchen Towels With Cute Rabbits



Gay Rabbits for Towels

AS CUTE as a button are these gay Peter Rabbit figures to liven a set of kitchen towels. Stitches are simple and can be quickly embroidered in bright colors. If you like, they'll make amusing quilt squares for a child's bedspread.

* * *

To obtain transfer designs for seven "Peter Rabbit" figures (Pattern No. 5102) color chart for embroidering, amounts of flosses specified, send 20 cents in coin, your name, address and pattern number.

Due to an unusually large demand and current conditions, slightly more time is required in filling orders for a few of the most popular patterns.

Send your order to:

Encore! Encore!

When Jack London was reporting the Russo-Jap war from Korea, an official called and said the people of the town wanted to see him. A platform was built and London rehearsed a speech. When he ascended the platform before a huge crowd, the official asked him to remove his false teeth. London shruggingly obliged, whereupon the audience broke out in cheers. There was no speech. London kept taking out and putting in his bridge to the applause of the multitude!

Metal Value of Coins

The face value of U. S. coins today is from three to eight times as much as the cost of their bullion. Only $1.20 worth of metal is required for minting $10 in pennies, $2 37 for $50 in nickels, $33.86 for $100 in dimes, $84 63 for $250 in quarters and $169 28 for $500 in half dollars.

WHY BE A SLAVE TO HARSH LAXATIVES?

Healthful Fresh Fruit Drink Has Restored Millions to Normal Regularity!

Here's a way to overcome constipation *without* harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

Most people find this all they need —stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B_1 and P. They pep up appetite. They *alkalinize*, aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

LOOSE PLATES?

To hold your loose uppers and lowers comfortably secure all day—and every day, try dentist's amazing discovery called STAZE. Not a "messy" powder! STAZE is pleasant-to-use paste. Get 35c tube at druggist today! Accept no substitute!

STAZE Holds All Day or Your Money Back!

SHAMROCKS BREAK EVEN ON BASEBALL GAMES SO FAR

The Shamrocks have won and lost one baseball game to date, defeating Crystal Lake 6-5 and losing to Corwith 4-0.

In the Crystal Lake game played there last Wednesday, Jacobs banged out a home run in the 6th to provide the win. He also lead the hitters with a triple in 4 trips. Dick Finders struck out 12 and allowed 4 hits.

In a well played game here Monday Corwith won 4-0, with Oxley allowing only 1 hit in the last of the 7th Finder for Klemme pitched a 2-hit game.

SPRING IS HERE!

Daisy, daughter of Mr. and Mrs Roy Schaefer, proved to the Times that Spring is really here at last. Sunday afternoon Daisy brought in a nice bouquet of crocuses that she had picked that day.

AROUND IOWA

MISSED BLAST

R. C. Hollander and Dr. Kermit, of Sheldon, are back home after a pleasure trip by plane through the south. Their first leg of their journey was to San Antonio and 24 houres after they arrived there, the most devasting tornado in years followed their trail, leveling several towns. Then they went on down to Texas City, Texas. 48 hours after their departure, ship explosions in the harbor made the town a shambles. They are glad to be back home.

MISSED CHILDREN

Charles E. Anstine, Harlan, ran his car over a curb and into a tree one day recently, but we suspect he doesn't feel so badly about it. Some children were crossing the street and he had to hit either the tree or the youngsters.

BLAST KILLS

At Crystal Lake, Joseph Pierce and Clayton Mick placed some dynamite in a stump, preparing to blast. Apparently, they did not realize that the elctric switch to operate the blast was already "on" and were killed in the resulting explosion. Their bodies were blown 200 feet. Charles Gordon and Calvin Perkins, who had just stepped away from the dynamite, were uninjured.

BIG FIRE

Clear Lake had its biggest fire recently, when the Surf ballroom, know to thousands of Iowa vacationers throughout the state, went up in flames, with an estimated loss of $250,000.

LONG SERVICE

At Cherokee, fire chief D. R. Goldie points out that the 20 men on the fire department have a total of 253 years of duty. Five men average 26 years of service, with Clarence Perrin, who joined in 1910, holding the record length of service, of 37 years.

BACK FROM POLE

Cascade welcomed back recently Chaplin Wm. Menster, who was a member of the Byrd expedition to the South Pole. He reported to the "old home town" that "Antarctica" has been consecrated to peace forever. The Cascade chaplin was the first minister of any denomination to visit the South Pole.

LONG TIME WED

In these days of frequent divorces and short marriages, Alton points with pride to Mr. and Mrs Nick Croatt, who have celebrated their sixtieth anniversary. They were married April 25, 1887 at Hospers and have had 9 children, eight of whom are still living.

DOING A GOOD JOB for IOWA

Agriculturally, Iowa is one of the richest and most productive states in America. Here we produce wealth that springs from our rich soils—and from the toil of our farmers.

Some of this wealth leaves our state never to return. Some comes back with a state-wide beneficial result. Who brings it back? Our farmers who buy through and sell through co-ops. These cooperative members are doing a good job for Iowa. We can thank Iowa's 318,000 co-op members for savings of more than 13 million dollars last year.

BUY THROUGH A CO-OP—SELL THROUGH A CO-OP

BUSINESS TREND IS FEEDER'S KEY

Likely To Determine Profits For Cattlemen During Next 6 Months

For the remainder of 1947, farmers will want to base their cattle feeding plans largely on what they think general business conditions will be, says Francis Kutish, Iowa State College economist.

Business prospects, more than any other one factor, are the key to profits in the next 6 months, he points out.

From the supply standpoint, the cattle outlook is good for the early summer months. There will be less pork on the market between now and autumn because last fall's pig crop was down 11 percent.

More On Feed

Cattle on feed in the Corn Belt April 1 were 13 percent above a year ago, but the share headed for early summer market is below last year.

Of the cattle on feed April 1, feeders expect to sell 51 percent before July 1. Last year 54 percent were sold by July 1. Two years ago the percentage was 58.

Cattle feeders have been marketing their cattle faster this year than they planned in January. A USDA survey showed that feeders marked 7 percent more cattle during the January-March period than they had planned last January.

As to the question of whether or not to buy cattle to go on grass, Kutish points out that feeder cattle have been at record peaks this spring—about $4.50 per hundred more than last year. Yet more cattle are moving to feedlots than did last year, says Kutish Actually, farmers in 8 Corn Belt states shipped more feeders in the first 3 months of 1947 than ever before in the same period The number was up 45 percent from last year.

Grass-Feed Cattle

Kutish points out that prices of feeder cattle normally rise in the spring Fewer are for sale then, and farmers are looking for cattle to go on grass. Prices usually drop during the summer. They are likely to hit a low point in the fall when ranchers are all selling from western ranges. The result is that in normal times profits from just pasturing cattle are not very great.

In recent years it's been a different story, says Kutish. The general price level has risen enough to carry cattle prices with it. It was possible for a farmer to make money merely by "holding" cattle through the summer Last year prices got a shot in the arm when ceilings were removed in the fall.

There will be no ceilings to come off this fall. So, reasons Kutish, the decision of whether to buy cattle to go on grass ringes pretty much on your guess about general business. If there is further inflation, then there may be money to be made in buying cattle to go on grass. If recession comes, such a move means a loss.

From where I sit ... *by* Joe Marsh

We Got to the Fish Fry After All

That community fish fry was sure a great success. There were plenty of appetizing extras, and Will Dudley did a right wonderful job of frying the fish—soft and flaky inside—brown and crisp around the edges.

But we didn't get to go. The missus was tired after working in the yard, and we just didn't want to leave her.

Then how did we know the fish was so good? Because the folks didn't forget us. They sent Skippy Henderson over with two steaming covered plates of fish, and a pitcher of cool, sparkling beer. And we finished them off in front of our own fire.

From where I sit, that's one of the things that makes our town so nice a place to live in: a spirit of share and share alike. That plate of fish and glass of beer weren't just great *eating*, they were symbols of the thoughtfulness that makes for better *living!*

CLEAN UP FARMSTEAD

Although this is the busy season on the farm, a half day devoted to cleaning up farm scrap piles would be time well spent, county extension director Paul Henderson thinks.

"Hancock County farmers could turn a rainy afternoon into ready cash by gathering up all scrap steel that has accumulated around the place and selling it," Henderson says. He points out that scrap steel has jumped from $19.75 to $33.75 a ton wholesale.

While the steel scraps are being picked up, time could be taken to clean up other trash piles around fence corners and farm buildings. Not only does this improve the looks of the place, but it cuts down on possible fire hazards and eliminates breeding places for rats and other vermin.

Some 3500 people are burned to death annually in rural America and the rural property loss runs close to 100 million dollars

Care should be taken to get rid of rubbish and old furniture which has accumulated in barns, attics and outbuildings. Chimneys and flues should be cleaned out and dead vines, brush and weeds removed from along fence rows and near buildings.

Henderson pointed out oily rags, frayed electric cords and defective equipment, loose wooden shingles and semi-clogged furnaces as items needing special attention in the clean-up drive.

GREYHOUNDS

Iowa will have some entries in the National Greyhound coursing meeting at Abilene, Kansas. From Avoca, George Lippold and Gaylord Harris have entered a total of four of the fleet canines.

KLEMME SCHOOL NEWS

Fifth And Sixth Grade News

—Mrs. H. G. Voetberg, Teacher.

Those having a perfect attendance in the fifth grade the past six weeks were:

Richard Baack
Ronald Karsjens
Dennis Ridder
Roger Terhufen
Melbourne Trampel
Lois Ann Jacobs

Those having a perfect attendance in the sixth grade the past six weeks were:

John Bisom
Galen Gruis
Lu Verne Heginger
Larry Stille
Billy Waddingham
Reverdy Mace

All of the boys in the sixth grade had a perfect record of being present every day. We think that is a very fine record.

This past week we had two birthdays in our room, Richard Baack and Margaret Boland celebrated the event by bringing treats to school which we all enjoyed

Tuesday afternoon when Mrs. Voetberg came into the room oranges and grapefruit came rolling to the front. The boys and girls really surprised her

Perfect spelling scores in grade five this week were given to the following:

Dennis Ridder
Roger Terhufen
Tommy Heivilin
Lois Ann Jacobs
Janice Swanson
Mary Ter Hark

Perfect scores for sixth grade people this week were given to the following:

Margaret Boland
Kay Jacobs
Elaine Neuberger
Beverly Sobek

JUNIOR HIGHLIGTS

Well, here we are again and everyone is counting the days of school left Quite a few of us are trying to raise our grades this last six weeks as we would all like to become seniors next year. It isn't how we started out this year in school but what really counts is how we all are finishing the year We all hope that we have accomplished a year of study which we will make use of next year and the many years that lie before us. A guess that we can't realize now just how much our high school education means to us, but we aren't the only generation like this for I believe everyone before us has been just like us. What we want to do most of all is to become worthwhile, lawabiding citizens and help, and that help must come from you as mothers, fathers and friends.

The banquet is well underway now and we have quite a bit accomplished already I'm sure the Seniors will agree with me when I say that the banquet theme is a complete secret between the Juniors and Seniors, that is.

—Reported By Ruth Kurtz

KLEMME HIGH SCHOOL Notes

Probably the only admission ever made to being young was overheard this past week between two of the freshman females. As one of their friend's departed on of the girls said to the other, "Gee, I'll bet she'll be cute when she grows up"

Well, report cards out once again and the last time now before that final mark goes on them. We are all hoping those final grades are for the better and will say promoted. But, students, I guess its up to us.

Mr. Patterson's bookkeeping students are still working with their Spencer's practic set. And this has even caused some loss of temper when mistakes are made. By whom? Well, we will not go into that.

The Business Arithmetic class now thinks that they understand metric systems of measure and are now learing how to figure percentages. Do you suppose if we learn how well enough the teacher will let us figure our own grades for the last six weeks?

Junior and Senior study halls have been pretty vacant this past week and the store room is usually full. The Juniors have been making plans for the Junior and Senior banquet which is to be May 9, and the Seniors have been working with posters, tickets and such for there play. In case you have forgotten that play is May 1 at 8:00 P. M. in the K. H. S. gym and its "Just Ducky"! Yes, it is.

Mary, Mary, quite contrary,
How does your homework go?
With radio singing and telephone ringing,
No wonder your grades are so low.

Ain't it the truth, tho? Ain't it the truth, not only for Marys but the Johns and Jacks as well.

Leaders, Parties and Policies is now the topic in the American History class. Oh! To be able to remember all that!

English Literature is rather hard to understand as we are studying how English drama got its start.

In Government we are studying about the state constitutions and how the state goverfments operate. We have just finished a chapter on political parties.

The typing class has just began work on a booklet called "The Right Thing To Do" As we can only have one mistake per paper I am sure most of us will know the right thing to do before we are finished.

Well, so goes another week and we are counting the days, for the Seniors that's only 15. Are we all happy about it?

Our Sophomore Class News

Reorted By Phyllis Boland

Pythagoras theorem is one of the most important theorems we are studying in Geometry. We shall study this until the end of the school year.

In World History we are engaged in World War I, it's causes and results. It has proved interesting to look back on the occurrences of the past.

The correct usage of the pronoun and the verb has been keeping us busy in English class.

DOES NOT PAY TO TURN HENS LOOSE

Keeping Them In House Will Result In More Eggs, Records Show

It doesn't pay to turn laying flocks out in the barnyard to range for feed, results reported by W R. Whitfield, Iowa State College extension poultryman, show.

Commercial flock owners have for some time realized the advantages of confining the flock to the house or sun porch, but the general farmer often has not believed in this practice, Whitfield says.

Need for direct sunshine and exercise has been pointed out as a reason for letting birds range Whitfield's answer is that properly constructed laying houses allow plenty of both exercise and sunshine Confinement promotes contentment of birds, too, Whitfield declares. "It's the contented flock that lays the best," he says.

Not Enough Feed

Whitfield doesn't believe that hens pick up enough waste grain around the feed lots to make ranging pay. A laying hen eats about 100 pounds of feed per year That multiplied by some 200 birds adds up to 20,000 lbs. of feed per flock per year.

About 500 pounds of not too good waste grain or green feed is all that can be saved from the feed lots, Whitfield figures. "Picking up 500 pounds of feed, when an additional 19,000 lbs. must come from the granary and feed bay anyway, isn't worth the time and labor of cleaning up muddy eggs, let alone loss of eggs from nests "hidden out" in the barnyard," he says.

And in addition flocks that are turned out don't lay as many eggs as the confined birds.

Compare Flocks

Reports from demonstration flock owners, who have kept records in cooperation with the Extension Service during the past year, show confined flocks outyield non-confined flocks by 17 eggs per bird.

Twenty - four demonstration flocks were allowed to range over the farmstead throughout part of the summer, but were confined all winter and a part of the mornings the rest of the year. Thirty flocks were confined the entire year, either in the laying house or to a sun porch with cobblestone or concrete flooring.

Although Whitfield's records show both groups of birds laid exceptionally well, the confined hens averaged 195 eggs against an average of 178 eggs each from the non-confined birds—17 more eggs per hen from confined flocks.

HANCOCK COUNTY BOARD PROCEEDINGS

1ST ADJOURNED APRIL MEETING

Garner, Iowa
April 21, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Supervisors F. J Schoun, Geo. Th. Gerdes and John Chambers, present.

The minutes of the last meeting were read and approved as read.

On motion and second the annual County Home report for 1946 is approved.

WHEREAS, C F. Merten, County Engineer, has filed a report recommending the grading of certain Hancock County roads during 1947 and further recommends that a letting be held on such grading with the grubbing, clearing and culvert work to be done by County Maintenance crews.

BE AND IT IS THEREFORE RESOLVED, by the Board of Supervisors in and for Hancock County, Iowa, that the report of the engineer be and the same is hereby approved and the county auditor be and he is hereby authorized and ordered to advertise a letting on the grading of certain Hancock County roads according to plans and specifications furnished by the County Engineer Said letting to be held at the Courthouse, in Garner, Iowa, at 1 30 P M on the 8th day of May A D., 1947 Said notice of letting to be published in the Kanawha Reporter, a newspaper published in Kanawha, Iowa, which notice shall state the time and place of letting, the approximate amount and kind of work to be done the time for commencement and completion and that the board reserves the right to waive technicalities and to reject any or all bids

On motion and second policy No 26730 of the Rome Insurance Company of New York, is approved

On motion and second C F Merten, is appointed Engineer to make an investigation and report on the necessity and feasibility of the extension of Drainage District No 122 petitioned for by Stanley Nedved, et al.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in DD No. 26, Main, DD No. 71, Main and DD No 91, Main

Supervisor Schoun, is appointed a committee to investigate and cause repairs to be made in DD No 7, Main and DD No. 3 and 4, lateral No 7.

On motion and second, Chairman J A Chambers is hereby authorized to execute the certificate of compliance relative to the right of way and borrow needed for the construction of Hancock County, Iowa, project S-1048(1)

WHEREAS, Wm Henschen, Engineer, has to report that Joe Noodles of Greenfield, Iowa, has completed his contract for the construction of Drainage District No. 143 to his entire satisfaction and there is due on said contract a final estimate in the sum of $551 46 as a final payment on said contract.

BE AND IT IS THEREFORE RESOLVED, by the Board acting for and in behalf of Drainage District No. 143, Hancock County Iowa, that the report of engineer be and the same is hereby approved and the county auditor be and he is hereby ordered to publish a notice of hearing on the report of the engineer Said hearing to be held at the Courthouse in Garner at 2 30 P M on the 5th day of May A D. 1947 The county auditor is hereby directed to publish a notice of hearing on the final estimate and the report of the engineer in the Garner Leader and Signal, a newspaper published at Garner, Iowa.

On motion and second Ray Hansley is appointed Weed Commissioner for Hancock County, Iowa, for the year 1947

On motion and second a notice of warning to depart is hereby ordered served on Anna P Seroggs.

WHEREAS G H Oxley, heretofore appointed a commissioner to view the premises and report on the vacation of a highway petitioned for by Walt Kircharger et al between Sections 31 and 32 Township 95, Range 26, West of the 5th P M and

WHEREAS said commissioner has filed his report and reported in favor of such vacation

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, that the report of G H Oxley commissioner be and the same is hereby approved and the 24rd day of June A D., 1947, at the hour of 12 00 noon is the time fixed for hearing thereon The County auditor be and he is hereby directed to cause notice of such hearing to be published in the Britt News Tribune as by law directed

This being the 21st day of April A D., 1947, a date heretofore fixed for the hearing on the establishment of Drainage District No 146 petitioned for by Vincent Kopacek et al the hour having arrived, the report of the engineer recommending such establishment and the proof of publication being on file and the Board being fully advised, said hearing was held as scheduled.

The petition, report of the engineer and objections to such establishment were read by Deputy Audditor Schoneman and objectors and proponents were given an opportunity to discuss the necessity and feasibility of the establishment of the drainage district and objections thereto, petitioned for by Vincent Kopacek et al as recommended in the report of the engineer

BE AND IT IS THEREFORE RESOLVED, by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of drainage district No. 146 petitioned for by Vincent Kopacek et al, that the hearing on the establishment of said district be and the same is hereby continued to May 2nd A D., 1947 at the hour of 1 30 P M. at the Courthouse in Garner, Iowa

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption was seconded by Supervisor Gerdes, whereupon John Chambers, Chairman, placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, George Th Gerdes and John Chambers aye. Nays. None. Whereupon the chairman declared the resolution duly adopted

WHEREAS, C. F. Merten, engineer, Wm. Boehnke and Walter Kahl, commissioners were heretofore appointed commissioners to view and classify lands and assess benefit in the water shed of DD No 144 Hancock County, Iowa, all in accordance with Section 455 45 Code of Iowa, A. D., 1946 and laws amendatory thereto.

WHEREAS, said commissioners did qualify as by law directed and did file their report on the 21st day of April A D., 1947, which report sets out the assessment against each tract and parcel of land and highways in the district.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of DD No. 144, Hancock County, Iowa, that the report of the commissioners heretofore appointed to classify lands in DD No. 144, Hancock County, Iowa, and to assess benefits for the construction of said districts is hereby tentatively approved and a hearing thereon will be held at the Courthouse in Garner, Iowa, on the 16th day of June A. D., 1947, at the hour of 1 30 P M. at which time taxpayers in said district will appear and show cause why said classification and assessment designed shall not be taxed against the lands in the water shed of Hancock County, Iowa Drainage District No. 144

All objections to such assessment shall be filed in writing in the office of the County Auditor in Garner, Iowa, at or before the hour set for hearing thereon.

The county auditor be and he is hereby directed to cause notice of such hearing to be published in the Leader and Signal, a newspaper of general circulation published at Garner, Iowa, setting out the names of the owners of said lands in Drainage District No. 144, Hancock County, Iowa together with the description of the real estate and the designated assessment, each tract, parcel of land, highway and railway in the district, is chrged with

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor Gerdes, whereupon John Chambers, Chairman, in the chair placed the motion of its adoption and upon roll call the vote thereon is F J Schoun John Chambers and George Th Gerdes, Aye Nays, None

Whereupon the chairman declared the resolution duly adopted

On motion and second the Board adjourned to May 2 A D, 1947 at 9 o'clock A M

FRED C MISSAL
County Auditor
JOHN CHAMBERS,
Chairman

VEGETABLE GARDEN WILL BENEFIT BY FERTILIZER

Vegetable crops require a much more fertile soil than do farm crops, reminds Larry Grove, Iowa State College horticulturist For this reason it is a good idea to apply manure and commercial fertilizer to your garden

Grove says it's possible to apply manure in the spring if the garden wasn't prepared last fall. A half-acre farm garden will take 3 or 4 tons of barnyard manure that is free from straw. Town gardens may be given compost or manure at the rate of 20 pounds per 100 square feet.

Chemical fertilizer may be applied in dry form, or they can be dissolved and applied as a liquid to the growing plants. If superphosphate (0-20-0) is used, it should be spread evenly with the hand before the garden is ready to rake. For best results it should be applied at the rate of 4 pounds per 100 square feet and raked in as deep as possible

Thorough raking of the garden will pay good dividends, Grove points out. Successful germination and strong seedlings depend to a large extent on how well the seedbed is prepared.

Tomatoes which are to be grown direct from seed in the garden should be planted now. The seed should first be treated with red copper ovide or some other good disinfectant or protective dust. Eight seeds should be planted per hill and later weeded out to one plant.

CHILDREN'S LUNCHES
BROUGHT FROM HOME
LUNCH BOX FITTED WITH THERMOS BOTTLE
1. Hot soup or stew—Milk.
2. A Nutritious sandwich.
3. Crisp carrots, or celery sticks.
4. Hard cooked egg.
5. Cup cakes, or cookies, and fruit.
PAPER BAG LUNCH — POOR AT BEST
Sanwich must be made very nutritious — Enrich breads Whole Wheat (not just bread labeled wheat.) Good fill- — meat, or egg.
Fresh vegetable wrapped in waxed paper — Carrot sticks cabbage wedges.
Hard cooked egg — an egg a day is far more important an an apple a day for growing children.
Fruit is a must — Apple, orange, or grapefruit.
Sweets? Yes, such as yellow sponge cake, oatmeal cook- or peanut brittle.
Lunches are carried it is very desirable that a hot dish or ik may be obtained at school — moreover, it becomes st important that the two meats ealen at home be highly ritious.

Ingenuity Solves Housing Problem

Cooperative Action Builds Homes for Yakima Vets

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

(Editor's Note: This is the first of four articles describing how veterans in different parts of the country managed to put roofs over their heads. The first deals with Yakima, Wash.)

WASHINGTON — There is one quality that is as thoroughly indigenous to America as potatoes, hot dogs, baseball or apple pie. That is ingenuity It often is alluded to as "Yankee ingenuity," but it blossoms from the Florida Keys to Puget Sound and from the purview of San Diego's farthest floating pelican to the northernmost quirk of St. John's river

Ingenuity is something that achieves the impossible There has come to my attention a number of stories on how certain communities have solved, with their American ingenuity, that seemingly unsolvable housing problem. I think some of the stories are worth repeating to you, and I'm beginning with Yakima, Wash., a town of 50,000 people which I haven't visited for 15 years, but which I can visualize clearly, resting contentedly in the heart of Yakima valley.

Baukhage

That vicinity furnishes many things from apples to polo ponies, but like many other communities in America, it didn't—until this spring—furnish enough homes for veterans. Formal dedication of a white, green-roofed, five-room house was the end of the first story I want to tell, a story with many a sequel.

Last fall there were 160 houses standing unfinished in Yakima for lack of plaster Many of the houses were unlivable, but with winter weather coming on and the housing shortage getting worse every day, some people tried to move into their uncompleted homes.

Yakima's mayor, M. K. Buck, knew that 200 low-cost homes (under $5,000) were needed for veterans as well as 1,000 higher-priced houses He consulted contractors, plaster sub-contractors, the plasterers' union, veterans' organizations and press and radio; gave them the facts, asked their help.

Sub-contractors agreed to move crews from commercial construction to the unfinished homes. They also agreed to transfer stocks of plaster being held for commercial building to veterans' housing The plasterers' union agreed to work only on veterans' housing when plaster was available Materials dealers agreed to sell rock lath and sheet rock for veterans' homes only.

The plan went into high gear when a carload of plaster—the first to reach Yakima in a year—came in one October night, consigned to a local lumber company. When the company manager arrived early in the morning, he found a crowd of veterans waiting for him. The local commander of the Disabled American Veterans checked the needs of each purchaser. The entire coarload was apportioned on the spot—to the place where it would do the most good.

Within a short time, 50 homes were completed—but 50 were not enough, so the mayor organized an emergency housing committee with a retired Baptist minister as chairman, veterans' organization representatives, a lawyer, a labor chief and three persons from local savings and loan associations.

The committee asked local builders and architects to design a house which would meet FHA standards and still be sold for less than $5,000. A large order in these days of high prices, but the committee turned up a practical plan. Four local contractors were interested and construction got underway. The local government housing expediter helped by organizing a "swap shop" where builders could find out who had some extra hardwood flooring, plaster or plumbing fixtures.

The Yakima contractor who completed the first of these new low-cost houses says he couldn't have built the house for the price if he hadn't had plenty of cooperation from everybody in the building industry. He saved money by using straight walls instead of offsets, and he simplified the cabinet work. But the most important thing was the cooperation he got from the unions who saw that he had the right men at the right time to do the jobs when they needed to be done. The contractor paid union wages to his workmen, bought his materials from regular dealers, made a fair profit for himself—and was still able to sell the house for $4,750.

Ex-Sergeant Colgan finds K.P. duty in his new house a pleasure. Ex-WAC wife Mildred says the kitchen is everything a kitchen should be—cross-ventilation and plenty of built-in cupboards.

The veteran who moved into the first house was Walter Colgan, a former army sergeant, and his wife, Mildred, who served in the WAC. They're very proud of their new five-room, two-bedroom product of American ingenuity and cooperation.

(Next week, Des Moines, Iowa)

Freshman Senators Make Mark

"I've never seen anything like it," my friend was muttering, "never in my 12 years on Capitol Hill."

My friend explained, "I mean the freshmen senators in this 'class.' The class of '47 I've never seen such activity among any group of baby senators before—the way these boys have pitched in to build major legislation; the way they handle themselves on the floor, presenting their points so effectively, and so on—"

It used to be the custom that freshman senators were seen and not heard. They were supposed to sit around for a year or maybe even two years, absorbing procedure and protocol, speaking when they were spoken to. But not the "Class of '47 "

My friend explained this unusual activity among the newcomers as due to two reasons.

One: There are so many newcomers—16 on the Republican side alone This means Republicans had to put newcomers on subcommittees. Subcommittees are small—three men, usually—and traditionally, the chairman of the subcommittee handles the legislation in question on the floor Thus this year's freshmen have had opportunities denied their predecessors.

Two: He points out that this year's crop of newcomers are unusually capable men. Under Roosevelt's large majorities, he said, "accidents" were apt to be swept into the senate—men who were put up by the party with no real confidence that they would be elected—but they rode in on the tail of Roosevelt's popularity.

According to my informant, there are very few "accidents" in this senate. One or two at the most, and even those, he says, aren't too bad.

He feels optimistic about the trend; thinks it's a good thing for the country. Most of the new "boys" are young—several of them in their early or middle forties. They've come straight from the people, and maybe they are closer to the people New house of representatives members, he says, can be trained to party teamwork under the type of strong leadership provided by Speaker Joe Martin, but the senate freshmen of '47 will never be led or influenced out of their independence of action. "Watch them," my friend predicts. "This class is going to be a notable one in the history of the senate."

BY THE SIDE OF THE ROAD . . . The grave of an "unknown brown and white doggie, victim of an intoxicated Christmas driver," is tended by neighborhood children. It is located at a busy intersection in Santa Monica, Calif. Curious motorists stop to read the inscription; then drive away carefully.

NEWS REVIEW

Anti-Strike Bill Drafted; Railroad Crashes Probed

LABOR BILL:
Plenty of 'Teeth'

A strike-control bill that would rigorously restrict labor unions in many ways has been approved by the house Republican steering committee. Its most drastic provision, perhaps, is a clause authorizing the federal government to obtain injunctions for a 75-day period in industries which affect public health or safety. This apparently would cover the telephone and other communication industries, coal mining, electric light and power companies, railroads and possibly several other fields.

The bill was prepared under direction of Chairman Hartley (Rep., N. J.) of the house labor committee. He told newsmen he hoped that the bill would pass the house within a week. It probably faces a struggle in the senate, observers believe.

The injunction feature is designed to give the government a stronger weapon against strikes imperiling public safety and welfare. The attorney-general would be empowered to seek a restraining order in federal courts which would require a 75-day "cooling off" period.

Other provisions would outlaw industry-wide bargaining and ban the closed shop. Unions would be required to keep dues low and to elect officials regularly by secret ballot. Communist-dominated unions would lose the recognition of the National Labor Relations board. Unfair labor practices would be investigated and prosecuted by a new agency—the Office of Administration of the National Labor Relations Act.

RAIL ACCIDENTS:
Daily Occurrence

Derailment of the Santa Fe's Super Chief in northern New Mexico, with injuries to 25 passengers but no fatalities, rounded out a week of railroad accidents reminiscent of the early days of railroading.

The Super Chief, one of the nation's most famous streamlined luxury trains, left the track near Raton, N. M., while traveling at high speed. The three-unit diesel locomotive broke loose and came to rest with its nose on the trestle of a dry river bed. The train was eastbound from Los Angeles.

Other accidents within a week:

April 3, Burlington's Twin City Zephyr derailed in Downers Grove, Ill.; three killed, 35 injured.

April 4, engine of Rock Island Rocket derailed near Linwood, Kas.; engineer injured.

April 5, Milwaukee road switch engine fell off bridge near Ottumwa, Iowa; crew narrowly escaped drowning in swollen Des Moines river.

April 6, Union Pacific's City of Portland collided with a freight near Granger, Wyo.; 11 injured.

April 7, Pennsylvania's Gotham Limited jumped track outside Columbia City, Ind.; 40 injured.

April 8, Pennsylvania's Manhattan Limited derailed; passengers shaken up.

FRANCE:
Trouble in Colonies

Rioting and revolts in various parts of the French empire have prompted the French cabinet to strengthen the army. To this end President Auriol has called up conscripts of the 1947 class on May 15, several months early.

An uprising in Algeria has brought promises of reforms. Interior Minister Depreux has gone to the North Africa country to make swift changes to pacify the rebellious Kabyle tribes and to quiet general unrest.

War Minister Paul Coste-Floret has demanded additional troop reinforcements to cope with trouble spots in Indo-China, Madagascar, Algeria, Morocco and several African protectorates.

BIG EGG . . . This speckled Brahma hen, owned by Mrs. Evans Mealing of Glen Cove, L. I., N. Y., is the new champ of egg layers. She laid a 14-ounce egg, seven and a half inches in circumference, which is shown beside one of ordinary size.

RELIEF IN SIGHT

Building Costs To Level Off

NEW YORK.—Construction costs have reached a peak after soaring to all-time highs during the post-war period, it is revealed in a survey covering 268 general contractors

Fifty-three per cent of the contractors queried in the poll, which was made by F. W. Dodge corporation, expressed belief that building costs have reached their highest peak, and a majority felt that costs will stabilize below present levels.

It was pointed out that, with exception of lumber, cement, structural steel and cast iron soil pipe and fittings, prices for most building materials have tended to remain steady since the start of the year.

Only in the Pacific states was opinion general that further gains of from 11 to 12 per cent would be witnessed in 1947.

According to the survey, labor inefficiency caused by an irregular flow of materials, construction delays imposed by an inadequate supply of skilled workers, and an excessive expenditure of time in shopping for and obtaining materials are major contributing factors of today's high construction costs.

Of the reporting contractors, 43 per cent said the average wage of some building craftsmen in their areas of operation had increased since the first of the year, and 76 per cent said that they expected increases later in the season.

In the aggregate, the general contractors reported that 34.6 per cent of their present work, by dollar volume, is being done on a lump-sum basis, while the rest is being handled on cost-plus-fixed-fee contracts.

IN THESE UNITED STATES

Famed Azalea Gardens Recall Beauty and Quiet of Old South

WNU Features.

NORFOLK, VA.—It's spring again and Norfolk's azalea gardens are in bloom.

Eighty acres of floral and woodland beauty bid the visitor to old Virginia welcome to a beauty spot which many lovers of nature claim is unrivaled anywhere.

Within a few minutes' drive of the business section of Virginia's hustling seaport city and actually within sound of giant airliners taking off from Norfolk's airport, the azalea gardens are a step to yesterday—to the beauty and quiet of the Old South where nature stages a pageant that man can only admire but cannot hope to reproduce

More than 50,000 azalea bushes, planted so as to give continuous blooming from about April 1 to about June 1, are the principal attraction at the gardens but they are only a part of the beauties there. Tall trees and quiet lakes and flowers other than azaleas combine to form a silent symphony of nature at her best. Song birds in profusion add their voices to the scene.

The azalea gardens, a part of Norfolk's park system, are located along the shores of Norfolk's lakes which form a perfect water mirror for the flowers. The area has been landscaped with paths and foot bridges to make all sections of the gardens available to visitors.

The gardens began their spring blooms in March when camellias, Japanese quince and forsythia preceded an avalanche of naturalized daffodils and bluebells.

In April five varieties of Indian azaleas and six varieties of Kurume azaleas bloom under a canopy of native dogwood, redbuds, shadbush and other plants.

Riot of Color.

May sees azaleas macrantha and hexe at their best with accompanying plants being mountain laurel, columbines and Louisiana wild iris.

In June the flowers grow near the water's edge. The colors of the rhododendron catawbiensies and the flame azalea compete with those of the Japanese iris close by the shores.

Wild flowers bloom in profusion in July. Included in the wild flowers in the azalea gardens are the beautiful cardinal flowers which present a contrast to the rhododendron maximum.

Lovers of the crape myrtle, which is Norfolk's adopted flower, will find that plant at its best in August when its blooms appear in bold masses in many parts of the gardens.

In the fall, thousands of berry shrubs, including four varieties of hollies, nandinas and pyracantha, supplement the autumnal tints of the woodland.

The gardens as they exist today are a result of the dreams of Frederic Huette, director of the Norfolk bureau of parks and forestry, and Thomas P. Thompson, former city manager.

Admission to the gardens is free, and when the azaleas are at their best as many as 13,000 persons have visited them in one day.

Army Bows Out.

The azalea gardens have been recognized by the army as having priority over the pressing needs of war emergency In 1942 the army staked out a construction project in the area and planned a series of buildings which would encroach on the actual garden properties. City officials, garden clubs and other organizations rallied to the defense of the gardens and the army, despite the pressure of war in 1942, changed its plans and erected its buildings elsewhere.

At that time Huette voiced the feelings of nature lovers the world over when he said:

"Not all the government's billions can replace a 50-year-old oak, a 25-year-old pine or a 20-year-old gum."

The azalea gardens are but a small part of the attractions of the Norfolk area for the tourist. The lakes on which they are located are a veritable fisherman's paradise and while fishing is not permitted in the gardens themselves, it is permitted close by

Numerous Attractions.

Within 20 minutes' driving time are Virginia Beach in one direction and Ocean View in the other In the general Tidewater area are such points of interest as the Williamsburg-Jamestown-Yorktown historical section, naval establishments at Norfolk and Portsmouth, the waters of Hampton Roads and the scenic grandeur of the Great Dismal Swamp. Not far away also are the rugged Outer Banks of the North Carolina coast.

As another lure to visitors, Norfolk points to its food, which is universally acclaimed as a delight to the visitor and homefolk alike, whether it be saltwater delicacies from the deep or the famed Smithfield ham and Virginia fried chicken, ably supported by candied yams, black-eyed peas, turnip greens and peanut soup.

Firemen Get Lost, Miss Two Blazes

FRANKLIN, IND. — Chalk up a double error for the Franklin fire department after firemen lost their way to one fire and completely missed another. Summoned to the rural J. B. Hicks residence, firemen took the wrong road. When they finally arrived at the Hicks home, neighbors had extinguished the blaze. Meanwhile, a dairy barn in town was gutted by flames.

"Off We Go"
AVIATION NOTES

AIRPORT CHATTER

At Corvallis, Ore., a justice court acquitted John R. Cattron, pilot, of chasing geese in an airplane State game enforcement officials charged that Cattron apparently was trying to fly wing formation with a flock of geese near the Corvallis airport. . . . Construction is underway on a new airport at Maquoketa, Iowa. Plans call for two runways, one of which will be 2,000 feet in length, and a 30 by 80 foot hangar. . . . Airplanes are playing a significant role in development of a pheasant hatchery operated at Greenwood, Del., by E. D. Brasure Jr. Brasure utilizes air express to ship his turkey poults to Michigan, Louisiana, Texas and other states. Brasure, who has shipped several thousand pheasants by air, reports that not a single one has been lost in transit. . . . Although shipping of baby chicks, poults and hatching eggs by air has become almost commonplace in recent years, it is seldom that poultry feed moves through the "wild blue yonder." That is what happened in the vicinity of Nashua, N. H., however, when an acute feed shortage impended. A shipment of feed by air was credited with saving a number of valuable breeding flocks.

• • •

The Iowa Flying Farmers organization is really soaring—in membership at least. The group, which will note the first anniversary of its founding in June, already has exceeded the 500 mark in membership. The total, according to Howard Hill, president, exceeds that of any other three states in which Flying Farmers are organized. As one of its major projects, the Iowa group issues a monthly magazine to keep members posted on opportunities for rural farmers.

• • •

FAMILY PROBLEM

The flying Hicks family of Talladega, Ala., doesn't have the usual one-car family trouble. That is eliminated because the father, City Commissioner James L. Hicks, owns an automobile agency. The Hicks' arguments instead concern use of the family planes. There are two airplanes in the family, but Hicks, three sons and one daughter all have their fliers' licenses.

• • •

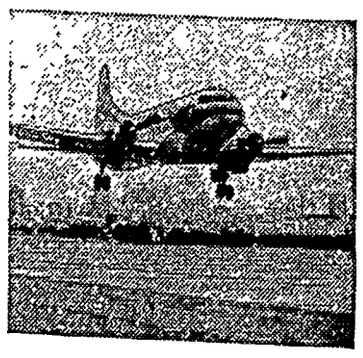
A new type of drunken driver—drunken airplane pilots—got legislative attention in Wisconsin. A bill was introduced in the state assembly providing for fines of $10 to $100 for the first offense and $100 to $500 and six months' imprisonment for a second offense by drunken or reckless pilots.

• • •

WHITE GRASS

Scientists have been urged to develop a snow white grass. The suggestion was made by some plane-piloting Illinois farmers. If they can't get white grass, they'll settle for grass of some other color that would plainly mark runways on rural landing fields.

• • •



NEW TRANSPORT . . . First of the Consolidated Vultee Aircraft corporation's new Convair-240 commercial transports will be delivered in June. The new plane is America's first 300-mph, twin-engine, pressurized and air-conditioned, 40-passenger transport using jet exhaust propulsion for added cruising speed.

• • •

AIR LETTERS

Effective April 29, a new 10-cent "air letter service" to all parts of the world will be inaugurated by the postoffice department. The service calls for use of air letter sheets, purchasable at post offices. The thin sheets, measuring 12 by 8½ inches, may be folded and sealed into the form of a small envelope. The letter will bear a 10-cent airmail stamp of the same DC-4 design as the 5-cent airmail stamp. Present minimum charge for letters mailed abroad is 25 cents.

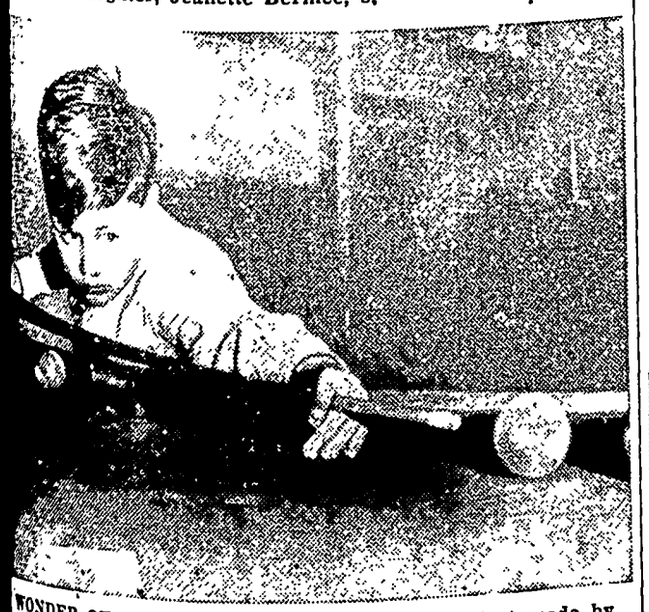
THE WALK AT SCHOOL . . . Nonchalant as a deb on Fifth "Mr. Jeffrey" a rooster whose feathered feet give him a le facsimile of the Chaplin walk, struts down the aisle be- ks at Public School 97, Brooklyn, while the students look on e and admiration. "Mr. Jeffrey" is one of the group of furred ered tourists, making the rounds of schools in the New York lecturers from zoo.

TILES OF TOMORROW . . . Don't laugh, these may be the sses that you will be seeing in the near future. The distressing shown here were concocted of birthday candles, balls, bed- lles and what-have-you. They were featured in hairstyle show Angeles, given for benefit of spastic children. Models, left to ront, Jean Pagano, Dorothy LePle and Sally Wadsworth. Rear, Bennett and Pricila Wilsey.

ROVERSIAL HEN . . . The "eggcentricities" of Mrs. Babe, Island Red hen, which lays too many lop-sided eggs, have made e center of controversy at Fresno, Calif. Alex Pretzer threat- to send Babe to the block. Leader of the pro-Babe faction Pretzers' daughter, Jeanette Bernice, 8.



WONDER OF BILLIARDS . . . Emulating the start made by Hoppe, the original "boy wonder" of billiards, even to the way his cue, Jimmy Cottrano Jr., 8, Flushing, L. I., N. Y., already excellent billiard player and consistently defeats grownups in ions. Jimmy secured his early start by expert coaching of his , who is a well-known New York billiard player. Jimmy says soon enter national tournaments.

'THE LIP' OUSTED . . . Commissioner A. B. Chandler, czar of baseball, announced that for the good of baseball, Leo Durocher, manager of Brooklyn Dodgers, has been suspended for the 1947 season. "Accumulated unpleasant incidents" was the reason given.

ENVOY TO IRELAND . . . George A. Garrett, Washington D. C., investment broker, who has been named by President Truman as new U. S. minister to Ireland. He will succeed David Gray, who recently retired.

MASTERS GOLF WINNER . . . Jimmy Demaret, 35, Ojai, Calif., the former Texan crooner, who won the 11th masters golf championship for the second time. His score for the 72 holes was 281, seven under par.

HE KILLED MUSSOLINI . . . Walter Audisio, known in wartime partisan circles as "Colonel Valerio," is shown as he told 10,000 Communists how he personally executed Benito Mussolini and Clara Petachi.

DE GAULLE'S COMEBACK . . . Gen. Charles de Gaulle, spearhead of the French die-hard spirit when France was overrun in 1940, shown as he delivered address at Bruneval, France, as part of his comeback against French Communists.

HOUSEHOLD MEMOS... by Lynn Chambers

Save Your Sugar For Canning, but Bake Sweets, Too

If you need luscious chocolate cookies quickly, make these, which take so few minutes to bake and frost. Children adore them and your guests will give them an encore.

The oldest of our rationed commodities is still with us even though the situation has eased to a certain extent. The sugar bowl is, perhaps, still not as full as we would like to have it, but we can still manage to have our sweets and still save enough for canning if we are watchful.

The youngster will still come in peeking into the cookie jar, and we still have guests who like a bit of a sweet as they spend an evening of conversation or games with us. For these purposes I have selected some recipes which we will all find useful.

For the cookie fans, here are some recipes which are bound to please:

Molasses Cookies.
(Makes 75)

- ⅓ cup shortening
- ½ cup molasses
- ½ cup brown sugar
- ½ cup thick sour milk
- 3 cups sifted flour
- ¼ teaspoon salt
- 2 teaspoons baking soda
- 1 teaspoon ginger
- 2 teaspoons lemon extract

Mix shortening which has been melted with molasses and sugar and stir until smooth. Add sour milk, then sifted flour with salt, soda and ginger. Add lemon extract. Mix until smooth. Chill until firm. Roll dough on a lightly floured surface to ⅛ inch thickness and cut into assorted shapes, as desired. Place on a greased baking sheet and bake in a moderate (350-degree) oven for 8 to 10 minutes. Roll thinner if crisper cookies are desired.

Chocolate Frosted Cookies
(Makes 3 dozen)

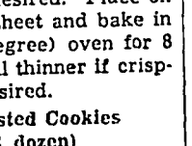
- 1½ cups sifted flour
- 1½ teaspoons double-acting baking powder
- ½ teaspoon salt
- 3 squares unsweetened chocolate
- 4 tablespoons butter
- ⅔ cup sugar
- 1 egg, unbeaten
- ⅔ cup milk
- 1 teaspoon vanilla

Sift flour once, add baking powder and salt and sift again. Melt chocolate and butter over hot water; add sugar and mix well. Add egg and beat thoroughly. Add flour and milk alternately and mix until smooth. Add vanilla. Drop from teaspoon on greased baking sheet and bake in a moderate (350-degree) oven for 7 minutes. When cold, spread with fudge frosting and place a half pecan in the center of each.

Quick Fudge Frosting.

- 3 squares unsweetened chocolate
- 2 tablespoons butter
- 12 marshmallows, cut in pieces
- ¼ cup water
- Dash of salt
- 2 cups sifted confectioners' sugar
- 1 teaspoon vanilla

Place chocolate, butter, marshmallows, water and salt in saucepan. Heat over low flame until chocolate and marshmallows are melted and mixture is smooth and well blended. Remove from fire and add remaining ingredients. Beat until of right consistency to spread. Use on chocolate frosted cookies or to cover top and sides of two eight-inch layer cakes.



With just ½ cup of sugar and the use of a sugar substitute, you can satisfy the sweet tooth with no less than 30 delectable cup cakes:

LYNN CHAMBERS' MENU

Vegetable Platter:
Asparagus, Cauliflower
Tomatoes and Corn
Toasted English Muffins
Deviled Eggs
Molded Grapefruit Salad
Beverage
*Strawberry Pie

*Recipe given.

Plain Cup Cakes.
(Makes 30)

- 2 cups sifted cake flour
- 2½ teaspoons baking powder
- ¼ teaspoon salt
- ⅓ cup shortening
- ½ cup granulated sugar
- ½ cup corn syrup
- 1 egg, unbeaten
- 9 tablespoons milk
- 1 teaspoon vanilla
- ½ teaspoon lemon extract

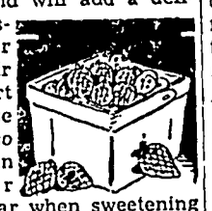
Sift together flour, baking powder and salt. Cream shortening and sugar together until light and fluffy. Work in corn syrup and beat until light. Add ¼ of flour mixture and blend in thoroughly. Add unbeaten egg and beat thoroughly. Add remaining flour and milk alternately, beating smooth after each addition. Blend in vanilla and lemon extract. Turn into greased and floured muffin tins and bake in a moderately hot (375-degree) oven for 25 minutes or until done. Frost as desired.

Sugarless Chocolate Icing.

- 2 squares unsweetened chocolate
- 1 can sweetened condensed milk
- 1 tablespoon water
- Dash of salt
- ¼ teaspoon almond extract

Melt chocolate in top of double boiler. Stir in gradually the condensed milk and cook 5 minutes over hot water. Stir until smooth. Remove from heat and add water, salt and almond extract. Cool and frost cup cakes.

Strawberries are here in all their bright gayety and will add a delicious sweet dessert to your menus for their extremely short season. Because the berries are so sweet, you can take it rather easy on the sugar when sweetening them. In fact, many people find them so sweet that they use no extra sweetening at all



Berries like strawberries, which are naturally sweet, need little extra sugar. Plan to serve them in pies, tarts and as shortcake as often as possible during their short season.

***Strawberry Pie.**

Prepare 1 baked 9-inch pie shell. Just before serving, wash and hull 1 quart of fresh strawberries. Sweeten lightly to taste and then fold into ½ pint of cream which has been whipped. Spread in pie shell and serve. Or sweeten berries to taste and fill baked pie shell. Top with whipped cream which has been garnished with whole berries.

Winter pears make tasty pies for jaded spring appetites. For something a little different, try this French Pear pie.

French Pear Pie.

- 6 cups sliced fresh winter pears
- 2 tablespoons lemon juice
- ⅓ cup corn syrup
- ⅓ cup sugar
- ½ teaspoon ginger
- 2 tablespoons flour
- One 9-inch unbaked pastry shell

Select pears which are firm but not hard. Peel, core, slice. Mix with lemon juice, corn syrup, sugar, ginger and flour. Place in pastry-lined pie plate.

Topping.

- ⅓ cup shortening
- ½ cup brown sugar
- 1 cup flour

Cream together shortening and sugar. Mix in flour. Spread over pears in pie shell. Bake at 375 degrees for 45 minutes, or until pears are tender and topping is brown. Eight servings. Serve warm or cold.

Released by Western Newspaper Union.

LYNN SAYS:

Try Pleasing Variety
In Everyday Foods

A dash of lemon juice is good for bringing out the full flavor of almost any kind of fruit or berry pie.

When you want a combination fruit pie, try one of these pairs: pineapple and raisin, pineapple and cherry, cranberry and pineapple, apple and pear, apple and cranberry, apricot and pineapple, apple and raspberry, or strawberry and rhubarb.

Make pastry ahead of time and allow to chill before adding the water if you like the crust flaky.

For cream pies, be certain the filling as well as the pastry shell is thoroughly cooled before putting the two together.

When you make an attractive red berry pie, always use a lattice crust so that the beauty of the berries can be seen immediately.

If you do not want a top crust or crumble topping, make a lattice top out of the scraps of pastry. This is easy on your budget too.

SEWING CIRCLE PATTERNS

Pretty Frock for Graduation Cover-Up Apron Easy to Sew

Slim Waister

THIS wee-waisted junior frock is ideal for graduation in June. Two rows of dainty lace or ruffling edge the brief sleeves, the full dirndl type skirt is a favorite in every teen-age wardrobe. You'll wear it for dates, too, all summer long.

HOUSEHOLD HINTS

Clean up suede hats, bags, etc., before putting them away. Remove grease stains by sponging with a cloth dipped in vinegar. When dry, restore nap by brushing with a stiff-bristled brush.

—•—

Clothes closet shelves look very smart when painted one color with a line of enamel in a contrasting color run along the edge. For example, a gray shelf with a fuchsia color edge.

—•—

To glue in the proper manner, wood surfaces must be completely dry, free of moisture, oil, or paint.

—•—

Place a shoe-box cover in the bottom of your paper or corded shopping bag. This gives a solid foundation to stand on counter or floor and prevents liquids from trickling out of tipping containers.

—•—

Umbrellas folded up when damp are likely to mildew. The next time you come in out of the rain, leave your umbrella open while it dries. Then put it away in a cool, dry place. It will last longer, and not leak through when you need it.

Mrs. Roy Arnold entertained from Friday until Saturday the Misses Gertrude Johnson and Alice Cross, teachers from New Hartford, Iowa.

Last week the Northern Implement Store improved their place of business by building a concrete platform in front of the store which can be used for displaying machinery.

George Rule of Dow City came Saturday evening and visited until Sunday evening at the home of his son-in-law and daughter, Mr. and Mrs. Gerald Koerner.

Mrs. Marie Nagel, Mrs. Atlanta Thompson , Mrs. John Clements and boys and Mrs. W. F. Pavey were Mason City visitors Friday. Mrs. Thompson left from there for Marshalltown for a visit.

BINGHAM CHAMPIONS MET

The monthly meeting of the Bingham Champions 4-H club was held at Ben Limberg's home on April 21. Fourteen members were present. It was decided to hold the next meeting at Alton Limberg's on May 26. A group picture of the club was taken before the meeting. The club decided to order T-shirts with the 4-H emblem and the club name on them.

Charles Bird was selected to represent the Bingham Champions as a nominee for the State Conservation Camp at Camp Mitigwa.

A discussion was held on health.

Chemicals Arrive For Spraying In North Iowa Counties

John O. Mullins, President, Mullins Hybred Service Company, Britt, Iowa, this week announced the arrival of three carloads of spray chemicals for use in the control of insects and weeds throughout northern Iowa.

This shipment, one of the largest to ever be received in northern Iowa, which includes DDT, 24D and Sinox, is part of a total of seven carloads arriving to be used by a group of 36 aggressive young veterans participating in the Mullins spray program.

Each man has been equipped with new modern spraying equipment that is adaptable to all types of spraying for farm and cities.

These men have just completed an extensive course of study in the use of modern chemicals and method of application. Bob Hartzell and Aaron Wille have taken the training and will service this part of the country. Altogether, some forty veterans have been trained to operate spraying outfits in nine north Iowa counties.

KLEMME LOCAL NEWS

Phone your news to 12.

Mr. and Mrs. E. H. Patet called at the Gus O'Krueg home at Goodell Sunday evening.

Mrs A. H. Dulmes and Mrs. Harvey Barz were Mason City visitors Friday afternoon. They were accompained by Mr. A. L. Kingery who drove over to bring Mrs Kingery home from the hospital. Mrs. Kingery had been receiving treatment for several days.

Boone Magor Pals Met

The Boone Magor Pals 4-H club met at the home of Mrs. Phil Puffer Saturday, April 19, 1947 for their regular meeting.

The Roll Call was answered by "One improvement in my room" by fourteen members. There were also two leaders and one mother present.

Joan Bonnstetter gave a talk on "Shortcuts to drying of curtains to take the place of ironing." Ailene Oxley reported on "A Young Girl Peeling Apples," and Karen Hain told us about "Saskia" Mrs. Bonnstetter gave us the lesson on refinishing chairs.

Recreation was in charge of Madge Scott.

—Ardys Bailey, reporter

Liberty Busy Bees Met

The Liberty Busy Bees 4-H club met at the home of Darlene Schultz Saturday, April 19. Roll call was answered by nine members.

We had a discussion about the county banquet, if we wanted it semi-formal or formal and when. We decided that we wanted it formal in the spring.

The club voted Dorothy Moll to be the girl who might have a chance to go to the State Camp.

Talks were given by Vivian Stromer on "How to Launder Sacks." The other one was given by Dorothy Moll on "Good Color Scheme for A Girl's Room."

Picture studies were given by Mary Joan Haberkamp and Beverly Haberkamp.

The leaders gave a demonstration on how to make book covers. Afterward each member made book covers. Lunch was served by the hostess.

CONTRACTOR FINISHES DRAIN DITCH PROJECT

William Henschen, engineer, advises that Joe Needles, Greenfield contractor, has completed the construction of Hancock county drainage district No. 143 in Ellington township petitioned for by Fred Meinacke et al. A final hearing on the report of the engineer will be held at the courthouse May 5.

DITCH REPORT OK'D

C F. Merten, engineer, William Boehnke and Walter Kahl, who were appointed a classification and assessment commission on drainage district No. 144, have completed the assessment and classification and their report was approved by Hancock county supervisors Monday. A hearing on their report will be held by the board June 16.

Britt Man Appointed Weed Commissioner By Hancock County Board

Ray Hunsley of Britt was reappointed Hancock county weed commissioner for 1947 by the supervisors Monday. Hancock county has been operating on the county weed commissioner plan for a number of years.

Statesmanship Of Governor Robert Blue

Governor Robert D. Blue's address to the delegations of Labor unions, which converged upon the Legislature, April 21st, has been described all the way from "great" to "marvelous." The Governor, upon invitation from the visitors, spoke from the west steps of the capitol and extended a welcome to an estimated 7,000 to 12,000 people. The address is declared by supporters and non-supporters to belong on the higher levels of statesmanship. With characteristic frankness and certainty of conviction, the Governor demonstrated his capacity to head the great state of Iowa. Nothing he has done since becoming Governor has brought such great and favorable responses Union labor members are among those who have written their praise of a Chief Executive courageously remembering the two and one-half millions of Iowans in the presence of any large or small pressure group.

The demonstration by labor was an orderly one. Indeed the conduct of the visitors was superior to that of some of the Legislators who professed to speak for them. This was a case of so-called leaders operating on a level below that of their hearers. But there were indications that, in many ways, labor is growing up. The evolution from violence to votes; brutality to ballots; and rabidity to reason; is in evident process.

CONTROL CARROT WEEVIL AND RUST FLY WITH DDT

Some sections of Iowa havn't been able to produce storable crops of carrots in recent years because of the carrot weevil.

That weevil, as well as the carrot rust fly, can be controlled by DDT, says Harold Gunderson entomologist. He says the proper treatment is to sprinkle 8 oz. of 3 percent DDT dust per 30 ft. of row at the time of seed planting.

The same treatment should be affective against the cabbage maggot which hits cabbage and radishes, he believes.

Evangelical & Reformed Church

Calvin Groeshuesch, Pastor

10:00 A. M. Morning Worship.
11:00 A. M. Sunday School.

Rev. G. H. Gebhardt of the Fort Wayne Orphans Home will be speaker. Offerings in both services will be for the Orphans Home.

3:00 P M. Youth Rally at Hubbard Evangelical and Reformed Church. No meeting in Klemme Sunday evening.

Wednesday:
2:00 P. M. Women's Guild.
8:00 P. M. Choir.

Thanks for sending in your news items.

EST HENSCHEN BUILD- G GARAGE FOR TRUCKS

rnest Henschen, Klemme representative, last week a crew of men at work put- in concrete footings for a 32 building across the street the Pavey repair shop. e new building will be built ollow clay blocks and will rge enough to accomadate of his oil tank trucks and some space for storage.

Buys New Truck

Henschen has also added tank truck to his equip- His new truck is 950 capacity and has six e cells.

dy Group Will Meet

Mission Study Group of ethodist Church will meet home of Mrs. E. H. Patet ursday, May 8th at 2:00 p.

HELLO, FOLKS!

e 6 months old girl came e her home with Mr. and enneth Gast near Garner, y. Mr. and Mrs. Gast amed their new daughter ay. They also have a ger, who is now 6 years

A Bouquet For Albert Kraus

We think Albert Kraus deserves a bouquet for his part in keeping Klemme clean. Albert has a farm about a mile from town. Each spring Albert comes to town in his truck and begins to haul ashes to his farm yard to fill mud holes and have good dry driveways.

Mr Kraus has never charged for his services and feels amply repaid for the ashes and cinders he takes to his farm. He has been doing this for several years and we think he should have a hand of applause from the citizens of Klemme

4-H MEMBERS TO ENTER EXHIBITS IN EGG SHOW

Turtles can hide under their shells but the shell of an egg hides no secrets from 4-H members who are preparing their entries for the Midwest Chick Egg and Poultry show at Iowa State College, May 15 to 17

Members won't pick their specimens until next week—just in time to get them to the show ahead of the closing hour But this week they are holding a lot of eggs before the candler, just for practice.

A special invitation for 4-H members to exhibit at the show has been extended by its sponsors—the Poultry Club at Iowa State College. Any 4-H member may enter, whether or not he or she is enrolled in a poultry project.

Members are encouraged to take part in the show because of the experience they will receive in selecting a sample To prepare a suitable show specimen the member must pay attention to quality, Henderson points out These same qualities are important in eggs sold on the market and becoming familiar with quality is a important part of 4-H member's educational training, Henderson emphasizes.

Algona District Speaking Contest Held At Klemme Church

The Algona District Speaking contest was held at the Klemme Methodist Church last Sunday in the morning worship service It was the National Public speaking contest for Methodist youth with about 5,000 youths participating across the country There were three contestants from this district who spoke here Sunday, namely: Miss Janice Haupt of Rowan, winner of first place, Miss Rose Schaefer, Klemme, and Miss Maxine Tryon, Titonka, who tied for second place in the district. Janice spoke on "World Service Through Medical Service." Rose spoke on "Life and Stewardship." Maxine spoke of "The Methodist World Service Through Tithing."

Miss Haupt went to Storm Lake in the afternoon to compete in the Northwest Iowa Contest. Four winners from the Conference will go on to the Jurisditional meet. Besides learning much about what the church is doing for World Service, the winner will receive prizes up to $500. in cash with four year scholarships to the college of their choice. Rev. H. E. Harvey presided over the District Contest on Sunday and led the worship service.

The judges of the contest were Mr. Claude White, Mrs. Roy Arnold and Mrs. Ernest Lewis.

Working On House

Last fall Henry Wessels moved a house in from the country to the lot just north of the John Clements residence. The past week Mr. Wessels has had the foundation built, a cement floor put in and a grade entrance built. He will have a nice house when all of the plans have been carried out.

LIBERTY GO-GETTERS MET AT PAUL ZROSTLIK'S

The Liberty Go-Getters boys 4-H club met at the home of Paul Zrostlik, Monday evening April 28. The boys discussed regular meeting schedules, weed control and the conservation activity each Hancock County Boys 4-H club is doing for 1947. Moving pictures on Fly and Weed Control were shown by Paul Henderson, County Extension Director

Madison Township Meeting

The Madison Township meeting was held at the Center School May 2, 8:00 p. m. with approximately 75 people in attendance Lloyd Smith, from the State Office, Gasoline Tax Refund Division, was the main speaker of the evening He presented a very interesting talk about his duties and experiences in his line of work Everyone enjoyed the musical part of the program which consisted of a duet and quartette, composed of local talent. Delicious refreshments were served by the committee

Ellington Township Meeting

The Ellington Township meeting was held at the Center school on April 30 at 8 00 p m. The guest speaker was Mr. Hepner, vocational agriculture teacher at Forest City. He gave an interesting talk on how to save time, labor and money in the raising of poultry Chas. Jackson, the County Organization Director, talked about the services offered to Farm Bureau members. Paul Henderson, County Extension Director, showed an interesting picture on the control of weeds and explained the use of DDT and 2-4-D A delicious lunch was served by the committee.

Dog Taks Long Ride

Rivets, the little doy belonging to Donald Schaefer, son of Mr and Mrs. Roy Schaefer, arrived Sunday morning from Casablanca, French Morocco, North Africa to make his home on an Iowa farm. He came by plane from Africa to Atlantic City and then by train the rest of the way.

DEPUTY RETURNS

Deputy County Auditor Myrtle White, who has been clerk for Hancock County Representative Penn Eckels during the recent session of the Iowa legislature, returned to her duties in the office of the county auditor Wednesday. Miss White had a leave of absence for the duration of the session of the Iowa legislature.

Shamrocks Lost In Sectional Tournament Play

The Klemme Shamrocks were defeated 7-3 in the first round of the sectional baseball tournament at Garner Saturday by Ventura.

IOWA TRAPPERS NET TWO MILLION DOLLARS

Iowans, for the third time in four years, exceeded the two million dollar mark in furs trapped during the 1946-47 trapping season, according to G. L. Ziemer, Director of the State Conservation Commission. During the 30 day muskrat season and 60 day season on other protected fur-bearing animals, a total of 630,748 pelts valued at $2,003,965 61 were taken.

There were 18,000 licensed trappers during the season, plus approximately an equal number who trapped on their own land where no license is required.

Mink, for the second time, exceeded in total value the muskrat wnich in the past has been the number one fur-bearing animal, 60,397 taken brought $1,095.58 with an average pelt price of $18 14 Muskrat numbering 387,614 at $1 71 average Iowa farm boys and professionals $662,819.94.

All furs were considerably lower in average value during the past season with beaver decreasing $17.49 each and mink taking a drop of $10.02.

SPRING CLEAN-UP IMPROVES APPEARANCE OF KLEMME

This is Clean-Up week in Klemme and with the good weather the past week most Klemme people got their yards raked and cleaned and gardens made ready for planting.

Town officials remind residents of Klemme that ashes and rubbish can be dumped free at the town dumping grounds this week only. After this week a fee of $1 00 per load will be made for dumping, and the dumping grounds will be open only on Saturdays.

Make arrangements this week to have your rubbish and ashes hauled away.

Officials also point out that residents are expected, not only to clean up their own yards, but to clean the alley and street adjoining their lot.

Let's make Klemme a clean town by going all out for the annual clean-up campaign.

COOP. OIL ASSOCIATION BOARD REORGANIZED

Several changes were made recently in the personnel of the Hancock County Cooperative Oil Association. Board of directors and officers, with one new director added.

Emil Ollenburg is now president, Carl Woiwood, vice-president; Emery Brown, secretary and Roy Railsback, treasurer. Mr Railsback was elected new director.

Retiring from the board after many years of service are Chas. Grau, former secretary and Wm J Barz, former treasurer and manager.

Roy Railsback is manager of the company, which office he has held for several months.

BEST DEFENSE AGAINST RABBIT IS WIRE FENCE

The best defense a gardener has against a rabbit is simly a well-staked chicken wire fence.

Since the rabbit is classified as a game animal he can't be shot out of season nor poisoned legally.

For those who don't have wire fence, Harold Gunderson, Iowa State College entomologist, advises a rabbit-repellent. He says the succulent green shoots of young plants aren't a bit attractive to a bunny after they have been dusted with sulfur.

Nicotine sulfate, mixed with a teaspoonful to a gallon of water and sprayed on the plants, is equally effective, he says.

Biggest trouble with repellents is that they wash off in a rain and have to be applied again.

Iowa farmers who heve established farm woodlot areas are entitled to a tax exemption on the forested area.

LAKES CLOSED TO MINNOW SEINING

The State Conservation Commission has closed 39 state-owned lakes to minnow seining in an effort to increase the natural food supply in these lakes.

The following are closed for the 1947 season: Spirit, West Okoboji, East Okoboji, Upper Gar Lowar Gar, Minnewashta Center, Silver Marble, and Hottes lakes in Dickenson County; Silver, Lost Island, Five Island, and Mud lakes in Palo Alto County, High Lake in Emmet County, Clear Lake in Cerro Gordo County, Storm Lake in Buena Vista County; Black Hawk in Sac County; North Twin and South Twin lakes in Calhoun County, Upper and Lower Pine lakes in Hardin County; Blue Lake in Monona County; Lake Manawa in Pottawattamie County; and Brown's Lake in Woodbary County; Silver Lake in Delaware County; Beeds Lake in Franklin County; Swan Lake in Carroll County; Springbrook Lake in Guthrie County; Lake of Three Fires in Taylor County; Lake Ahouabi in Warren County, Red Haw Hill Lake in Lucts County; Lake Keomah in Mahaska County; Lake Wapello in Davis County; Lacey-Keosaqua Lake in Van Buren County; Lake Macbride in Johnson County; Backbone Lake in Delaware County; Echo Valley Lake in Fayette County; Mill Creek Lake in O'Brien County; Union Grove Lake in Tama County.

MINNOW AND FROG SEASON OPENS MAY 12TH

The season for taking frogs and minnows opens May 12 While there are no catch or possession limits on minnows, conservation officals are definitely concerned with the minnow shortage in many parts of the state and ask sportman to cooperate in relieving this condition by seining only as many for bait as are to be used in the immediate future.

The daily catch limit on frogs is four dozen, possesson limit eight dozen.

CROPS DELAYED IN HANCOCK COUNTY, READY TO PLANT CORN

Windy and sunny weather of the past week helped to speed up farm work by drying the ground Farmers were in full swing getting ground ready for corn and bean planting.

Farm work was delayed considerable this year because of the bad weather in April, which piled up the work and delayed sewing of oats. The oats crop will thus be cut down this year.

Pastures were likewise behind schedule and stock was kept out of the pastures to give the grass a start. This required more feed for cattle in the barns and stock lots.

If the weather warms up, a number of farmers will plant their corn this week.

KANAWHA PLAYS BALL GAME HERE SUNDAY

The Klemme Merchants baseball team will play the Kanawha Independents on the home diamond Sunday. The game is scheduled for 2:00 p. m.

Last Sunday the Merchants lost to Belmond there 11-10 in an eleven inning ball game that was close throughout. "Red" Buntenbach and Terry Peck both thrilled the crowd when each slammed out a home run Berhow, Langlitz, Patterson and Brinkman pitched for Klemme with "Red" Buntenbach behind the plate.

ALONG THE MAIN DRAG

The past week Mr. Quandt has improved his cafe by having new window shades installed.

The Creamery has re-decorated the office in blue and gold.

The painter's brush has also been used at the Klemme Food Market the past week.

Seniors Played To Big Crowd Thurs. Night

4-H MEMBERS AVERAGE BIG PROFITS ON LAMBS

Iowa 4-H members netted an average of $71 83 on each lot of 16 lambs they fed in the Western lamb feeding project this past winter, a recently completed summary of the activity reveals.

The feeding project was started in October 1946 and ended in February 1947 Enrolled in the project were 354 members from 44 counties These boys and girls sold 9,161 lambs at five area shows and sales for a total of $240,004.36.

Average return per hundred for the lambs was $23.53. They averaged 106 pounds per head and were on feed for an average of 127 days. The lambs gained an average of 26.3 pounds.

Largely responsible for the high feeding profit was the spread between cost price and the sale return The lambs went out in October weighing 78.9 pounds at an average cost of $17 06 per hundred

For each 100 pounds of gain the lambs ate 757 pounds of concentrates—mostly corn, oats and protein supplement—and 606 lbs. of roughage. Feed costs per 100 pounds of gain averaged $20.74.

Good to choice lambs made up 85 1 percent of all lambs sold this year Falling into the medium grade were 12.1 percent of the lambs.

In spite of the high average profit a few members lost money on their feeding operation An analysis of the high profit feeding operations, made by C W McDonald, Iowa State College extension sheep specialist, indicates that the most rapid and economical gains were made by members who used mainly shelled corn as the source of grain Those members used a small quanity of oats to start the lambs on feed They also used a good-quality legume hay The highest gaining group of lambs also received more protein supplement than those with lower gain

MORE PROFIT FROM HENS WITH INSULATED HOUSES

Records of Iowa's demonstration poultry flock owners again show that insulated, ventilated laying houses pay off in increased profits, reports W R. Whitfield, Iowa State College extension poultryman

The flock owners with insulated laying houses boasted an average labor income of about 70 cents more per hen this year than the ones with uninsulated houses. Figuring an average of 300 birds to a flock, the increased income amounts to $210, which would more than pay for the insulation the first year.

To determine the difference made by insulation, Whitfield dvided the 44 flocks into two groups—those who had insulated houses and those who didn't. The first group contained 23 flocks and the second had 21. He found that the labor income per hen was $1 84 for the first group and only $1 15 for the second.

The flocks in insulated houses laid more eggs at a lower cost These flocks produced an average of 187 eggs per hen while the hens in the unprotected flocks were laying only 171 eggs. And the feed consumption of the first was only 101.3 pounds per bird compared to 107.4 for the second.

SCRAP STEEL PRICE JUMPS

County Extension Director Paul Henderson advises Hancock County farmers to devote a little time to gathering up of all scrap metal and steel about the farm. Scrap steel, advises Henderson, has jumped from $1975 to $33.75 a ton, and a cleanup of scrap may prove profitable as well as improving the beauty of the farmstead.

SENIOR CLASS PLAY "JUST DUCKY," GREAT SUCCESS

The Senior Class play "Just Ducky" drew a capacity crowd and over $250.00 was taken in.

The play was thought by many to be the best play ever presented by any Senior Class. The character parts were well played and the players had their lines down perfect and there was not a single hitch in the presentation, the timing was perfect.

All of the players, those who carried the main parts and those who were playing minor parts are all to be complimented for their excellent acting ability.

The music department provided entertainment between acts, one of which was the piano solo used by Gloria Haefner in winning a first place rating in the state contest.

Mrs H E. Harvey, who directed the play, was presented with a gift from the Seniors. Jean Kurtz, a senior, worked behind the scenes as promoter and stage director.

VEISHEA SET FOR MAY 15 AT I. S. C.

College To Be "On Review" In 3-Day Open House And Festival

Iowa State College's educational facilities and recent developments in agriculture, science, engineering, home economics and veterinary medicine will be "on review" for Iowans next week. Occasion is the 26th annual Veishea open house and festival. It begins Thursday, May 15, and continues through Saturday.

Friday—High School Day—students have planned the open houses. Visitors will have the opportunity to see an army exhibit of equipment in use by army fighter planes and for combat demonstrations by ground forces. A jet aircraft engine will be displayed. These are but two of the many displays planned by all college departments.

To Crown Queen

Thursday afternoon festivities will begin with the crowning of the Veishea "queen of queens" who has been selected by Bing Crosby and Bob Hope. Two horse shows to be judged by Temple Stevens of Moberly, Mo., and with Harlan Connley, secretary of the Iowa Horse and Mule Breeders Association, as announcer, will follow the opening ceremonies.

Boat races, sports events, a musical—Stars Over Veishea—and Veishea Vodvil will highlight the High School Day events.

Saturday morning the Veishea parade of more than 100 floats with an air cover of 25 or more airplanes will begin at 10 a. m.

College agricultural engineering students will sponsor an engineering field day Saturday, the last day of Veishea.

Experimental Machines

The field day, to be held on the agricultural engineering farm southwest of the campus, will feature demonstrations and displays of the latest farm machines, including experimental machines developed by the college.

Some of the new machines will be displayed in the agricultural engineering building on the campus as well as at the farm. The farm demonstratons will be held from 9:30 to 12:00 in the morning with a repeat performance at 1:30 in the afternoon.

Iowans coming to the campus may obtain directions to the open houses and other events at two information booths to be erected on central campus.

Work Circle Meets

Mrs. Roy Arnold and Mrs. W. F. Pavey will be hostesses to the Work Circle of the Methodist Church on Thursday, May 15th.

Greek Revolution Sets New Trend

Guerrilla Bands Instructed In Tenets of Communism

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON.—The Greeks had a word for it—the word revolution, I mean. It was antistasis, I believe, as nearly as I can transliterate the Greek alphabet.

But until very recently it meant something quite different from what it means in Greece today

I won't attempt to telescope the history of the Hellenes back to Helen of Troy, the first successful shipbuilder, who, we are told launched a thousand ships, not by floating a war bond issue but on her face, as it were. But looking back only into the memory of our oldest diplomats, or even some of the younger ones, we are familiar with the program. It usually started with the "colonels." It wasn't a too strenuous or bloodthirsty affair. A few colonels got together They marched on the palace or the war department or the state department, had a few polite words, put their own cabinet in, shot off a few shots which damaged at most a few more or less innocent but curious bystanders and that was that.

BAUKHAGE

But—there came a change.

The revolution which followed the "liberation" of the Greeks from Nazi occupation was quite a different matter. It didn't come from the top and work down. It came from the bottom and worked up.

The Allies had armed the "resistance," the Greek patriots who fought the Germans. But while the Allies poured in such material aid as was possible, just as they helped Tito in Yugoslavia, the Russians were pouring in something else. Propaganda The Allies learned, too late, the true physiognomy of the revolution which opposed the government. The "liberation" was a revolt engineered and carried on by the enlisted men, not the high officers. And its leaders were communist-indoctrinated.

The majority of the rebelling Greeks were not Communists. They were not fighting to establish a communist regime, but to overthrow an autocratic junta. But they were organized and directed by Moscow-trained leaders.

Today there is a "revolution" in Greece. The majority of the so-called "guerrillas" are not Communists. They are fighting to establish (they think) a liberal Greek government. But all of their leaders are Communists. And the rank and file are being carefully and thoroughly indoctrinated in communism. They raid, they fight, they eat off the land, they use the weapons provided by the Allies. But out of each such fighting and eating day they take time out to go to school.

These schools are conducted regularly from 10 to 12 and from 4 to 6 unless a battle or so interrupts. In these schools the good Greek patriots are being thoroughly instructed in the philosophy of Karl Marx, Nick Lenin and Joe Stalin. This is of record. It is fact, not fancy. Moscow would (unofficially, of course), probably boast of it rather than deny it.

Those who graduate with sufficient communistic "honors" are appointed political commissars and attached to each guerrilla unit.

It is easy to imagine what would happen if these forces took over the government.

Meanwhile, there is no objection on the part of the agents of Moscow to have the Greeks set up "coalition" governments—they have had nearly a dozen, all of which failed because the leaders of the various parties represented could not cooperate.

The failure of these governments, the revolt, dissension, unrest, terrible economic conditions, all contribute to that great ally of communism—chaos.

Conditions. That is the answer. The whole of the American policy of "aid to Greece and Turkey" is intended to change present conditions. To change them the experts tell us we must:

1. **Stop the warfare, assure personal security to the people.**
2. **Feed them.**
3. **Restore their normal economic life, and as a result, their normal social life.**

Then see that they are let alone to take care of themselves. Communism then will die of malnutrition.

Basement Homes Solve Crisis

(This is the second in a series of stories showing how American ingenuity helped solve America's problem—the G.I.'s No. 1 headache—housing.)

"Children in Orphanage Because of Housing Shortage"—that was the headline on a story in the St. Cloud, Minn., Times—a story that went on to say: "Three applications were made this week by parents seeking admission for their children in the St. Cloud Orphan's home. The parents were unable to rent or buy living quarters. Rev. Jerome Bielejeski, in charge of the home, said: 'This institution is no place for a child with a mother and father who can provide a home for him. Our principal objective is to care for dependent and neglected children and orphans These children have not been neglected — except by society.'"

That was two years ago. It stirred the people of St. Cloud. They set up an emergency housing committee whose first action was to print a blank form to be filled out by people who needed homes. Within a few days, 200 families had registered—nearly 1,000 people with no place to live.

To take care of the most urgent cases, the town (population 28,000) obtained 100 trailers and set up two camps. Then it turned to the houses which were being built—very slowly because of the lack of material, particularly lumber. Also these houses cost more than most returning vets could pay.

There is a concrete block plant in St. Cloud.

"Why," Mayor Murphy asked himself, "can't we make use of that? Isn't there some kind of house we can build using concrete? . . . Why not basement houses?"

St. Cloud had used basement houses before—in the depression days of the early '30s, when people who couldn't afford to build complete houses built basements with the hope of completing the structure later.

The mayor agreed to underwrite the construction of the first five basement houses in October, 1945. Today there are 175 of them in St. Cloud.

The basements are approximately 24 feet by 30 feet, with concrete block or poured concrete walls, rising approximately two feet above the ground. Each basement is divided into two bedrooms, a living room and dinette, with a kitchen in one corner, and a bath. Some roofs have a small rise, others are flat, with tarpaper laid over what will some day be the floor of houses. The cost is $2,600, and the buyers agree to build the rest of the house within three years, if possible.

One of the first G.I.s to move into a basement home was Cliff Ganfield. Cliff was 20 months in the infantry in the South Pacific, made two landings on Luzon and went into Japan with MacArthur's troops. When he first got a job in St. Cloud with a department store, his wife, Sarah, and daughter, Karen lived with her folks in a town in the northern part of the state.

Others in the community followed the lead of Mayor Murphy. Among them were young Don Strack, who returned from the army late in 1945. Before the war, Don had worked with his father, who is a contractor. Don wanted to build houses for his pals, back from the army, and so he started constructing basements. He says that construction time is about three to four weeks, not counting delays for materials. Strack has completed 12 basement houses and has several under construction now.

Other people in the community have built basement houses for sale or rent to veterans. Among them is Ralph Borrowman, city engineer. And some vets have started to build their own homes. George Schuler, former sergeant, who spent 23 months in the European theater, is one who is building his own basement home.

A local church also is being built like basement homes. Redeemer Lutheran church has built a basement, which has two white crosses rising above the hatchways now used for entrances.

FUTURE NAVY FIGHTERS . . . Navy men are right in there **punching at an early age, as attested by this photo of two members of the navy junior boxing class (composed of sons of naval officers) at the 29th annual Annapolis Navy academy boxing championships.**

NEWS REVIEW

Parley Still Deadlocked; Higher Prices Predicted

MOSCOW:
No Agreement

The conference between U. S. Secretary of State Marshall and Premier Stalin has achieved little or nothing, in the opinion of American diplomats in Moscow. The deadlock between Russian and United States delegations in the Council of Foreign Ministers seems no nearer to solution. Basic disagreements on the German peace treaty are too great, it is thought, for any easy or rapid agreement.

This pessimistic view does not exclude the possibility that some minor concessions may be made by the Russians for propaganda purposes. It is not believed likely, however, that anything important will be achieved at this session. Hope that the Austrian treaty would be completed has pretty well faded.

Main stumbling block in all the treaty negotiations is the Russian demand for huge reparations. If the Russians would retreat somewhat from their position, some arrangement might be worked out, it is admitted.

While there is considerable justification for calling this conference a failure, American diplomats point out that certain fundamental issues have been aired, and that Secretary Marshall has had an opportunity to present American policy to Russia and the world.

HIGHER PRICES:
Sloan Says So

Still higher prices are coming soon, according to one of the top-flight business executives of the country—Alfred P. Sloan Jr., chairman of General Motors corporation. In a speech before the Economic club of New York, Sloan blamed demands of union laborers for wage increases.

"It is clear a new national wage pattern is being formed, he said, and that business cannot meet higher wages and make price reductions at the same time. He admitted that lowering of prices is a "badly needed" change Any enterprise that can absorb wage boosts without raising prices should do so, he advocated, but he added that few could do so. Burdensome taxes also prevent substantial price reductions, he said.

It is the price level of farm produce, not of manufactured goods, that is most out of line, Sloan declared. In all likelihood, he predicted, consumer resistance to high price in the perishable goods lines, particularly foods, will bring "a more or less serious decline in general business volume before final adjustment is made."

TEXAS CITY BLAST:
Chaos Prevails

The explosion of the French freighter Grandcamp in a slip in Galveston bay, Texas City, Tex., was followed in rather fast order by explosion of the freighter High Flyer, as well as other explosions. Both ships were laden with tons of ammonium nitrate.

It may be weeks before any reliable facts can be secured—even as to the origin of the first blast. Hundreds lost their lives, the injured may reach thousands and property damage of millions is certain. The loss to the Monsanto Chemical plant, in immediate vicinity of the initial explosion of the French vessel, will reach 20 million dollars.

Prompt assistance by state officials, federal authorities and Red Cross units as well as Houston, Galveston and other Texas firefighters and police, the cooperation of air lines, railroads and doctors, nurses and ambulance workers, prevented the loss in life from reaching several hundred more.

A few hours after the first blast Texas City was the scene of chaos. Ten fires sprang up within a few hours. The concussion wrecked buildings in the center of town, and fires completed the destruction of many sections of the industrial city. The residential section was about the only section not leveled. Homes and buildings in Houston, Galveston and other cities were thrown open to the evacuees, who wandered around in a daze. The shock was felt 10 miles away and the fires could be seen for 100 miles. Even airplanes exploded in the air.

IN FULL SPLENDOR . . . This night picture, with the Washington monument in the background, shows the cherry blossoms in the nation's capital in all their glory.

TO OFFSET EXPORTS

Record Wheat Crop Forecast

WASHINGTON. — Although wheat stocks in this country have been drained to extremely low levels by record-breaking movement of grain and flour to war-riddled European countries, prospects are that the 1947 production will be sufficient for all home needs with some to spare, it is revealed in a department of agriculture report.

The winter wheat crop is expected to hit a record of 973,047,000 bushels while the spring wheat crop is indicated at 265,000,000 bushels in present crop prospects. This output, the department indicates, is ample to care for all needs despite the carryover of only 140,000,000 bushels on farms as of April 1.

Although exports of flour and raw grain were the primary factor in creating the low old crop stocks, high prices served as another factor in inducing farmers to sell their grain.

Feed grain officials also were unperturbed over reduced farm stocks of oats and barley, primarily because of a substantial increase in corn stocks, compared with a year ago, and the fact that the corn is of much better quality than in 1946.

Winter wheat was seeded under favorable conditions and ample supplies of soil moisture in the fall of 1946 resulted in generally satisfactory germination and excellent fall growth. Cold winter weather has prevented excessive early plant development, thus improving yield prospects.

Rye was reported planted under generally favorable conditions in the fall of 1946. Growth and development of the crop was said to be satisfactory in the fall and early winter because of good moisture conditions, but cold weather after mid-December retarded plant growth. However, the crop has progressed satisfactorily and no unusual losses are apparent.

WNU Washington Bureau, 1616 Eye St., N. W.

State Legislatures Petition Congress

AS CONGRESS continues to struggle to enact some remedial labor legislation, to evolve a tax reduction bill and to hold down expenses, it is continually beset by organized pressure groups. Each lobby is bent upon obtaining its own ends. Private power interests seek to weaken governmental control of public power. Railroads seek to bypass anti-trust laws. Labor and business lobbies are out for what they want. State relief for school teachers is almost a must. Public housing and slum clearance is a must, with the powerful real estate lobbies arrayed against it.

But the pressure groups which likely have, or should have, most influence upon congress are the state legislatures. These legislatures presumably reflect the thinking in the home towns of the nation, and they have petitioned congress by memorials on a large variety of subjects. Here are a few:

Arizona asks that the federal contribution of two-thirds of the first $15 of old-age assistance be made permanent. California wants more grants to states for care of disabled veterans. Colorado desires increased appropriations for the FBI and the house un-American activities committee. South Carolina requests adequate funds for continuation of the school lunch program. Minnesota and North Dakota ask continuation of funds for rural electrification. Montana wants adequate funds for the Missouri river basin reclamation projects. Oregon wants continuation of the appropriation for agricultural marketing research. South Dakota seeks appropriations for flood control on the Missouri river. Utah wants $650,000 for a dam and reservoir at the Bear river bird refuge. Wyoming asks appropriations for reclamation projects on the Colorado river in upper basin states, favors the Townsend recovery plan and wants the Indian bureau abolished.

Sugar, Taxes, Unions

Illinois, Iowa and Wisconsin request decontrol of sugar. Colorado and South Dakota request federal outlawing of the closed shop. South Dakota and Nebraska ask community property income tax privileges for all states. North Dakota petitions for uniform tax laws on division of income between man and wife.

Georgia wants an investigation of housing frauds against World War II veterans. Idaho asks continuation of emergency farm labor supply program and a long-range wool price stabilization program, protests policy of keeping federally-owned mineral lands permanently, and opposes further tariff reductions on mineral products. Iowa favors federal debt reduction. Michigan petitions for the tidewater lands bill. Mississippi wants Senator Bilbo seated. Montana wants cash payment for terminal leave, construction of a tuberculosis sanitarium for Indians in Montana and extension of the Steagall amendments guaranteeing 90 per cent of parity for farm products beyond December 31, 1948.

Housing, Cotton, Power

New Jersey legislature favors adoption of a national housing policy to provide effective cooperation between federal, state and local governments. Oklahoma wants to put control of cotton exchanges under the department of agriculture and wants a uniform system of grading cotton. Oregon wants increased power generating capacity in the Columbia river basin and abolition of the civilian production administration. Rhode Island favors all possible aid to Italy and a temporary extension of rubber controls. South Carolina also wants unlimited funds for cancer research and federal grants to states for public assistance based on the economic capacity of the states South Dakota petitions for debt and expense reduction in advance of tax reduction and repeal of federal taxes on gasoline and lubricating oils. Washington wants construction of a highway to Alaska and no increase in power rates on Columbia river projects.

These memorials keep coming. Congress would not get very far on its economy program if all the petitions, even of the various state legislatures, were granted, for each wants money or action of some sort that will benefit them.

It is significant, however, that the great majority of these requests come from western states which have little or no representation in high places on the congressional committees that consider and recommend legislation.

As far as this writer can learn, about all the effect these official petitions by the various state general assemblies have is to take up space in the Congressional Record, where they are printed at the instance of the senators or congressmen from those states.

Atomic Control Possible Now

Article 51 of the United Nations charter provides a basis for possible compromise on an atomic energy control plan which bypasses the veto problem.

"If it could be agreed that illicit production or storing of fissionable materials constitutes evidence of intent to commit armed attack, then nations could automatically, once a violation had been certified, proceed to take enforcement action without waiting for explicit Security Council approval," points out Dr. Fox.

THE FICTION CORNER

By Eugene Wright

BECAUSE he had a problem on his mind that morning Louie didn't give much attention to the man who got in his cab except to notice that he had an old, tired face and looked as though he might have money, and when he heard his passenger say, "Grand Central," he pulled out from the curb in a hurry and swung down a side street to Fourth avenue.

He hadn't had a decent fare that morning and his time would be up soon. Grand Central, he knew, would meter about seventy-five cents, and if his fare was in the hurry he seemed to be and he got in there on time he might get a quarter extra, making it a dollar. At Twelfth street, seeing some sort of a demonstration ahead of him, Louie tried to go down a side street to avoid being held up, but the street was filled with trucks and he had no choice but to fall in line behind the stalled uptown traffic. His mouth drew down at the corners and his hands tightened on the steering wheel as he read the signs on banners a group of demonstrators were carrying.

"Darn fools," he said. "Ain't we got troubles enough right here without people worryin' about what goes on in Spain and China and them other foreign countries?"

A faint smile played over his passenger's grim, sagging face. He had made a large donation to foreign relief himself, he remembered, about three months ago. He could make good use of that money, now.

"You don't believe," he asked, "in charity?"

"Not that kind!" Louie exhibited a strong, troubled profile. "Not when there's people in this country needing it just as much as they do over there."

THE MAN gazed admiringly at Louie's thick, lustrous hair, the ruddy color of his neck and cheek. "You," he said, "look strong and healthy."

"I'd be in a pickle," Louie told him, "if I wasn't."

"In what way?"

Louie shrugged. "You can't support a family on part time in the taxi business." And then, his body seemed to grow rigid between his shoulders, "I'm a blood donor."

For a few moments the man was silent; his eyes were reflective. "That's interesting," he said finally. "I'm sure it's appreciated."

"You might think so." Louie gave a short laugh. "The last guy I gave some blood to threw me out of his apartment. He was practically dying. If I'd refused to make the transfusion he would have died. He wouldn't have had time to get anybody else. And yet because I couldn't pay him a month and a half back rent I owed him he had me thrown out in the street—furniture, wife and kids—everything." It seems. . . unfair."

"Unfair!" Louie's hand tightened on the steering wheel. "How would you feel if the guy that walked down on you was walking around the streets with your blood in him? And this guy's rich! He didn't need the money. He'd given a thousand bucks to the Red Cross a couple of months before. He's got more real estate in New York than he knows what to do with."

He put his cab in gear. The traffic had moved on. Traffic was beginning to thin out ahead. "I'm always praying that some day I'll meet the guy. There's some things I'd like to tell him."

"You'd recognize him—this man, that saw him?"

"Sure by his picture in the newspaper. They had him all covered when I gave him the transfusion. Only his arm was sticking out." He crossed Fourteenth street and moved into the outside lane to make up for the lost time. "But I'll meet him some day," he said.

For some time the man behind him gazed directly through the windshield. He seemed to be unaware of the fact that his face was in full view of the rear-vision mirror. He looked very old, and very tired.

"I see what you mean," he said finally, and Louie could just barely hear him above the noise of traffic. "I suppose we do pay too much attention to what's going on in other countries and overlook sometimes what's going on right under our noses. But we mean all right. It's easier for us to give to an organization that's rigged up to help groups of people than it is to look around yourself for people who need help.

"IF YOU were to meet the man you gave your blood to and didn't know him you might think him a pretty decent kind of a fellow. A man isn't generally thoughtless or bad just because he's rich. Suppose he was caught in a jam himself and needed every dollar he could lay his hands on. Suppose a group of banks were going to foreclose on him and he'd lose everything he had in the world if they did? A fellow like you—young and healthy, why, you could afford to lose a million dollars. You could make it back again if you wanted to; and if you didn't want to you could do something else.

"But when a man gets along in life and then loses everything he's been working for for forty or fifty years it's apt to be quite as big a shock to him as it was to you to be turned out of your apartment. In fact, some very good men aren't able to survive such shocks.

"For all you know, that man may be dead. You may never see or even hear of him again."

With a strange feeling in his throat, Louie turned his cab into Forty-second street and drew up before Grand Central station. The guy seemed to know what he was talking about, he thought. And suppose this man had died—after he'd given him his blood. Died with his blood in his veins. He'd never thought of that before. And he didn't like it, somehow.

"I guess you're right," he said, his head lowered as he tore the slip from his meter and handed it back. "After all, he didn't know me from Adam. I guess we all make mistakes."

A strange smile lighted the man's face His hand trembled as he drew from his wallet his last hundred dollar bill and pressed it, folded, into Louie's hand.

"It's never too late," he said, "to try to rectify those mistakes."

"We got troubles enough right here," said Louie.

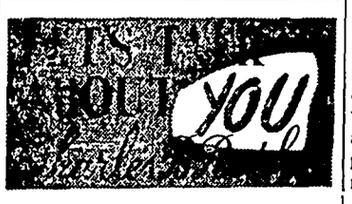
Series B-47



Ten Rules for Happiness

You've read, you've thought, you've heard a good deal about happiness. You've seen people seek it, most of them unsuccessfully. You wonder whether there is really any way to guarantee yourself as much happiness as you think everyone has a right to expect.

Maybe these ten rules from the Cleveland Academy of Medicine will help. A learned committee from this academy studied the matter. What it sought was a formula for happier living.

The rules are:

Have a hobby. A hobby is a refuge, a storm cellar into which you can duck when stress and storms on the surface of your life buffet you about too much.

Develop a philosophy of life That simply means to have a guide by which to live. A life without one is a helter-skelter existence without plan, without goal, without the comfort of ideals or truth.

Share your thoughts Companionship is essential to personality and to mental health. If anyone lives too long with his own thoughts they can generate explosive qualities that destroy Confess, confide, consult someone you like.

Face your fears and have it out. The world is filled with people running away from fears, but never quite escaping them. Face yours. Overcome them boldly.

Balance fantasy in your life with fact. Dream, for all normal beings must, but balance your dreams with acts. Don't fall into the habit of dreaming your life away.

Beware of alluring escapes from your troubles but face them realistically and work out a reasonable answer.

Exercise moderately in order that you may have physical as well as mental health.

Love wisely, for life without love is life without light.

Don't worry.

Trust in time and be patient.

There you have the ten rules for happiness. They seem almost too simple to be effective.

But they are the rules based upon eternal truths of human nature and psychology, and if you will adopt and follow them they will do some interesting things to your own life.

THERE'S MUSIC IN THE AIR . . . Typical of the many musical events which will be staged throughout the country during National Music Week was this outdoor concert presented under auspices of the Choral and Instrument Music association of Chicago.

HIGH NOTE

Annual Observance Stimulates Interest in Musical Activities

WNU Features.

From unrehearsed hymn sings in small rural communities to elaborate musical festivals in larger cities, music will fill the air during the week of May 4 to 11 as more than 2,500 communities throughout the country join in observance of National Music Week.

Intended to stimulate greater year-round interest in music and music education, National Music Week has been observed since 1924. In previous years, various communities had sponsored their own programs at unspecified times.

Although the keynote for Music Week is set by a central Music Week committee, with headquarters in New York, actual programs are entirely in the hands of local committees and individual workers The central committee, however, is available for guidance and information.

Stimulate Interest.

The only idea actively promoted by the central committee is that the week be utilized for activity calculated to benefit year-round growth in musical interest. They believe that a period in which people are made more conscious of the value of music to the individual and to the community should serve as a time of enjoyment through making and hearing music, and as a stimulus to musical projects for young and old.

Many projects designed to aid veterans will be promoted as features of the 1947 observance. In some cities these will take the form of scholarships and educational opportunities generally; in others musical equipment for servicemen's centers and hospitals; in still others concert appearances for the especially talented. Local Music Week committees also will provide musical programs for patients in veterans' hospitals.

Another interest which will gain through the Music Week observance is "living war memorials" (notably buildings with acoustics for musical performances) In the larger cities such memorials are more likely to take the form of concert halls and auditoriums, and in the smaller places band shells and bandstands for outdoor use.

Churches Cooperate.

For many years churches have marked the opening Sunday of Music Week with sermons on music and religion, and with special programs by organists and choirs. Increasingly there is a trend toward inter-church and inter-denominational services. The closing Sunday, which coincides with Mothers Day, is frequently the occasion of musical events in honor of mothers.

To indicate the wide extent and variety of local observances, the Music Week committee cites a few examples culled from the 1946 records.

In one of the most elaborate observances, Los Angeles, Calif., staged a week-long series of programs under municipal auspices. Leading event was a music festival at Hollywood Bowl featuring a youth chorus of 700 voices. A school music festival entitled "America Sings," the premiere concert by a civic orchestra, concerts by the police, county and selected high school bands, and a program by a combined women's chorus were other highlights.

Baltimore, Md., also gave a prominent part to youth in its observance. A "Children's Prayer for Peace" program was marked by participation of youngsters from the Chinese, Jewish, Negro, French, Norwegian, Russian and other colonies.

Stage 271 Programs.

Under cooperative auspices of the local Business and Professional Women's clubs and the playground and recreation commission, Alton, Ill., observed Music Week with a total of 274 programs.

A campaign for promotion of greater interest in and attendance at its local symphony orchestra concerts was conducted in Springfield, Ohio, during the week.

Despite the achievements in the larger centers, however, it is in the smaller communities that the main strength of the Music Week movement lies. There are between 2,000 and 3,000 communities of less than 5,000 population that almost yearly mark the occasion in some worthwhile way.

Because of its median size and long history as a participant, Paris, Tex., is cited as an example of the smaller towns which stage unusual and effective programs.

The 1946 observance there began with an inter-denominational hymn festival led by joint choirs of several churches. Excerpts from an operetta by a school choral club provided the entertainment for the Parent-Teachers association meeting The high school band gave a demonstration for Rotary club, and the public library included in its special display of books on music a scrapbook history of the local Music Study club. Posters submitted in a contest for upper grade children were hung in store windows and awards to the members were memberships in the Civic Music association.

Texas Paradise Stays Crimeless For Four Years

SARITA, TEX.—Surrounded by a sparsely-populated area, Sarita is gaining recognition as the crimeless section of Texas.

That distinction results from the fact that not a single crime has been recorded in the last four years District court sessions consist merely of selection of jurors, who never are used.

"Nothing much has happened in the 33 years I've been here," insists District Clerk Nettie P. Woods. "We didn't have a divorce last year and I don't think we'll have one this year," she adds. No case of juvenile delinquency ever has been recorded in the county.

"I guess snakes give us more trouble than anything," the clerk says.

Births, deaths and marriages are the only newsworthy events in the county, in her opinion. There is no state old age assistance, no formal charity and during the depression of the 30s there was no WPA.

No 'Close Shaves'

TULSA, OKLA. — Customers cannot get a shave in the "Big 9" barber shop. The shop, despite its name, is so narrow that its chairs cannot be laid back for customers to recline, so its barber concentrates on cutting hair.

Horse on You

COVINGTON, KY. — Cow punching has been added to duties of Campbell county police. In a single week police were called upon to corral 20 stray steers which wandered from their pasture, to capture a rampaging bull and to take charge of two wandering cows.

Vigilantes Now Seek Dummy Nags

WASECA, MINN. — Times have changed since the Waseca County Horse Thief Detectives association was organized to rid the county of horse thieves in the late 1880s.

Now the society, preparing for its annual meeting, had to seek a dummy horse, the kind that harness makers use. The horse was required to instruct new members in how to put on a saddle and other such techniques. Old-timers feel every member should know at least that much.

A group of "deputies" was formed as a posse to capture prospective talent for entertainment.

The organization, which ranks as one of the oldest in the state, has not been active in apprehending horse thieves for decades, but it remains active by meeting annually to allow members to recall thrilling escapades of the past.

Mystery of Clouds

A scientific mystery which is yet to be solved is the reason why water droplets in certain clouds do not freeze when having a temperature several degrees below the freezing point.

LOOSE PLATES?

To hold your loose uppers and lowers comfortably secure all day—and every day, try dentist's amazing discovery called STAZE. Not a "messy" powder! STAZE is pleasant-to-use paste. Get 35c tube at druggist today! Accept no substitute!

AROUND IOWA

NARROW ESCAPE

At Cedar Rabids, Lt. Col. Bill Feiler of Des Moines "buzzed" the field at an air show. The propeller of his P-51 bit into the runway, bending the blade. Col. Feiler quickly gained altitude, and landed in an adjoining field with a dead motor. He was unhurt.

VANDALS

Members of the Palo Alto Gun club at Emmetsburg are so made this week they would like to have something besides clay pigeons to shoot. Vandals wrecked a small storage house on the club grounds and dumped it into the Des Moines river. It was worth about $250.

NO LICENSE

At Harlan, L. E. Bredenberg, an ardent fisherman, is said to have bought more fishing licenses in Iowa than there are fish in the Nishnabotna river. Last week, with R. M. Shiltz, he went out to the river to practice casting. A conservation officer "joined" the party, which cost each man $10. Mr. Brendenberg says it was the first time he was ever asked to show his license, and probably was the first time he never had one.

"BURIED" ALIVE

Everrett Sanger, Grinnell, had the unusual experience of being buried alive last week. Fortunately, it was only from the waist down. Collapse of the walls of a sewer ditch in which he was working caused the mishap Rescuers worked about three-quarters of an hour before Mr. Sanger could be extracted.

"Secrets of the Stratosphere." Here's the thrilling story of science's experiments with giant space-hurtling rockets. Read how they pierce the mysterious stratosphere'siron curtain to bring back vital scientific data. In The American weekly, the great magazine distributed with the CHICAGO SUNDAY HERALD-AMERICAN.

Everyone wants a weed-free lawn. 2,4-D is the answer.

Clean plowing is a good way to control corn borers.

County Nurse Has New Office

Miss Harriet Oxley, county nurse, now has her office in the northwest corner of the basement in the court house. This is the office space formerly used by the Rationing Board. The office has been re-decorated for Miss Oxley.

Many Farmers Planning To Lay New Tile Lines

The long siege of recent wet weather serves as a vivid rereminder to many farmers of the importance of a good field drainage, says C. H. Van Vlack, Iowa State College agricultural engineer. Hundreds of lines of new tile are slated to be laid in all sections of Iowa this spring as a part of farm improvement plans. And many other old lines need to be checked to make sure they are doing their job properly.

Whether on old lines or new, farmers are urged to give special attention to tile outlets. Van Vlack points out that more tile drainage failures are caused by by poor outlets than from any other source.

Probably the most economical way to solve the drainage outlet problem, where everything up to 10-inch tile are used, is to install a section of corrugated iron pipe where the drain empties. Such sections should be 18 to 20 feet long and extended 3 to 4 feet beyond the bank. Laying the section so the opening faces a little down stream also is recommended. The joint where the corrugated iron and the last tile meet should be plastered with concrete.

Tile larger than 10 inches in diameter will need a bulkhead at the outlet. Because such bulkheads must be properly installed to prevent their washing out, Van Vlack suggests getting the aid of a Soil Conservation Service technician or other skilled help in making the installation.

Van Vlack suggestss that tile be laid at a depth of about 4 ft. in open soils and about 3 ft. or less in the tight soils. In general, the deeper the tile are placed the wider the space can be between lines.

With tight clay soils the distance should be about 30 to 40 feet between lines. In light-textured, loamy and sandy soils, this space can range up to 100 feet.

As to most satisfactory tile size, Van Vlack says the distance across the opening should be at least 5 inches unless the grade is unusually short and steep. The carrying capacity of a 5-inch tile is about double that of the 4-inch size.

WEED NOTICE

TO ALL LAND OWNERS, OCCUPANTS AND PERSONS IN POSSESSION OR CONTROL, INCLUDING RAILROAD LANDS AND LOTS WITHIN HANCOCK COUNTY, Iowa:

The Board of Supervisors of Hancock County, Iowa, in an adjourned meeting on May 2, A. D., 1947, passed the following resolution, to-wit

BE IT RESOLVED, by the Board of Supervisors of Hancock County, Iowa, that pursuant to the provisions of Chapter No. 317, Code of Iowa, 1946, it is hereby ordered

1. That each owner and each person in the possession or control of any land or lots in Hancock County, Iowa, shall cut, burn or otherwise destroy all noxious weeds thereon, as defined in this chapter, at such times in each year and in such manner as shall prevent said weeds from blooming or coming to maturity and shall keep said lands free from such growth or any other weeds as shall render the street or highways adjoining said land unsafe for public travel Noxious weeds shall be cut or otherwise destroyed on or before the following dates and as often thereafter as is necessary to prevent seed production

Group I

June 15th, 1947 - For leafy spurge, perennial peppergrass, sour dock, smooth dock, sheep sorrel.

Group II

June 30th, 1947 - For Canada thistle, Russian knapweed, quack grass, buckhorn, wild mustard.

Group III

July 15th, 1947 - For field bind weed, wild carrot.

Group IV

July 30th 1947 - Horse nettle, perennial sow thistle, butterprint, puncture vine and cocklebur

2. That each person and owner in the possession or control of any lands in Hancock County, Iowa, infested with any primary noxious weeds including quack grass, perennial sow thistle, Canada thistle field bindweed, horse nettle leafy spurge, perennial peppergrass, Russian knapweed shall adopt a program of weed destruction prescribed by the Weed Commissioner, which in five years may be expected to destroy and will immediately keep under control such infestations of said primary noxious weeds.
3. That all weeds other than primary noxious weeds on all county trunk primary highways and local county roads and between the fence lines thereof shall be mowed by the adjoining property owner, to prevent seed production on or before July 15, 1947.
4. That if the owners or persons in possession or control of any land in Hancock County, Iowa, fail to comply with the foregoing order, the weed commissioner shall cause this to be done and the expense of said work including costs of serving notice and other cost, if any, to be assessed against the land and owners thereof
5. That the county auditor be and he is hereby directed to cause notice of the making and entering of the foregoing order by publication in each of the official newspapers of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Gerdes who moved its adoption, was seconded by Supervisor Schoun, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, George Th. Gerdes and John Chambers, aye Nays None Whereupon the chairman declared the resolution duly adopted

Please take notice and govern yourselves accordingly

THE GARNER CHAPTER OF THE
American Red Cross

Our knowledge of nutrition has progressed a long way in the last 50 years.

FIRST: It showed that growth can be influenced by nutrition.

NEXT: Health--will bring resistance to disease and can be influenced by what we eat.

NEXT: Diet has an improved effect on length of life.

NOW: We know it may be a means of improving the next generation.

The School Lunch Program is one of the most effective ways by which all of us may benefit from this knowledge, and your aid in maintaining school lunches is urgently requested.

KLEMME SCHOOL NEWS

Fifth And Sixth Grade News

—Mrs. H. G. Voetberg, Teacher.

We celebrated two birthdays in our room this week, that of Elaine Neuberger and of Roger Terhufen Each brought treats which we all enjoyed.

In sixth grade arithmetic we are working on division of decimals. We have discovered that we are going to have to review our multiplication combinations

Friday in fifth grade Language class we gave directions for making something.

Seventh and Eighth Grade News

—Clara Smith, Teacher

All of us wrote the Eighth Grade State Examinations on Thursday. Fifteen rural students wrote them with us.

The seventh graders are working interest problems this week while the eighth graders have been working on square root problems.

In eighth English we wrote articles for our class paper last week We completed our paper Wednesday and called it "Junior Shamrock."

KLEMME HIGH SCHOOL Notes

Our Sophomore Class News

—Reported by Phillis Boland

Excitment was great among the Seniors Thursday evening because of their class play, "Just Ducky." We want to congratulate them on their play; it was wonderful.

With thoughts of school soon to end, we were happy until the teachers reminded us of our final tests. We hope that when they make our tests they will be lenient and not make them so difficult.

The Sophomores are getting anxious for school to be out, and we wonder why Is it for the summer vacation coming or the Junior year coming closer? It seems that everyone in high school has started to get busy with his school work the last six weeks. Maybe it's spring that makes us work harder, but I think it's the idea of getting our credits so we'll be able to step one step higher in high school; that means we'll be Juniors.

Congratulatons go to Gloria Haefner on her piano solo. We wish her the best of luck when she goes to Missouri.

FRESHMAN NEWS

—Reported by Luella Priebe

During the past week we have been trying to learn about World War I and the Big Four in History We are starting on Adolf Hitler now.

We have been studying about adjective and adverb clauses in English I. We seem to be having a little trouble with them. Mrs. Harvey thinks we have it all straight, then someone pops up with another wrong answer, then she starts all over again

In science we finished the chapter on our bodys. We found out the right kind of food to eat. We've been observing our dinners for the four tastes, salty, bitter, sweet and sour. We have found all four in most of the dinners.

Chicken-Of-Tomorrow Contest Extended

Closing dates for entering the Chicken-of Tomorrow contest have been extended to May 15, county extension director Paul Henderson said this week.

Word was received from W. R. Whitfield, Iowa State College extension poultryman, that closing entry dates for the contest have been changed from April 26 to May 15. The extension was made to give flock owners who until now haven't been able to enter, a chance to compete for district and state prizes.

According to Henderson, contestants entering between now and May 15 have an excellent chance to win their share of the prizes.

Prizes, while they vary in the eleven districts, range from up to $100 in some counties. A sweepstakes award of $50 is available in one district and 5 cents a pound over the market prices is offered to number one poultry in all parts of the state when the birds are shown.

To enter the contest it isn't necessary that poultry to a major project—one hundred to three hundred chicks hatched between February 23— March 1; March 23-29, or April 20-26 can be entered by any member of the family.

Some twenty thousand dollars have been spent on newspaper advertising and nearly 100,000 poultry kits have been distributed to farm people over the state.

There are still plenty of opportunities for farm flock owners to not only compete for prizes but help themselves through improved flock management by entering the contest. Remember, May 15 is the final closing date.

PLOW DOWN COVER CROP NOW TO SAVE MOISTURE

To save soil moisture cover crops should be plowed down by early May.

Iowa State College agronomists point out that cover crops, especially rye and vetch, grow fast and use a lot of soil moisture during warm spring days.

If plants are allowed to grow too late in the spring they'll take so much moisture that, without additional rain, there won't be enough to germinate newly-planted corn, the agronomists warn.

Additionally, more nitrogen is added to the soil by plowing cover crops under early. While cover crops are always beneficial, if rye and vetch are not plowed down before the rye heads, corn will suffer from too little nitrogen.

The agronomists recommend plowing under the rye and vetch before the rye heads and at least a week or 10 days before planting corn.

Cover crops seeded last August and plowed under this May can be expected to add 1.5 tons of organic matter to the soil. This organic matter gives the soil greater resistance to erosion during the critical May-June period It also makes the soil more porous so that it absorbs the rain instead of letting it run off. In this way, cover crops decrease soil loss.

YOU TRY IT

At Jefferson, Jippy Pappas awarded a quart of ice cream at a basketball supper to the person who could come closest to pronouncing a name selected by him Ruth Grow won the ice cream; the contest name was "Themetrios Papathemetriakontipoulos." The Jefferson Bee reported, with marked reserve, that the name caused the contestants "a bit of trouble."

DYNAMITE

Dynamite is causing some deaths in Iowa this spring. At Paton, Verner Lindgren, 36, had arranged a charge of the explosive It failed to go off. When he went to investigate, the dynamite exploded. He died the following morning as a result of injuries. Near Guthrie Center, Max Tearney, 14, learned about dynamite caps the hard way and lost two fingers on his right hand, as well as the tips of both thumbs.

About 60 Iowa counties have already started their fly-control campaign.

Read it first in The Times.

GETTING SOYBEAN SEED IMPORTANT

Iowa farmers who plan to raise soybeans this year, if they haven't already gotten seed beans, should do so immediately.

Recommended varieties may be scarce, Bob Weber, Iowa State College agronomist warns, if farmers wait until planting time to buy their seed High prices of seed indicate that some localities have shipped their beans to market. Too, he points out, the late season has increased the demand for soybeans. Many farmers have to turn to beans in lieu of oats.

Weber urges farmers to plant recommended varieties. "The right variety, planted at the proper time in a well prepared seedbed, with rows spaced as close together as cultivating equipment will permit, and last, but not least, early cultivation to control weeds, will increase the yield by 5 to 10 bushels per acre," he says.

Get Right Variety

Planting the variety best suited for soil and climatic conditions is very important, Weber says.

Variety performance tests show Lincoln outyielded the average of the recommended varieties over the state by 4 or 5 bushels. But, he cautions, because of its late maturity producers in the northern three tiers of Iowa counties may suffer losses if caught by an early frost.

Lincoln, when planted not later than May 31, is recommended for counties south of a line through Sioux City, Fort Dodge, Waterloo and Dubuque It stands up sufficiently well and grows tall enough to bear its pods off the ground for easy combining In addition it is the highest oil bean in the state, according to Weber.

If Lncoln is unavailable, other good varieties for southern Iowa are Illini, Dunfield in central and southern sections; Chief in the southern tier of counties In central Iowa, Illini and Dunfield on the less fertile soils and Richland and Mukden on the most fertile soils are recommended.

Depends on Date

For the northern counties Richland is good on the fertile soils if planted between May 10 and 25 Also Harbaro is good on fertile soils if planting has been delayed beyond June 1 and up to June 15. If planting has been delayed beyond June 15 it is almost imperative, Weber thinks, that an early variety such as Ottawa Mandarin is used.

Earlyana and Early Minnesota Manchu are more susceptible to lodging than Richland. They should be planted in northern Iowa on less fertile soils. For the flat land of northeastern Iowa, Weber advises the use of Earlyana up to June 1 and Habaro or Ottawa Mandarin for planting between June 1 and 15.

The best planting time for central and southern Iowa is immediately after corn—about May 15 to May 25. However, Richland will mature up to July 1 in that area. In southern Iowa, Lincoln could be used for planting up until the middle of June.

LIKE MY DAD SAYS...
"You can plan now for good sudan pasture"

AT OUR place, we say good summer pasture is a kind of insurance. It's insurance that our milk and cream checks will keep coming all summer . . . and the same size.

So we seed Sudan grass this month. By the time the bluegrass is getting tired, the Sudan is ready to lend a hand. You see, Sudan can be seeded any time from May 15 to June 15. It's ready to be pastured when it's 18 inches high, and an acre will take care of 2 or 3 cows.

HOUSEHOLD MEMOS
by Lynn Chambers

Meat Makes Fine Main Dish Salads
(See Recipes Below)

Spring Salads

"Most women know how easy it is to whip together a salad," said my next door neighbor. "Why don't they think of using a meat or fish salad to make spring lunches easy?"

Naturally I agreed with her wholeheartedly, and promised to remind my readers of this thought now that the weather is becoming warmer. What is better when you've been hanging out clothes or gardening, than coming in to lunch on a crisp, chilled salad? You know you can slip the salad together before you start the morning's work and place in the refrigerator until luncheon.

Protein is an important requirement of our body, whether we are young or old. Thus, it's wise to plan a main dish salad that makes use of one of the good protein foods such as eggs, fish, cheese or meat. But make it crisp and crunchy, too, using vitamin and mineral-laden greens right from the garden.

Veal Salad.
(Serves 6)

2 cups cooked macaroni
1 cup celery, chopped
6 sweet pickles, chopped
6 sliced radishes
½ cup cucumber, sliced
3 tablespoons green pepper, chopped
2½ cups diced, cooked veal

Mix salad ingredients. Toss together with just enough mayonnaise to moisten all ingredients thoroughly. Serve cold on crisp greens.

(Note: If desired, roast leftover or stewed veal may be used.)

Potato Salad.
(Serves 6)

6 new potatoes, sliced
6 slices uncooked bacon, diced
1 small onion, minced
¾ cup vinegar
¾ teaspoon salt
Dash of pepper
¼ cup sour cream

Boil potatoes in their skins until tender. Peel and slice. Fry bacon until crisp; remove and brown onion in fat. Add vinegar, salt, pepper and sour cream. Add potatoes and bacon. Serve hot or cold, garnished with sliced tomatoes and weiners prepared thus:

Broiled Weiners.
6 frankfurters
6 slices bacon
¼ pound American cheese
Mustard

Slit frankfurters, spread inside with mustard and insert strips of cheese. Wrap a strip of bacon around each frankfurter and place under broiler. Heat to brown and crisp the bacon and melt the cheese.

***Hearty Salad Bowl.**
(Serves 6)

1 clove garlic
1 head of lettuce
½ bunch watercress
1 cup french dressing
1 cup celery, cut in strips
1 cup cooked ham or tongue, slivered
1 cup cooked chicken, slivered
1 cup Swiss cheese, slivered
1 cup cooked or canned pears
1 hard-cooked egg, chopped

LYNN CHAMBERS' MENU

Hot Consomme — Cheese Sticks
*Hearty Salad Bowl
Butterscotch Pudding with Cream
Ice Box Cookies — Beverage
*Recipe given.

Rub salad bowl with peeled clove of garlic. Shred greens in the bowl and toss in with ½ cup of dressing. Add remaining ingredients and remaining dressing. Toss well and serve garnished with the chopped hard cooked egg.

Jellied Fish Salad.
(Serves 6 to 8)

1½ cups grated tuna fish or flaked salmon
2 shelled hard-cooked eggs, chopped
½ cup chopped, stuffed olives
2 tablespoons capers
1 tablespoon chopped chives or minced onion
1 tablespoon plain gelatin
¼ cup cold water
1½ cups mayonnaise
Lettuce or greens
Tomatoes, sliced or quartered
Avocado slices, marinated in lemon juice

Combine tuna fish, eggs, olives, capers and chives. Soak gelatin in cold water for 5 minutes, then dissolve over hot water. Add dissolved gelatin to mayonnaise, stirring constantly. Add to fish mixture and mix together thoroughly. Turn into a mold and chill until firm. Unmold on bed of greens and garnish with tomato and avocado slices. Serve with additional dressing, if desired.

Green pepper and eggs go together like bread and butter. You can chop hard-cooked eggs together with minced green pepper and use as the basis of a salad sandwich, or if you want to fuss a bit more you can make a pretty-pretty salad this way, when you invite your next door neighbor over for a spot of lunch.

Prepare this salad in advance and it will slice more readily.

Stuffed Green Pepper and Egg Salad.
(Serves 6 to 8)

3 medium-sized green peppers
½ pound cream cheese
3 shelled, hard-cooked eggs
1 sweet pickle
½ cup chopped stuffed olives
⅔ cup mayonnaise
Lettuce
French dressing

Wash peppers, cut off tops and remove the seeds. Meanwhile cream the cheese until it is smooth. Put eggs, pickle and olives through a food chopper and add to cheese with mayonnaise and combine to make a thick paste. Pack this mixture into the peppers and chill for several hours. Slice peppers crosswise, ¼ inch thick, and arrange several slices on lettuce. Serve with french dressing, if desired.

Released by Western Newspaper Union

LYNN SAYS:

Use Leftovers Well If You Would Budget

If you have plain cooked macaroni, this can be combined with a number of leftover vegetables, hard-boiled eggs and used with mayonnaise as a main dish salad.

A simple entree to stretch left-over chicken is to combine it with bright peas, green pepper and pimiento in a white sauce. Serve this piping hot over tenderly cooked golden egg noodles.

Use leftover vegetable juices in place of water in meat and vegetable dishes to utilize them.

When serving leftover ham creamed, add a novel note to the dish by using Chinese vegetables with it. This adds delicious variety to the meal.

If you have leftover weiners from the night before, slice them and add them to a sauce and serve over a nest of spaghetti. This nourishing dish is something the youngsters will like.

RATES FOUR STARS

Big Business with Capital B—VA Tackles Stupendous Job

By WALTER A. SHEAD
WNU Washington Correspondent.

WASHINGTON.—A slightly built, grayish, baldish man wearing the fatigue uniform of a four-star general, sits behind a huge desk in the mammoth, block-long Veterans' administration building. He is, without doubt, among the busiest men and has one of the biggest jobs in the world. He is Gen. Omar N. Bradley, administrator of veterans' affairs.

He brought with him to Veterans' administration the same qualities for which General Eisenhower gave him equal command with General Montgomery on the western front during the war and which made him one of the most respected commanders, one of the ablest tacticians and disciplinarians in the army.

Although eligible for retirement, General Bradley accepted the assignment by President Truman in an effort to bring to a state of efficiency the badly-managed, overgrown Veterans' administration created after the last war and bogged down in red tape and bureaucracy.

General Bradley took into VA his resourcefulness as a military leader, his bent for democratic action, for efficiency, for loyalty and discipline and his respect for the G.I.s who fought and won a war, thousands of them under his direct command.

Streamlines Agency.

He has streamlined VA; he has decentralized the administration into regional commands. The job is one of the most stupendous and far-flung tasks in the world today.

General Bradley is head of the biggest mutual insurance business in the world with policies in force totaling 35 billion dollars on the lives of some five million veterans.

He directs a medical program which hires 5,000 doctors and cares for 90,000 patients.

Providing benefits and relief in one form or another for more than 14 million World War II veterans, VA maintains a master file of 24 million veterans or their dependents who have received active benefits. At the present time, approximately 18,300,000 Americans are veterans of some war.

For instance, VA has on its mailing list about 28,000 Kellys, 17,500 Cohens, 2,000 Kominskis, 16,000 Shultzes. From this tremendous number of former servicemen, VA has received as high as 11 million pieces of mail in a month.

General Bradley heads one of the country's largest loan agencies and, as of February 1, VA had approved loans for 639,200 G.I.s amounting to more than $3,421,000,000. Although a majority of these loans were for homes and farms, they ranged all the way from the veteran who started a diaper service in Spartansburg, S. C., to the farm boy who wanted to purchase a new harrow in Arkansas.

Wholesale Purchases.

A purchasing committee of tremendous magnitude is another of VA's activities. This agency buys in mass lots for veterans' hospitals such as 676,000 pounds of breakfast cereal at one time, 144,000 pounds of salted soda crackers, 7,014 albums of records for juke boxes, 800,000 volumes of books for hospital libraries.

As of February, 1947, more than 2,430,000 ex-G I.s were in schools or on-the-job training under provisions of the G I. bill. Approximately 385,000 private business firms were conducting on-the-job training courses. About 1,000 G I s are obtaining education and allowances for study in foreign schools.

In addition, General Bradley administers pension and disability payments to veterans, which run into the billions of dollars, and burial benefits, which also run into the billions.

Under terms of one law, he bought more than 6,000 automobiles for war amputees. He also directs a service to supervise legal guardians and custodians of about 141,000 wards of VA, children of deceased veterans.

Benefit Payments High.

Approximately six million veterans have received unemployment and self-employment compensation benefits through VA and United States Employment service.

Most of the VA administrative problems, which were at an extremely low ebb when General Bradley took over, have been due to the mushroom growth of its activities.

How long will the nation be paying huge pension lists? In March, 1946, VA made the final payment to a dependent, closing the rolls on the War of 1812. Payments still are being made to 49 dependents of Mexican war veterans, while 916 veterans and 2,392 dependents of Indian wars still are getting monthly checks. There are 116 Civil war veterans, with an average age of 100, who are still receiving payments.

Plagued By Changes.

VA officials say that the peak of payments to veterans and dependents of World War I was not reached until 1940.

In the meantime, congress passes new laws and changes those on the books, creating new administrative headaches. More than 200 bills affecting veterans were introduced in the first two months of the 80th congress.

Cost of administering the VA program for the fiscal year 1947 is expected to be approximately 8 billion dollars.

"Off We Go"
AVIATION NOTES

YOUNG FLY, OLD DO NOT

When Americans are young and have little money, they fly. When they get older and begin to earn more, they don't fly.

Two interesting curves in graphic form tell this story in a study entitled "Age Study of the Flying Public," made by Civil Aeronautics administration.

The study reveals that almost 50 per cent of all pilots are found in the two age groups of 20-24 and 25-29, while persons in these groups comprise only 19 per cent of the total population 16 years or older. Less than 5 per cent of persons in these age groups earn $5,000 a year. Two-thirds of the people who earn $5,000 a year or more are between the ages of 35 and 55, but the proportion of all pilots in those age groups drops sharply from 10 per cent at 35 to almost nothing at 55.

Beyond 35, the percentage of pilots drops rapidly. Apparently Americans quit flying completely at 65 although there are known to be several sexagenarian pilots still active in the United States.

• • •

It is cheaper to operate an airplane than an automobile for business, Arthur Whitcomb, Keene, N. H., contractor insisted in testifying before the New Hampshire legislative committee on aviation. He reported that he flew his own plane 27,000 miles last year on business at an average cost of 5½ cents a mile. He drove his car 18,000 miles at an average cost of 6¼ cents.

• • •

FEES REDUCED

A 20 per cent reduction in fees for recording ownership of aircraft and aircraft liens, from $5 to $4, became effective May 1, under orders of Civil Aeronautics administration.

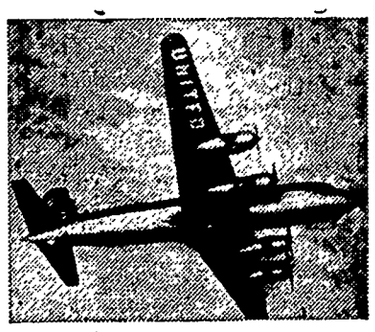
The charges were instituted last August under a congressional mandate to CAA that it defray the cost of service operations through service fees whenever possible.

Other charges levied by CAA in accordance with directions of congress include $10 for issuance of air agency certificates to flying and ground schools, mechanic schools and repair stations, and $5 for issuance of certificates to parachute lofts.

• • •

Even airline pilots scurrying back and forth across the continent can't escape the watchful eyes of their wives. Mrs. Jack Jenkins of Cleveland insists a short wave radio band on the living room console is a necessity for pilots' wives. When her husband, who pilots an American Airlines flight from Cleveland to Nashville three times a week, returns from a flight, she always has dinner on the stove and his slippers ready. She picks up his position report to the airport on their home short wave band.

• • •



SETS SPEED RECORD. . . United Air Lines' new four-engined Mainliner 300 (Douglas DC-6) set a new official coast-to-coast airline speed record of 6 hours, 47 minutes, 13 seconds on a 2,400-mile flight from Santa Monica, Calif., to New York City. The Mainliners now are in scheduled service.

• • •

HELICOPTER POLICY

Helicopters will perform their growing transportation services with a maximum of safety and a minimum of noise, the helicopter council of Aircraft Industries association has assured aviation authorities. Pointing out that "utility of the helicopter can be developed only by taking advantage of its unusually safe and useful flight characteristics," the council urged that regulations be adapted to permit operation of helicopters in urban areas.

11 States Have Adopted Recall of Public Officials

Since 1908, 11 states have adopted the recall, the procedure by which an elected public official may be removed from office by the people before the end of his term, says Collier's. Usually, a petition signed by 25 per cent of the voters must first be obtained and then a special election is held to determine whether and by whom he shall be replaced.

Of the some 200 recalls that have occurred, all have concerned local officials except two directed against state officials, the first having removed the governor and two others in North Dakota in 1921 and the second two commissioners in Oregon in 1922.

Mrs. Ed. Becker was at Belmond Saturday visiting with her aunt who had fallen and fractured her wrist.

Junior Roths and Homer Schoenwetter made a motorcycle trip to Kansas City Monday, returning home Tuesday afternoon.

Mr and Mrs. Walt Kimball of Boone spent the week end here visiting with their son-in-law and daughter, Mr. and Mrs. Cap Blank and family.

Mrs. Howard Spitler is a patient at the Mercy hospital at Mason City where she underwent a major operation Monday morning.

Will Mutch of Grundy Center spent Tuesday in Klemme visiting with his brother-n-law and sister, Dr. and Mrs. A. H. Dulmes.

Mrs. C E Sherwood, mother of Lloyd Sherwood and his sistres, Opal and Ena Mae of Mason City, came to attend the Senior Class Play.

Mr. and Mrs. Ben Riemer of Garner, and Mr. and Mrs. Geo Kern and daughter were dinner guests Sunday at the Emil Beier home.

Mrs. Harvey Barz, Mrs Ben V. Greiman and Mr. and Mrs. Brouwer drove to Oelwein Friday for a visit with their brother, Ray Brouwer who is ill with pneumonia.

Mr. and Mrs. Erling Odegaard of Iowa City spent the week end visiting at the parental John Swalve home. On Sunday they drove to Mason City to see Mr and Mrs. Harold Swalve's new baby.

Clarence Kluckhohn came home Friday from Iowa Falls to send the week end visiting with his parents, Mr. and Mrs. C. E. Kluckhohn. Clarence is a salesman for a grocery concern.

Mr. and Mrs. August Baack and Dorance, and Mr. and Mrs. Howard Baack and Children, Gary, Harlan, Marijane, Marilyn, Howard Jr., and Dennis were entertained to dinner Sunday at the Martin Jensen home near Mitchel.

Mr. and Mrs. Chet Speer of Oakland, California, came for several week visit with Havelock and Klemme friends and relatives. They spent the week end visiting at the Verner Lewis home. Mr. and Mrs. Speer formerly were in the restaurant business in Klemme and were located where the Lewis Radio Shop is now doing business.

Damage Reported In Hancock County Gale

The gale Thursday did minor damage to trees and small buildings in Hancock county. Several small buildings were reported demolished and many branches broken from trees. The terrific wind rolled clouds of dust skyward and made work in the fields impossible. Motorists reported hazardous with visibilty poor along some plowed fields.

Pvt. Wm. J. Cosgriff Stationed In Kobe, Japan

Pvt. William J. Cosgriff is presently on duty with the Eighth Army in Kobe, Honshu, Japan.

Kobe, Japan's second largest port, is being utilized by the occupation army as a supply base. Before the war Kobe was Japan's import and export center. Surrounded by mountain ranges of unusual scenic beauty, it has been called one of the garden spots of Japan.

Colorful, crowded, and cosmopolitian, Kobe still manages to retain the oriental flavor, which made it one of the queen cities of Japan before the war.

One of the unique spots in Kobe where Pvt. Cosgriff will continue to receive part of his army training is the Kobe Base Rifle Range. This range is located on the grounds of the Emperor's Imperial Palace. The palace, destroyed during raids on Japan, has been removed, and the range built near the spot where it stood formerly.

At the present time Pvt. Cosgriff is assigned to the 83rd Depot Supply as an inventory man.

Pvt. Cosgriff entered the army in September 1946 at Ft. Snelling, Minn.

Pvt Cosgriff came to Japan in January 1947, and has been stationed at Kobe since his arrival. He is the son of Mr. and Mrs. George Cosgriff, Klemme, Iowa.

Maynard Dorow Receives Another 4-H Recognition

Maynard Dorow, 17, Garner, is one of 10 Iowa 4-H members from among whom final selection of delegates to the National 4-H Club Camp will be made, the state 4-H club office at Iowa State College advised the Hancock County extension office recently.

The finalists will apear before a committee of farm leaders, educators and public officials in Des Moines, May 3, for personal interviews. This committee will name the four delegates—two boys and two girls—who will attend the camp, June 11 to 18.

Maynard is a son of Mr. and Mrs. W. F Dorow. He is a senior at Ventura High School where he is a student of vocational agricultural, where he also has taken part in athletics, musical activities and edited the school paper.

Now enrolled for his seventh year of 4-H work, Maynard has completed projects in baby beef, market litters and horses. He has been a member of two demonstration teams and taken part in seven judging contests. A demonstration team, of which Maynard was a member, which showed steps in control of grubs in cattle, placed first at the North Iowa Fair in 1946 and received a red ribbon at the Iowa State Fair the same year.

Maynard has been both president and vice-president of his local club, the Concord 4-H Yanks, which is led by his brother Norbert. He has attended 51 of the 54 meetings of the club. He was one of Iowa's delegates to the National 4-H Club Congress in Chicago last December

In evaluating the influence of his club membership Maynard says that his experience has resulted in the adoption of better management methods on his father's farm. He lists specifically the control of swine mange, the use of phenothiazine for control of swine parasites, of rotenone to control cattle grubs and the feeding of better balanced rations to all the livestock on the farm.

Another point he makes in connection with his 4-H experience is that his family has received ideas for home recreaton which have been of value in arranging parties at home.

Goodell Vet Will Be Discharged After 28 Years Army Service

Major and Mrs. E. Robinson are spending this week in Illinois. The former is receivng his honorable discharge at Fort Sheridan, and Mrs. Robinson is visiting relatives in Chicago. Major Robinson has a record of 28 years of service in the army.

DDT is very effective on potatoes. USDA entomologists report experiments where they got a 75 percent increase in potato yield from using DDT to control potato insects.

SEARS, ROEBUCK SCHOLARSHIPS

Farm boys in Hancock County are eligible this year to receive scholarships to Iowa State College under an agricultural scholarship fund established by Sears, Roebuck and Company.

Approximately 15 such scholarships will be offered, according to Paul Henderson, county extension director.

Their value is $200 each, and they are to be made available to superior, but financially handicapped, first-year agricultural students, Henderson explained.

An announcement from the college says scholarships are to be awarded on the basis of scholarship, need, character, desire to study agriculture, and record of activities such as 4-H club and Future Farmer projects, high school, church and community activities.

Money is paid in three installments over the 1947-48 college year, contingent on satisfactory grades by the recipient.

Henderson said he had been asked to nominate only boys living on Iowa farms who rank in the top one-fourth of their classes and who cannot go to college without this help.

Application can be made at the office of the county extension director. He will forward them to Iowa State College where they must be received not later than July 1.

Scholarships similar to the ones offered this year have been given at Iowa State College since 1936 Normally they have for $150, but the amount has been increased this year.

Mrs. Trumbell Hostess At Bridge Party

Mrs. Sumner Trumbell entertained the ladies of the Saturday Bridge club at her home on Saturday afternoon.

Mrs. Orville Bridges won high score and Mrs. Ed. Jacobs second high. Mrs. Geo Lawhorn, Mrs. Ed Jacobs and Mrs. R. A. Jorgenson, Sr were guests.

Since DDT is poisonous to man and animals, you don't want to use it in your garden on leafy vegetables that you eat.

"Here's my Secret of Better Living... Lots of Delicious Dairy Foods!"

Ummmm! So delicious . . . meals planned with *lots* of Dairy Foods! Use them freely and generously, for they're Nature's preferred foods, for delicious flavor, and for vital nutrition! We in Iowa know how *good* they are, for we *produce* them!

A "secret of better living" indeed — golden, delicious, high-score Iowa *butter* . . . Rich, wholesome, refreshing *milk* to drink . . . Fine, tangy *cheese* . . . convenient, vitamin-enriched *evaporated milk* . . . taste tempting, nutritious *ice cream* . . . mineral-rich *cottage cheese* . . . full-flavored *buttermilk* . . .useful *dried milk solids!*

Keep lots of these fine foods in your refrigerator and pantry *always*—use them regularly and generously, for they're *money's-worth*—and as *good* as they are good *for* you!

"IT'S BETTER WITH BUTTER"

Published in the interest of almost 200,000 Iowa Dairy Farmers

From where I sit ... *by* Joe Marsh

Where's the Argument?

You should have heard Ed Carey and Spike Miller debating the merits of Guernseys versus Holsteins. Ed's our firechief, and Spike handles hardware—but to hear them argue you'd have thought that they'd been dairying for life.

Finally they put it up to Sam Carter, who *breeds* dairy cows! Sam hems and haws . . . and concludes there's a lot to be said for Holsteins, and about as much for Guernseys . . . take your pick!

Actually, Ed and Spike were like people arguing about—say, beer versus buttermilk. Folks who've never tasted beer will sometimes get mighty vehement about their choice of beverages. And folks who've never tasted buttermilk will be equally pig-headed.

From where I sit, it's in things we know nothing about that we get bigoted and stubborn. But when it comes to things we know a lot about, we're able to see both sides . . . be tolerant and reasonable . . . and above all, understanding.

Joe Marsh

School Picnic May 23rd

School activities will come to a close with the annual school-community picnic on Friday, May 23rd.

Further details of the graduation program and school picnic next week

JUNIOR-SENIOR BANQUET HIGHLIGHT OF THE YEAR

The Junior - Senior Banquet was held Friday evening, May 9, 1947, at the Klemme High School gymnasium. Every member of both classes was present and all of the faculty, which made quite a crowd.

The Diamond Horseshoe

The theme of the banquet was the Diamond Horseshoe Night Club. The gymnasium was divided into halves with one end as a dining room and the other as a dance floor. Blue and white streamers formed the division with streamers also coming from the center light to all the walls Also from the center was a large horseshoe which shone in the dark. The tables in the dining room were in the shape of a horseshoe, with the motto above the main table.

The banquet itself consisted of the horse's shoe, white ties and tails, femes in formals, hoi polloi, diamonds on rubies, top hats, walking sticks, java jive and jersey bounce. This translated into our common language was potatoes, gravy, ham, peas, salad, pickles, buns, pie ala mode; milk and coffee. It was delicious to—Thanks to the Junior mothers.

As we entered the night club our wraps were checked by the Freshman waiters and hat check girls. Each person received either a red rose or a white carnation.

After the dinner during which we enjoyed soft music and dedication was a short program with Edward Grosshuesch as master of ceremonies. We were entertained by a floor show which was presented by the Junior song birds, Mademioselle LaVonne, Charlotte Lewis, The Irresistable Chorus Girls and Farewell Four.

The remainder of the evening was taken up by dancing to the music of many great name bands.

Last Week Of School Full Of Activities

Several events remain on the calendar as the school year ends.

Commencement exercises for the Class of "47" will be held at the high school gymn, Thursday, May 22nd, at 8 00 W Henry Galbreth, former superintendent of Klemme Public Schools, will give the address. Mr. Galbreth is editor of the Midland Schools Magazine, the official publication of the Iowa State Education Association

Baccalaureate Sunday Eve

Reverend H E Harvey will give the class sermon at the Reformed Church, Sunday, May 18th, at 8 00. The program for that evening is printed in this issue of the Times.

Graduation Thursday

Ninteen seniors are candidates for graduation They are finishing required work this week as they are not required to attend school next week They will take time out Thursday for their annual "skip day". This year the seniors plan to drive to Manly, buy a round trip ticket on the Rocket to Minneapolis, and spend the day there

School Next Week 3 Days

There will be school next week on Monday Tuesday and Wednesday for the rest of the school Hot lunches will be served as usual those three days. There will be no school on Thursday

School Picnic Friday

The school year will end Friday May 23, with a community picnic in the town park. Everyone is invited to attend this picnic Each family is asked to bring two covered dishes, besides sandwiches, dishes and silver for its own members

Coffee and a cold drink will be served. If the weather is bad the picnic will be held in the high school gymnasium

FIRST AND SECOND GRADES GIVE MAY DAY PRAGRAM

Miss Lee Halfwassen's first and second grade pupils presented a very nice May Day program at the school gym on Tuesday evening to which parents and friends were invited.

A May pole dance was presented with Jean Barz as May Queen. Songs and recitations were given and several numbers by the Rythm Band were greatly enjoyed.

Following the program lunch was served in the first and second grade room.

Gloria Haefner Won Second Rating In National Contest

Gloria Haefner, who won a first rating with a piano solo in the State Contest, won a second rating in the National Contest at St. Joseph, Mo.

Dorothy Kuepke, of Garner, won a first rating. Both girls accompanied Miss Rankin, Garner music teacher, to St. Joseph. LaNelle Harvey of Klemme also went with the group.

NEW EQUIPMENT ADDED AT THE CORNER STORE

Modern Ice Cream Cabinet Increases Storage Capacity

Last week Ray Jorgenson, Jr. further improved his Corner Store by having a new, modern ice cream cabinet installed next to his soda fountain.

The old cabinet was moved to the rear of the store where it will be used to carry surplus ice cream This arrangement enables the Corner Store to carry a larger assortment of ice cream and frozen novelties in stock and gives them twice the capacity they formerly are able to carry in stock.

This young Klemme business man has made a lot of changes and improvements since purchasing the drug store from P. M. Wilson, March 1st. He also contemplates more improvements in the future.

TIMES LATE THIS WEEK

The Times is unavoidably late this week Elwood Geary, our linotype operator, took the week end off to be with his mother at Fonda, Iowa for Mother's Day. While there his grandmother passed away and Elwood remained to attend the funeral on Tuesday, getting back to work on Wednesday morning.

Then to top off the man power shortage, the Editor was sick the first of the week, and nothing much was done in the way of getting the paper out. It all added up to a lack of time!

WEDDING DATE ANNOUNCED

Mr and Mrs. Harry Jubert of Green Bay, Wisconsin, announce the opproching marriage of their daughter, Vivian, to Calvin W. Grosshuesch, son of Rev. and Mrs. Calvin Grosshueesch of Klemme, Iowa. The wedding will take place at the First Presbyterian Church at Green Bay, Wisconsin, on Saturday evening, May 31st at 6:00 o'clock.

METHODIST STUDY GROUP THURSDAY MAY 8

The Methodist Study Group met with Mrs. Patet on Thursday May 8. The chairman, Mrs. E. J. Arnold opened the meeting by giving the history of the song, "The Kingdom Coming."

Mrs. Otto Lemke led the devotion followed by prayer.

The lesson was given by Mrs. Harvey. Mrs. John Chambers had charge of the questions.

The musical numbers were arranged by Mrs. George Schoenwetter. Mary Swanson and Mrs. Patet served a nice lunch. There were thirty ladies present.

Send or phone your news to 12 and build your home-town newspaper.

Public Notice

It is quite apparent that traffic conditions in Klemme are getting progressively worse. Not long ago a 9-year old girl was almost hit on our streets; perhaps next time this accident may be fatal. If so, will the blame be placed on the Council for inefficiency as you might say in this department, or rightfully on yourselves as citizens that you have left unreported, violations that helped to bring this about and lacking the backbone to act as a witness to the violation when asked to do so. With this in mind, we wish to place before you these thoughts, and we ask your cooperation.

First:

To you minors whose only apparent aim in life is to see how much rubber you can burn off of your tires by turntable tactics at the intersections, two-wheel turns on the corners, dead stops to show the public how well your brakes are working, and other acts of pure ignorance, will not be tolerated. Further, firecrackers, shot gun blasts, and other means of creating a disturbance will fall into the same classification for which penalties are set by ordinance and you may not have your driver's license either for perhaps 3 months.

Second:

To you parents, of which some of you are well aware of what your youngsters are in the habit of doing, in case there is an accident, fatal or otherwise, you may discharge your financial end of it, but the moral side of the picture can't be wiped off that easily, and its about time that these things were settled at the proper place, namely, your home.

Third:

To the young people of the surrounding community, we welcome you to Klemme, but we expect you to act as ladies and gentlemen while in our town, as your parents expect you to act. If your drive into town does not have the proper toning down effect, tip your car over a couple of times on the back forty, turn your lights off if driving at night; place your smaller brothers and sisters at irregular intervals along your highway and see how many will be left to answer breakfast call in the morning; perhaps then our streets and school ground will be used for the purpose for which they were intended.

Fourth:

Our Ordinance is GOING TO BE ENFORCED. If we are unable to do it with your help, the STATE PATROL will do it for us. They play no favorites and we don't either.

Respectfully Submitted,

THE KLEMME TOWN COUNCIL.

BRITT TWP. FARM BUREAU ENTERTAINED BY 4-H GIRLS

The Britt Twp. Farm Bureau was entertained by the Britt Busy Bureau 4-H Girls club, May 8. The girls presented two plays and two piano seclections. The piano selections were by two of the Hejlik girls. Chas. Jackson, County Organization Director, gave a short talk on the value of Farm Bureau to each individual farmer. Mr. Jackson also gave some interesting figures on Farm Bureau services.

Paul Henderson, County Extension Director showed Moving pictures on weed control and discussed the use of 2,4-D weed spray. Mr. Henderson also urged all farmers to cooperate in the fly control program.

Klemme Merchants In North Central Baseball League

MOTHERS, NOTICE

Miss Seim and her pupils are inviting the Kindergarten children of next year and their Mothers to visit us on Friday afternoon, May 16th, 2:30 in the school Gymnasium. There will be a short program and lunch will be served afterwards.

POPPY DAY WILL BE SATURDAY, MAY 24TH

Organization of the corps of volunteers who will distribute poppies here on Poppy Day, Saturday, May 24th, has been completed by the Klemme Auxiliary The corps is composed of members of the Auxiliary, both senior and junior and the Girl Scouts

Carrying baskets of poppies, made by disabled Veterans of both wars, the Girl couts and the Auxiliary ladies will be on the streets early on Saturday of Poppy Day and will continue to offer flowers, to be worn in honor of the war dead, throughout the day.

In return for the poppies, the Poppy Day workers will receive contributions to the American Legion's welfare and rehabilitation funds

The disabled Veterans, who persons receiving any pay in make the poppies, are the only the Auxiliary's poppy program

All of the women and girls distributing the poppies donate their services for the day, and every penny of the money contributed goes for the benefit of the disabled men and the needy families of Veterans.

The local corps will be part of a nation-wide army of more than 100,000 unpaid volunteers who will distribute the little red flowers of remembrances throughout the country on the annual Poppy Day

Buy and wear a poppy!

HANCOCK D. H. I. A. REPORTS

John Ward, Supervisor for the Hancock County Dairy Herd Improvement Association reports 26 herds on test with 399 cows, 350 cows in milk and 49 dry. The average production per cow for the 399 tested was 802 lbs of milk and 29 2 lbs. of butterfat. Ward also reported the following lactation records:

A grade Guernsey owned by Richard Schubert, Britt, Iowa, in 305 days produced 7192 lbs. of milk and 352 lbs. of butterfat. A Registered Holstien, owned by Jack Dethmers, Garner,Iowa, in 305 days produced 10 920 lbs of milk and 414 lbs. of butterfot. Two registered Jerseys, owned by Carl Ruger, Britt, Iowa, in 305 days one produced 7,189 lbs. of milk and 388 lbs. of btuterfat, and the other one produced, in 246 days, 5,946 lbs. of milk and 355 lbs. of butterfat. A Grade Guernsey, owned by Kenneth Dovoan, Wesley, Iowa, in 305 days produced 5,749 lbs. of milk and 278 lbs. of butterfat. A Grade Holstein, owned by Floyd Friedow, Kanawha, Iowa in 305 days produced 11, 534 lbs. of milk and 413 lbs. of butterfat. A Grade Holstein, owned by Hammon Bros. in 305 days produced 8,765 lbs. of milk and303 lbs. of butterfat. A Grade Holstein owned by Mitchell Bock, Klemmo, Iowa, in 305 days produced 8,651 lbs. of milk and 291 lbs. of butterfat.

GRADUATION GIFTS

The Times has just received a line of Whiting Stationery, the world's finest boxed writing paper, very suitable for graduation gifts and priced as low as $1:00 per box.

BEGIN LOOP PLAY AT HAMPTON SUNDAY, MAY 18

Eight North Iowa Towns In League This Year

The Klemme Merchants independent baseball team have again teamed up with seven other North Iowa towns to form the North Central Iowa Baseball league.

The local team will open the league season at Hampton on Sunday, May 18th. Other teams in the league are Clear Lake, Latimer, Hansel, Rockwell, Geneva and Popejoy.

Locals Lost To Kanawha

Klemme lost on the home diamond Sunday to Kanawha 10-4 The losing pitcher was Berhow and the winner pitcher was Hill.

NIMRODS GET SET FOR OPEN SEASON ON FISH

Crappies May Be Taken At Clear Lake This Year

May 15 adds northern, wall-eyed and sauger pike, yellow perch, yellow bass, and silver bass to the list of fishes already open in Iowa. Nesting species of game fish on which the season does not open until June 15 include large and small-mouth bass, warmouth bass, sunfish, blue gills and crappies.

Crappies In Clear Lake

However, crappie fishing has been set ahead and opens May 15 in the following state-owned lakes· Clear Lake; East and West Okoboji lakes; Lake Manawa; Storm Lake; Black Hawk Lake, Lake View State-owned Gravel Pits and Arrowhead in Sac County; Hartwick Lake and Backbone Lake in Delaware County; Upper and Lower Pine Lakes in Hardin County; Blue Lake in Monona County; Brown's Lake in Woodbury and Noble's Lake in Harrison County.

The minnow and frog season opened May 12. Four dozen frogs is the daily catch limit with eight dozen possession limit, except for bullfrogs with a catch limit of 18.

CONTROL FLIES IN BARN BY SPRAYING WITH DDT

The old custom of darkening the barn to keep flies out is no longer necessary in these days of DDT.

Since flies seek the light, many farmers have followed the practice of covering windows in barns with paint or cardboard and hanging burlap sacks in the doorways to make the interior as dark as possible.

A better method, explains Harold Gunderson, Iowa State College entomologist, is to spray the barn and the livestock with DDT.

On the average Iowa farm, 4 to 6 pounds of 50 percent wetl table DDT powder will be needed to spray all outbuildings and livestock products with one complete application. A second application may be needed before the season is over, so the entire program for the buildings will require 8 to 12 pounds of DDT. In addition, each 10 head of the livestock will require 5 pounds of 50 percent wettable DDT powder for the season.

Then let the flies light where they may. If they come into a well-lighted barn that is also well sprayed, the will soon be dead anyway.

Feed dairy cows while they are dry. They need 6 to 8 weeks' rest between freshenings.

Linen towels absorb water quickly.

by GRANTLAND RICE

AS THE lid of a new baseball season is pried off, it seems to be about time that Ford Frick, president of the National league, and Will Harridge, president of the American league, did something about the umpire situation.

We are referring to the matter of umpire baiting—including profanity, invective and shouted insults from too many managers, and too many players, who use umpires as alibis for their own mistakes or dumbness We agree 100 per cent with Wilbur Wood, sportswriter, that such actions in the future should be suppressed under drastic penalties.

B. Southworth

It has been said that umpire baiting has a big crowd appeal and that it is now an accepted addition to the national game. We don't believe this is true It may have its appeal to a few, inclined to the mucker side, but not to the mass of spectators, who go out to get their thrills from a hard fought battle on the field, not to hear a salvo of billingsgate directed at some man in blue If this has become a tradition, then it is a tradition that should be ended.

Fight and aggressiveness are a big part of the game, but they should be directed against the opposing team, not against an able arbiter, whose average of ability is too often well above the average of the ball player's skill.

Umpires today are carefully selected and well trained. Their record for honesty in the last 40 years surpasses any other record in sport.

Proud of Profession

They have an amazing pride in their work, in calling each play as they see it. Pride in their profession is something that not all managers and ball players have. Many have—but too many do not. Otherwise, many more ball players would be in far better physical shape both before and during the baseball season.

The managerial or player squawk is usually an alibi, either for lack of physical skill or a cover-up for missing brain cylinders. No smart fan ever falls for this corny hokum, this attempt to shift the blame.

The umpire's decision is final. A dozen profane Babels can't change it. Right or wrong, it is the way he saw it. And the umpire is in the spot to see it better than anyone else. He is certainly in a far better spot than howling fans, 150 to 200 feet from the play, looking on at deceptive angles.

A short while back, we asked several National league umpires what managers and what teams gave them the least amount of trouble.

The vote came for Billy Southworth, formerly of the Cardinals now directing the Braves, and Eddie Dyer of the Cardinals.

Cardinals Don't Argue

Neither Southworth nor Dyer will stand for any such rowdy tactics. And what team has been the most aggressive outfit in baseball for the last 10 years? You know the answer. The Cardinals. But they take out their aggressiveness in hustle and scrappiness on the field. Their opponents are the other teams—not the umpires.

No umpire ever heard Walter Johnson make any sort of kick.

"In a sudden lapse, I called a pitch that almost split the plate a ball against Walter Johnson," Billy Evans told me. "Johnson never even frowned. I apologized later for my mistake. 'Yes, I knew it was a strike,' Johnson said, 'but we all make mistakes.' "

I was sitting on the bench with Ted Williams. He went to bat with two on and took a third strike. No squawk.

"Was that a good one?" I asked him.

"Yes," Ted said. "It cut the outside corner by an inch. It fooled me. It was a swell pitch."

That's the way baseball should be. The great majority of the big names in the game are that way. They don't have to throw their alibis at the umpire. Cy Young, Mathewson, Alexander, Johnson—four of the greatest of all pitchers, never had any umpire trouble.

If ball players want to show their aggressiveness, why not score from first on a single to center to win a world series, as Country Slaughter did? Or run bases as the Cardinals run bases?

Rare in Other Games

What fun can a crowd get from seeing a swarm of players surround some umpire, holding up the game, howling about a decision that won't and can't be changed? They don't see anything like this happen in football, an even more rugged competitive sport. They rarely see it in any other game.

Umpire baiting isn't aggressiveness. Too often it is cowardice, and this also goes for the stands, where the odds are only 30,000 to 1.

The umpire can take care of himself. Being human, he will make his share of mistakes on split-second or split-inch decisions.

HOUSEHOLD HINTS

Pushing a child in its carriage provides a form of outdoor rest, but should never take the place of a child's real nap.

—•—

Make it a habit to turn the handles of saucepans toward the back of the stove, so that they are out of reach of little children.

—•—

Freshly ironed shirts hung on clothes hangers until time to wear should have plenty of free space between them, especially in warm damp weather.

—•—

Store felt hats, well cleaned and aired, covered with paper in a dry place. Dampness may cause mildew.

—•—

Decorator's rule on glass curtains: Allow the curtains to reach the sill, to cover the base of the apron of the window or to the floor, just touching. In between lengths never look right so gauge your curtain lengths as above and allow for shrinkage and your windows will look well dressed.

*Recipe given.

heat and stir in liquid pectin. Stir and skim fruit by turns for 5 minutes. Pour into sterile glasses and cover at once with paraffin.

Strawberry-Pineapple Jam.

Combine equal parts of strawberries and shredded pineapple with sugar equal in weight to the fruit. Boil until thick and clear, as for jam. Pour into sterile jars and seal at once

If your taste turns to cool, refreshing desserts that make use of strawberries immediately, then you'll want to hang onto these two which take it easy on the sugar supply. Both of these may be made easily in an automatic refrigerator tray.

Strawberry Ice.
(Serves 4)

½ cup granulated sugar
½ cup light corn syrup
1 cup cold water
1 quart washed, hulled strawberries

Cook sugar, corn syrup and water until mixture spins a thread, or until thermometer registers 228 degrees. Mash strawberries, and add to syrup; mix well and chill. Turn into freezing tray and let freeze until firm, stirring the mixture once or twice with a fork.

***Strawberry Sherbet.**
(Serves 4)

1½ cups strawberries
2 tablespoons lemon juice
⅔ cup canned sweetened condensed milk
2 egg whites, stiffly beaten

Press measured berries through a sieve. Add milk and lemon juice, then chill. Fold in stiffly beaten egg whites. Turn into freezing tray and chill in automatic refrigerator until frozen around the edges. Turn mixture into bowl and beat thoroughly with egg beater Return to tray and freeze until firm.

If you are lucky enough to have one of the crank freezers, then you'll want to make a share of strawberry ice cream for the week-end. Truly there is nothing more tasty and delicious than the pale pink ice cream made with crushed, fully ripe berries. Serve it plain in all its splendor and you won't need a thing to go with it. Do be sure to have enough for seconds, because there's nothing better than homemade, crank freezer type, strawberry ice cream.

Strawberry Ice Cream.
(Makes 1½ quarts)

1½ cups milk, scalded
2 eggs, slightly beaten
1½ teaspoons vanilla extract
Dash of salt
6 tablespoons granulated sugar
¾ cup corn syrup (light)
1½ cups heavy cream
1 quart washed, hulled strawberries
¼ cup sugar

Stir milk into eggs in top of double boiler. Cook until mixture coats the spoon. Stir in vanilla, salt, 6 tablespoons sugar and corn syrup; Cool, then add cream. Mash strawberries and add to them ¼ cup sugar. Fold in custard mixture. Freeze in a two quart freezer, using 8 parts of crushed ice to one part of salt.

Released by Western Newspaper Union.

Never cook soups with herbs for a long period of time, as the herbs lose their delicate flavors. Sprinkle the herbs in the soup just a few minutes before serving to get the most out of them.

To save heat and keep the kitchen clean, use pots and pans that fit neatly over burners so that all heat will be utilized.

Do not attempt to remove grease in its liquid form from floors. Pour ice water on the spots, then scrape the fat off with a knife.

The FICTION Corner

The Rustler Was a Gentleman

By COLE RICHARDS

THE riders, three men and a girl, burst from Ladrino Canyon like bullets fired into the dawn. Spurs flashing, whirlwinds rising from the hoofs of the straining horses, they pelted down on Kansas Terry The girl was Toni Lee, the men, her foreman, Chuck Mayne, and her cowboys, Slats and Jimmy Gwinn.

"Outa all New Mexico," the burly Mayne thought, exultantly, "we picked that there canyon to ride through. And here's our rustler, with a dead calf."

His exultation was tinged with discomfort. Embarrassing, having a lady with them; he could only hope the men, on both sides, would gloss things over, sort of.

Kansas Terry, the rustler, could have grabbed his pack pony's lead-rope and vaulted into his saddle He could have got away through the high greasewood, but he did not.

He bent over the dead roan calf. The nickel conchos on his leather roping guard flashed with the swift turns of his wrist. He wiped and sheathed his bowie knife Tall, lanky, easy in manner, he stood with his back to the party riding toward him

The riders circled him at the gallop, pulling the ponies to their haunches in sudden stop.

Kansas Terry's brown Stetson was shoved back, disclosing his pale eyes, with their sly, mocking expression. He smiled sweetly. "Mornin', Miss Toni. Mornin', Chuck. Mornin', Slats. Mornin', Jimmy." Addressing the girl, he bowed from the hips. Kansas Terry's good manners never failed him.

Chuck Mayne's bushy brows met over his rugged face like storm clouds over the Bad Lands. "We got yuh this time, Kansas"

"Now Ah wouldn't say so," Kansas Terry drawled, gently.

Chuck Mayne felt uneasy. There was something about the mockery in Kansas Terry's pale eyes, something about the extra silk on his politeness, that said he wasn't caught by a long way

Toni Lee drew her fingers across her eyes as if a mist gathered there. A slim girl, with wide-set eyes, gentility showed on her as plainly as the silver bracelets on her brown wrists.

"That there," Mayne asserted, "is a calf outa Miss Toni's herd"

"That there," Terry returned, courteously, "is a maverick. There ain't a brand on it"

MAYNE swung out of the saddle The right side of the calf was up, the curly roan hair unmarred by branding iron. He heaved the carcass over His heart turned over, too, and stopped

On the calf's flank a square as large as a man's hand glared bright red

The calf, strictly speaking, had no brand. The brand had been cut away.

Chuck Mayne straightened up, with his fists on his hips. Outwardly cool, inside he seethed

He rode up close and whipped the rustler's gun from the holster. "Stretch the mred hands, high, mister."

"Regular cactus of a guy, ain't yuh?" he drawled, amiably. "Sharp and hard to grab." His own bowie flashed. He cut a similar square of hide from the roan flank. "This what you done?" Mayne hurled the soggy rawhide as far as he could. "Git it, Slats."

Slats transferred the lead horses to Toni Lee. Touching spur to his pinto, he scooted to the piece of rawhide. Arriving there, he made a slow circle, and other circles inside that. Slats could pick up a trail with any Indian. If the brand had been thrown he would have found it.

"Nope," he said, at last. "'Twasn't throwed."

Jimmy, dangling his loop, looked from the cottonwood in the canyon to the lanky, confident rustler. He shook his head "Once a rustler cut a bran' thetaway. He stuff it down a prairie dog hole."

"I heard," Slats put in, languidly, "of one jammin' a piece of hide down a calf's throat."

"Look for it!" Mayne ordered. "Doggone it we caught this rascal redhanded."

Kansas Terry looked at his hands, coolly and impersonally. He appeared to find nothing wrong with them His finger touched his throat, above the knotted red bandanna, as if a hemp noose rasped the flesh The gesture made Mayne's hopes rise, but they thudded down when Terry folded his arms and stood at ease

Muttering, "We'll find thet brand," Mayne hurled himself into the search. He drove on Slats and Jimmy with a fury of energy.

A sweating trio of men worked over the desert around the calf They looked into mesquite and snarled cactus and prickly pear. They investigated four prairie dog holes, a badger hole and the throa of the calf.

"So th' calf ain't branded," Mayne said reluctantly. "Th' brand wasn't throwed, wasn't stuffed nowhere, and it sure aint on yore person, or the blood 'ud give yuh away. But some day I'll git yuh agin."

Kansas Terry smiled sweetly. "Ah'll be at yore service," he said, courteously, without a trace of gloating. "Goodbye, Miss Toni. Goodbye, Chuck. Goodbye, Slats. Goodbye, Jimmy." Addressing the girl, he bowed.

"Yuh got doggone good manners," Mayne scowled, "but yore a rustler, jest th' same."

THE four riders made a cloud of dust along the escarpment. Kansas Terry stood motionless, watching them. The riders vanished up a draw, but Terry stood immovable He stared at the emptiness they left on the plain, for a long, long time Once he readjusted the bandanna, and his fingers slid gingerly along his neck. His hand found the bowie knife, but left it in the sheath.

The sun rose until the heat washed all the pale green and orange from the sky, leaving it a brazen blue Terry's sorrel and the black pack-pony grazed farther and farther away Still the rustler did not move, beyond shifting his feet to ease them, and rolling a cigarette

At last he drew the bowie and took one step toward the calf.

He tensed, sprang back, reached for his gun.

Mayne, riding alone from the canyon, shouted, "Jimmy's got a rifle on yuh, Kansas! Don't move!" He rode up close and whipped the rustler's gun from the holster. "Stretch them red hands, high, mister."

"Matters stand jest as they did, Chuck."

"Sho' don't I know it? Me an' Jimmy's been a-watchin' yuh, while Slats got Toni away Didn't want her to see yuh caught an' hung."

"Thank yuh, suh," Terry said, sincerely. "But the brand still ain't in evidence"

"No, but I got to thinkin' after I left yuh."

Mayne shoved the gun muzzle under the brim of Terry's brown Stetson, and lifted the hat. Terry's curly hair had a strange tonsure—a square of roan calf hide.

"Figured it thetaway," Mayne said softly "Yuh got too good manners, Kansas, to stand in front of a lady with yore hat on."

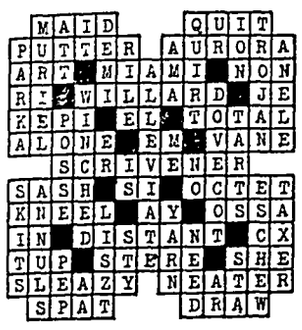
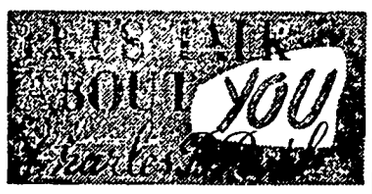
Answer to Puzzle Number 12



Series H-47



YOU MIGHT BE A NAGGER

The husband was up for striking his wife. He had no defense except that she nagged him continuously. But in the eyes of the judge that was sufficient, for he said, in acquitting the husband, "There's nothing worse in this world than a nagging person."

Note that he said "person," not "woman," for it is a fact that just as many men as women nag—and both men and women, when they nag, put big boulders in the path of their life.

Maybe you know naggers and wonder why they nag. It's a curious and interesting reason. Naggers nag because they are dissatisfied with their own existence, and want to make others dissatisfied. That is one reason. Another is that they are jealous. A third is that the nagger is simply a selfish, spoiled person.

The worse thing about nagging, however, is that many persons are naggers without knowing it.

Keep a record for two or three days, and if you find a querulous note in your actions or words, a tendency to like to tell others what to do, you're a nagger.

And then you have to take the treatment. The treatment consists of one word—STOP. If you want others to like you, if you want to make the most out of every day of your life; don't develop the habits of a nagger.

Lovely Centerpiece

HERE'S a crocheted doily to treasure — cleverly designed around a center arbor hung with five-inch bunches of round grapes and big three-inch crocheted leaves. Completed it is 20 inches and is wonderfully easy to do. Nice as a dining table centerpiece in ecru or white.

Church Construction

The greatest wave of church construction in history occurred in France in the 12th and 13th centuries. Although having only 10,000,000 inhabitants, France, between 1170 and 1270 alone, built 80 cathedrals and nearly 500 cathedral-class churches at a cost that today would be equivalent to about $3,000,000,000.

END LAXATIVE HABIT THIS EASY WAY!

Millions Now Take Healthful Fresh Fruit Drink—Find Harsh Laxatives Unnecessary

It's lemon and water. Yes—just the juice of 1 Sunkist Lemon in a glass of water—first thing on arising.

Taken first thing in the morning, this wholesome drink stimulates bowel action in a *natural* way—assures most people of prompt, *normal* elimination.

Why not change to this *healthful* habit? Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B_1 and P. They alkalinize, aid appetite and digestion. Lemon and water has a fresh tang, too—clears the mouth, wakes you up!

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

Variety of Ingredients Adds to Salad Popularity

To tempt the family appetites, keep salads bright and attractive to the eye, as well as cold, crisp and well flavored. Variety in the ingredients also helps to keep the raw salad one of the favorite dishes at family meals The best sources of food values are the foods we eat, not the ones we put on the table and merely look at.

Chopped salads are favorites with most families because a variety of odds and ends can be used as ingredients, and the leafy vegetables are chopped in with the rest and not merely used as a base for the salad to be thrown away uneaten. While head lettuce is standard in salads, watercress, spinach and endive are all good greens richer in vitamin A, that also add excellent flavor to a tossed salad.

To make salads the best possible, prepare them as close to serving time as possible, and have them well chilled. Wash all the ingredients carefully, but do not leave them soaking in water. Drain all vegetables well before using them in salad. Use a sharp knife or scissors for cutting or chopping the foods, mix the salads lightly and add the dressing just before serving the salad, to avoid wilting.

Cheap Glasses

Many poorly fitting and cheap glasses cause ocular distress and headaches, according to the Journal of the American Medical Association. In discussing the harmful or beneficial effects of the average sun glasses on the eyes, the Journal states: "The average sun glasses, obtained in drug and ten cent stores, if sufficiently dark, are as a rule comforting to the eyes of the average wearer on an average bright day, on the water or on the beach, where they are usually used. They reduce the total amount of light entering the eyes. The idea that certain makes of glass do not transmit the 'harmful' ultraviolet light is mostly sales talk, as the ordinary white glass allows but little ultraviolet light to pass through. In fact, in order to obtain passage for ultraviolet through a window pane it has to be specially made for that purpose A certain amount of ultraviolet light is beneficial to the eyes; it is for this reason that vacations are taken at the seashore and in the mountains, and in the winter patients are sent to sunny climes."

Land of Paradoxes

Alaska is a land of paradoxes. Generally known as the "frozen north," the territory offers a climate that, in its variations, closely resembles the climate of the northern United States. Indeed, most of the territory lies within the north temperate zone. In spots, of course the winter-time temperature might justly be called sharp, for the thermometer does drop well below zero. On the other hand, summer temperatures range upward from 70 degrees above. Alaska is known too, of course, as the "land of the midnight sun." And, thanks to this characteristic—the long summer days—garden crops grow faster than they do in most regions in the states, and they grow bigger.

Long Service

The first iron fighting ship in the United States, and the second in the world by only a few months, was launched at Erie, Pa., in 1843. This ship, the iron barkentine USS Michigan, was commissioned the next year for use on the Great Lakes and saw varied service through many years as a patrol vessel, guard ship and training ship during the Spanish-American war. In 1905 the name USS Michigan was taken from the old craft and given to a new battleship. Renamed the Wolverine, she saw further service on the lakes and when that name, too, was transferred to a carrier in 1943 she was laid up in Erie Harbor almost exactly one hundred years after her launching.

'Operation Crossroads' Aid To Ship Design, Says Writer

The atom bomb tests at Bikini atoll must be regarded as "the most widely misunderstood scientific experiment in all history," Philip W. Swain, editor of the technical magazine, Power, declares. Asserting that Operation Crossroads was "brilliantly planned and managed," Mr. Swain said that the tests were conducted primarily to "get points on a set of curves," and that data so obtained were worth many times the expenditure. The intelligent use of these curves by the men who build and operate the navy will be worth many times the estimated $100,000,000 cost, he said.

Asserting that "both Bikini tests were brilliantly planned and managed," Mr. Swain said that while the air burst bomb missed the target ship Nevada by 1,500 to 2,000 feet, falling astern and slightly to port that "this will not greatly hamper the primary curve-plotting operation, based on the measured distance of ships from the actual burst."

The editor's own summary of the effect of an air blast on today's typical warships was given as follows: up to one-fifth mile, sinking, to one-half mile, heavy damage, to three-fourths mile, moderate damage; to one mile, slight damage He estimated that the underwater bomb can sink ships up to 2,000 or even 2,500 feet away.

Striking Scenery

Nature has created striking effects in the Wurttemberg-Baden region of Germany. The great rift valley of the upper Rhine, part of which forms the western border of Baden, is a broad trench of fertile farmlands, orchards and vineyards dotted with industrial towns Beyond the Rhine gap, the wooded hills that spread across Baden into Wurttemberg present another type of country, one of lonely lakes and waterfalls, rocky gorges and the solitude of the firs and beeches of the Black forest. In this historic section of central Europe, old towns and ruined castles depict events from Roman to late medieval times, when feudal barons struggled for power. At Ulm, on the Danube in the southeast corner of American-occupied Wurttemberg, the Austrian General Mack surrendered to Napoleon. Baden's Heidelberg, with its famous castle and university, claimed nearly 200,000 visitors every year.

Oscillating Bed

An oscillating bed which aids in fantile paralysis victims in breathing, and which public health officials say may have many other uses in treating respiratory diseases, is now being used in the treatment of polio sufferers The bed is mounted on a motor-driven frame which an electronic drive see-saws in rhythm with the patient's normal breathing The patient may sleep in any position without losing the effectiveness of the treatment. Neither the bed nor the motion restricts usual care or treatment of the patient in any way Basically the bed is a standard hospital bed with crank control for raising the patient's head and knees A clever rocker device eliminates the jolt ordinarily present when an oscillating bed changes its direction of motion.

House Plants

Suit the house plant to the window where it will stand Different plants vary in their needs for light and sun. Most flowering plants must have sunshine to bloom. A north window, therefore, is a poor location for them, and a south window is best for profuse blooming. Geraniums and begonias are among the favorite house plants that do best with plenty of sunshine during the winter African violets will thrive with the minimum of sun and may be grown successfully at east or west windows. In contrast, foliage plants may do well at north windows as they need little or no sun.

Giant Spud Gave Famed Actress 'Lift' for Show

Some interesting stories have been told concerning food "fads" of famous people. One of these stories concerns Sarah Bernhardt, the famous French actress, and her passion for giant-size baked potatoes

Miss Bernhardt was scheduled for a performance at Keith's Hippodrome theater in Cleveland in 1917, but shortly before curtain time she wired John F. Royal, manager of the Hippodrome, that she was too ill to make her appearance. Royal knew that Miss Bernhardt, then 73 years old, was under constant medical care. One leg had been amputated three years before. So he made elaborate preparations for Miss Bernhardt's comfort—even installing a kitchen range in her dressing room and borrowing the Hotel Statler chef who had cooked for her on a previous visit to Cleveland

The chef had informed Royal that Miss Bernhardt had a great passion for giant baked potatoes served with big slabs of butter. So the grocery stores of Cleveland were scoured for Idaho titans. When Miss Bernhardt arrived at the theater, she revived a bit at her first sniff of baked potatoes, and quickly consumed two of them. In the middle of her third baked Idaho, the great actress looked up, announced that she felt better, and would make her appearance after all.

Oxygen Starvation Threat To Life of New Infant

Oxygen starvation, which is often promoted in childbirth by popular drugs for the alleviation of the mother's pain, may be the cause of unnecessary death for the infant or severe permanent damage to his central nervous system with a resulting lowered intelligence, according to Dr. Herbert F. Traut, professor of obstetrics and gynecology at the University of California Medical school.

Dr. Traut explained that the mechanism whereby oxygen is channeled to the human fetus is probably the least efficient of any of the higher animals. Red blood cells circulating from the mother to the fetus are the primary source of oxygen. The supply from this source is decreased in many cases in the following ways: by a natural lowering of circulation to the fetus in the last three months; by a degeneration of connective tissue with clotting and decreased circulation, apparently an inherited factor; and by nutritional deficiencies, such as vitamin shortages.

The physician said that the use of nitrious oxide for anesthesia, and of morphine, scopolamine or pituitrin in labor further decreases the oxygen supply to the infant. He said that in any case where a shortage of oxygen to the fetus is indicated use of these agents should be avoided and the patient should breathe pure oxygen.

Services' Experiences Aid States in Combatting Rust

The wartime experience of the army and navy in protecting equipment against rust and corrosion is being turned to good account by at least seven state highway departments, it was disclosed in a report by Du Pont chemists.

Seven states — Alabama, Iowa, Kentucky, Massachusetts, Michigan, Minnesota and Missouri—are using a priming paint containing zinc yellow pigment for protection against rust on both new and existing steel highway signs Zinc yellow is a pigment that was used in paints on navy ships, army jeeps, trucks, tanks and planes, for an undercoat next to bare steel and aluminum. Primers formulated with this pigment dry rapidly and provide a hard, adherent surface for the finish coat.

Where there is continuous exposure to the weather, the chemists said, the use of a zinc yellow priming coat on a clean metal surface affords many additional years of rust-free life The highway signs of the seven states are painted with primers in which an average of 27 per cent of the pigment is zinc yellow.

Tinting and Dyeing

The only difference between tinting and dyeing is in method. In tinting, you simply rinse the article in a lukewarm solution for a short period of time. The resulting color will survive a number of launderings, but it will not be a fast color in the commonly accepted meaning of the term. It is dyeing that produces fastness in color This is done by use of hot water (not boiling) and longer immersion of the article in the dye-bath. Complete or nearly complete saturation is thus achieved. Whereas a single vessel is employed in tinting, two vessels are recommended for the dyeing process. One vessel is used to prepare the dye solution—the dye being stirred in a quart of warm water until dissolved. The second vessel is for the dye-bath itself. It contains the article to be dyed, immersed in sufficient cold water to cover it The solution from the first vessel is poured into it and the dyeing process is begun. Most colors can be tinted or dyed interchangeably. However, tinting will not sufficiently develop the shade of deeper colors and dyeing is recommended for these colors

Steel Vessels

By 1885, iron and steel ships were being built up and down the Atlantic seaboard; in San Francisco, Portland, Ore., Pittsburgh; Wyandotte, Mich.; Dubuque, Iowa; Cleveland and in a number of other cities. Of 48 ships built in that year, 6 were of steel. Six years later, 8 of 40 were of steel. The navy, then being built under full draft, was to be almost entirely of steel. By 1890 and 1891, more steel ships were being made than of iron Even in Bath, Maine, one of the last strongholds of the old wooden sailing vessels a steel sailer was built in 1894 By 1897, steel predominated to the extent that 67 out of 68 ships were made of steel. In that year, Newark ,N J, led production with 14 vessels.

Thin Coats Best

When refinishing furniture, two thin coats of paint, varnish, enamel, shellac or paint are better than one thick coat. When a thick coat of finish is applied, the surface of the coating dries quickly and seals over, so that solvents are trapped underneath and air cannot get in to oxidize the oils. The entire drying process is interfered with, so that the varnish may check and become brittle on top and spongy underneath A better method is to apply a thin coating, let it dry thoroughly, and then apply the second coating This applies not only to furniture, but to most other surfaces as well

Rendering Fat

Leaf fat and fat trimmings make the best lard, while the ruffle or gut fat makes the poorest, according to nutritionists. The two types of fat should never be rendered together. In preparing the fat, trim out all the lean. It is not necessary to remove the skin. Cut the fat in cubes, cook over a slow fire, and stir frequently to keep it from sticking to the bottom of the kettle. Cook the lard slowly until white blisters form on the cracklings and they begin to brown. At this point most of the cracklines will float. When these two signs appear, it's time to take the lard off the fire. Now press out the cracklings and strain the lard through a cloth. Stir the lard occasionally as it is cooling, as this will make the lard whiter and give a finer texture.

Many North American Animals Are In Danger of Extinction

At least 50 North American animals now are in danger of extinction, according to Dr. Hartley H. T. Jackson of the U. S. Fish and Wildlife service. Already, he points out, some notable species have vanished. The big, dark buffalo of the northeastern United States was last known in Pennsylvania in 1801. The Maine giant mink, nearly twice the size of an ordinary mink, disappeared in 1860. About six races of grizzly bears have perished. The Merriam elk of Arizona, largest of all elk, was exterminated by 1900. The last big Plains wolf, long a nuisance to stockmen, ceased to exist about 1930.

Now, says Mr. Jackson, "North America has a long list of endangered wildlife races. Several of the grizzly bears have already gone. The Florida black bear is reduced to less than 500. The glacier bear of Alaska is so scarce as to face extinction. The fisher, the marten, and the wolverine have all been trapped so extensively for fur that they have been reduced to a danger point everywhere in North America. The black-footed ferret, with a range almost coinciding with that of the prairie dog, has become rarer and rarer until now it is seldom reported.

The southern sea otter a few years ago was believed to be extinct, Jackson said, but a small herd unexpectedly was discovered on the coast or California, which now numbers about 300 animals. The timber wolf of the northeastern states has almost succumbed to the inevitable. In fact, all the large wolves of the United States are endangered. The unsuspecting little kit fox of our western plains was easily trapped for its fur and no restrictions placed on killing it. Once a common mammal, it now is rare and in many regions extirpated. Several of our seals are so reduced in numbers as to cause serious concern.

Appearances Deceptive In Purchasing Citrus Fruits

Don't buy citrus fruits by appearance alone, since what looks like a full, juicy orange may be surprisingly void of juice and full of pulp. Rather, weigh the fruit in your hand. Heavy citrus fruits are richer than lightweights. Next look for a firm, smooth, thin skin of fine texture, and don't worry if there are a few surface blemishes and slight discolorations. However, avoid fruit with badly creased skin, and a puffy spongy appearance, which is light in weight. Color or lack of color has nothing to do with the degree of ripeness The color of citrus fruits depends on several factors: Variety, season of the year, and area of production. Florida and Texas oranges often have areas of green, especially at the stem end, but this color does not indicate under-ripeness of the fruit. As a matter of fact, all citrus producing states have maturity laws which growers are required to observe. After passing the maturity test, the ripe fruit which is not an attractive orange color often is treated with ethylene gas. This treatment takes out the green color and brings forth the familiar natural yellow or orange shade.

From where I sit ... by Joe Mars

Industry Looks at Our Town

Maybe you read how a group of industrial experts have decided that the small town is the place for industry—not big cities. Reasons they give are better housing, pleasanter living, and more opportunity for wholesome recreation.

Well, looking around our town I'd say that was about right. Most of us own our homes, and keep them looking nice; we enjoy each other's company: and our recreations are mostly simple outdoor sports, and in the evening a mellow glass of beer with pleasant company.

As Doc Walters says, that so life just naturally sets you u work the next day . . . whethe in office, mill, or field. And should know. He works fou hours, but never misses his ing "constitutional" or his e glass of beer with friends.

From where I sit, any ind could profit from being in a where wholesome living, te ance, and friendship are the

NOTES FROM THE SENIORS

This will be nearly the last time any notes will come from the Seniors, for now we are all counting our days left in K. H. S. on the fingers of only one hand.

That is, of course, we can count them on one hand if we don't have to come back for tests that last week! And by the looks of some grades . . . well, nuder classmen . . . be seein' you then. Especially where History is concerned.

Yes, the man from Josten's was here so the Senior girls who had chipped their rings asked about getting them fixed. He said to wait until after graduation. So boys, you can have them awhile longer!

In English Literature class we are back on grammar It seems as though we still can't speak correctly

The Bookkeeping class was to be finished with their Spencer's Practice Set by Friday, but, well about one-third of the class has handed them in. Sorry Pat, but there's just been too much going on lately!

One of the big events for both the Junior and the Senior school year was the banquet which was held Friday night.

The Seniors are eagerly looking forward to Thursday . . .what goes then? Well, it's supposed to be our "Skip Day" We'll tell you about that after the big day instead of before.

—Elizabeth Goll.

THE JUNIOR NEWS

The poor Juniors got left out of the limelight last week and really we did have some news written up for you. Last week was a big event for you as the representative from Josten's finally arrived and the impatient Juniors at last ordered their announcements and class rings for their senior year. And I might add that we all cooperated very nicely, or did we?

We wish to extend our hearty congratulations to you, the Seniors, for the wonderful play you presented on May 1st. You really did swell and I'm sure everyone enjoyed it very much

There are four Junior girls who just carry some things a bit too far. Does anyone have any idea who they are? (This is recopied from last week's column so I hope it isn't too outdated to still hold true)

Well, the banquet is finally over and now we Juniors will have to go through what the Seniors did last week! The task of getting back to work, attending study halls, etc

In Government Class we are learning how our local government operates. The chapter now under discussion is "Township and County Governments."

The Typing class is still working on their manuscripts. They are supposed to be typed without an error Put down that eraser, kiddo!

With the help of several Juniors.

OUR SOPHOMORE CLASS NEWS

—Phyllis Boland

Soon school will end and everyone will be releived, including the teachers. We are finding the end of our books very interesting

Every once in awhile Mr. Rector forgets to assign a lesson in Biology We are now wondering if this is done accidently, or on purpose, for it seems we have tests on those days.

The correct useage of adjectives, adverbs, prepositions and conjunctions is the theme of our English work. If only we could remember what we have learned. English would be much easier for us in the coming years.

The series of events leading up to World War II is being discussed in World History class. It is proving very interesting.

13 WOODEN BRIDGES IN HANCOCK TO COST $5,820

Hancock county will construct 13 wooden bridges during the summer of 1947 according to County Engineer Charles F. Merten. A letting will be held on the project May 19. It is estimated that the cost of construction will be approximately $5,820.

NOW IS TIME TO CHECK MILK COOLER CONDITION

It's time to get milk coolers ready for summer, A. W. Rudnick, Iowa State dairy specialist says.

Cooling tanks should be cleaned up, cracks in the tank or in the insulation box repaired and water pipe couplings checked to eliminate the chance "of getting caught some hot Sunday with a lot of milk on hand and no way of cooling it," Rudnick warns.

In repairing the tank, inlet and outlet pipes should be arranged so that plenty of cold clean water can circulate through the tank and around the milk and cream cans.

To prevent the rapid growth of bacteria, milk must be cooled immediately to at least 60 degrees F. and preferably lower, Rudnick says. The simplest cooling method is to have a flow of cold water through the tank. This provides the "clean, quick and cold" handling needed to produce high-quality milk and cream Cooling cans of milk by air circulation is not satisfactory because the temperature of the milk drops too slowly, even when the air temperatures are below freezing.

Cellars and caves are not good either They, like air, do not cool the milk fast enough. Moulds and yeast gain entrance and the temperature is such that it promotes their growth.

The cooling tank should be located in a milk house. If possible, it should be put in a spot protected from sun, dust and livestock. Rudnick recommends a shaded grassy area as second choice.

County Auxiliary Meeting

The County Auxiliary meeting will be held at Corwith May 20 at 2:00 p m. at the Legion Hall.

All Auxiliary members meet at Thada's store at 1:15 p. m.

3 HANCOCK ROAD CONTRACTS LET

Belmond, Garner and Woden Outfits Hired

Hancock county supervisors this week awarded contracts to Herman Buns & Son of Woden, Clair Nelson of Belmond and Harry Rehm of Garner, for the casting blading, end haul and incidentals on trunk and local roads in Hancock county during 1947.

Buns & Son were awarded a contract on Sec. 1 which includes 9 miles of local road; Harry Rehm was awarded contract on Sec 2, which includes 11 miles of local road, and Clair Nelson was awarded a contarct on Secs. 3 & 4 which includes approximately 9 miles on wide road and end haul work on trunk and local roads The total amount of the grading contracts awarded are $27,740

County Engineer Charles F Merten says work on the projects will get under way as soon as weather and soil conditions permit.

The contract for surfacing of these highways will be let at a later date.

SCHOOL MASTERS AND WIVES HAD DINNER AND PARTY AT GARNER

Supt. and Mrs. A. L. Kingery attended a dinner and party at the Hull's Cafe at Garner Friday evening sponsored by the School Masters Club of Hancock County.

After the dinner and business meeting the group enjoyed playing Court Whist.

DDT WILL DO THE JOB, EXPERTS SAY

"DDT will do a remarkable job of fly control if applied properly and used in conjunction with correct sanitation measures, fly control experts told 100 persons at a district spray school at Mason City, Tuesday May 6.

Attended by commercial spray operators, non-professional operators, fly control committee members, and others interested in the Iowa fly control campaign, the school was designed to teach methods of making the state fly-free this summer.

Attending from Hancock County were Bob Hartzel, Aaron Wille, Dean Thornberry, Orville Smith, Paul Huston and Roy Hanson, commercial spray operators, Hilliary Greiman, the Garner Chamber of Commerce president, Ed Goble, Kanawha Commecial Club; Jack Dethmers and Forrest Bennet of Mullin's Hybrid Service, and Paul Henderson, County Extension Director

A 50 percent wettable power is the most satisfactory DDT preparation for geenral use on farms the school was told It is the cheapest and the safest

For use inside store buildings it was recommended that xylene emulsions of DDT be used because they leave no visible traces.

Spray operators were warned against using oil solutions of DDT inside farm buldings or on unpainted surfaces where the oil might soak in and become a fire hazard. Stock must not be treated with oil spray, either the experts say.

Oil solutions are recommended for use on screens, where a water solution would increase rust . These oil solutions are the most expensive form of DDT preparation the experts said but a pint or quart likely will be enough for the screens of an entire home for the season.

Uses of 2,4-D for killing weeds also were explained to the spray operators at the school. Spray equipment was demonstrated in actuar operation.

Those conducting the instruction were Floyd Paddock of Iowa Extension Service and Howard Hallander of U. S. Puplic Health Service.

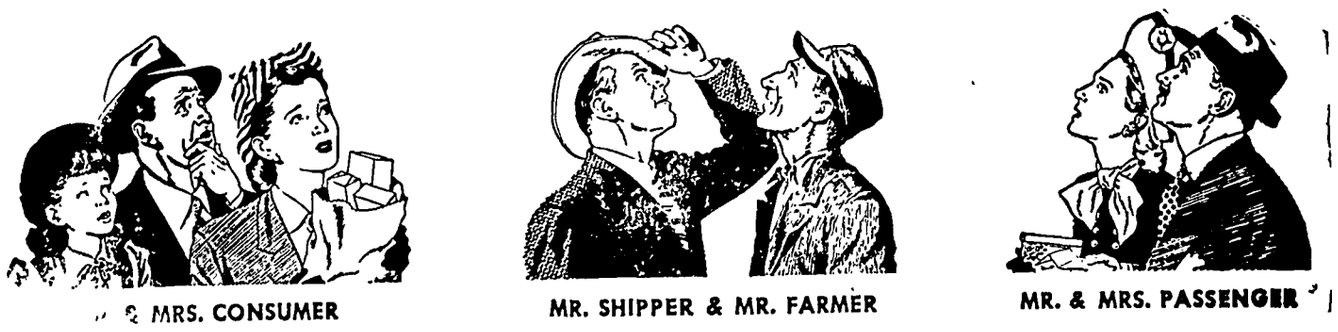
Non-operating railroad unions are demanding still another raise of

$568,000,000.00 a year



You would foot the bill!

Look out! There's another big railroad wage demand headed your way!

The non-operating unions alone—whose members do not actually operate trains—are demanding a flat increase of 20 cents an hour. These demands would cost the railroads of the country *five hundred sixty-eight million dollars a year!*

Last year these employes had an increase of 18½ cents an hour. This was their third major wage increase since 1939. Their average weekly pay has gone up 75%, as against a cost-of-living rise of 54%.

Since 1939, railroad wage and material costs have gone up more than three times as much as freight rates, and five times as much as passenger fares. That is why in 1946, with the largest peacetime traffic in history, the net income of railroads went down to the equivalent of only 2¾% of the net property investment.

What About 1947?

Even with the recent freight rate increase, preliminary figures indicate that the railroads will make only about the same low return in 1947 as in 1946. This will be because:

—the wage increase made in 1946 will be in effect for all of 1947;
—special payroll taxes on railroads have recently been increased;
—and passenger traffic has declined.

Where Would the Money Come From?

We can't pay out what we don't take in. And we are not taking in enough now to meet present costs and to complete the improvements in service that you need and that we want to give you.

You Would Foot the Bill!

Profit, $50—But Houses Are Built

Hammer's Cheerful Song Assures Homes for Vets

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

(This is the third of a series describing how American ingenuity is helping to solve one of America's biggest problems—the G.I.'s No. 1 headache—the housing shortage).

WASHINGTON —Have you been in York, Pa., lately? It's a big-little town of 50,000 population in southern Pennsylvania with a hinterland of rich farm country, of the famous Pennsylvania Dutch, where tables groan with seven-sweet-and-seven-sour dishes, as good victuals as you'll find though you wonder the world between hors d'oeuvres and baked alaskas from pole to pole and back again.

York is a busy place, a place of bustling industries whose products are known from coast to coast. It is also a town which can lift its eyes from the plowshare and the forge to think, simply and soundly, about caring for its own. It's a town of ingenuity.

Walk out to the Midland avenue section with me. You come upon a batch of clapboard houses—they line both sides of the street for a whole block—in various stages of completion. One group of workmen is finishing the grading on lots; another hauls plaster into a house; still others unload door frames across the street, and put the finishing touches to the roof of a house being built for a veteran.

Baukhage

Go a little farther downtown and you come to the Elm street houses—neat, obviously new, two-bedroom bungalows which have just been sold to veterans for $5,250 each.

On the other side of town, in Park Village, you can drive for blocks through winding streets flanked by new houses, partly completed houses, excavations for houses, and everywhere the cheerful song of the hammer and the saw, the lap of pouring concrete, the thud of the pick in the deep soil.

When the lights go on at night, you will notice that a great many of the old-fashioned, three-story row houses in downtown York are lighted from top to bottom. You'd guess that a lot of people were living in those houses. You'd be right. The buildings have been converted into small apartments.

It looks as though York is getting itself pretty well housed. A glance at the figures confirms just how well the town is doing. In 1946 York built 613 new houses—100 per cent more houses than were ever built in any previous year of the city's history. In addition, Yorkites added 481 new dwelling units by converting old houses into apartments.

Of course, this didn't just happen. It was made to happen by a great many local people determined that York's veterans would have a place to live.

The big drive got under way last year when a survey showed that one out of every three York veterans was living doubled up with friends or relatives in dilapidated old buildings in need of major repairs, or in trailers without standard plumbing facilities. That's the way it was in York a year ago when Mayor John L. Snyder appointed an 18-member emergency housing committee.

The committee's decision was that York should be able to provide 1,200 new units in 1946; another 1,800 this year. They called a meeting of every one concerned with housing; asked each builder to stand up and tell the group how many of the needed houses he would build in 1946—until the pledges met the quota.

Shortages of materials were a serious threat to this undertaking, but York builders had accepted their quotas and were determined to build houses. When they couldn't find the scarce materials near home, they went to Buffalo, to Ohio, to Hagerstown, Md.

Members of the housing committee pitched in with enthusiasm. One of them came back from a Sunday drive with two kegs of nails in his car—bought on the spot when he discovered a little country hardware store that had some. Someone else found a millwork concern in a nearby town which had some door frames for sale.

To keep prices down, local builders voluntarily cut profits. One went so far as to take a profit of only $50 per house on a large group of veterans' houses.

Because converting to apartments is quicker and takes less materials, York also undertook a campaign in this direction, aided by the Chamber of Commerce, the local housing expediter, banks, press and radio.

In 1946—a year when shortages brought building programs in many communities to a dead stop—York built twice as many houses as had been produced there in any previous year. York's goal for 1947 is 1,800 new living units. The folk in York aren't promising anything — they aren't talking about what they're going to do. But in the first four months of the year—with the building season just getting under way—they've filed over 1,100 applications to build houses.

School Boys Learn Constitution

On a 140-acre fruit farm a couple of miles from Olcott Beach where I used to go swimming and the name of which was taken by one of the sweet singers of the last generation (some of you remember Chauncey Olcott of "My Wild Irish Rose")—anyhow on that farm a young boy strained with the pruning knife; stretched to pluck the fuzzy, Niagara county peaches.

That was scarcely a decade ago.

On a bright March day, this same fellow—now 17—came into my office. Since he was a graduate of a Buffalo school, we had something in common despite the gulf of the years. We had something else in common, too. I also had once won a prize in oratory.

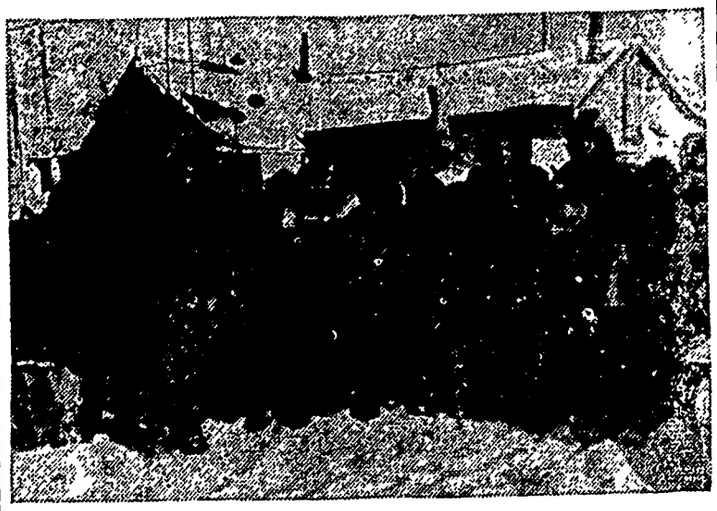
Mine had to do with a gentleman named Spartacus when I was a Masten Park high school entrant. His was a far more timely topic—the Constitution of the United States. His name is Edward Smith and he's a graduate of St. Joseph's on Main street in Buffalo.

Smith is one of the four national winners of the American Legion's oratorical contest held each year to stimulate American high school boys to study and understand the Constitution. Never was such an understanding needed more.

Winning was no cinch. Two hundred thousand boys from every state entered this year. Smith (there weren't too many "Smiths" in this contest, he told me) had to face nine different critical audiences—one in his school; one in the city of Buffalo; one in Erie county; one in the district; one in the zone; one in the state; one in the region; one in the section, and then the final heat—the national contest at Charleston, W. Va.

Smith's theme was that Americans must not be too complacent about the dangers of Communism; that our Constitution in itself is not protection for our form of government—that its duties and privileges must constantly be exercised by every citizen. He told me, incidentally, that Communism in relation to the Constitution was quite a popular subject among this year's contest entrants.

Edward Smith of Buffalo, a winner in the American Legion oratorical contest based on the Constitution, is being quizzed by Baukhage, also an ex-Buffalo schoolboy, on the Bill of Rights.



SCHOOL AT NORTHERNMOST OUTPOST . . . There seems to be no evading the traditional "three R's." These little Eskimo residents of Point Barrow, northernmost outpost of the United States, are learning them at the Point Barrow school (background) from American teachers. Point Barrow, a little village covered by snow the year around, is the center of extensive oil explorations started by the navy in 1944.

NEWS REVIEW

Big 4 Parley Is Failure; Wheat Pact Is Delayed

MOSCOW MEETING:
Little Accomplished

After seven weeks of wrangling, the foreign ministers' conference at Moscow ended in a state banquet.

Results of the parley were extremely disappointing, even to those whose expectations had been small. It had been hoped that a treaty for Austria would be worked out, but even preliminary agreements could not be reached. The more important matter of the German treaty suffered the same fate, as expected.

Secretary of State Marshall bluntly blamed the Russians for obstructing the negotiations. He charged that the Soviet delegation had "widened rather than narrowed our differences."

Principal points of controversy were the definition of German and Austrian assets which the Russians want as reparations and the disarmament and demilitarization plan, known as the "four nation treaty."

Almost the only proposition accepted was one, introduced by Russian Foreign Minister Molotov, that all German prisoners of war in Allied hands be returned to Germany by December 31, 1948.

Failure to complete the Austrian treaty means that occupation troops of the four powers will remain in Austria for several more months.

WAR GRAFT:
Garsson Case Again

A new move in the drawn-out war contracts graft case of Representative May and the Garsson brothers will be May's testimony in his own defense. His lawyer, Sawyer Smith, told the court that it is untrue that the 71-year-old Kentucky politician profited from deals between the Garsson munitions plants and Cumberland Lumber company. "Andrew J. May will take the stand and explain to you how every dollar of that money was spent, and how not one cent went to Andrew J. May," the lawyer asserted.

H. Garsson

On trial with May are Henry and Murray Garsson, head of the war materials syndicate, and Joseph Freeman, the Garsson agent in Washington. The government prosecutor contends that May received $5,000 outright from the Garssons and two checks for $1,000 each for "intervening with war department officials" in behalf of the companies.

M. Garsson

New evidence turned up by the FBI, according to the prosecutor, is the typewriter used in preparing the false invoices of the lumber company, through which it is alleged May received the bribes.

WHEAT AGREEMENT:
British Won't Sign

There will be no world-wide agreement of wheat-producing countries on prices and marketing procedures in the near future. This seems certain as the International Wheat conference in London has broken up on British refusal to sign the proposed plan. Negotiations have been in progress for many weeks in an attempt to formulate a five-year price and marketing schedule.

Sir Herbert Broadley, British delegate, explained his reason for rejecting the draft was that the price scheme in it would not enable the price of wheat to fall quickly enough to a reasonable level. "The United Kingdom cannot afford to pay excessive prices for its imports," he said. "The world must face much lower prices for wheat than those ruling at present, but we want to see those prices achieved in a manner which protects the producer against hardship and enables necessary switches to be made without disaster."

Delegates from Canada, Australia and India followed the British lead. Leslie Wheeler, U. S. delegate, urged immediate acceptance of the draft. Brazil's delegate seconded him. This move was rejected. Wheeler then asked that the proposal be sent to the International wheat council, which will be held in Washington, and that countries not now adhering be invited to join. The conference accepted this request.

NO RENT BOOST:
House Kills 10% Plan

The house banking committee, reversing its previous stand, voted down a proposal for a 10 per cent blanket increase in rents. It approved and sent on for action a bill continuing controls until December 31. The senate banking committee already has voted unanimously against any raise, and the senate's bill would continue control until March 1, 1948.

The vote in the house committee was 14 to 10. As outlined by Representative Wolcott, chairman, the house bill provides:

Continuance of rent control just about as it is now until December 31, with the President having authority by proclamation to keep ceilings in effect until next March 1 if he deems it necessary.

A new provision whereby tenants and landlords may voluntarily enter lease contracts for up to 15 per cent increases in rent, provided these leases do not expire before December 31, 1948.

WARNS OF SURPLUSES

Strong Farm Program Urged

WASHINGTON. — Expanded consumption and adjusted production are the major points of a strong farm program recommended by Edward A. O'Neal, president of American Farm Bureau federation, in testifying before the house agriculture committee.

"It would be folly to assume that we will not have burdensome surpluses of farm produce again that may wreck farm prices," O'Neal warned.

In endorsing reciprocal trade principles, the farm leader declared that "agriculture more than ever needs an expanded volume of foreign trade to bsorb its output."

Although describing the farm legislation since the early '30s as "the greatest cooperative endeavor between farmers and the government," O'Neal criticized "a tendency to develop centralized control of these programs from Washington." Instead, he urged transfer of larger authority to state extension services as a means of effecting savings in costs and providing greater service to the masses of farmers.

O'Neal informed the house committee, which is considering a long-range farm policy, that his organization has not come to final conclusions on the subject, but he read this statement:

"We recognize the desirability of full agricultural production, but agriculture cannot maintain full production if industry is going to maintain rigidly high prices by cutting down production and applying monopolistic controls, or if labor is going to insist upon maintaining rigidly high wage rates and to continue such increases in wages without regard to productivity, and to enforce such rates with scarcity policies which discourage consumption and throw people out of work and onto relief rolls.

"It is this approach which leads to economic chaos.

"Farmers believe in an economy of abundance and stand ready to join with industry and labor to achieve maximum production and maximum employment through price policies and wage policies which are geared to a maximum level of consumption."

IN THESE UNITED STATES

Memorial Service Will Note First Landing in New World

WNU Features.

JAMESTOWN, VA.—Tribute to that intrepid band of colonists who debarked on Jamestown beach May 13, 1607, to mark the first landing of permanent English settlers in the New World will be paid at annual commemorative ceremonies here Sunday, May 11.

In the hallowed little Jamestown Memorial church religious services will be conducted as the main feature of the observance. Jamestown Day, as May 13 is designated, has been observed under sponsorship of the Association for Preservation of Virginia Antiquities annually for half a century.

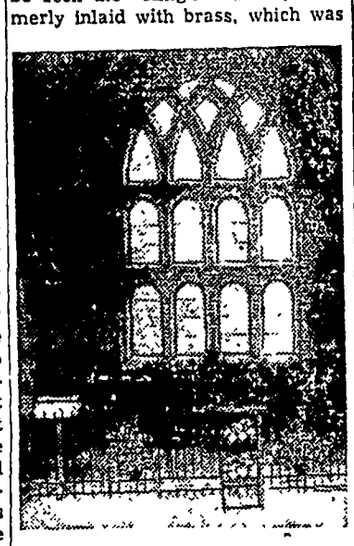
The tower of the original Jamestown church, long the only visible relic of Old Jamestown, dates back to 1639, perhaps longer. Of particular interest are the loopholes in the tower through which colonists fired at Indian marauders. Original and unrestored, the tower is constructed of hand-made bricks and mortar, laid in English bond.

Built as Memorial.

In 1907, the tri-centennial of the founding of Anglo-Saxon civilization in the Western Hemisphere, the memorial church was erected over the massive three-foot foundations, buttresses and tiled chancel of the church of 1639. The old church was burned during Bacon's rebellion in 1676, rebuilt not long after, but at some unknown period in the 18th century was abandoned and gradually fell into ruins.

There was a still earlier log church with cobblestone foundations, fragments of which may be seen in the graveyard. It was in this church, probably built in 1617, that the first legislative assembly in the New World was convened July 30, 1619 with Sir George Yeardley, the royal governor, presiding. This historic event took place more than a year before the Mayflower set sail from Plymouth.

Back of the chancel railing among the remains of the 1639 church may be seen the "Knight's Tomb," formerly inlaid with brass, which was stolen at an unknown time. It is the only tomb of its kind in America and is supposed to be that of the same Sir George Yeardley, who died at Jamestown in 1627.



HISTORIC CHURCH . . . This view shows the interior of historic Jamestown Memorial church, decorated for services commemorating the arrival of the first English colonists. As the sign indicates, markers in the floor are unknown graves.

Countless dead are buried in the ancient graveyard, which has been restored by the National Society of Colonial Dames of America. Although the actual number of graves and the names of most of their occupants have been lost in the shadows of time, a number of interesting old tombstones still remain.

Grave of President.

An ancient tombstone marks the final resting place of Benjamin Harrison I, ancestor of Benjamin Harrison, signer of the Declaration of Independence. Buried nearby is another Benjamin Harrison, ninth president of the United States.

The epitaph on the tombstone of William Sherwood proclaims—for all the modern world to see—that he was "a great sinner." The inscription, legend insists, was made in accordance with a provision of his will.

An intruding sycamore tree, now more than 130 years old, has disturbed the eternal sleep of the Rev. James Blair, founder of the College of William and Mary, and of his wife, Sarah Harrison Blair. They began their long sleep side by side, but the tombstones have been pushed far apart by the misdirected tree, which now has fragments of the stones embedded in its trunk.

Program Announced.

Officiating at the commemorative religious service will be the Rt. Rev. William A. Brown, bishop of the Episcopal diocese of southern Virginia.

The historical address will be given by Paul Green, author of the historical drama, "The Lost Colony."

Racing Responsible For Taxless County

SARATOGA SPRINGS, N. Y.—Virtual elimination of taxes is possible in Saratoga county as a result of the county's cut from pari-mutuel betting at the race track.

Under a state law passed primarily to aid New York City, Saratoga county last year levied a 5 per cent tax on race track betting. The county's cut amounted to $1,062,000, and the budget is about $750,000.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

Airplane dusting of farm crops was studied at a conference of pilots, farmers and scientists at Rutgers university, New Brunswick, N. J., which was believed to be one of the first meetings of its kind ever held.

Discussions centered around new insecticides and fungicides useful in large scale dusting operations. Weather problems affecting airplane dusting also were discussed. . . . The city of Clarinda, Iowa, was granted title to a 294-acre tract formerly used as a prisoner of war camp. The property was deeded over by War Assets administration with the stipulation that it be used as an airport. Prior approval of a $60,000 airport bond issue and a federal grant of $53,000 will provide funds for developing the field. . . . Use of light aircraft has been found effective by the Ogden, Utah, police department. The department recently has utilized small planes to search for a missing deer hunter, found stranded in the rugged Wasatch mountains, and to locate a sheep herder lost on the desert.

* * *

Out of consideration for fox whelps at Owatonna, Minn., a flight of America's mightiest army bombers changed course. Informed by Wayne C. Lidell, manager of a fur farm near Owatonna that the roar of even one plane makes the female fox extremely nervous and fearful for her young, army officials revised the scheduled course for a flight of B-29's making a simulated attack on Minneapolis.

* * *

CAA LISTS 4,431 PORTS

In connection with the national airport plan under the federal aid airport act, Civil Aeronautics administration has listed 4,431 airports which should be constructed or improved during the next three years. From the list will be selected projects to be included in the fiscal 1948 construction program, depending on the amount of funds appropriated by congress and relative urgency of each project.

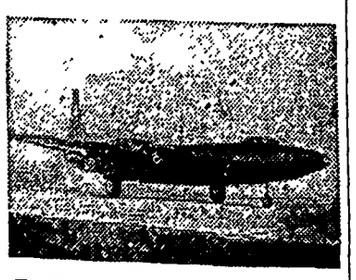
Included on the list are 417 large airports (those with paved runways of 4,300 feet or longer), 3,850 smaller airports and 164 seaplane bases. Grand total cost of construction is estimated at $985,800,000, which would be divided between federal funds of $441,600,000 and sponsor's share of $544,200,000.

Of the 4,431 projects, 2,550 would be entirely new airports while 1,881 are existing fields requiring improvement.

* * *

A dramatic example of the use of air freight when combined with a bit of ingenuity spared some 20 families in Alaska the necessity of spending the winter in igloos or other improvised housing. The ingenuity came from Williamson, Inc., of Sheboygan Falls, Wis., which built 20 prefabricated houses in such small sections that Northwest Airlines was able to fly them to Anchorage, Alaska.

* * *



FASTEST BOMBER . . . America's fastest bomber, Consolidated Vultee's jet-propelled XB-46, is completing flight tests at Muroc army airfield. Under secret development for two years, the XB-46 is powered by four J-35 turbojet engines housed in two low-slung nacelles. The needle-shaped fuselage is 106 feet long, only seven feet less than the 113-foot wingspan.

* * *

PREFER FACING BACK

Ninety-four per cent of transcontinental army air transport command passengers prefer to sit facing the rear of the airplane, it was shown in a five months' survey. The command conducted the experiment on its "statesman" flight between Washington and Fairfield, Calif. Of the 1,020 passengers queried in the survey, 959 favored reversed seating. Riding backward, ATC surgeons report, is safer in the case of crash landings since passengers have the entire seat for support.

Watch Your Kidneys!
Help Them Cleanse the Blood of Harmful Body Waste
Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.
Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!
DOAN'S PILLS

PRINCESS WITHOUT SHOES . . . Perhaps never again in history of the British royal family will a photographer have a chance to snap Her Royal Highness Princess Elizabeth standing in her stockinged feet. The Queen, left, damaged her own shoes. Princess Elizabeth loaned her shoes to her mother, then so that it wouldn't spoil her fun, promptly forgot the incident while enjoying the sights of South Africa with her mother and guest, unidentified.

FORGETS CHILDREN . . . Charles Phillips, 102, of San Francisco, says he has six children but cannot remember how many sons or daughters. He says they are all old enough to chew hay. He is pictured in local hospital recovering from a minor ailment.

WOMEN OF ACHIEVEMENT . . . Chosen by the Women's National Press club as "Women of Achievement" are, standing, left to right: Mrs. Josephine Tighe Williams, who received award posthumously for her daughter, Dixie Tighe; Eva Le Gallienne, Dr. Esther Caukin Brunauer and Beatrice Blackmer Gould. Seated, left to right: Dr. Helen Brook Taussig and Agnes E. Meyer.

BOUND FOR ALASKA ON SCOOTER BUILT FOR FIVE . . . D. A. Gregory and his pet fox terrier, "Pooch," left Brownsville, Tex., on a three-wheeled motor scooter, bound for Alaska. Their number has been increased to five, thanks to the addition of three pups born en route.

MOTHER-OF-THE-YEAR . . . Mrs. Frederick G. Murray, Cedar Rapids, Iowa, who has been chosen by the Golden Rule foundation as the "American Mother-of-the-Year." She has raised five children and devotes considerable time to child welfare work.

DENMARK'S KING . . . King Frederik IX, Denmark, who became head of the ancient throne upon the death of his father, King Christian X, 76-year-old monarch, who ruled his country for 35 years.

WHO IS AFRAID . . . This boa, 10 feet long, was flown to the Chase wild animal farm, Egypt, Mass., from South America. Far from fearing death by constriction, Mrs. Marion Chase wraps the boa around her neck as some gaudy oversized ornament.

NEW DODGER MANAGER. . . Burt Shotton, who has been appointed as the manager of the Brooklyn Dodgers to succeed the suspended Leo Durocher. Shotton went to Brooklyn from Pensacola, Fla., and took immediate charge of the "Bums."

STATUS DOUBTFUL . . . Pauline Betz, national women's singles tennis champion, arrived at New York after her tennis tour of Europe. U. S. Lawn Tennis association has ordered her to end participation in amateur events due to question on her standing.

The Home Town Reporter in WASHINGTON

Inflationary Price Trend Worrying Farm Leaders

FARMERS, along with the rest of the citizenry, are feeling the pinch of high prices and paying the penalty for whatever part they played in kicking out price controls.

Executive committees of three of the four major farm organizations, meeting here recently, expressed "grave concern" over the price situation and adopted a resolution in which they "viewed the present inflationary price trends" with alarm and urged leaders in industry, agriculture, labor and government to "join in a concerted effort to halt this dangerous trend."

In the first week of last November your home town reporter wrote in this column concerning the artificial meat shortage and the withholding of livestock from the markets by farmers. . . . "The shortsighted farmers who participated in this conspiracy, this strike against price control, will not gain in the long run. As meat goes up prices of other farm produce likely will go down and most surely the prices of commodities that farmers buy will rise and stay up for some time . . . it's a strike for higher prices, identically the same as when the laborer walks off his job in a strike for higher wages. The farmer gains nothing and neither does the laborer, for both are helping to build up the spiral of increasing cost of living for everything they buy."

Some of our farmer friends chided us about that column and said, "No, it's not a strike, it's good business." While the leaders of the farm groups meeting here, the Farm Bureau federation, the National Grange and the National Cooperatives, publicly attempted to clear their own skirts of any blame for the present high prices by adopting a resolution to that effect, privately and off the record they admitted their sense of guilt. They further sought to quibble somewhat by protesting against the practice of government and private groups to use the 1935-39 period as a base for making price comparisons, claiming that farm prices during that period were 16 per cent below parity. So what? They are now, many of them, 200 per cent and more above parity.

'Payments Mean Controls'

The farm leaders were able to agree upon parts of their program which they now are presenting to the house agricultural committee in hearings on a long range farm program. The grange wants to do something now about parity prices but the Farm Bureau would rather wait until next year when present parity ratios expire. Some were hopeful of eliminating the New Deal triple A control program and were somewhat staggered when Cong. Clifford R. Hope of Kansas, Republican chairman of the house agricultural committee, bluntly told them, "Price stability is impossible unless farmers accept controls." Which means continued acreage controls, support prices, conservation controls, etc.

The farm leaders expressed jealous concern over proposed slashing of department of agriculture budgets, and although they agreed that some budgets must be cut perhaps 20 per cent they definitely wanted no cuts in REA school lunches, research and marketing.

Indicating the split in the thinking of the farm group, one leader, off the record, told your home town reporter, "Yes, we took our usual slap at labor and demanded some pretty drastic labor controls. If all of us could only realize that the workers are our best customers, and would work together instead of letting the big boys continually drive a wedge between us, we would all be better off.

Nation-Wide Monopoly

"Suppose, for instance," he said, "if in our fight for a new and higher parity price on farm commodities congress would fix a basic price and then say, 'OK, that price is all right for New York, Illinois, Montana, Kansas or Nebraska, but we'll cut it 20 per cent for Oklahoma and Texas because living is cheaper there; we'll cut it 30 per cent for Arkansas, Mississippi, Alabama and Georgia; we'll give Kentucky and Tennessee a 10 per cent cut, and so on according to the index of living in each state.' I wonder what our farmers would think of that?"

"And yet our 90 per cent of parity guarantee by the government is the result of our industry-wide bargaining power, the same price across the country. It's a floor under our wages. Call it monopolistic if you want to. That's what we have and we're trying for a better bargain. Why we should try to deny the same industry-wide bargaining right for labor I don't know, but we have taken that stand."

Your home town reporter notes that this represents some different thinking from that usually expressed at farm conferences.

DWARFING A GIANT . . . Despite its 308-foot drop (almost double that of Niagara) the Lower Falls in Yellowstone National park appear small in comparison with the surroundings in Yellowstone canyon.

'SEE AMERICA FIRST'

National Parks Are Major Lure to Vacation Throngs

WNU Features.

Vacation-hungry Americans are on the move. Tourist trails once again are jammed as the American public, with its vacation lanes unshackled of wartime restrictions, attempts to cram a full quota of fun and frolic, rest and relaxation, adventure and sightseeing into the short vacation span of a few weeks.

The upsurge in vacation travel is noted in all forms of land, sea and air transportation. Trains and buses are crowded; airlines are booked with reservations; passenger vessels and even tramp steamers are unable to accommodate all those bent on sea-faring jaunts

With transportation, food and hotel accommodations in Europe still insecure in the war's aftermath, most Americans still are content, as they were last year, to heed the old slogan of "See America First."

The nation's principal attraction for vacationists is the national park system, embracing 169 separate areas in all parts of the United States. Last year the park system attracted a record-shattering 21,600,000 visitors, half a million more than in any previous year.

First In a Series National Parks

On the basis of attendance so far, Newton B. Drury, director of the National Park service, which administers the system, predicts that 1947 will set another new record.

"What's more," says the park chief, "we hope to be able to take better care of our visitors than we did last year, when our park staffs had nowhere near recovered from the reductions of wartime."

Concessioners who operate the hotels, lodges, stores and transportation system in the parks also were shorthanded last year, Drury, points out, but he adds that "they probably will be in better shape this year."

• • •

AS HAS BEEN the case for many years, one of the most popular travel objectives of the American vacationer will be Yellowstone National park in Wyoming, Montana and Idaho. Yellowstone is the oldest park in the entire system; it is, in fact, the oldest national park in the world, having celebrated the 75th anniversary of its founding on March 1 of this year.

Containing approximately 2,213,000 acres, it is noted for its geysers and hot springs, of which it has more than any other area in the world. Old Faithful, spouting its steaming waters high into the air at intervals of about an hour, day and night, summer and winter, has become a virtual symbol of Yellowstone.

Yet Yellowstone would be a great national park if there weren't a geyser or hot spring. While the two great falls of the Yellowstone and the Grand Canyon of the Yellowstone with its vividly colored walls combine to form its most spectacular scenic feature, the park abounds in natural beauty. Yellowstone lake, with its hundred miles of shoreline and its eastern border of lofty peaks; scores of towering waterfalls; Obsidian cliff, of black glass, high and sweeping upland valleys and vast expanses of little-known wilderness — these merely suggest the variety of the scenery is possesses.

No other national park is as widely known for its wildlife. Yellowstone played an important part in restoration of the American bison, after it had come close to extinction, and there are hundreds of them in the park today. In quiet streams and marshes, the traveler is likely at any time to come across moose. Elk, antelope, bighorn sheep, grizzly bear, although not always seen by the traveler, are there and in numbers.

Most familiar, perhaps, is the black bear, and this animal provides one of the most vexatious problems that confronts the National Park service. For, despite warnings that they are wild animals and dangerous, visitors insist on feeding the bears.

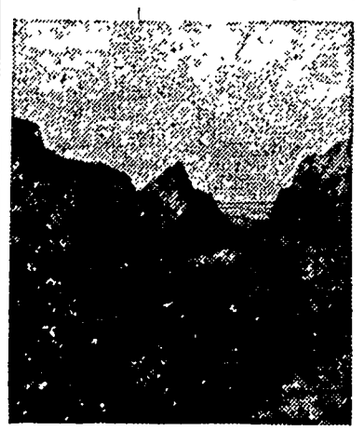
Accommodations for visitors in Yellowstone range all the way from luxurious hotels down through inexpensive housekeeping cabins to the campgrounds which are scattered throughout the park. Hotel and lodge centers are situated at Mammoth Hot Springs, location of park headquarters; at Old Faithful, Canyon and Lake, while cabins are available at Camp Roosevelt, near Tower Junction There are highway entrances to the park from north, northeast, east, south and west. Because the demand for accommodations is certain to be heavy this year, those who plan visits to the park are advised to obtain reservations as far in advance as possible.

• • •

IN MARKED CONTRAST with the oldest of the national parks is the newest, Big Bend in West Texas, located in a big bend of Rio Grande river. The State of Texas made a present of this 700,000-acre park to the people of the United States in 1944—so short a time ago that there has been little opportunity to provide it with the developments found in most of the older parks.

While much of the park is semi-desert, where the desert vegetation is staging a steady recovery of its natural condition after many years of heavy grazing, its heart is the forested mass of the Chisos mountains, rising to elevations of more than 7,000 feet. Along the Rio Grande are three sheer-walled canyons, Mariscal, Boquillas and the Grand Canyon of Santa Helena, the deepest and most imposing of the three.

An improved road southward to the park from the town of Marathon is now under construction, and ultimately it will be reached by a first-class road. Accommodations in the park, for 40 to 60 persons, are simple but good; and many visitors find a visit to the area an interesting experience, in spite of, or perhaps because of, the lack of development.



STUDY IN CONTRASTS . . . Big Bend National park offers a combination of rugged mountainous terrain and semi-desert vegetation, as indicated by this view through the "window" in Chisos mountains.

Hyde Park Visitors Cause Damage

WASHINGTON. — Half a million visitors have worn such a path through Franklin D. Roosevelt's Hyde Park, N. Y., home, now a national historic site, that a bit of bracing and carpeting has become necessary, the National Park service reports.

Furthermore, according to the park service, there has been "some wear and tear" on the grounds and lawns have been ruined.

The stairway to the second floor has been braced and a heavy service carpet laid over the worn flooring at the entrance.

The home, grave and 33 acres of grounds were opened to the public April 12, 1946, on the first anniversary of the late president's death.

Only about 2,500 persons can enter the house itself on any one day and no more than 75 are admitted at one time for safety reasons.

Mrs. A. J. Kudje won the high score and Mrs. Geo. Lawhorn won second high.

Lunch was served at the conclusion of the games.

BETTER MANAGEMENT IS KEY TO POULTRY PROFIT

Better management programs, not switching breeds—are the key to greater poultry profits. That is the opinion of W. R. Whitfield, Iowa State College poultry specialist. He reports that records kept by demonstration flock owners, in cooperation with the college, show that the difference between breeds isn't enough that any one breed can insure success or failure.

With the exception of the hybrids, which produced an average of 240 eggs per hen per year, there really wasn't much difference in egg production. The number of eggs laid ranged from 168 for Rhode Island Reds up to 184 for crossbreads, and then jumped up to 240 for the hybrids.

Offsetting the high egg-laying rate of the hybrids was the fact that the mortality within the flock was high, being second only of the Leghorns. Difference between other breeds was slight.

Total feed consumption ranged from slightly over 100 pounds of Leghorns to about 110 pounds for the heavier White Rocks. Because of the higher egg-laying rate the crossbreeds and hybrids had a better record on feed required per dozen eggs. Other breeds were fairly close together on egg-feed ratio

Whitfield says the biggest differences are within the breeds rather than between breeds. For example, there was a difference of 111 eggs between the average production of the best and the worst Leghorn flocks on which records were kept. Similar differences were noted in the other breeds.

BLISS PROPOSES CITIES HELP RURAL EDUCATION

Cities should share the cost of educating rural youth who eventually will find employment in cities, believes R K. Bliss, of the Iowa State College Extension Service.

Bliss points out that an estimated 300,000 persons leave farms every year to seek employment in cities and towns. The cost of rearing and educating these persons is about 1 2-3 billion dollars annually.

"The annual drain on land wealth for rearing and educating those who leave the land for work in the city and town is tremendous," Bliss points out. He thinks it is only logical that cities pay their fair share of this cost, possibly by shouldering a larger share of rural education expenses and in helping build farm-to-market roads.

In addition to the losses by migration to the large centers of population, Bliss says there is another great loss of agricultural wealth. This economic drain comes from the dividing of farm estates, he states.

For example, he cites the case of a farm family with three children. The parents have reared and educated the children, and have clear title to 160 acres of land and the machinery and livestock needed to operate.

At the time of the parents' death the estate was worth $24,000. Each heir received $8,000. But since one heir was living in the city, one-third of the wealth was transferred from farm to city. Bliss says that the average for the United States probably would find nearly one-half of the children leaving the farm for other employment.

"In view of the tremendous transfers of wealth from the land to cities and towns," Bliss states, "the cost of farm programs, including education supported by general taxation, does not seem high—not when the dollars so appropriated are effeciently and economically used on such fundamental agricultural problems as soil conservation." The safeguarding of the nation's food supply is of interest to all the people, he points out.

Farmers In Four Townships Will Vote On Fire Protection

LIBERTY, ELL CONCORD, GARFIELD FARMERS WILL VOTE ON TAX LEVYING

Special Election Tuesday, May 27 On Question Of Levying For Fire Protection

Rural voters in four townships: Ell, Liberty, Concord and Garfield township will go to the polls on Tuesday, May 27 at which time they will vote on the proposition of levying a tax for purchasing fire fighting equipment and maintaining the same.

The usual voting places for the four townships will be open from 12:00 noon until 8.00 p. m. Ell township voters will vote in the Klemme Community Hall.

If the proposition carries, a levy will be made and the money thus raised will be used to purchase fire fighting equipment. In earlier elections held the farmers in the northwest part of the county purchased a truck which is housed at Woden. In the north part of the county they have a truck housed at Forest City

In the case of the farmers in the Klemme territory some 8 years ago they purchased shares in the Klemme fire truck and have enjoyed protection during that time. Because of this fact, the Trustees in Ell and Liberty decided to split the money so that part of the funds will be used to improve the equipment housed in Klemme, while part of the funds will be used to house a truck in Garner and a part of the northwest corner of Liberty will go to Britt.

All farmers in the four townships are urged to go to the polls and cast their vote on the special election next week Tuesday, May 27

Your Automobile Ready For O. K.?

Cars Will Be Checked For Mechanical Defects

If your car is not in safe driving condition, you may be getting a ticket from the Highway Patrol in the near future.

A state-wide safety campaign against defective cars on Iowa highways will be started soon by the Highway Patrol according to announcement made in Des Moines today by Al Kahl, Iowa Safety Commissioner.

Two series of corrdinated checks will be made at unannounced times in all parts of the state. Driver's licenses, brakes, lights, horns and windshield wipers will be inspected.

Last summer, according to Commissioner S. N Jespersen of the Patrol, a 6 week traffic check of 38,000 vehicles revealed 1 car in every 4 to be defective. During the present inspection, the driver of a car found to have serious defects in brakes or lights will be given a summons ticket. This means appearance in court.

Where mechanical defects are not serious enough to warrent a summons, then a "faulty equipment" ticket will be given to the driver.

The "faulty equipment" ticket requires the driver to have the defects repaired within a definite time limit. The ticket is self-addressed, and after it has been signed by the mechanic doing the repair work, it must be mailed to the Patrol to prove that repairs have been made. Failure to comply with this "faulty" ticket will result in a summons being issued.

Figures On Traffic Accidents In Iowa In 1946

There were 15,715 collisions between two or more automobiles in Iowa in 1946.

Auto accidents totaled 20,439 in Iowa in 1946.

1,792 cars ran off the roads of Iowa last year causing 83 deaths.

Traffic accidents killed 523 Iowans last year.

There were 126 pedestrians killed in traffic accidents in Iowa last year.

49 children 9 years old or less died in traffic accidents in Iowa during 1946.

Headlights blinding caused 765 traffic accidents in Iowa during 1946.

Defective brakes caused 667 traffic accidents in Iowa in 1946.

In all, 37,068 motor vehicles were involved in traffic accidents in Iowa last year.

Direct traffic violations caused 15,799 accidents in Iowa during 1946.

Lorraine Knoll, Garner, Bride Of Raymond Swalve

Miss Lorraine Knoll, daughter of Ben Knoll of Garner, and Raymond B Swalve, son of Mr and Mrs. John Swalve of Klemme, were united in marriage on Wednesday evening, May 14th at 7.30 o'clock at the Evangelical and Reformed Church of Klemme with the Rev Calvin Grosshuesch officiating at the double ring ceremony.

Attending the couple were Mr and Mrs. Walter Greiman of near Garner

Miss Kathryn Raw of Garner played the wedding march and "Recessional" and also nuptial music before the ceremony.

Wayne Klinge ushered the groom's mother to her place preceeding the ceremony

The bride was attired in a light blue wool gabardine suit with black and white accessories. Her corsage was of white snapdragons and white carnations. The matron of honor wore a melon crepe suit with black and white accessories. Her corsage was of pale pink carnations.

The groom wore a dark blue suit with a white carnation boutonniere. The groom's attendant wore a dark brown stripe suit with a white carnation boutonniere.

The groom's mother was attired in a brown and white checked crepe dress with a corsage of yellow snapdragons.

After the ceremony a reception was held at the couples' home in Garner for a small group of relatives and friends.

The couple left on a short wedding trip and are now at home on Allen Ave. in Garner.

The bride graduated from Garner High School as valedictorian of the class of 1941. She was employed with the telephone company at Garner for two years and for the past four years has been employed at the Orville Maben Insurance agency.

The groom is a graduate of Klemme High School with the class of 1941. He spent 26 months in the U. S. Navy of these 23 months were spent in the Hawaiian Islands. He was graduated from the Wahiawa Radio School, Oaku, majoring in Major Relay work. He was supervisor of a crew at the first NTX relay center in the Pacific until his return to the states for his honorable discharge in May, 1946. He is now employed at the Stockwell Machine Shop where he was employed before entering the service.

MR. AND MRS. WALTER EISBERG HONORED ON 20TH ANNIVERSARY

A basket dinner was held at the home of Mr. and Mrs. Walter Eisberg at their home northwest of Garner Sunday in honor of their twentieth wedding anniversary Mr and Mrs. Eisberg received many lovely gifts from their friends and an enjoyable afternoon was spent informally.

Those present were: Mr. and Mrs. Albert Jass, Mr. and Mrs. Albert Boehnke, Mr. and Mrs. Ralph Jass and Mr. and Mrs. Wm. Klock, all of Garner; Miss Lucille Eisberg of Salisbury, Mo.; Mr. and Mrs. Edward Jass, and Mrs. Clara Roenfraz of Ventura; Mr. and Mrs. A. T. Jass, Donna Jean, Mrs. Bertha Weber and Mr. and Mrs. Will Schulz, Alice and Irene, of Clear Leke Lake.

LOAF OF BREAD

At Audubon last week, Laurence Anderson, 72, crossed the highway near his home to get a loaf of bread. He was struck by a car and instantly killed.

CLASS WILL

We, the Seniors of 1947, being of average age and sound mind and memory do make public and declare this our LAST WILL AND TESTAMENT, here by revolking and annulling any and all will or wills by us made heretofore:

Marcille Josten wills her ignorance and lack of ability to sit down and study to Charolotte Lewis.

Peanut Roths wills his interest in school to Alice Anderson.

Lefty Ridder wishes to leave his graceful art of shooting pool to someone still in K. H S How would you like this recreation, Carolyn?

Rod Bock's ability to skip school without getting caught to Darwin Wille.

Pete Larsen wills his New, Genuine Shick-double edged, electric razor to Laverne Lewis

Abe Blumer wills his liking of studies to a studious person like himself, Bud Montgomery

Emily Johnson wills her dancing technique to Erdene Nelson.

Charles Christie wills his unique driving ability to a damsel named Esther Hartbeck

Betty Lacey wills her likeness for Garner seniors to Shirley Stille and thats not because she wouldn't take it either.

Lois Ann Lau wills her quietness and excessive bashfulness around men to Donna Hevilin.

Frank Sherwood wills his liking of Betty Ann to Eddie Grosshuesch.

Peggy Coobs wills her interest in local men to Beulah Goll.

Dorothy Ellingson wills her man T. C. Is anyone here stupid enough to take that initial for another female.

Maurice Buckley will let his way with women slide to Ned Howard.

Ervin Ausborn wills his liking of Alumni women to Speck Jones.

Jean Kurtz wills her temperment to Mrs. Lieth.

Phyllis Christiance wills her likeness of the soil to Ben Katuin.

Elizabeth Goll wills her rhythmic elbows to Betty Kramer and continuous line of chatter to Lois Stille.

Dean Jacobs wills his athletic ability to Harlan and one wave and one dimple to Don Franklin.

The Four Roses Peg, Liz, Emy, and Dot, will their brand to anyone that likes it, and can abide within their laws.

The Three Ace's Frank, Jake and Pete will their title to anyone who can fullfill their position.

VENTURA YOUNG LADY BRIDE OF KLEMME FARMER, MAY 4

Mr. and Mrs. Clarence Holmes of Ventura, announce the marriage of their daughter, Miss Carolyn Holmes to Mr. John Albers of Klemme, which took place on Sunday, May 4th at the Little Brown Church near Nashua, Iowa; the Rev. F. L. Hanscom, pastor, officiating.

Mrs. Hanscom played nuptial music. The couple was attended by Harold Albers, brother of the bridegroom, and Miss Norma Holmes, sister of the bride. The bride was given in marriage by her father.

After a short wedding trip, the couple is now at home on the Albers farm southeast of Klemme. Before the wedding the bride was honored at several showers and dinners.

Mr. Albers has farmed near Klemme for several years.

Liberty Township Farm Bureau Holds Meeting

The Liberty Township Farm Bureau held its regular monthly meeting May 15th. They were entertained by the school children taught by Mrs. Clarence Gatchel. Paul Henderson showed a moving picture "Death To Weeds" explaining the use of 2,4-D weed spray. C. J. Jackson gave a short discussion of Farm Bureau organization problems.

Klemme Seniors Look Into The Future

THE SENIORS

Everyone knows what has been happening to the Seniors the past week or two so there is just nothing to write about so we'll be different and jump ahead ten years and tell you what they are doing there.

SENIOR CLASS PROPHECY

It is now the spring of 1957 and the seniors are graduating from high school n K. H. S This together, with the balmy spring weather makes us recall fond memories when we seniors of 1947 were graduating from the Klemme High School Ten years makes a great difference in anyone's life, and no doubt has in our classmates. Let us imagine ourselves going on a trip to visit them There is no doubt we are in for a great surprise.

Starting out on a bright spring morning we go to visit the Ervin Ausborn farm He is desperately trying to get some plowing done, but is having quite a time with three little Ausborns on the tractor with him. You see his wife has quite a time too, trying to be both a wife and telephone operator. He tells us that one of his close neighbors is Phyllis Christiance Miss, that s ! ! She is managing her father's farm and as we reach her home we find her emerging from the chicken house with a basket full of eggs. She tells us although her nursing career was sidetracked that Jean Kurtz has been very successful, for she is now Supt. of nurses at the Veterans Hospital in Des Moines. Jean of course, enjoys it for the patients are all men. Through the hospital Jean has gotten in touch with Ivan Blumer, at the Mayo Brothers Clinic.

So we journey to Rochester, Minnesota and to our amazement we find Ivan is a pschiatrist. As we enter his office who should his receptionist be, but Dorothy Ellingson (yes, still Ellingson) Abe, as he was known back in high school, tells us he enjoys his work immensely We hávn't a doubt of that for we notice he has a pretty wave in his hair, and as we recall, Dorothy took a beauty course By the way Dot still has her giggle. They tell us we can find two more of our classmates at the University of Minnesota, namely Elizabeth Goll and Clarence Larsen.

The distance is short and we are soon on the campus. We are taken to the Dean of Men, who is none other than the one-time bashful Pete. His bashful days are over for he has thrice been married and is no doubt looking for the fourth. Miss Goll, now a member of the faculty is hoping her lucky number is four Elizabeth is busy keeping some pupils after school and we are not surprised to find they are four handsome college boys. I'll bet she enjoys this for she spent many cheerful hours after school herself - - see, a good chance for revenge While at the University we attend a college baseball game between the U. of Minnesota and Northwestern U The coach for Northwestern is Dean Jacobs, who we remember as an all around high school athlete. When he isn't using the bat to bat the ball he is using it to hit the boys. Jake thinks he will try a job as a coach at Oxford in England, we wonder why ! ! ! Could it be that an old flame of his is in England?

Chicago is a city we can't pass up for someone is sure to be there. Yes, we're right, for as we near the Loop we see a big sign reading "Bock Tavern, Roger Bock, Proprieter. Come on in and enjoy a game of pool and some French imported wine." Rod certainly has profited from those days he skipped school. He doesn't have time to visit with us but we do find out where Lois Lau's Classy Chassie Shop is, she is now Chicago's foremost clothes designer. I'll bet she really turns the charm on those city slickers now ! !

From here we hop a train for New York. It seems to be that our classmates like big cities. As we enter the outskirts of New York the Ringling Bros. Circus is just opening their season. We take a little time off to see the circus, but are we surprised when a little trapeze artist flies through the air and is none other than Peggy Coobs. We wonder how Peggy can make eyes at a certain clown way up there, for, true to his high school nature Francis Sherwood has become Ringling's star clown Francis always did like to tease the women and now he really makes use of his high school experiences. After the show we find Francis and Peggy enjoying peanuts, popcorn and lemonade. On their way to New York they stopped to see the Kentucky Derby, where they said they were nearly ran over by a horse whose jockey was Charles Christie. He explained that he had learned his riding ability from his wife, the former Charollotte Lewis.

After leaving the circus we decide to see the current Broadway hit, "Taps In Revue," for the tap-dancing director is none other than Marcille Josten. We remember her as the most studious pupil of our class and now we hear she can really tap, and how ! ! We are really in luck because Marcille is able to tell us about the other five members of our class who ventured outside of the United States. The week we visited Marcille she had seen Seaman first class Maurice Buckley who, had just been in Paris. Maurice always did have a way with women and now he has a girl in every port. While in Paris he had been to the "Hall Of Flame," a Paris night-spot owned by Roger Ridder and Dean Roths. He said the floor show was really good because another old classmate, Betty Lacey, was the star. Her fan dance performance adds a lot to that Paris atmosphere of plenty of wine, women, and song, so say Roger and Dean. It was a good thing Betty attended those Klemme dances regularly. Then Marcille tells us to look at the Play Previews on our way out of the theatre. We thank her for being so helpful and do as she said. Well, well, one of England's new dramatic plays is coming to America which was directed by Emily Johnson, the sweet tempered blond of the class. Now we know why Jake had an eye on England, but now Emily is coming to America so the days of single life will probably end.

This concludes our look into the future life of the nineteen members of our class. Although their future will probably not be as we predicted, we do wish them great success and the best of luck in whatever they do. A happy future to all the Seniors!

Reported By Lois Lau and Phyllis Christiance.

SAVED BY AWNING

An awning does more than protect from the sun. At Mt. Pleasant, Harold Lamm was walking under a downtown awning there one day recently when a tar bucket used by roof workers fell from directly over him and was caught by the awning.

KLEMME GIRL TO BE BRIDE AT CHURCH CEREMONY

Mr. and Mrs. Henry Jost, of Klemme, announce the engagement and approaching marriage of their daughter, Phyllis Kirkwood, to Walter E. Gast of Garner.

The wedding will take place Sunday afternoon, May 25th at 3:00 o'clock at the Klemme Evangelical and Reformed Church with the Rev Calvin Grosshuesch officiating

SCENIC WONDERLAND . . . *Typical of* the rugged and awe-inspiring beauty of the four national parks in the Rockies is this scene in Rocky Mountain National park in Colorado.

THE MAJESTIC ROCKIES

Chain of Parks Incorporates Spectacular Mountain Scenery

WNU Features.

Towering peaks, deep, forest-clad canyons and lake-studded gorges combine to provide a spectacular and awe-inspiring wonderland in the Rocky mountains. Here, where the majesty of the mountains reaches its supreme heights, congress has established a chain of national parks, beginning with Yellowstone in 1872. These parks exemplify the many forms and faces of the Rockies, with each possessing a distictive character of its own.

Three of the parks—Glacier, Yellowstone and Rocky Mountain—bestride the Continental Divide so that the waters from their snowfields, lakes and streams drain into both the Atlantic and the Pacific. The fourth, Grand Teton, embracing the highest portion of the Tetons, drains into Snake river, a major tributary of the Columbia.

National Parks Second In a Series

• • •

GLACIER PARK, lying up against the Canadian border, and forming a part of Waterton-Glacier International Peace park, contains nearly a million acres of land and water. Although there are still some 60 glaciers, many of which the summer visitor can reach without great difficulty, it is the work of much greater glaciers of thousands of years ago which carved the many valleys of the park that are chiefly responsible for its name. In the valleys and basins so formed lie more than 200 lakes, these, reflecting the sheer peaks which rise from 3,000 to 5,000 feet above them, provide much of the spectacular beauty of the park that makes it one of the most photographed in the whole park system.

A highway crosses the park, by way of Logan pass on the Continental Divide, and short spur roads extend to several of the finest of the lakes. However, Glacier is primarily and most enjoyably a horseback park. The National Park service calls it the foremost trail park as it contains about 1,000 miles of trails. The trails, rangers insist, provide the best means of really getting acquainted with the park. Glacier also stands next to Yellowstone in quantity and variety of big game, of which the mountain goat is probably the most famous species.

• • •

GRAND TETON, only a few miles south of Yellowstone, and flanked on the north and east by Jackson Hole National monument, is extraordinary both because of the jagged, rugged grandeur of its mountains and because of the fact that these rise abruptly from what geologists call the fault block trough of Jackson. Hole. In other words, on their eastern side they have no foothills.

The tip of Grand Teton, with an elevation of 13,766 feet, is more than 7,000 feet above Jackson Hole and the lovely series of lakes—Jenny, String, Leigh, Jackson and others—that nestle against the base of the range. These mountains, too, owe much of their sculpture to glaciers, of which a few remain in the higher basins.

Packed with the 150-square mile area of alpine park are 22 peaks of more than 10,000-foot elevation as well as numerous lakes, glaciers, snowfields and extensive forests.

No highway crosses the range except at Teton Pass, where the Teton range joins the Snake river range. Only foot and bridle trails penetrate the backcountry. Much of the area, particularly the upper Teton country, is virgin mountain-forest.

• • •

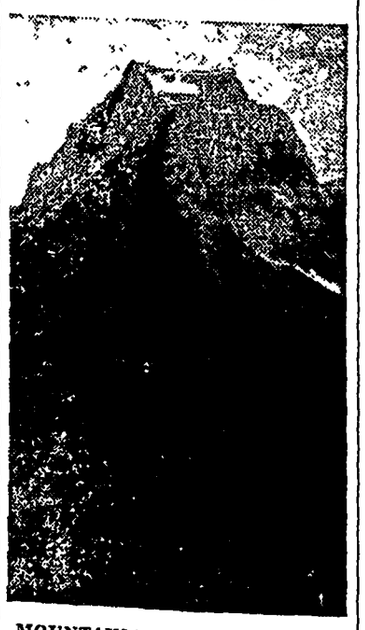
THE VISITOR to Rocky Mountain National park, lying about 75 miles northwest of Denver, is more than a mile and a half above sea level before he enters it. The park's lowest elevation is around 8,000 feet; its highest, the summit of Long's peak, is 14,255. Within the park are some 65 named peaks of more than 10,000 feet elevation, and scores of lakes, small and large. Here again lakes and peaks have been carved by the slow and inexorable movement of glacial ice.

Rocky Mountain is a great hiker's and mountain climber's park, as are Grand Teton and Glacier, but it also offers the motorist one of the greatest thrills to be found in any national park. This is the Trail Ridge road, of which more than four miles are above 12,000 feet elevation and 11 miles are above the 11,000-foot timber line. From few places in the world is there offered such a far-flung panorama of spectacular mountain scenery.

Although the National Park service encourages mountain climbing in these and other parks of the system, its ranger force is called on year after year to go to the rescue of climbers who venture among the peaks alone or under unskilled guidance; and it is seldom that a season passes without one or more fatal accidents to those who disregard the safety rules which the service enjoins on all climbers. The fundamental piece of advice to the venturesome is: "If you want to climb, consult a ranger. Get his advice; and once you have it, abide by it. It may mean the difference between life and death."

• • •

IN GLACIER National park, there is almost every type of public accommodation. Concession operations in Rocky Mountain under contract with the government are limited, but at Estes park, on the east side, and Grand lake, on the west side, there are numerous hotels and camps just outside of the national park. At Grand Teton, there are no hotel, lodge or camp concessions, but there are varied accommodations in the town of Jackson and at many places in Jackson Hole.



MOUNTAIN PINNACLE . . . Jagged peaks and spectacular glaciers lure vacationers to Glacier National park in Montana. This imposing peak is Going-to-the-Sun mountain as seen from St. Mary lake.

Wildlife Refuge in Everglades Planned

Development of a new national park in Florida's tropical Everglades region is being expedited by the National Park service and the State of Florida. The Everglades, known as the last stand of the American crocodile, the roseate spoonbill and other valuable wildlife species, will be preserved in its primitive state as a wildlife refuge.

Thousands of islands lie within the region, covered with dense vegetation ranging from giant cypress trees to royal palms. Indians still hunt for fox, bear, panther, deer and raccoon in this area. Crocodiles, alligators and numerous varieties of fish inhabit the waters. All this wildlife, however, is dominated by birds—gannets, curlews, ducks, herons, the "long white" egrets, the sand crane and the bald eagle.

The proposed park will cover 1,300,000 acres.

When Your Back Hurts

And Your Strength Energy Is Below

It may be caused by disorder function that permits poisonous waste to accumulate. If so, you people feel tired, weak and when the kidneys fail to remove acids and other waste matter from blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is other sign that something is wrong with the kidneys or bladder.

There should be no doubt about it. treatment is wiser than to neglect it. Use Doan's Pills. It is better recommended medicine that has won countless users proval than on something less well known. Doan's have been used for many years. Are at all drug stores. Get Doan's today.

DOAN'S PILLS

THE FICTION CORNER

THEN IN TRIUMPH

By Frank L. Parke

THERE were cars in front of the house. Four of them. And two more in the drive. Clifford Oslow cut across the Drake's lawn and headed for the back steps. But not soon enough. The door of a big red cabriolet opened and a woman came rushing after him She was a little person, smaller even than Clifford himself. But she was fast. She reached him just as he made the gap in the hedge

"You're Mr Oslow, aren't you?" she panted. She didn't wait for a confession. She pulled out a little book and a pencil and held them under his nose "I've been trying to get her autograph all week," she explained. "I want you to get it for me Just drop the book in a mailbox. It's stamped and the address on it."

This Week's Best Fiction

And then she was gone and Clifford was standing there holding the book and pencil in his hand. "Never mind," she shouted from the car, "mailing the pencil!"

He stuffed the autograph book in his pocket and hurried up the steps. There was a lot of noise coming from the parlor Several male voices were going at once. A strange woman's voice insinuating itself every now and then And Julia's voice, rising above the babble, clear and gaily and very sure

"Yes," she was saying. And, "I'm very glad." And, "People have been tremendously generous to me."

She sounded tired, though.

Clifford leaned against the ironing-board while he finished the sandwich and the coke He left the empty bottle on the table, snapped off the kitchen light and pushed easily to the hall door The hall light was on and someone Clifford didn't know was pacing the carpet across from the parlor But it was only three short steps to the rear stairs. He didn't make it.

Someone who babbled incomprehensively at him grabbed him by the arm and bounced him along the hall and into the parlor. "Here he is!" somebody shouted "Here's Mr. Oslow!"

There were half-a-dozen people there, all with note books and busy pencils. Julia was in the big chair by the fireplace, looking plumper than usual in her new green dress. She smiled at him affectionately but it seemed to him, a little distantly. He'd noticed that breach in her reliance many times lately. He knew that it wasn't superiority, but that she was desperately afraid that it wouldn't. She looked, he saw, as tired as he had sounded.

"Hello, Clifford," she said.

"Hello, Julia," he answered.

"I didn't get a chance to go over and kiss her A reporter had him backed against the wall. How did it feel to go to bed a teller at the pay-ment booth down at the gas company and to wake up the husband of a best-selling novelist? Very startling, he told them. Was he going to give up his job? No, he snapped, he wasn't. Had he heard the news that "Welcome Tomorrow" was going to be translated into Turkish? No, he hadn't.

And then the woman came over. The one whose voice he'd heard back in the kitchen where he wished devoutly he'd stayed.

"How," she inquired briskly, "did you like the story?"

Clifford didn't answer immediately. He just looked at the woman.

They bounced him into the parlor. "Here he is!" somebody shouted.

Everyone became very quiet. And everyone looked at him. The woman repeated the question. Clifford knew what he wanted to say "I liked it very much," he wanted to say and then run. But they wouldn't let him run. They'd make him stay And ask him more questions. Such as which character he had liked best. Which he couldn't answer

"I haven't," he mumbled, "had an opportunity to read it yet. But I'm going to," he promised. And then came a sudden inspiration. "I'm going to read it now!" There was a copy on the desk by the door. Clifford grabbed it and raced for the front stairs.

BEFORE he reached the second flight, though, he could hear the woman's voice on the hall phone. "At last," she was saying, "diligent digging has unearthed an adult American who has not read 'Welcome Tomorrow.' He is, of all people, Clifford Oslow, white, 43, a native of this city and the husband of . . ."

The second floor rooms might have been vacant, but Clifford took no chances. He kept on going until he reached his study at the back of the attic. He snapped on the light over the table and dropped into the chair before it. He put Julia's book right in front of him, but he didn't immediately open it.

Instead he squirmed back in the chair and looked about him. The room was familiar enough. It had been his for over eighteen years. The table was the same. The print of the Jones flagship was the same. And the old typewriter was the one he had bought before Julia and he were married.

There hadn't been many changes. The fireplace had been re-bricked. And the radio was a recent gift of Julia's. And stacked all along the bookcase were the manuscripts of his novels. His rejected novels. On top was his latest one, the one that had stopped going the rounds six months before

On the bottom was his earliest one The one he wrote when Julia and he were first married The one whose people both of them lived with in the two years during which he labored over it. "How's Vincent coming along?" Julia would say "He's got the house built," Clifford would tell her, "but I can't think of a valid way for him to get the Gleason acre he needs for pasturage "

Yes, Clifford was a writer then. Large W And he kept on thinking of himself as one for many years after, despite the concerted indifference of the publishers Finally, of course, his writing had become merely a gesture A stubborn unwillingness to admit defeat Now, to be sure the defeat was unquestioned Now that Julia, who before a year ago hadn't put pen to paper, had written a book, had it accepted and now was looking at advertisements that said, "over four hundred thousand copies "

Julia, Clifford sighed Well, the utter miserableness of his failure wouldn't be permitted to steal one ounce from her merited pleasure in her own accomplishment!

He picked up "Welcome Tomorrow" and opened it, as he opened every book, in the middle He read a paragraph. And then another He had just started a third when suddenly he stopped. He put down Julia's book, reached over to the shelf and tugged out the dusty manuscript of his own first effort. Rapidly he flipped over the crisp pages. Then he began to read aloud.

FROM his own manuscript he read: "The water was high above the fence-top Beyond on the hill the cattle cowered Vincent stood, silent and stricken, beside the ruin of his farm "

Clifford put the manuscript on the table on top of the book. For a time he sat quietly inspecting the crease of his trousers. Then he put the book in his lap and left the manuscript on the table and began to read them, page against page. He had his answer in ten minutes.

And then he went back downstairs. A couple of reporters were still in the parlor "But, Mrs. Oslow, naturally our readers are interested," one was insisting. "When," he demanded, "will you finish your next book?"

"I don't know," she answered uneasily.

Clifford came across the room to her, smiling. He put his arm around her and pressed her shoulder firmly but gently. "Now, now, Julia," he protested. "Let's not quibble with the young man."

The reporter looked up.

"Mrs. Oslow's new novel," Clifford announced proudly, "will be ready in another month."

Julia turned around and stared at him, quite terrified.

But Clifford kept on smiling. Then he reached into his pocket and brought out the autograph book and pencil that had been forced on him on his way home. "Sign here," he instructed.

Good Eyes Aid Artists

There seems to be a relationship between good vision and artistic ability. Of a group of 100 art students examined, those who showed superior artistic ability had excellent eye coordination and depth perception.

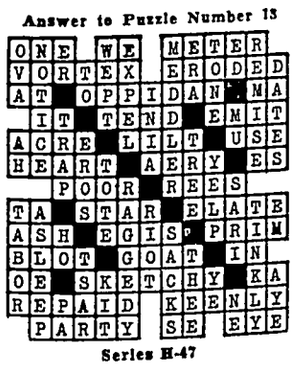
Answer to Puzzle Number 13



Series H-47

Sportlight

by GRANTLAND RICE

THE recent death of Benny Leonard revives the old argument concerning the best lightweight from a long and able parade. No other ring division has sent out as many fine fighters. The list includes such boxers and punchers as Joe Gans, Benny Leonard, Jack McAuliffe, Frank Erne, Kid Lavigne—the Saginaw Kid, Bat Nelson, Ad Wolgast, Willie Ritchie, Freddy Welsh, Tony Canzoneri, Henry Armstrong and many others

B. Leonard

In various debates and arguments that have been under way for 40 years, there are generally two names that finish out in front—Leonard and Gans.

Some time ago, Harry Smith, the veteran San Francisco expert who has been covering championship matches for more than 50 years, who goes back deep into ring history, put this selection up to many of those who had seen both men in action. In the vote that followed; Gans, the Old Master from Baltimore, had a slight lead. Both were rated headline artists as boxers and punchers Leonard had much the better ring record But Gans, to make a living, had to take orders more than once that included a dive.

He was the fighter Jack Blackburn, a great ringman on his own who once had charge of Joe Louis, picked as the best. But there are many others who rate Leonard on a par.

Gans finished his career in the last stages of tuberculosis, but even when a sick man he outlasted Bat Nelson, the Durable Dane. No one ever knew just how good Gans might have been under cleaner handling plus better health.

Both Boxer and Puncher

In addition to being a brilliant boxer, one who had no waste motion, he also was a murderous puncher. In his last fight with Nelson, when Gans was moving close to an early death, he nailed Nelson with a right to the side "I thought Gans had used a knife," Nelson said later "I never had a punch that hurt as much. I felt like crying."

Leonard was smart, game, one of the ablest of all the boxers and a hard puncher on the side. He was one of the greatest of the lot, and many rank him in front. And beyond that the game has known no one more willing to help any worthy cause, where he could be of use

On the night before the Dempsey-Willard battle in Toledo, back in 1919, Bob Edgren and I dropped by to see Jess Willard. The 245-pound defending champion was more than willing to outline his plan of battle

"Look over Dempsey's record," he said. "A knockout in one round. Another knockout in two rounds Two more in one round. You know what that means. It means he starts punching from the bell. You can't keep piling up one-round knockouts unless you pile in and start swinging. I'm going to wait for him with my left out and my right ready for an uppercut. The second he comes in close enough, I'll let him have it. And I don't believe any 187-pound guy can hurt me "

That had been Dempsey's earlier plan. Jack and Kearns had covered a bet, $10,000 against $100,000, on knocking Willard out in the first round. Naturally Dempsey didn't want to waste any time fooling around.

It was Leonard, a master mind in Dempsey's camp, who got Dempsey and Kearns to switch their plan.

"This big guy will be waiting for that first rush," Leonard said "He's dangerous with that right-hand uppercut. There's no use taking any such chance against a fellow who outweighs you by 58 pounds. The thing to do is to make Willard lead first. Circle in and out, weaving and bobbing And keep it up until he leads. Then go to work."

Strategic Stalling

This was wise advice. For something like 47 seconds, which seemed longer than 10 minutes, Dempsey circled Willard after the manner of a leopard moving around an ox. Dempsey would move in, weave, bob and then move back again. Around and around, with Willard shifting position, all set for the expected rush.

The time finally came when Willard couldn't wait any longer. After all, Willard was the champion and he had a 58-pound margin in weight, many inches in reach and five or six inches in height. As Dempsey started weaving in again, Willard tried a left jab. The tigerish Dempsey moved in under and nailed Willard with a hard right to the body, followed in a split-second flash with a killing left high on the cheekbone.

Willard fell like a giant marionette whose strings had snapped.

Later on, in the short fight, Willard jolted Dempsey badly with the same uppercut he had hoped to use in the first round. But, by that time, Willard was a helpless hulk.

This is merely further proof of Leonard's ring smartness. He always had most of the answers.

Federally-Owned Land Yields Little Local Tax Revenue

IT IS axiomatic that whenever real property is taken off the tax duplicate, one of two things happens. Either your local tax rate is raised or the taxing unit simply collects less taxes.

This brings us to the introduction of a bill simultaneously in the house and senate which recognizes the fact that the federal government has taken over valuable properties in every state in the union. In hundreds of cases the government has forced local communities to assume inequitable, tax burdens as a consequence of taking this property off the local tax duplicates.

The two bills set up a commission of seven members to determine and pay to state and local governmental units contributions in lieu of taxes on real property taken over by the government. Sen. Hugh Butler of Nebraska is sponsor of the measure in the senate, while Rep. Claire Engle of California is author in the house.

The measures represent several years of organization and pressure brought about by the National Association of County Officials, which has an office here in Washington, and is representative of the various elected county officials in 40 states.

At the present time there are approximately 40 separate laws which provide various methods, amounts and percentages of federal payments to state and local units of government in lieu of taxes on lands taken over by the federal government. In many cases, however, particularly during the war years when government exercised the power of eminent domain and took over thousands of acres of lands, including high priced agricultural lands in rural areas and equally desirable and high cost industrial sites in cities, absolutely no taxes or money in lieu of taxes is being collected on these lands

Serious Problem in West

The rapid growth of government ownership of lands, particularly in the western states, has led various organizations, including the U. S. chamber of commerce, to protest. For instance the federal government owns 87 per cent of the total land of Nevada, 72 per cent of Utah and 73 per cent of Arizona. The government owns 46 million of the 100 million acres of land in California, and these figures in varying percentages apply to all the western states But even in eastern states government ownership of land has increased in the past several years. The government owns 12 per cent of New Hampshire, 7 per cent of Michigan, 5 per cent of North Carolina and various smaller percentages in all other states.

In Baltimore, where the huge Glenn Martin airplane factory operates, the local unit of government is collecting no taxes on this highly valuable industrial plant, comprising many acres It is owned by the army and operated under lease by Glenn Martin company. There are similar situations in many cities.

As one instance, the navy built a tremendous supply depot south of Ogden, Utah It acquired hundreds of acres of the best truck and farm land This land was taken off the tax duplicates and revenue of the county government diminished. On the other hand, construction of the depot required increased activity on the part of the county. New schools were needed for children of the employees of the naval depot, additional policing was required, costs of highway maintenance rose rapidly, so this acquisition by the federal government reduced the county tax revenue and at the same time increased county costs.

Redress Laws Chaotic

The National Association of County Officials regards the issue as one of the most serious problems confronting local governments, because it goes directly to the heart of the maintenance of local government. Under the present code of 40 laws which attempts to make some reparation for this federal acquisition of real property, there is no regularity of amounts or times for payments. Formulas are calculated in each case. Thus it is difficult or impossible for county governments to budget these items.

The Butler bill, S 959, and the Engle bill, HR 2725, represent an attempt to bring some order into the picture and set up a policy of systematic and regular payments.

These regular payments shall in no case be in excess of the tax revenue the property would produce if privately owned. State and local governmental units are to be paid for all property owned by the federal government with exception of courthouses, customhouses, mints, postoffices, hospitals and other like properties which are specifically excluded from provisions of the bill.

It likely will be expensive but probably no more so than the increased taxes occasioned by taking duplicates at the local level.

NEEDLECRAFT PATTERNS

Gay Morning Glories on Apron

902

HOME will be lots gayer with you in these pretties! Merry morning glories decorate a practical apron, bandana, oven mitt. Simple stitches.

* * *

Be happy while you work at these and in these! Pattern 902 has transfer of motifs, pattern pieces; charts. Patterns are 20 cents each.

Due to an unusually large demand and current conditions, slightly more time is required in filling orders for a few of the most popular patterns.

WHY TAKE HARSH LAXATIVES?

Healthful Fresh Fruit Drink Makes Purgatives Unnecessary for Most People

Here's a way to overcome constipation *without* harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

Most people find this all they need—stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B_1 and P. They pep up appetite. They *alkalinize*, aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

Klemme Cooperative Creamery Company

Klemme Girl Scout Rewarded For Honesty

Maralee Ridder, daughter of Mr and Mrs. Lee Ridder, last week found a bill fold containing $26 00. A card in the bill fold had the owner's name and address and Maralee promptly turned her find over to the owner and was rewarded for her honesty.

Maralee, a grade pupil is a Girl Scout and lived up to her Scout training.

The Editor wants to point out this incident to other boys and girls as we want our young people to grow up to be honorable citizens and to be honest and law-abiding.

It always pays to be a good citizen.

Soil Management And Land Valuation Short Course

County Extension Director Paul Henderson this week received word from R. M. Vifquain, director of short courses, that the soil Management and Land Short Course will be held June 3-4 at Iowa State College

The two-day course, the 20th such course offered by the college dealing with land valuation and soil management, will be devoted to drainage problems, crop rotation, soil tests, erosion, land evaluation and marginal land management practices this year.

Henderson says, the course, while of special interest to rural appraisers and farm managers, can be beneficial to everyone associated with the business of farming.

RIGHT APPLICATION OF DDT AIDS BEEF GAINS

A pound of DDT, properly applied as a spray on cattle, can produce from 1,200 to 2,300 lbs. of beef, research workers have figured

In Kansas experiments, treated cows on pasture gained 42 to 51 pounds and calves from 47 to 70 pounds more per animal than untreated cows and calves during a test period of 3 months.

Entomologists further figured that cost of DDT, compared to extra beef put on by treated cattle, shows that each dime's worth of DDT produced about 100 pounds of beef.

That's one reason why specialists at Iowa State College are urging farmers to take part in the Iowa fly control campaign this year.

Golly Workers Club Meets

The Jolly Workers Club met at the home of Mrs. Anna Ausborn on May 14th. There were 18 members present. Mrs. John Kaduce, Jr. and Carol were visitors.

Luella Boelman read the minutes of the last meeting. Mrs. Bessie Marshall, our vice-president, took charge of the meeting. An exchange of flowers made an interesting roll call. It was decided to send another box of needy things to our family in Holland. We all decided to send our president, Mrs. Lily Pearson, a greeting card and handkerchief as she has been unable to attend our last two meetings.

After the meeting Bingo was enjoyed. A lovely lunch was served by Anna Ausborn and Luella Boelman as co-hostess

The June meeting will be at the home of Freda Lass with Jenny Nelson as co-hostess.

Avery Sunbeams Hold Meeting

The Avery Sunbeams had a Mother's Tea in honor of their mothers May 10 at the home of Lillian Wille. The meeting was opened with the club pledge. Six members answered roll call by naming one country they have adopted.

Plans were made for Rally Day which will be held June 10 at Duncan Harriet Ostendorf was nominated as our candidate for the county office. Iris Rosendahl will be her campaign speaker Harriet Ostendorf and Betty Kramer decided to attend the 4-H district camp at Clear Lake.

Betty Ann gave a talk on dresser scrafs. Harriet discussed wall finish and wall paper.

A picture study was given by Pauline Kramer.

Mrs Paul Kramer, Mrs. Bernard Gruis, Mrs. Harry Ostendorf, Mrs. Walter Rosendahl, Mrs. Carl Wille, and Mrs. John Chambers were present for the tea. Two new members, Mary Ann Blumer and Darlene Bachman, also attended.

Our Sophomore Class News

With the thought of finals soon to come we wonder how we will fare, and if our report card will have the grades on it that we all want Most of us are working hard to get our notebooks in so those grades will help.

We have finished our English books and are continuing in our Literature books. We are studying essays on Biography and Autobiography.

We have finished both Biology and World History books also, but we will not be able to complete our Geometry books. Many have worked ahead, however, and will nearly finish it.

Every day is so filled with activity that we do not realize how fast the days are flying and that the glorious vacation is drawing near. Of course school starts again in September, but who wants to think of that now.

—Phyllis Boland

CATTLE FEEDERS TO MEET MAY 23

May 23 will be Cattle Feeders' Day at Iowa State College.

The twenty-ninth annual animal husbandry open house will get under way at 10 a. m. with the showing of six groups of steers which have been on feeding experiments since last November.

Livestock specialist C. C. Culbertson says the value of corncobs as beef-producing feed, will be graded as to their market worth. William Imm, Swift and Company, and C. A. Story, Chicago Producer's Commission Association, will appraise the cattle and answer questions as to the commercial value of the animals.

Bleachers will be set up so that spectators will be able to see all groups of experimental cattle without walking from one lot to another as has been necessary in the past.

R. J. Eggert of the American Meat Institute, Chicago, will start the afternoon program with a talk on the beef cattle outlook J. C. Holbert, Washington, Iowa, will review the feeder cattle situation.

"The Cattle Feeder Looks Ahead" will be the subject of a talk by E. H. Hill, vice-president of Iowa's State Farm Bureau Following him, Paul Gerlaugh, Ohio Agricultural Experiment Station, will discuss cattle research work done at the Ohio station.

The 1-day program, which in the past has drawn upwards of 2,000 cattle feeders, presents an excellent opportunity for Iowans to learn more about the present livestock situation and see for themselves the results of various experiments carried on the college, Culbertson says.

SPRAY FOR FLAX

Don't use 2,4-D to spray flax fields. County Extension Director Paul Henderson warns Hancock county farmers against using 2,4-D on flax He says that according to Iowa State College botanist, E. P Sylwester, 2,4-D causes twisted stalks and will reduce yields through killing if used as a spray on flax.

Sinox and Dow-Selective, two commercial sprays, are recommended for flax. While either of these sprays is injurious to red clover and somewnat damaging to sweet clover and alfalfa, they are both very effective in destroying mustard, lambs quarter and pig weeds in flax

Sinox should be mixed 1 gallon to 100 gallons of water and used at the rate of 80 to 100 gallons per acre. For Dow-Selective Sylwester says to mix 3 pints to 100 gallons of water This mixture should be applied 100 gallons to the acre

For most effective use, fields should be sprayed when the flax is 6 inches high and the weeds are in the 3 or 4 leaf stage The plants should be sprayed when they are dry with no dew on the ground, according to the instructions received by Henderson.

We earnestly hope that the same degree of success that has marked your days in the classroom will carry on into whatever you have planned for the future, whether you continue with your schooling or follow some other pursuit.

From where I sit ... *by* Joe Marsh

When Ed's Crops Failed

Three years ago Ed Smith's luck went bad. His crops failed, and it wasn't long before Ed's home and furnishings were up for auction.

Half the town turned out, and Ed must have thought his neighbors were a bunch of hungry vultures—buying up all his precious possessions for a song.

When it was over, and the auctioneer had left, Sam Abernathy turns to the crowd and says: "All right, folks, let's take time out for a glass of beer, and then put this stuff back where it belongs!"

Two hours later, Ed was in possession of his home and furnishings; and the folks who'd paid for them were sitting around Ed's fire enjoying a neighborly glass of beer — to show their friendship and their confidence in Ed.

Today, Ed's back on his feet—another constructive member of the community. And from where I sit, we've all been well repaid—a good investment in a good man.

Joe Marsh

Cooperative Action Nets Homes

Some Cities 'Talk' Housing; Memphis Actually Builds

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

(This is the fourth of a series describing how American ingenuity is helping to solve one of America's biggest problems—the G.I. housing shortage.)

WASHINGTON — Thirty-five hundred new homes started in one year is a pretty good record for any fair-sized community—especially when the year is 1946, and the city, Memphis, Tenn., had never started more than 2,400 units a year before.

Some two thousand of last year's "starts" were completed in 1946. Now in the spring of 1947 while some communities still talk about and wish for housing, Memphis is going right ahead finishing up the rest of the 1946 starts and undertaking more.

The answer to this old southern city's success in housing lies partly in the cooperative attitude of city officials who are very conscious of the veterans housing problem, and partly to individual builders who have been willing to make price sacrifices, work long hours and do whatever was necessary to overcome shortages of materials.

Baukhage

Take Wallace E. Johnson for example—a builder who started in December, 1939, to construct one house and who now has to his credit several thousand.

He is devoting all his energy and ingenuity to housing veterans these days. It takes energy and ingenuity too, but this man who, during the war, was completing a house for a war worker every two and a half hours has what it takes.

For example, last September when lumber couldn't be bought for love or money, Johnson bought land with standing merchantable timber and a sawmill camp near Potts Camp, Miss., close to Memphis. This purchase made possible a triple play which has paid off in savings of time and money Johnson cuts his own timber, hauls it to his own sawmill for sawing, drying and cutting, then hauls it direct to his own building sites in size and amount wanted. So much waste is eliminated that the leftover lumber from a whole house can be hauled away in one wheelbarrow.

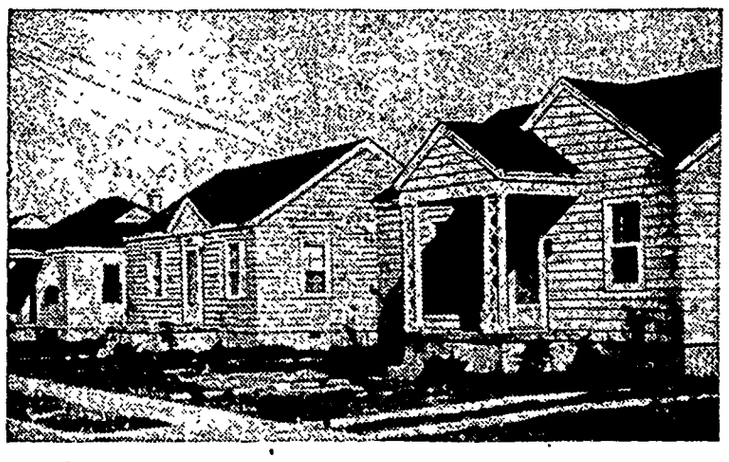
When brick couldn't be had in the Memphis area, Johnson still managed. He got brick on a swap basis—obtaining critical materials and labor for a brick-making concern which used the items thus supplied to make brick for Johnson projects.

If he couldn't find the materials he needed around Memphis, he went where he could buy them. He has sent employees by air all the way to the west coast to pick up windows and doors, even paying retail prices for them when he had to.

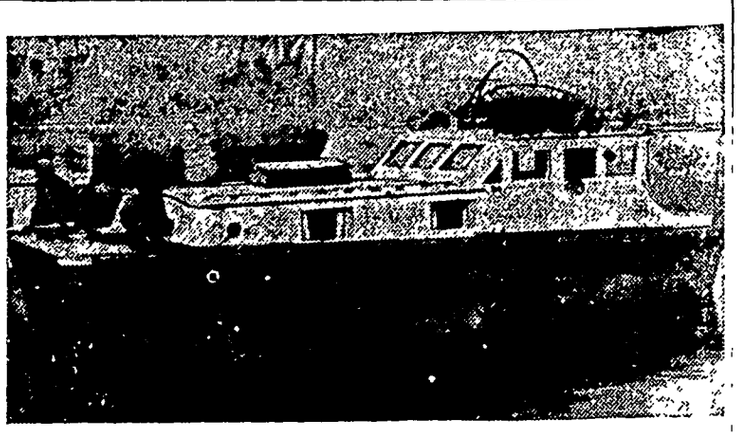
But Johnson couldn't do as well as he does nor keep his costs to veterans so low without cooperation of the community In Memphis the city repays builders of approved subdivisions for their expense in installing utilities The Memphis light, gas and water division, which is publicly owned, has gone so far as to permit utility connections even when no meters were available. Thus, quite a number of houses were finished and families were housed, without having to wait for the hard-to-get meters.

As a result of this cooperation Johnson last fall had completed 55 two-bedroom houses which went to Memphis vets for $5,250. Other prices are comparably low, $6,000 to $7,000, and even in the lowest brackets Johnson tries for good design. He switches roof lines or the set of a house on a lot, and utilizes other means to avoid the sameness generally characteristic of rows of houses in developments. Incidentally he recently was awarded a prize by National Home Builders association for "Meritorious House Design in 1947."

The tenants appreciate this. Not long ago one couple, the first tenants in a new subdivision, gave a Sunday night supper for all of Johnson's workers—the shipping clerks, timekeepers, the general manager, the truck drivers and all the people who helped build the house.



Community cooperation aids home builders of Memphis, Tenn., in completing badly needed housing projects. These homes are typical of the low-cost projects completed by Wallace E. Johnson.



THEY SOLVE HOUSING PROBLEM . . . Confronted with a housing problem, Dee Ainsworth and Mrs. Marion MacConnell of Los Angeles purchased a wartime LCVP (landing craft, personnel) for $700 and converted it into this trim boat with living accommodations. They will sail to Central America ports aboard their floating home.

NEWS REVIEW

Tornadoes Wreak Havoc; Blast Kills Eight Miners

TORNADOES:

Path of Destruction

Devastating tornadoes cut a wide swath through midwestern and eastern states, leaving a wide path of destruction in their wake.

Striking in a thickly populated rural area south of Fairmont, N. C., a high-riding twister killed at least one person, left an estimated 300 homeless and caused severe damage to tobacco crops.

The death toll from a tornado which leveled the communities of Bright Water and Garfield in northwest Arkansas was placed at nine. The business section of Bright Water, population 100, was virtually destroyed.

Most destructive of the twisters was one which tore through small towns in Missouri and Iowa, causing 13 casualties in the small town of Worth, Mo. More than 50 others were injured and property damage was estimated in the thousands of dollars. The same tornado lashed on across into Iowa, striking at Clio, where extensive property damage resulted but no loss of life was reported.

Narrowly averting the heavily populated city of Dallas, Tex., a tornado smashed briefly to earth on the city's eastern outskirts, then bounced skyward and disappeared. In its wake, two persons were dead and four were injured. Two other Texas twisters caused less damage.

MINES:

Another Tragedy

Disaster struck again in the ever-dangerous coal mines, an underground explosion in the Small Spring Hill mine near Terre Haute, Ind., snuffing out the lives of eight miners. Three others survived the blast.

The 11 miners were repairing and improving the ventilating system of the mine to prepare it for federal inspection. Closed since the general safety shutdown of April 1, the mine had failed to pass the first federal inspection.

The disaster was the fourth serious mine accident of the year. Major catastrophe was the Centralia, Ill., explosion of March 25, which took a toll of 111 lives. Ten miners were killed April 10 in a gas explosion at Exeter, Pa., and 15 lost their lives January 15 at Plymouth, Pa.

WRECKS:

Third for Pennsy

In the eerie pre-dawn hours, the third wreck on the Pennsylvania railroad's middle Pennsylvania division in three months killed four persons and injured 34, eight seriously.

The American, New York to St. Louis flyer, jolted into rods of sheet steel protruding from the sides of two gondola cars of a moving freight train, the impact ripping a tremendous hole in the side of the fourth car of the American and damaging the engine, mail car and another coach. No cars were derailed.

A moment later another freight train ripped into the sheet steel protruding from the other side of the freight, derailing its engine and tender.

The collision occurred at Boyer Ridge, near Huntingdon, not far from sites of the previous Red Arrow and Sunshine Special train wrecks, both of which also were in the pre-dawn hours.

PALESTINE:

Explosive Issue

The explosive Palestine question was marked by the usual wrangling and confusion in action before the steering committee of the United Nations general assembly.

The 14-nation steering committee rejected requests from the Arab countries for the assembly to debate at this session the question of canceling the British mandate over Palestine and freedom for the Holy Land.

Dr. Oswaldo Aranha of Brazil, assembly president, failed to effect a compromise before the crucial committee meeting.

Dr. Aranha

The Arabs denied that their proposal called for immediate independence for Palestine. They insisted they merely wanted a full discussion of the problem and recognition by the assembly of the principle of ultimate independence.

ALEMAN:

Cordial Welcome

First Mexican chief executive ever to make a state visit to Washington, Pres. Miguel Aleman was given a cordial reception on his trip to the nation's capital.

As the personal guest of President Truman, the visiting dignitary participated in a full schedule of events arranged in his honor by the state, war and navy departments and Mexican embassy officials.

In speeches before the Pan-American union and congress, President Aleman urged Western Hemisphere republics to assure "the independence of each nation through the solidarity of all."

The Mexican chief executive utilized the visit to begin preliminary discussions on an American loan.

Just Like the Movies

Just like in the movies, Film Actor Errol Flynn was the hero of a real-life rescue of Tom D'Andrea, another actor, who was thrown from his horse. The actors were galloping in the Battle of Gettysburg with the Union payroll when D'Andrea's horse stumbled in a gopher hole and threw him. Flynn grabbed him from under the flying hooves. To provide a typical movie ending, neither was injured.

Screen husbands and wives must sleep in twin beds one foot apart in films shown for the British public, British censors ruled. That, they explain, "discourages cuddling." Because censors spotted a scene in "My Awful Wife" in which Franchot Tone and Lucille Ball snooze in twin beds pushed together, the scene must be re-shot. Cost, $30,000.

Underpass Dooms Old Trees

With some friends I sat looking through a window on Lafayette Square just as the leaves reached the point where they screened Andrew Jackson, sitting on a horse which somebody described as having two feet firmly planted (like a radical) in the air Soon the foliage will come down like a hood, covering the skeleton branches which now are still showing through the green.

Trees were on our minds for we had just walked down Connecticut avenue, which for several blocks is being deforested so that a tunnel can be drilled underneath Dupont Circle. Washington is famous for its trees but of late years the automobile has caused the destruction of many of the finest. Widening of streets sometimes necessitates removal of trees. Frequently ancient oaks, elms or ginkgos are cut down and replaced with saplings.

Underpasses to take care of the traffic have burrowed under two of our circles already and now "my" circle Dupont (I live only three blocks from it), is to experience a similar operation. It will never be the same. Of course, Dupont Circle is not quite the same as it was when I first saw it three decades ago when it was the center of the social and diplomatic section.

I was bemoaning this "official vandalism" which robs these spots of their charm, as we looked out over the five varieties of elms in the park before us. One of our group, a naturalist, identified the elms as American, English, Scotch, Dutch and Smoothleaf, not to mention the horsechestnuts, maples, beech, dogwood, a beautiful deodar, an ash, which he reminded us was the mystic tree of Yggdrasil, its crown in the heavens and its roots in the nether world.

How much better would we be, I insisted, with our surreys with the fringe on top instead of our automobiles and our trees instead of parking space?

A survey made by the highway director of the District of Columbia, H. C. Whitehurst, shows that 52,000 vehicles skirt the circle every day, not counting buses and trolley cars. It is estimated that in less than 10 years 68,000 cars a day will be nosing by. That is the reason for the underpass.

The two circles already operated upon were Thomas Circle, an eight-point intersection, and Scot Circle, six-points. Since then the accident rate has dropped 75 per cent, the commission reports.

It is going to cost $3,800,000 to operate on Dupont Circle—and the trees.

COSTS UP, INCOME DOWN

Farm Product Prices Decline

WASHINGTON. — Prices of farm products declined about 1 per cent during the month ended April 15 after reaching record levels in mid-March, according to the monthly summary compiled by the bureau of agricultural economics.

The index of prices received by farmers in mid-April was 276 per cent of the 1909-14 average compared with a mid-March index of 280 and with 107 for the 1935-39 average.

Prices paid by farmers for production materials and cost of living items, including interest and taxes, continued an upward trend which has been under way for many months.

The index for these prices in mid-April was 230 per cent of the 1909-14 average compared with 227 in mid-March and 128 for the 1935-39 average.

This advance in the index for prices paid pushed farm parity prices slightly higher. Parity prices are theoretical standards used by the government in determining levels at which it will support prices of farm products.

Increased prices paid by farmers occurred primarily in feed, clothing and building materials, although the bureau reported that "prices of nearly every group of products bought averaged somewhat higher than the final figures for March 15, based on quarterly reports from more than 16,000 merchants."

Leading the general decline in meat animal prices, hog prices received by farmers fell $2.10 a hundredweight in the month to an average of $24.30. Butterfat prices fell 5 cents to 69.5 cents a pound and milk prices were lower because of seasonal production increases. Wheat prices averaged 4 cents lower and rye was off 34 cents a bushel.

BE A BUDDY

Poppy Sale To Provide Funds For Children of Soldier Dead

WNU Features.

Like every American girl and boy, the children of our country's soldier dead are entitled to a normal home atmosphere and a happy childhood. To assure them of that American birthright, Veterans of Foreign Wars maintain the V. F. W. National home in Eaton Rapids, Mich., for widows and orphans of ex-servicemen.

From this home every spring a little girl, daughter of a deceased ex-serviceman, goes to Washington to present to the President the first Buddy Poppy This presentation is preliminary to opening of the general sale of Buddy Poppies, which is conducted annually by the V F W throughout the nation during the week preceding Memorial Day A national goal of 21 million poppies has been set for the 1947 sale

Made by Veterans.

Buddy Poppies, made by disabled ex-servicemen patients in government hospitals as a phase of their occupational therapy work, are distinguished by a green label copyrighted by V F W.

French poppies, made by women and children of areas devastated in World War I, were used by the V.F.W. when it inaugurated the Buddy Poppy sale in 1922. The present plan was developed in 1924 to extend the relief afforded by the poppies to men disabled and needy but still capable of making the flowers.

V.F.W. was the first veterans' organization to undertake the poppy sale on a nationwide scale.

Entire proceeds of the sale are used for welfare and relief activities among veterans and their dependents, including an allotment to the V.F.W National home

Houses 250 Children.

The site of the home, now covering 640 acres, was the gift of Corey J. Spencer and his wife, Mattie Ebb Spencer, in 1925 The home consists of about 22 family-size cottages, no two exactly alike in architecture and furnishings. There also is a $35,000 hospital constructed by the V.F.W. auxiliary in 1931.

BUDDIES AID THEM . . . Funds derived from the annual Buddy Poppy sale will aid children and widows of ex-servicemen at the V.F.W. National home in Eaton Rapids, Mich. Two of the children are shown here enjoying life in the nursery.

Approximately 250 children, sons and daughters of deceased or totally disabled war veterans, are living at the home They receive the benefits of an ideal home environment, food, clothing and education In return, the V F W hopes only that these children will grow up to become useful and patriotic citizens.

Children are divided into family groups, each group occupying a cottage supervised by a "house mother" who keeps strict watch over their welfare. Wherever possible, the "house mother" is actually the mother of one or more of the children.

Honor Navy Dead

Each year, as part of its poppy program and the Memorial Day observance the V F W places a giant wreath fashioned entirely of poppies at the Tomb of the Unknown Soldier in Washington and at the crypt of Woodrow Wilson, World War I president, in the National cathedral. Thousands of similar smaller poppy wreaths are placed at the graves of our hero dead throughout the country by V.F.W. posts.

Another highlight of the organization's program is the presentation of a huge anchor of poppies to the secretary of the navy. He, in turn, presents the wreath to the Peary Ship post of the V F.W., an all-navy unit, for appropriate services on Memorial Day. At that time the anchor is cast into the ocean as a tribute to the men of the navy and marine corps who have lost their lives at sea.

Cat Disgraces Himself And Police Chief Owner

BEAUMONT, TEX. — Of all the cats in town, the one belonging to Police Chief Artie Pollock had to disgrace himself (and the chief) by going to a local hotel and getting drunk Learning that scraps of food from the hotel provided his three square meals a day, the cat decided to inspect the place. His trip, however, was interrupted when some rascal gave him a bottle of beer.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

Frank Hartman, Denver real estate agent and a commercial pilot with 15 years of flying experience, combines his flying and selling skills to advantage He recently closed a large ranch sale in a single day after showing the property to a customer from the air. The ranch buyers said they learned more about the property from the air in a half hour than they could have learned during a week riding horseback . After criss-crossing the Pacific ocean for 26,074 miles on a survey flight to Singapore and the Royal Netherlands East Indies in a big DC-4 Skymaster plane, Mrs. Mamie B Nelson, 67, is convinced she is "just as batty about air travel as my son." Her son, with whom she made the flight, is Orvis Nelson, president of Transocean Air Lines and vice president in charge of international operations for Philippine Air Lines. . . . Fred Richolson, farmer near Davis Junction, Ill., finds it convenient to allow Roger Lace, local air enthusiast, to use part of his pasture for a landing field. The arrangement works out to their mutual advantage. Richolson finds, since Lace frequently makes trips to nearby cities for badly-needed farm equipment. . . Cranberry bogs in Massachusetts are being dusted and sprayed with a helicopter, purchased by National Cranberry association for use of its members. Airplane dusting, used for the first time last year, is being continued on larger bogs but the helicopter supplements its work on small and inaccessible bogs.

* * *

"There were no complaints received or arrests made for intoxicated flying in Pennsylvania during 1946." That evidence of the lack of tipsy fliers is taken from the Pennsylvania Aeronautics commission's annual report on aeronautical violations.

* * *

AVERAGE PILOT

The average airline pilot and co-pilot in the United States is 32 years old and has been piloting planes 4,859 hours. This is a part of the picture of the average airline pilot as produced by a Civil Aeronautics administration study looking toward possible reduction of the human element in air accidents.

The program for redetermination of physical standards for airmen will take into consideration the physiological effects of extended occupation as an airline pilot and the possibilities of increasing air safety through use of pilot selection methods other than those of proficiency determination.

The average pilot and co-pilot weighs 165 pounds and is 5 feet, 10 inches tall. There were fewer than three chances in 100 that he wore glasses, only 2.7 per cent requiring a lens correction.

The group average for solo flying, 4,859 hours, included flying of all kinds and in aircraft of any description. During 1946 this group averaged 63 hours a month, 37 during daylight hours and 26 at night. CAA allows an airline pilot to fly 1,000 hours a year, an average of about 83 hours a month.

* * *

'AIRMAILER' . . . This is the "Airmailer," a new helicopter model designed and produced by Bell Aircraft corporation specifically for service on new helicopter airmail routes to be proposed by the post office department.

* * *

OWNER DIRECTORY

An official directory of registered aircraft owners in each of the 48 states has been completed by Air Review Publishing corporation of Dallas, Tex., under contractor to Civil Aeronautics administration. For the first time, an alphabetical listing of each owner by states is provided, supplanting the government's former method of listing aircraft by license number. The directory also includes the owner's address, and complete information about his plane.

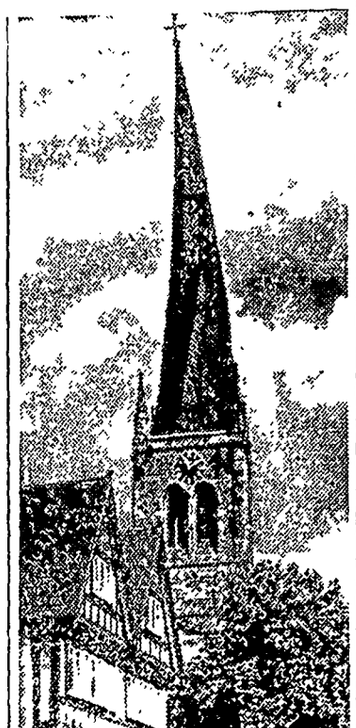
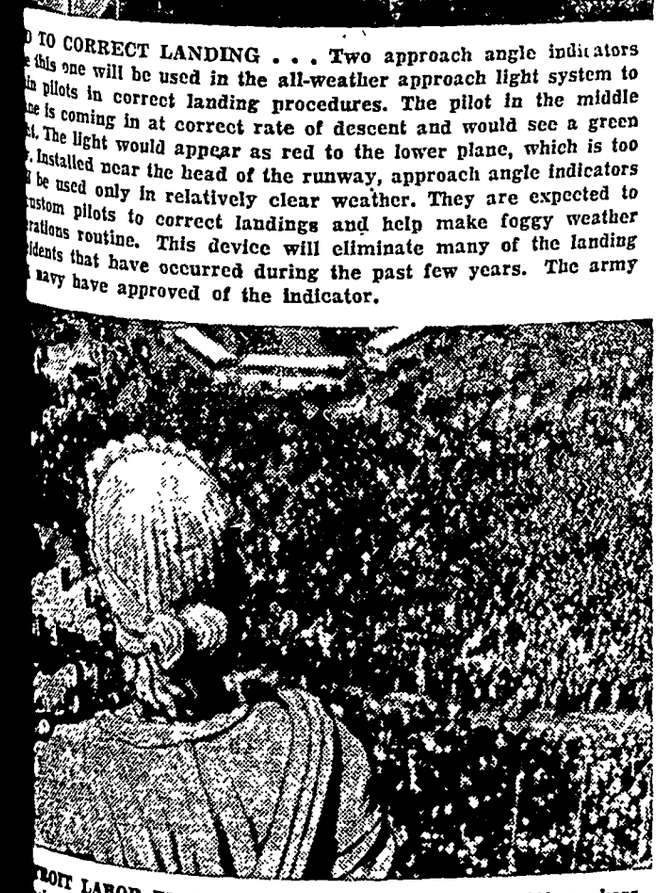
THE WORLD OF TOMORROW . . . Futuristic designer of transportation, Arthur Radebaugh of Detroit's New Center studios has his own idea of what transportation will become in the years to come. His ideas are shown in drawings depicting air, water and land transportation of the future. Radebaugh has worked for air lines, automobile companies and railroads—is admitted to be ahead of 1948 models in all three fields.

PATSY GOES TO COLLEGE . . . When Patsy, 10 months old, first entered the home management house of University of New Mexico, she was retarded mentally, suffered from a skin rash and was in such a complicated emotional state that medical science seemed stumped. Within two months, under the care of students in domestic science, she was ready to "graduate" with honors. The girls majoring in home economics bathe, feed and rock Patsy to sleep.

TO CORRECT LANDING . . . Two approach angle indicators like this one will be used in the all-weather approach light system to aid pilots in correct landing procedures. The pilot in the middle plane is coming in at correct rate of descent and would see a green light. The light would appear as red to the lower plane, which is too low. Installed near the head of the runway, approach angle indicators will be used only in relatively clear weather. They are expected to help custom pilots to correct landings and help make foggy weather operations routine. This device will eliminate many of the landing accidents that have occurred during the past few years. The army and navy have approved of the indicator.

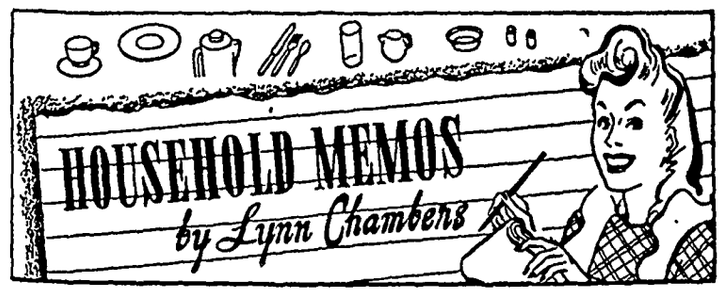


CROOKED SPIRE . . . The famous crooked spire of the parish church, Chesterfield, England. The spire is twisted owing to the warping of the timbers beneath a leaden covering. It is 230 feet high, 8 feet out of perpendicular.

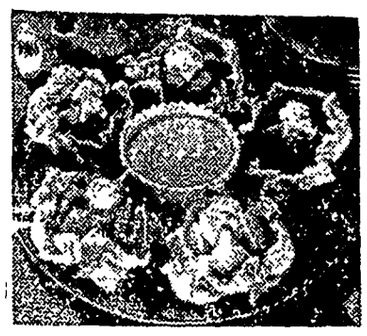


DETROIT LABOR PROTESTS . . . An estimated 100,000 workers marched to Cadillac square in Detroit to attend a five hour protest meeting against labor bills in congress. Several major Detroit automobile factories were forced to suspend operation for the day as thousands of workers jammed the city hall area in protest. This demonstration was typical of many others held in various parts of the country against representatives in congress who favored anti-labor bills.

REPORTING . . . George C. Marshall, secretary of state, as he reported to the nation from Washington on the "Big Four" conference. Marshall laid blame for the failure of the conference at Russia's door, but said Marshal Stalin had hopes.



Keep in Season By Adapting Menus To Cool Foods



Eggs and tomatoes make a pretty salad platter for evening suppers that must meet the hot weather problem. Both may be prepared in the cool hours of the morning.

No homemaker has to wait for the family's appetite to lag before she starts changing the menus to suit their needs. In fact, the process is less painful if she realizes that with the first of the warm weather, the family is apt to feel languid and lazy, and not much inclined to eat. Change immediately and you won't have a lot of leftovers.

One of the smartest things any woman can do is to be generous with salads in the menu. No, I don't mean the usual variety, but something entirely different from what you've been having the past few months. Use new, fresh greens, try exciting and refreshing fruit and vegetables combinations and see how quickly the family takes to them.

If necessary, make salads the main dish of the meals whenever possible, but when doing so, have them hearty enough to furnish the required number of calories to carry on daily activities. This is easy to do with cold meats, cheese and eggs.

A nice salad to serve because it's so refreshing is this one which has a generous amount of cottage cheese to furnish valuable proteins for tissue and body building. The citrus fruit makes it doubly refreshing on sweltering days:

Fruit Salad Bowl.
(Serves 6)

½ can cranberry sauce, jellied
1 pint cottage cheese
1 small green pepper
1 grated carrot
1 teaspoon salt
½ teaspoon celery seed
2 grapefruit, sectioned
3 oranges, sectioned
1 head of lettuce
Mayonnaise

Cut slices of cranberry sauces into cubes. Combine cottage cheese, green pepper slices, grated carrot, salt and celery seed. Fold in cubes of jellied cranberry sauce, saving a few cubes for garnish.

Arrange lettuce leaves in salad bowl. Pile cottage cheese mixture into center of bowl and surround with alternate pieces of grapefruit and orange. Serve with mayonnaise.

A salad that is a riot of red, white and yellow colors nestling in the green of lettuce leaves combines tomatoes with eggs. It can be served as the main dish at luncheon or Sunday night supper.

***Stuffed Tomato-Egg Salad.**
(Serves 4)

4 firm, well-shaped tomatoes
Salad greens
4 hard-cooked eggs
½ cup diced celery
2 tablespoons salad dressing
½ teaspoon Worcestershire sauce
1 tablespoon or more lemon juice
Salt and pepper
Frizzled dried beef or crisp, sliced bacon

Remove skins and core from well-chilled tomatoes. Cut in 5 or six sections and press open gently to make a flower. Sprinkle inside with salt and pepper. Place on salad greens. Meanwhile chop eggs, not too fine. Add celery, salad dressing, Worcestershire sauce and lemon juice. Season well to taste. Spoon into center of tomato. Top with additional dressing, then with dried beef.

Variation: Instead of egg filling, stuff egg, cut in half crosswise and place in tomato flower. Garnish with dried beef and salad dressing.

Caramel Layer Cake
*Recipe given.

If you are short of refrigerator space and still like molded salads, use a cornstarch for thickening, and you will have just exactly the salad you want.

Tomato Salad.
(Serves 6)

4 tablespoons cream corn starch
¾ teaspoon salt
2 tablespoons vinegar
2 cups tomato juice

Combine cream cornstarch, salt and vinegar. Gradually add tomato juice. Heat to boiling point and boil 1 minute, stirring constantly. Pour into individual molds which have been rinsed in cold water. Serve on lettuce and top with dressing made by folding in cold, freshly cooked peas into cold mayonnaise or salad dressing.

Variations: Add sliced stuffed olives, grated onion, diced turkey or chicken, drained peas or shrimp, as desired. Cocktail juice may replace tomato juice.

There's nothing fancy about this next salad recipe, as the name implies, but it's truly delicious. Serve it with cold, thinly sliced ham cake and beverage and you have a good, nourishing hot weather menu:

Farmer's Chop Suey.
(Serves 6)

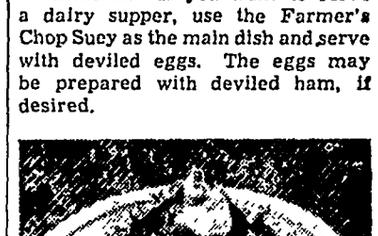
1 onion, chopped
1 cup diced cucumbers
1 cup sliced radishes
4 fresh tomatoes, cut in wedges
1 cup chopped green pepper
1 cup shredded cabbage
1 teaspoon salt
¼ teaspoon pepper

Prepare vegetables as directed above and sprinkle with salt and pepper. Prepare dressing as follows:

Sour Cream Dressing.
2 tablespoons vinegar
1 teaspoon salt
2 teaspoons sugar
1 teaspoon dry mustard
1 cup thick sour cream
1 cup cottage cheese

Add vinegar and seasonings to sour cream which has been mixed with the cottage cheese. Pour over greens and vegetables and stir or toss with fork. Sprinkle top with paprika.

Variation: If you want to serve a dairy supper, use the Farmer's Chop Suey as the main dish and serve with deviled eggs. The eggs may be prepared with deviled ham, if desired.



A tomato salad that will hold its shape even if not refrigerated at the last minute is this one made with cream corn starch. Tomato or cocktail juice may be used in the base.

Calavo-Grapefruit Salad.
(Serves 4)

2 large calavos
1 grapefruit
Small head lettuce

A favorite springtime salad for any occasion is a calavo half shell filled with tart citrus fruit. Cut the calavo into halves lengthwise and remove seed. Scoop out some of the flesh but leave enough to hold the shell intact. Cut the portion removed into dice and combine with diced grapefruit. Arrange the calavo shells on crisp lettuce and fill with the calavo-grapefruit mixture. Sprinkle with finely chopped fresh mint. Serve with a lemon-honey dressing.

Released by Western Newspaper Union.

LYNN SAYS:

Vary Your Salads With Dressings

Either fruit or vegetable salad tastes better if cottage cheese is beaten until light and fluffy and then folded into mayonnaise or French dressing.

Sour cream makes mayonnaise and cooked dressing fluffy as well as giving it pep. Add lemon juice or vinegar if more spiciness is desired.

For a different type of dressing that is crisp as well as delicious, mix ¼ cup of finely diced cucumber, tablespoon chopped green pepper, 1 teaspoon vinegar and ¼ teaspoon salt with ½ cup mayonnaise.

Crisp pieces of bacon added to French or oil dressings add appetite appeal to simple potato or vegetable salads.

Mayonnaise may be blended with sour cream or cream cheese and flavored with fruit juice for fruits and berries.

HOUSEHOLD HINTS

You may give an inexpensive paint brush the beveled edge of a more costly one. Dip the brush into glue and let it harden. Then lay it on a flat surface and shape with a sheet of sandpaper. When the beveling has been completed, wash out the glue.

For substantial buttonholes, first make a row or two of machine stitching around the spot where the buttonhole is to be.

To make picture nails hold in plaster: Bore a hole with a gimlet, then fill with plastic wood. Insert nail and let dry before hanging the frame.

To keep a gilt picture or mirror frame from drying or cracking pat a little lemon oil on gently once or twice a year. Do not rub.

Keep old pieces of fine, soft wool. They make excellent dusting cloths.

If the paint job is to be interrupted for several days, or if a new shade of paint is required, the brush should be thoroughly cleaned in a solution made for that purpose or in turpentine.

Leaves steal the nutrition from carrots once they are pulled from the ground. Clip leaves when carrots are pulled out of the ground.

STORY-FOR-THE-WEEK

This is one time when if homemakers of Hancock County make a "run" on the grocery to obtain sugar they will be helping the grocers and the country as a whole, according to Paul Henderson, County Extension Director

The U S. Department of Agriculture is urging homemakers to promptly cash their validated sugar stamps in order that the country can meet a serious transportation problem this summer and prevent sugar shortages later in the season. This means, Henderson says, that Sugar Stamp 11 should be used up immediately, and Sugar Stamp 12 as soon as possible after it becomes valid on June 1. This early buying will help the family make sure of its sugar allowance for this summer. Chances are that, if sugar buying is put off, the grocers will not have enough supplies in stock.

The reason that a "run" on sugar is urged is because box cars be used now to transport sugar across country. Within a few weeks these box cars will have to be diverted to take care of the trmendous wheat crop. There just won't be enough box cars to take care of the heavy movement of wheat and sugar at the same time. Winter wheat, it is pointed out, moves during the same weeks that sugar. demand s heaviest for home and commercial canning. Hence, if sugar moves off the grocery shelves now, grocers will have time to restock while sugar can still be moved across country.

HELLO, FOLKS!

Mr. and Mrs. Robert Janke, Klemme, are the parents of a baby daughter, Sandra Kay, born Saturday, May 3rd.

Phone your news to 12.

TO BE BRIDE IN AUGUST

MISS CORRINE MERKEL

Biggest Fish Caught Opening Day At Clear Lake

According to the Clear Lake Mirror, the largest fish caught in Clear Lake on the opening day, May 15th was a 12 lb 1 oz northern pike taken by Don Evaland, Mason City Gerald Ferris, Algona caught a 7 lb 4 oz walleye pike on the opening day and Wayne Wolford, Ventura regestered the largest crappie, 1 lb. 6 oz On Sunday, May 17th Marvin Mulhern, Mason City caught an 8 lb 6 oz. walleye pike, which is a big fish in anybody's lake

MOST OF HANCOCK COUNTY CORN HAS BEEN PLANTED

Many Fields Now Up, Some Corn Being Cultivated

Perhaps around 95 per cent of the corn in Hancock County was planted by Saturday night. The writer drove to Clarion Saturday evening and saw several fields where the corn was up We noticed that one field had been cultivated that afternoon. This was Elmer Anderson's field south of town. Many fields of corn will get under cultivation this week.

Soybean planting is slow, with but a few fields planted at this writing. A few farmers still have to plow before putting in soy beans. June 1st should see a good percentage of that crop planted.

Small grains and pastures have done well the past week with cool weather and plenty or rain.

KLEMME STORES TO OPEN ON WEDNESDAY NIGHTS

Beginning the first Wednesday in June, which is on June 4th, the Klemme stores will be open two nights a week, on Wednesday and Saturday, throughout the summer months.

The stores will continue to be open on Wednesday nights during June, July and August and will again close on Wednesday nights from Sept. 3 and on. The stores are open every Saturday night throughout the year.

Plan to do your trading in Klemme on the two open nights of the week thereafter, Wednesday and Saturday.

REPUTATION STILL INTACT—WHEN a 1914 Ford model pulled into Hughes Brothers filling station on W 2nd street Clear Lake, "Bud" thought he was seeing things and he was right It was a really and truly a Ford convertable which had ambled up from Klemme to mingle with the later model convertibles which were out giving their owners a sun bath at the famous summer resort While "Bud" serviced the "grandfather" model the occupants of the equipage basked in luxurious ease They are, left to right, Dean Jacobs, Francis Sherwood, driver, Clarence Larson and Eddie Barz, all of Klemme Eddie Grosshouesch, also part owner of the jalopy is also in the picture but cannot be seen as he is fixing a flat on the opposite side It is reliably reported that the Ford not only brought the boys to Clear Lake, but took them home again, keeping up the Ford reputation for reliability

(Courtesy Globe-Gazette)

LARGE CROWD ATTENDED COMMENCEMENT EXERCISES HERE THURSDAY EVENING

School Auditorium Packed For Annual Graduation Event

The Klemme school auditorium was packed with people who came to attend the annual graduation exercises here Thursday evening.

W. Henry Galbreth, a former superintendent of the Klemme schools, now of Des Moines, gave the address His address was one of the outstanding commencement addresses given here and his advise to the graduating class was packed full of good, common sense He spoke in a manner that was understood by everyone and the audience, as well as the Seniors appreciated his fine talk.

Supt. A. L. Kingery presented the Eighth Grade graduates and presented them with their certificates. Harvey Barz, president of the board, talked briefly to the graduates and handed them their diplomas. Principal Wm Rector presented Ivan Blumer, Salutatorian and Marcille Josten, Valadictorian of the graduating class. Coach Wesley Patterson presented letters and stripes to those who participated in athletics the past year.

TROLLING WITH MOTOR IS ILLEGAL IN IOWA

Widespread confusion exists among Iowa fisherman as to whether trolling with motor is legal on Iowa's inland waters. Commission officials state that trolling with a motor boat is definitely illegal in this state

G L. Ziemer, Director of the Conservation Commission, states that, "Probably the confusion arises from the fact that a bill was introduced to allow trolling on Spirit, West Okoboji, Clear, and Storm lakes but failed to become law."

Therefore, the law reading, "It shall be unlawful to fish by trolling from any machine propelled or sail boat on any of the inland waters of the state or on any boundry waters except the Mississippi and Missouri rivers," is still in effect.

ELL, LIBERTY VOTE FOR FIRE EQUIPMENT

A very light vote turned out Tuesday for the special election in Ell and Liberty townships to vote on the proposition of leving a tax to buy fire fighting equipment.

However, the proposition carried in both townships by the required sixty per cent. The money thus raised will be used to house fire fighting equipment in Klemme and Garner.

Agronomy Field Day will be held at Ames June 18.

Mr. And Mrs. Benn Coobs Honored On 25th Anniversary

MAY BRIDE

Mrs. Walter Gast

Phyllis Kirkwood Bride Of Walter Gast Of Ventura

The marriage of Phyllis Jean Kirkwood, daughter of Mr. and Mrs. Henry Jost of Klemme, to Walter Edwin Gast, son of Mrs. Hazel Gast of Ventura, took place at the Evangelical and Reformed Church Sunday afternoon at 3 00 p m, May 25th With the Rev. Calvin Grosshuesch reading the single ring ceremony.

The bride, who was given away in marriage by her father, H E. Jost, wore a white satin gown and a white lace cornet with pink sweetpeas, and carried a nosegay of white and pink carnations, fern and lilies of the valley She was attended by Miss Helen Suckow, a friend of the bride, who wore a blue gown and a corsage of pink and white carnations and sweetpeas

The groom was attended by Mitchel Schuenman of Garner Both wore white carnation boutonniers

The wedding march was played by Miss LaNelle Harvey, who was attired in a blue gown and wore a corsage of pink and white carnations and sweetpeas. Miss Jean Kurtz also wore a gown of powder blue and a corsage of pink and white carnations and sweetpeas. Jean sang "Always" and "I Love You Truly." She was accompanied on the piano by Miss LaNelle Harvey.

Miss Irene Menage who had charge of the guest book, wore a pink gown and a corsage of pink and white carnations and sweetpeas.

The bride's mother was attired in a white suit with white accessories to match. She wore a corsage of pink and white carnations and sweetpeas She was ushered to her seat by her nephew, Darrol Bielefeld The groom's mother wore an aqua colored dress with a floral design, with black accessories.

Following the ceremony a reception was held at the home of the bride's parents. The table was decorarated with two vases of violets. A two tier wedding cake, in pink and white with a miniture bride and groom on the top served as a center piece The reception was attended by sixty relatives and close friends. Mrs Winifred Merkel, Miss Lydia Bock and Mrs. C. A. Bielefeld assisted in the serving.

The wedding cake was cut by the bride and the groom with a knife that was sent to her by her brother, H. R. Jost, from India.

Out of town guests were Mr. and Mrs. Vern Schluter, Mr. and Mrs . Virgil Schluter and Miss Eva Schluter all of Meservey; Mr. Leo Holland, Mrs. Helen Masterson and Mrs. Clyde Wooton of Des Moines; Mr. and Mrs. Adrian Bielefeld and children of Dougherty; Mrs. Jim Hilderbrant, Mr. and Mrs. Bob Hubbard and daughter Barbara of Mason City; Mr. and Mrs. Vernon Gast and son Gary of Ventura; Miss Corrine Merkel of Gowrie and Dean Merkel of Forest City.

A reception and dance will be held in the Klemme community hall on Thursday evening, May 29th in honor of the couple.

HAD DINNER AT METHODIST CHURCH SUNDAY

Relatives And Friends Planned Surprise On Klemme Couple

A number of relatives and friends of Mr. and Mrs. Benn J Coobs surprised them on their 25th wedding anniversary Sunday by having a two-course dinner and program in their honor.

The table was decorated with flowers, silver candles, silver nut cups and a 4-tier wedding cake, baked and decorated by Mrs. D P Anderson served as the centerpiece.

Art Wellemeyer acted as master of ceremonies and also gave the history of the bride and groom Rev. Harry Buss sang several solos and Harriet Buss sang a solo. Rev. H. E. Harvey read two poems and a pantomine presented by several girls directed by Miss Marie Blank was one of the highlights. The program closed by singing "Blest Be The Tide That Binds."

Out of town relatives and friends who attended were Mr. and Mrs. Henry Coobs of McGregor; Mr. and Mrs. Wm. Coobs and children of Monona; Melvin Coobs of Ames; Rev. and Mrs. Harry Buss, Harriet and Beverly of Gladbrook; Mr. and Mrs. Paul Grange of Mason City; Mr. and Mrs. Ben Riemer and Mrs. Fred Gates of Garner; Mr. and Mrs Ben Ridder and Elwyn of Liberty; Mr. and Mrs. Wayne Pavey and Carol of Webster City, and Mrs. Frank Woodhouse of Plymouth.

Were Married In Mason City

Miss Leafy, daughter of Mr. and Mrs. G. A. Wilson, and Benn J. Coobs, son of Mr. and Mrs. H. J. Coobs, were married at the Methodist parsonage at Mason City on Monday, May 29th at 3:00 p. m.

Mr. Harry Buss and Miss Lurley Wilson attended the couple as best man and bride's maid.

They began housekeeping in a home on east Main street. Some years later they built the home where they now reside. They have lived in Klemme since their marriage.

Mr. Coobs is a veteran of World War I and saw extensive overseas service for 8 months with Co. E., 129th Infantry of the 33rd Division.

After the war he attended college at Ames, taking a mechanical course and coming to Klemme worked at the Gram & Schultz Garage, later purchasing Mr. Schultz's interest, and later sold out. For a number of years now he has been employed by the Northern Lumber Company of Klemme.

Their son, Melvin, is a veteran of World War II and saw a lot of action in the Pacific theatre of war. He is now taking an engineering course at Iowa Iowa State College and was home for the wedding anniversary. Their daughter, Peggy Lou, graduated from high school Thursday evening. She will follow a business career and will enter business college in Des Moines.

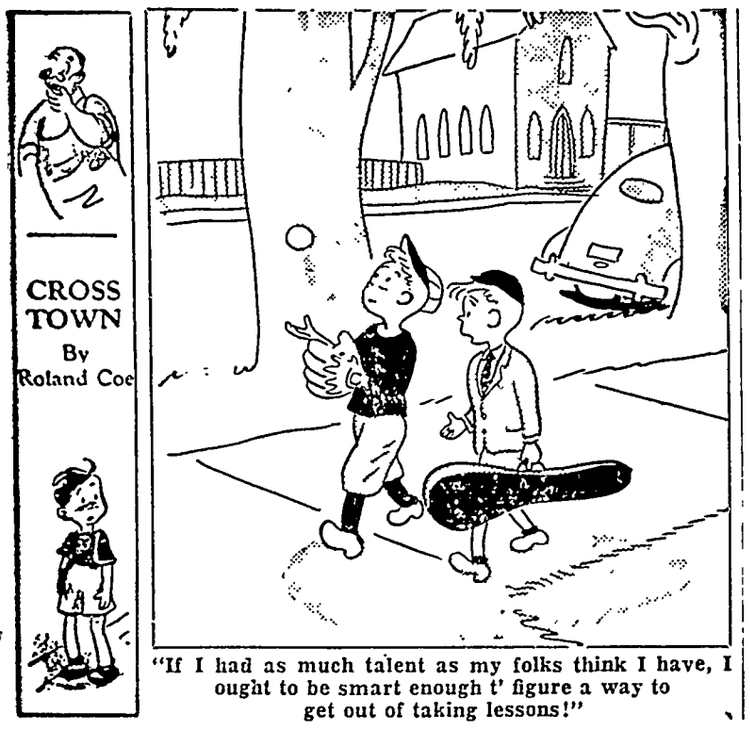
Mr and Mrs. Benn Coobs are members of the Klemme Methodist Church and both have been active in the American Legion and the Auxiliary Unit.

KLEMME STORES WILL BE CLOSED MEMORIAL DAY

Klemme business places will not be open on Friday of this week, but will remain closed all day for Memorial. Plan to do your shopping in Klemme on Thursday this week.

CROSS TOWN

By Roland Coe



"If I had as much talent as my folks think I have, I ought to be smart enough t' figure a way to get out of taking lessons!"

BOBBY SOX

By Marty Links

"Do you believe in love at first sight?"

Perfecto Punko

The gentleman behind the desk received the stranger with a smile, bade him to be seated, and said, "Have a cigar?"

"Don't mind if I do," said the visitor. And then sensing something unusual in the atmosphere, he added, "Is this a special occasion?"

"I'll say it is," was the reply. "I've got an addition to the family."

"Really?" said the stranger. "Congratulations!"

He put a match to the cigar, puffed on it a few times, and then observed, "About the fifth child, I presume."

NO GORILLA

He was the frail Frank Sinatra type. She was sweet and receptive but still realistic.

"When I crush you in my arms like this," he whispered, "what are you thinking of?"

Without hesitation she replied: "The manpower shortage."

Not Hereditary

The youthful mountaineer had just been brought into court and sentenced for breach of the peace. Testimony showed that he had done some feuding, featured by the adept handling of a knife

After the trial, his grizzled old father stood with a group of cronies on the courthouse lawn.

"I swear," he said, "I don't know whar that boy gets all his meanness. Now, you take me—I never stuck a knife deep in nobody."

Those Canny Scotch

A Scotchman, leaving his friend's house where he had been visiting, held out to his host's small son a nickel and a dime, saying, "Now, Sandy, which one will ye hae?"

Young Sandy (being a cute, wee beggar) said, "Ach, Mr. Mac Tavish, I was always taught not to be greedy, so I'll have the wee one."

Mac Tavish replied: "Well, noo, Sandy, for being a guid bairn, and no' greedy, I'll gie the big one to ye."

Not What He Thought

Cries for help attracted a passerby's attention. He came upon a big man beating up a small individual.

"Leave him alone," the samaritan shouted and threw himself on top of the big man, and knocked him flat with an uppercut.

"Thanks," said the little guy after he pulled himself together. "Now let's you and I share this $50 I took off of him."

A Lot of Hooey

A woman traveling by train was talking with a man in the next seat. In describing her holiday, she said that she had visited San Jose.

"You pronounce that wrong," said the man. "It's San Hosay. In California you pronounce all the Js as Hs. When were you there?"

The woman thought for a moment, then answered, "In Hune and Huly."

PRIVATE DRAMA

Annoyed movie-goer (to man in next row)—Excuse me, but we can't hear a word.

Man—And is it any business of yours what I'm telling my wife?

Hard to Follow

A worried patient visited a psychiatrist about his troubles.

"You'll have to forget your imaginary illnesses," advised the doctor, "and lose yourself completely in your work."

"I don't know," the worried patient interrupted, "I'm a deep sea diver!"

Jesting With Justice

Judge (in traffic court)—I'll let you off with a fine this time, but another day I'll send you to jail.

Driver—Sort of a weather forecaster, eh, Judge?

Judge—What do you mean?

Driver — Fine today — cooler tomorrow.

Always Reaching

Moe: "What does the average woman want from life?" asks a reader.

Joe: "Just a little more than the average man has got."

Quite Similar

Visiting American — The unions here in England are very much like ours at home.

Englishman — Yes, the resemblance is striking.

That Proves It

Tourist—Is this spring sanitary?

Native — Must be. Everybody drinks from it.

You, Too, Can Do the Latest Dance Steps Through Simple Directions and Diagram

New Steps are Easy

THERE'S nothing mysterious or difficult about the new dances. They all break down to a few basic patterns which anyone can learn at home by following simple diagrams.

You can learn to dance by following the directions and footprint diagrams in our booklet No. 37 Send 25 cents (coin) for "How to Do the Latest Dance Steps" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y Print name, address, booklet title and No. 37.

Coach for Holy Ghost

An ancient custom of Spain, which existed until a generation ago, was the inclusion of a particular coach in every royal procession. Called the Coche de Respeto it followed that of the king and was empty, having been reserved for the Holy Ghost.

First Balloonists

A human being was not the first to go up in a balloon. On September 19, 1783, when King Louis XVI of France watched a rooster, duck and a sheep go up in a hot-air balloon invented by the Montgolfier brothers, he was so impressed that he offered to provide a criminal as the first human passenger.

However, de Rozier, the king's historian, insisted that the trip was an honor to which only an honest man was entitled, and asked for the privilege himself.

on Your Car, Truck or Tractor

find our—

"How's Your Oil Filter?"

If you hate to throw money away—here's a *SURE* way to save it! Whether your car is old or new—whether you own one car, or a number of tractors and trucks as well—you should *check the oil filter regularly!* It's easy—just drive in at your Fram dealer and ask for a *free* Dipstick Test.

Then, if oil shows dirty, have him install a Genuine Fram Replacement Cartridge to get the most out of your present filter, remove grit, carbon and sludge, keep oil physically, visually clean and prevent unnecessary motor wear!* (Remember, there's a Fram cartridge made to fit almost every type of filter.)

Or, if your car, truck or tractor is not already filter-equipped, have your Fram dealer install a complete Fram oil filter. Takes just a few minutes—the cost is small—and the savings in longer, trouble-free engine life are big! So play safe . . . see your Fram dealer today! Fram Corporation, Providence 16, R. I.

*Certain heavy-duty oils, due to the detergent additive used, turn dark in color almost as soon as put into the motor. Where such oils are used, cartridges should be changed on the advice of your service station or dealer.

FRAM Oil & Motor Cleaner

Cleans the Oil that Cleans the Motor

THE FICTION CORNER

A Home, For Nellie

By THYRA S. WINSLOW

This Week's Best Fiction

It WAS Easter Sunday in New York. And the sun was shining. Laura Burton and Frank Harding had been to church and now they were part of the sleek crowd on Fifth avenue.

Laura held Frank's arm. To look at her you'd feel sure that she was happy. She was pretty and young and so well turned out. Successful young business girl, you'd probably have guessed. Or maybe even a young bride! And that, (indeed, was a catch. Laura WAS a successful young business girl. But she wasn't a young bride! And yet right by her side was Frank Harding. And it was Frank with whom she was in love!

He could have been as far away as the North Pole, Laura felt. As far as matrimony, that is. He was nice to her. He took her to the theater, occasionally. He took her to the movies once in a while. He took her to dinner. But he was careful not to take Laura too often!

Laura had tried all of her tricks, long ago And all of the tricks she'd read about. But none of them worked.

Well, he was here with her now. That was something.

It was fun, being here with Frank, being jostled by the well-dressed crowd. It was fun—but it wasn't enough It would end too soon—and there'd be nothing else. Why Frank might not even telephone to her again for days and days! And there'd be just office routine. And a few dull dates that were only a little better than staying home. And actually staying home and pretending that reading the newest magazines and listening to the radio was enough Funny, when Frank was with her reading or listening to the radio was quite enough. If Frank were with her—but that was the whole trouble!

"I didn't have a chance to get you a flower," Frank said, as they strolled. "Let's get one, now."

They walked over to Madison avenue, found a flower shop and were going to turn in for a corsage, when—

"Look'" said Lura.

And there in with the flowers, on the moss carpet, were a whole flock of very young, very yellow baby chicks

"They're darling!'" said Laura.

"Rather have one than a flower?"

"Of course I would!'"

But baby chicks were so inexpensive that Laura had one and flowers, too.

They took the little chicken to Laura's immaculately modern apartment. It walked on the beige carpet and scratched a bit. And for no reason they named it "Nellie." They fed it some of the prepared food they'd bought. And decided that having a little chicken for a pet was great fun.

It was great fun! For Laura, anyhow She put the chick in her snowy kitchenette before she went to the office in the morning—and left a note for Carrie, who came in, afternoons, to be careful of Nellie. At ten o'clock Frank telephoned her

"How's Nellie?" he asked.

"She was fine, when I left this morning. When are you coming in to see her?"

"I thought tonight would be as good a time as any No use letting her forget her foster father. What about a bit of dinner tonight. At Louse's, maybe?'"

It was wonderful! Frank had never telephoned so soon after seeing her—had never made a date so promptly Nellie? What of it. She'd be with him.

Frank got there at half past six. They spent nearly an hour sitting on the floor and playing with Nellie. They went to a movie after dinner

"They knelt on the floor playing with the little chicken. It was so cute and small and yellow!"

—and then Frank came in to see Nellie again!

She was a cute little chicken No doubt of that. So small and yellow! And she gave gentle little "cheeps" —and even stopped those when you snuggled her in your hand.

And the next day Frank called again!

And then there were other dinners. A whole flock of them. And Laura was happier than she had ever been in her life! It couldn't be all Nellie's attraction!

Nellie grew tall. She lost her baby prettiness, and her legs grew long and tiny feathers replaced her soft yellow fuzz. And as she grew taller she grew more friendly Neither Laura nor Frank would have believed it possible. Nellie followed them the way a puppy might do.

It was grand having Nellie as a pet and Frank coming in so frequently.

AND then Nellie became ill! Not very ill, of course — but she seemed to mope and her eyelids drooped.

Laura and Frank took Nellie in a taxicab to a veterinarian. The vet didn't know too much about chickens But he prescribed a change of food. "That chicken has got to have sunshine," he said "Sunshine—and a place to scratch in the earth"

And Laura lived in a small apartment. And Frank in an apartment hotel!

There had to be a home for Nellie! That was certain.

Without realizing that they might be open to ridicule, they began hunting for a house in the country. Luckily Laura's lease was up on the first of the month.

They finally found just the house they were looking for White, with green shutters And a beautiful garden—it needed fixing, of course, but Laura liked to work in a garden.

"I'm great in a garden," said Frank, unexpectedly. "I used to work in our garden at home. Things always grew for me."

Laura hadn't known that Frank had ever been in a garden! Laura signed the lease for the house. In a way she felt that she was burning an awful lot of bridges. All of her friends lived in town.

Laura and Frank went out to the new house every minute they had to spare Frank painted. He made book shelves. He repaired the flagstone walk. He was wonderful!

The movers were ordered.

On Saturday Frank came by to take Laura to a party. Then they were going to have a last dinner in Laura's apartment.

The party was fun. But Laura was a little sad. There still could be parties, even if she lived in the country but, somehow, she'd be so far away from everyone As long as she saw Frank, that didn't matter—but if something should happen —if Frank didn't come to see her—

Frank opened the apartment house door with Laura's key, which she handed to him Carrie had been listening for them, evidently, for she was at the door the minute it opened

"My goodness!" she said, "I don't know how to tell you! But—but you got to know it Nellie is dead! Yes'm, she just fell over!"

Nellie was dead! And, suddenly, Laura realized what it meant to her. She'd miss the little chicken, of course But now she'd be all alone! And not even in town!

She started to cry.

Frank put his arms around her.

"Don't cry!" he said. "We can get other chickens"

"But — but —" she said, and couldn't go on. She didn't know how to say it. She wanted to ask: "Will you come, if there are other chickens? Was it Nellie you came to see?" She didn't say anything at all.

"After all, Nellie was only a chicken," he said.

"But I was going to move to the country—to make a home for—for Nellie," she sobbed.

"The country's fine," said Frank. "I can hardly wait to get there myself. I say, you know, I've been thinking about it, and I—well, what do you say if we, well, get married and you make a home for me. That would suit me all right. How would it suit you?"

Laura wiped her eyes. And decided it would suit her just fine.

Butter-Making

Points to be observed in good butter-making include use of only good, clean, rich milk from properly fed and cared for cows. Cleanliness of the cow and the milker is essential. Correct temperature for ripening the milk and for churning is necessary. Cream should be ripened at 65 to 70 degrees F. The churning temperature should be about 60 to 68 degrees so that butter will form in granules about the size of wheat grains in 20 to 25 minutes. When that stage is reached, stop churning, wash the butter with water of the same temperature, in two or three waters, until all milk is removed. Add about a tablespoonful of salt to each pound of butter and work enough to distribute the salt. Mold and wrap in parchment paper.

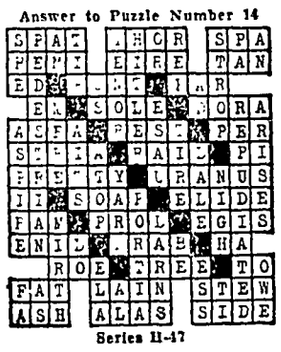
Answer to Puzzle Number 14



Series 11-47

Sportlight
by GRANTLAND RICE

Greenberg

IT WAS NOT until 1920, the year Babe Ruth came to the Yankees as an outfielder, that fans realized the dead qualities of the ball that had been used previously. That was the year Babe Ruth hit 54 homers, where such past champions as Frank Baker had been leading the league with less than 12. The ball had been getting faster in 1919. But Babe would have led the home-run pack even with the deader ball, as he always had the greatest combination of power, timing and smooth swinging known to the game.

Jimmy Foxx reached the 58 mark in 1932, and Hank Greenberg climbed to the same 58 peak in 1938. Last season, Greenberg demonstrated he still had 44 home runs in his tall system.

The ball used this season is certainly not any deader than it was in past years. Judging from the loud salvo of four-base hits, the 1947 model is flying even farther. I can't recall another season where as many home runs have been hit, in the same number of games, as the new campaign has shown so far.

One amazing example is Eddie Miller of Cincinnati, a brilliant-fielding shortshop, who never has been rated even close to the power department. Miller now rarely misses an afternoon without belting one out of the inclosure.

When the season opened, Ted Williams, Greenberg and Johnny Mize were voted the trio most likely to succeed at the art of leading the home-run department. Kiner and Joe DiMaggio were included in this list; also Keller, York and Musial. But early indications are that 10 or 12 outsiders have decided to enter the long-distance tournament. There have never been as many, this early in the season, able to move up with the big guns.

The man still to beat is Williams. Ted has pleasant dreams of beating the 40 mark and possibly moving up into the 50 section. But, as the cheerful Mr. Durante puts it—"Everybody wants to get in the act."

In the meanwhile, the early spring war cry about breaking up the Cardinals has subsided for the time being. The Cardinals remind you of a 3 to 5 shot in a horse race that gets away last.

But, it is surprising, the number of things that can happen before October. A pennant race is no six-furlong sprint.

* * *

The Importance of Legs

Except for polo players and jockeys, legs are rated as the most important factor in competitive sport. Even polo players and jockeys need strong legs.

The trouble is few athletes realize the importance of their underpinning, according to most of the trainers we have talked to, and only a small percentage ever get their legs in shape.

The only exception is the golfer who has to walk from 5 to 10 miles a day, through each single and double round Greatest offenders are ballplayers and fighters. You find few who are willing to get their legs in shape, through the road work needed for this purpose.

Ty Cobb lasted for 24 seasons, largely because he hunted almost every day between seasons, usually moving at top walking speed. The same is true of Babe Ruth, who lived on his legs in the off season, either in the hunting field or on some golf course. And the Babe's slender ankles had to carry a tremendous frame, around 230 pounds.

The leg work, that Joe Louis has thrown in throughout his long ring career, is one of the main reasons the Bomber is still heavyweight champion of the world.

There are too many easy ways of transportation for the youth of today. The kids will ride four blocks, when they get a chance.

There are not many athletes who have the incentive to give their legs enough work to get them ready for the games they play.

* * *

Middleweights Supreme

This will be the first time in many summer moons that a battle for the middleweight championship will overshadow the heavyweight scrap.

No matter how noisy the ballyhoo, nor how loudly the tom-toms echoed, no advance hullabaloo would have made fans believe that slow-moving Joe Baksi would have had any sort of a chance against Joe Louis, even had the match been arranged this year.

Just how much the passing years have taken from Louis is anybody's guess, but no one can believe Louis has moved so far down the soapy chute that he would be in serious danger of losing his title to one of the present crop of heavyweight opponents.

NEEDLEWORK PATTERNS

Basic Stitches of Crochet

It's High Finance

A man was walking down the street carrying a beautiful cat.

Someone stopped him and asked him how much money he wanted to sell the cat.

The cat owner replied: "$10,000."

"Why that's preposterous—$10,000!" the man exclaimed.

A few days later the would-be purchaser again ran into the cat owner and, upon asking about the cat, learned it had been sold.

"Sold?" inquired the would-be purchaser. "For how much?"

"For $10,000."

"Cash?" cried the skeptic.

"Well, not exactly," said the owner. "I got two $5,000 dogs in exchange."

Gas on Stomach

Relieved in 5 minutes or double your money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets No laxative Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

HARSH LAXATIVES UNNECESSARY?

Millions Find Healthful *Fresh Fruit Drink* Gives Them All the Laxative Aid They Need

Don't form the habit of depending on harsh, griping laxatives until you've tried this easy, healthful way millions now use to keep regular.

It's fresh lemon juice and water taken *first thing* in the morning—just as soon as you get up, the juice of one Sunkist Lemon in a glass of water. Taken thus, on an empty stomach, it stimulates *normal* bowel action, day after day, for most people.

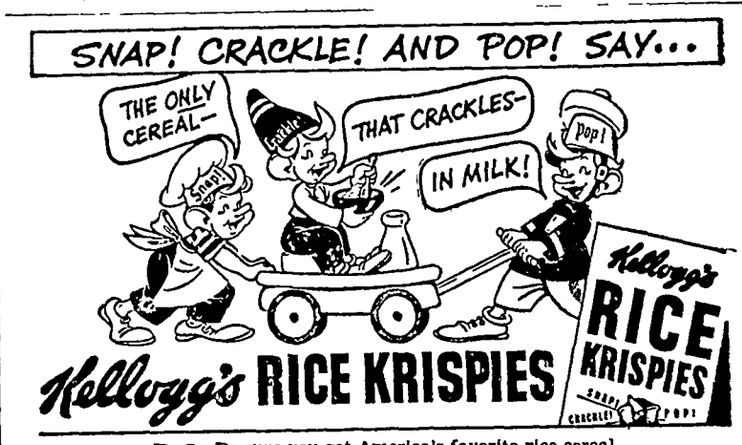
And lemons are actively *good* for you. They're among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply vitamins B_1 and P, aid digestion and help alkalinize the system.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

FALSE TEETH

To hold your loose uppers and lowers comfortably secure all day—and every day, try dentist's amazing discovery called STAZE. Not a "messy" powder! STAZE is pleasant-to-use paste. Get 35c tube at druggist today! Accept no substitute!

STAZE Holds All Day or Your Money Back!



P.S. Be sure you get America's favorite rice cereal, the one and only *Kellogg's* Rice Krispies!

● Changing his community to a program of balanced farming earned for M. P. Moore, Senatobia, Mississippi, election to the Champion Farmers of America in 1944. On his 15,000 acres he pioneered soil conservation methods, proved that feed crops can be grown, and showed that properly managed rundown land will profitably support livestock. On fewer acres he grows as much cotton as under the one-crop system, and on the acres removed from cotton, raises feed for hundreds of cattle. The purebred Polled Herefords on his Circle "M" Ranch are among the best. For four consecutive years his auction prices have set new world records. His many tractors are equipped with Firestone Ground Grip tires, and he says that the new Firestone Champion Ground Grip is the best tire he has ever used.

NOTE: *Write to The Firestone Tire & Rubber Company, Akron, Ohio, for booklet "M. P. Moore, Champion Farmer."*

Champion Farmer Moore Uses

Firestone

CHAMPION GROUND GRIPS

THERE are four sound reasons why men like Champion Farmer Moore are putting their tractors on Firestone Champion Ground Grips: (1) *they clean up to 100% more effectively;* (2) *they pull up to 62% more;* (3) *they last up to 91% longer; and* (4) *they roll more smoothly on the highways.*

The extra high, curved, connected traction bars make this superiority possible. Shaped like a pyramid, they cut into the soil with a sharp, cleaving action. Mud falls from them freely because the space between the bars is wider at the shoulders than near the center of the tread. The bar connections brace and strengthen the tread and give the tires a powerful "center bite" in the very heart of the traction zone. The tires roll smoothly because the curved, connected bars are in continuous contact with the highway.

It will pay you to insist upon Firestone Champion Ground Grips for your tractor. They cost no more than ordinary tires.

Listen to the Voice of Firestone every Monday evening over NBC

BOARD PROCEEDINGS

2ND ADJOURNED APRIL MEETING

Garner, Iowa
May 2, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Supervisors F J. Schoun, George Th Gerdes and John Chambers present.

The minutes of the last meeting were read and approved as read.

On motion and second the bonds of Wm Henschen, Engineer, are approved on D D No. 8, D. D. No. 10 and D. D. No. 147

On motion and second the bond of Fred L. Meinecke, Township Clerk, is approved

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D D No 7, Section 5, and D D. No. 7

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D D No 54 Main, D D No 17 Lateral No 5, and in D. D No 142 Lateral No 3

Supervisor Gerdes is appointed a committee to investigate and cause repairs to be made in D D No. 46-3

This being the 2nd day of May, A. D., 1947 a date heretofore fixed by resolution of this Board for a continuation of the hearing on the proposed establishment of D D No 146 a sub-district of D D No 1 and 2 Hancock County, Iowa petitioned for by Vincent Kopacek, et al, the hour for said hearing having arrived and the Board being fully advised, said hearing was held as scheduled

It appearing that said petition complies with the requirements of law in form and substance and that such improvement will be conducive to public health convenience welfare benefit or utility and that the cost thereof will not be excessive and no claim has been filed for damages

BE, AND IT IS THEREFORE RESOLVED by the Board of Supervisors, acting for and in behalf of D D No. 146, a sub-district of D. D. No. 1 and 2, Hancock County, Iowa, that the drainage district petitioned for by Vincent Kopacek, et al, and as recomended by Engineer Wm Henschen Be and the same is hereby established in accordance with Chapter 455, Code of Iowa, A. D. 1946, and laws amendatory thereto and shall henceforth be known as D D. No. 146 Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Gerdes, who moved its adoption, was seconded by Supervisor Schoun whereupon the chairman, John Chambers, in the chair, placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, John Chambers and George Th Gerdes, aye. Nays none Whereupon the chairman declared the resolution duly adopted

BE IT RESOLVED by the Board of Supervisors of Hancock County Iowa, acting for and in behalf of D D No. 146 Hancock County Iowa that a letting on the construction of said district be and the same is hereby ordered held at 1:30 P M on the 23d day of June A D 1947

The County Auditor is hereby directed to cause notice of such letting to be published in the Britt News-Tribune setting out the approximate amount and kind of work to be done the date for commencement and completion and the Board reserves the right to waive technicalities and to reject any or all bids. Bids shall be requested on labor and material and bidders may bid on each item seperate or on both

WHEREAS Wm Henschen has to report that Concrete Products Corporation of Humboldt Iowa have completed their contract for material on Hancock County, Iowa D D No 188 to his entire satisfaction and there is due on said contract a final estimate in the sum of $776.62.

BE, AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa acting for and in behalf of D D No. 138 that the report of the Engineer be and the same is tentatively approved and a final hearing thereon will be held in the Courthouse in Garner Iowa at 1:30 P M, on the 3d day of June A D, 1947 The County Auditor is hereby directed to give notice of such hearing by publication in The Garner Leader and Signal

WHEREAS, C. F Merten, Engineer, has recommended a letting on the construction of thirteen (13) wooden bridges to be constructed on Hancock County roads during the 1947 season and it is deemed for the best interests of the taxpayers of Hancock County that said letting be held.

BE, AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that a letting on the construction of 13 wooden bridges be and the same is hereby ordered held at the courthouse in Garner, Iowa at 1:30 P M, on the 19th day of May, A D 1947

The County Auditor be and he is hereby ordered to publish a notice of such letting in the Garner Leader and Signal and the Britt News-Tribune setting out the time and place of letting the approximate amount of kind of work to be done the date for commencement and completion and that the Board reserves the right to waive technicalities and to reject any or all bids.

In the matter of the petition of Wm S. Smith et al for the establishment of Drainage District No 147 a sub-district of D D No 105 Hancock County, Iowa, in sections 20 and 29 Township 96, Range 25 West of the 5th P M which petition was filed on August 12, 1946.

WHEREAS Wm Henschen was appointed Engineer on August 12, A D., 1946 as commanded in section 455 12, Code of Iowa, 1946, to make a survey, investigation and report on the feasibility and necessity of the establishment of said proposed drainage district and said engineer did file his report on April 29, A D 1947, which report states that he has surveyed the lands of the petitioners and the lands in the water shed of the proposed district and in his opinion the proposed establishment as prayed in the petition will be conducive to public health, conveniences and welfare and will be of greater benefit than the cost thereof and recommends that said district be established.

BE, AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of the proposed drainage district No. 147, petitioned for by Wm S. Smith, et al., that the report of the Engineer be and the same is hereby approved as a tentative plan and said report and plan shall come on for further hearing at the Courthouse in Garner, Iowa, at 10:30 A. M., on the 23rd day of June, A D., 1947 The County Auditor be and he is hereby directed to cause notice of hearing on said petition and the report of the engineer to be published in the Britt News-Tribune, a newspaper of general circulation published at Britt, Iowa advising all owners, occupants, lienholders and encumbrancers of record in the proposed district of the pendency and prayer of the petitioner the favorable report of the Engineer thereon, the approval by the Hancock County, Iowa, Board of Supervisors of the report as a tentative plan and that same may be amended before final action thereon and that all claims for damages and all objections to such establishment shall be in writing and must be filed with the County Auditor at or before the time set for hearing thereon

The foregoing resolution was offered and read by Supervisor Geo Th. Gerdes, who moved its adoption, was seconded by Supervisor F J. Schoun whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, George Th. Gerdes, and John Chambers Aye. Nays, none.

Whereupon the Chairman declared the resolution duly adopted

BE IT RESOLVED, by the Board of Supervisors of Hancock County Iowa

That pursuant to the provisions of Chapter No. 317 Code of Iowa 1946 it is hereby ordered:

1 That each owner and each person in the possession or control of any land or lots in Hancock County, Iowa shall cut, burn, or otherwise destroy all noxious weeds thereon, as defined in this chapter, at such times in each year and in such manner as shall prevent said weeds from blooming or coming to maturity, and shall keep said lands free from such growth of any other weeds as shall render the street or highways adjoining said land unsafe for public travel Noxious weeds shall be cut or otherwise destroyed on or before the following dates and as often thereafter as is necessary to prevent seed production:

Group 1 June 15, 1947 for leafy spurge, perennial peppergrass, sour dock, smooth dock, sheep sorrel

Group 2 June 30, 1947, for Canada thistle, Russian knapweed, quack grass, buckhorn, wild mustard

Group 3 July 15, 1947, for field bindweed, wild carrot

Group 4 July 30, 1947 for horse nettle perennial sow thistle butter print puncture vine and cocklebur.

2 That each person and owner in the possession or control of any lands in Hancock County infested with any primary noxious weeds including quack grass, perennial sow thistle, Canada thistle, field bindweed, horse nettle, leafy spurge, perennial peppergrass Russian knapweed, shall adopt a program of weed destruction prescribed by the weed commissioner which in five years may be expected to destroy and will immediately keep under control such infestations of said primary noxious weeds

3. That all weeds other than primary noxious weeds on all county trunk, primary highways and local county roads, and between the fence lines thereof shall be moved by the adjoining property owner to prevent seed production on or before July 15, 1947

4 That if the owners or persons in possession or control of any land in Hancock County, Iowa, fail to comply with the foregoing orders, the weed commissioner shall cause this to be done and the expense of said work including costs of serving notice and other cost if any, to be assessed against the land and the owners thereof

5 That the County Auditor be and he is hereby directed to cause notice of the making and entering of the foregoing order by publication in each of the official newspapers of Hancock County, Iowa.

The foregoing resolution was offered and read by George Th. Gerdes, who moved its adoption, was seconded by Supervisor Schoun Whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Geo. Th Gerdes and John Chambers, aye. Nays, none. Whereupon the Chairman declared the resolution duly adopted

On motion and second the financial report of the Hancock County Home for the year 1946 is approved:

Chairman

ATTEST FRED C. MISSAL
County Auditor

5TH ADJOURNED APRIL MEETING

Garner, Iowa
May 13, 1947

The Board of Supervisors of Hancock County, Iowa, met at the Court House at Garner, Iowa, at 10:30 A. M. on May 12, 1947, for the purpose of considering the report of the Commissioners heretofore appointed to assess benefits in Drainage District No. 8, Drainage District No. 108, Drainage District No. 105 and Hancock County Roads, all in accordance with duly published notice fixing time and place of hearing at the County Court House, Garner, Iowa, at 10:30 A. M., of May 12, 1947, proof of such publication being on file.

There were present Supervisor F J. Schoun and Supervisor George Th. Gerdes; absent, Supervisor J A. Chambers.

Upon motion of Supervisor Gerdes, Supervisor F. J. Schoun was elected chairman pro tem of the meeting.

The minutes of the last meeting were read and approved as read.

The meeting was called to order by the chairman and F. C. Missal, County Auditor, read objections and opportunity was extended to all those present to voice or supplement objections filed in writing with the County Auditor There were filed in writing the following objections: F. B. Popkes, Ben Popkes, C. R. Williams, Theo. J Siebert by Joe Meyer, Herman C. Harth and Mary S. Harth, and Robert W Neuhoff and written request by Wesley Kehl with reference to Drainage District No. 105. And after considering the objections and hearing statements of some of the property owners in support of the objections the following resolution was read and offered by Supervisor Gerdes, and seconded by Supervisor Schoun, to-wit.

WHEREAS, the time has arrived for consideration of the report of the Commissioners heretofore appointed to classify, re-classify and assess benefits in Drainage District No. 8 and benefits in Drainage District No. 105, Drainage District No. 108, and to Hancock County Roads and

WHEREAS, it appears that Drainage District No. 8 has heretofore been established and Drainage District No. 105 and Drainage District No. 108 are improved and benefited and outlet into said Drainage District No. 8, and the roads in Hancock County, Iowa, will receive benefits therefrom and

WHEREAS, the board has determined that the original assessments as made in Drainage District No. 8, are not equitable as a basis for the expenses of the enlargement thereof and did heretofore order a new classification of all the lands in said Drainage District No. 8 and appointed Commissioners and a civil engineer as provided by law and the board having now considered said report, and the objections on file

BE AND IT IS HEREBY RESOLVED that the statement filed by Wesley Kehl with reference to Drainage District No. 105 be placed of record for future reference, and the percentage of Chester Williams on the Southeast ¼ of the Northwest ¼ of Section 26 Township 95, Range 26, of Lateral 3 of said Drainage District No. 8 be reduced from percentage 0660 by .0260 to make said percentage 0400 thus reducing the assessment on said forty acre tract from $514 80 to $312 00

BE IT FURTHER RESOLVED that Hancock County roads be increased as follows by adding to percentage .0966, percentage .0280, making the total percentage factor of 1226 thus increasing the assessment on said County roads from $753 48 to $956 28 on said Hancock County roads.

That the percentage and assessment on the Northwest ¼ of the Southeast ¼ of Section 25, Township 95 Range 26, included in Lateral 2 of Theo J Siebert be reduced as follows that the percentage of said Northwest ¼ of Southeast ¼ of Section 25 as fixed by the Commissioners at 0614 be reduced 0100 making the new factor percentage .0514 thus reducing said assessment from $368 40 to $308 40

That Hancock County road be changed in said Lateral No. 2 from percentage 0464 by adding 0100 making the new percentage factor 0564 thus increasing assessment against Hancock County roads from $278 40 to $338 40

That all objections to the Commissioners report except as modified and changed herein as to the land of Chester Williams and Theo. J Siebert above referred to be and the same are in all respects overruled and denied

BE AND IT IS FURTHER RESOLVED that the report of said Commissioners to assess benefits filed herein in the office of the County Auditor on the 10th day of March, 1947, be and the same is, with the modifications made in this resolution, established and confirmed, and with said changes and modifications made in this Resolution said report is declared to be the percentages of actual benefits of the cost and expense of said construction and repairs all of which this board finds to be just fair and equitable with the changes and modifications as herein made.

BE IT FURTHER RESOLVED that said reclassification of land in said Drainage District No 8 except as changed in this Resolution and of the roads and Drainage District No 105 and Drainage District No 108 be and the same are fixed as the amounts which each tract included in said Drainage District No. 8 or outletting therein shall pay for the benefits on account of said improvements, and said report as changed shall be the classification and percentage upon which all future levies on lands in said Drainage District No 8 shall be made unless and until reclassification is made thereof

Farmers . . .

AT THE PRESENT TIME:

All classes of fleshy steers and heifers are selling exceptionally high — much higher than they have been for a long time

Fat cows, canners and cutters, bulls, etc. are also selling at extremely high prices.

All classes of grass cattle or fleshy feeders are bringing the highest prices of the season.

Feeder pigs, breed sows, and wet sows are in unusally good demand and selling well above regular market prices. This will give you an idea of top prices in our sale last week:

Fat yearling steers and heifers per cwt. $23.45
Grass Steers " " 21.80
Fat Cows " " 19.10
Veal Calves " " 27.75
Feeder Pigs wt. 128 lbs. sold for " " 30.00
Wet Sows " " 20.70

PHONE 37 GARNER, IOWA

The Board having let the contract for said improvements prior to the hearing upon said Commissioners report BE AND IT IS FURTHER RESOLVED that the assessment against each tract of land, highways, roads, lots and parcels of land and Drainage District Nos 105 and 105 outletting into Drainage District No. 8 be and the same are declared levied against each respective tract of land as set forth in said Commissioners report except as changed and modified by this resolution, and said amounts are hereby levied upon all lands, highways, railroads right of way and property within said district in accordance with such new classification and apportionment and against said Drainage Districts Nos. 105 and 108, the cost of Laterals to be assessed except as changed and modified herein separately as is set forth in said report.

BE IT FURTHER RESOLVED, that bonds shall not be issued for the cost of such construction and said assessments may be paid by the owner of the person liable for said assessment may pay the same in cash or may pay the same in accordance with Section 455 64 of the 1946 Code of Iowa, and if any such owner determines to pay said assessment as provided by Sub Section 2 of said Section 455.64 of the 1946 Code of Iowa same shall be paynble in ten annual installments as therein provided, with interest at 4% per annum

After discussion of the foregoing resolution the motion was put upon its adoption and upon roll call the vote was as follows F J Schoun, Geo. Th. Gerdes aye. Nays, none J A Chambers absent.

Thereupon Supervisor F J Schoun, chairman pro tem declared the motion and resolution duly adopted and directed the Auditor to spread the same upon the votes of the proceedings and to make publication as therein provided after making the changes as provided in said resolution.

4-H RALLY DAY

Hancock County's annual 4-H rally day, to be held at Duncan June 10, will bring together most of the 100 members, their parents and many friends, according to Paul Henderson, County Extension Director. The day's program will begin at 10:00 a. m and be concluded at 3:30 p. m.

Election of county 4-H girl's officers is an item of business on the day's program Recognition of leaders and committee members and reports of the activities of local clubs are other features of the program.

Two skits which will portray the part 4-H girls have had in service to the community, the state, nation and the world and the work of the girls in their Home Furnishing project will add color to the program, Henderson said.

The service skit will combine a report of the contributions of effort, materials and money that the members have made to worthy causes with pageantry, music and reading

In the skits showing accomplishments in the Home Furnishing project the audience will see a dramatization of the skills which the members gain in their work.

Responsbility for these portions of the program has been assigned Ell Tip Toppers, Madison Livewires, Liberty Busy Bees, and Avery Sunbeams.

The Garfield Lively Workers, the Amsterdam Pace-Makers, and the Boone-Magor Pals will present folk games. The Britt Busy Beavers, the Bingham Boosters, and the Erin Eager 4-H Club will present special music.

Picture memory contest will be conducted as a climax to the picture memory studies each club has had during the year

Mrs. C. J Wille, county 4-H girls' chairman, will preside at the general rally day sessinos. She is assisted by the members of the county 4-H committee, Mrs. D E Keat, Forest City, Mrs. Lyal Fox, Britt, Mrs. Oscar Greiman, Garner, and Miss Ruby Schram, Garner

Eleanor Jakoubek, county 4-H girls' president, will conduct the business meeting and the installation of new offcers. Other retiring officers who will assist with the day's program are: Alice Anderson, Vice President, Carol Fox, Sec.; and Betty Lacey, Historian.

Soil Conservation District Commissioners Meet

The Hancock County Soil Conservation District Commissioners held their May meeting at the SCS office in Garner on May 21. The meeting was held a week early because Vernon Moss, the local technician will be at LaCrosse, Wisconsin for 5 weeks training beginning May 26.

Moss reported for the month of May, three interest meetings with farmers where six requests for assistance were received a total of 19,465 feet of contour guide lines laid out for farmers, one preliminary survey for drainage completed and 2160 acres mapped in county by soils man

The six new requests for assistance numbers 101 to 106 inclusive were approved by commissioners.

Moss presented farm plan Number 1, M. C. James, and plan Number 2, V A. Cook for approval. Both plans were approved by the District Commissioners.

The June meeting was scheduled for July 2.

Will Show Pictures At Klemme Church Sunday Evening

Rev. Armin Meyer, missionary of India will be the speaker at the Klemme Evangelical and Reformed Church Sunday

Rev. Meyer and his wife are on a furlough and spend part of their time visiting congregations and lecturing on missionary work in India.

Sunday evening they will show pictures at the church on their work in the India mission fields.

Had Picnic Dinner Sunday

A picnic dinner was held on Sunday at the Herman Gast home in honor of Mr. and Mrs. James Fredin of Fort Dodge. Others present were Mr. and Mrs. Kenneth Gast, Roger and Judy of Garner; Mr. and Mrs. Loren Gast and Kathryn of Liberty; and Mr. and Mrs. Ronald Gibbs.

4-H Boys' Enrollment Figures Released

Hancock County has 132 members enrolled in agricultural projects, Paul Henderson County Extension Director, announced this week He made the figures available after completing a tabulation of enrollment reports from the individual members.

Total project enrollment is 158 units. This figure is greater than the number of members because several of them have more than one project.

Topping the list of enrollments is the Baby Beef project which has 57 members who are feeding 101 animals.

In second place is the Market Litter Enrolled are 36 members who have 40 litters. Standing third is the Purebred Sow and Litter project with 24 members and 28 litters.

Other projects and the number of enrollments are: Dairy, 19 members; 26 heifers; Colt, 6 members, 7 colts; Poultry, 6 members , 3,625 birds; Purebred Beef Heifer, 5 members, with 8 heifers; Lambs, 3 members; Garden, 1 member, Soybeans, 1 member.

Currently there are 11 agricultural project clubs in the county. Members enrolled in these clubs from 16 of the county's townships.

Providing adult leadership for these clubs are 19 men in addition to the 4 members of the county 4-H committee Henderson points out that these are all volunteer leaders. They attend all local meetings of the clubs and guide the officers and committees in conducting the club program

Assistance to the leaders for their work with the clubs is provided in a series of training schools conducted by the county extension personnel. The meetings are held bimonthly.

Avery Sunbeams Met At Lillian Wille's

The Avery Sunbeams girls 4-H club met at the home of Lillian Wille, May 10th for their annual Mothers' Day tea. Six girls, six parents, 1 leader and 2 visitors were present. The girls discussed Rally Day and the District 4-H Camp. Roll call was answered by giving "A New Courtesy I Have Adopted." A demonstration "Colorful Dresser Scarves" was given by Betty Kramer. A discussion "Choice of Wallpaper" was led by Harriet Ostendorf. Two of the pictures in the picture study group were studied by the group

LIBERTY BUSY BEES MET

The Liberty Busy Bees met at the home of Vivian Stromer on Saturday, May 17. Nine members answered roll call by "my favorite picture and its painter". It was Mothers and Daughters tea so there were six visitors present.

The club appointed Darlene Schultz candidate for county office, Marjorie Bredlow candidate speaker, and Beverly Habercamp voting delegate, for the coming Rally Day, June 10.

The club is to meet at Ruth Habercamps the evening of June 6 to finish and get things lined up for Rally Day.

The girls talked and made a few plans for giving a program for the Farm Bureau.

Two picture studies by Gloria Haefner and Dorothy Moll.

Talk by Bethel Haberkamp on "How to Improve the Closet."

Demonstration by leaders on "Removing old Finish and Refinishing Soft and Hard Wood"

Lunch was served by the hostess.

—Reporter for club, Dorothy Moll.

GOOD SPRAY OPERATORS NECESSARY

A few unscrupulous commercial sprayers are causing a good deal of damage to the Hancock County fly control campaign, Paul Henderson, County Extension Director, reported this week.

He said that good spray jobs by conscientious operators were essential to the campaign, but that DDT improperly applied would be useless.

In order to save themselves money and disappointment over results Henderson suggested that those who employ commercial spray companies should be sure the operators are know locally. A few fly-by-night concerns are capitalizing on the magic name of DDT without adhering to the proper methods in it

POULTRY AND EGG PROSPECTS GOOD

Price Outlook Is Brighter Than For Most Other Farm Products

Poultry and eggs are less apt to slump in price this year than are most agricultural products, says Frances Kutish, Iowa State College agricultural economist.

From the supply standpoint both poultry and eggs are in a strong position. Fewer eggs, fewer chickens and considerably less turkey are in prospect for the American dinner table during the remainder of 1947.

If we have a general drop in demand later this year, egg prices will go up less than usual Chicken prices will go down moderately If business holds up egg prices will go up somewhat faster than their normal rate.

High, Low Periods

Egg prices reach a low point during the period of heaviest production between March and June. Production begins to fall off in May, and eggs normally rise until late fall or early winter when they reach a peak. Fewer eggs are produced in that period.

Chicken prices usually drop slightly in the fall when marketings are at a peak

Supply and general business conditions are not the only factors in the market at present. Kutish points out that prospects for more meat and lower prices during the latter part of 1947 are important.

Aleman Proves A 'Good Neighbor'

Mexican President's Visit Boosts Friendly Relations

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON—Despite the fact that relations between the United States and some of our sister republics to the south have degenerated considerably since the inventor of the "good neighbor" policy died that's not the case with Mexico. You would realize that if you had seen the all-time high in demonstrations that took place when Pres. Miguel Aleman visited Washington.

The first meeting and greeting on Constitution avenue had the inspiration of local pep campaign but there was no outside stimulant injected into what was a really rip-roaring response to the lanky and smiling Latin when he visited congress on May Day. More than a few of his hearers could follow him in the Spanish—and everybody could match up his liquid phrases with the translation they held in their laps. The speech was short and snappy.

BAUKHAGE

When he was through, senators, representatives and the packed galleries couldn't stop applauding even after el Presidente had disappeared. Applause burst out again and again for almost everybody as they passed up the aisle. Senator Vandenberg, who usually is associated with foreign relations of another sort, got a generous share along with the cabinet members and diplomatic corps.

From the rostrum of the house of representatives, Aleman said that "nearly 300 million people living side by side in this hemisphere are concerned not only with assistance to ward off foreign aggression, but also with the efforts to overcome the dangers of poverty and despair in the difficult years of peace." A little bit earlier that day a joint statement had been issued, signed by both President Truman and President Aleman, stating that agreements had been reached for the U. S. to grant credits to Mexico—credits to make the greatest and earliest contribution to the economic development of the land below the Rio Grande. The two chief executives agreed that their respective administrations must exert every effort to raise the standards of living in their countries, increasing productivity and, consequently, purchasing power.

Confusion Prevails At News Conference

We newsmen had our own "hasta la vista" later that afternoon in Blair-Lee house, a part of the twin residences turned over to visiting dignitaries for a press and radio conference which came near being chiefly a photographic contest. It was a struggle, unseemly indeed, in that somewhat precieuse setting of antique furniture, pale green walls, wide mirrors and not very large early American rooms.

Not large enough anyway for the mob which surged about between the little bar, the battery of cameras and the doorway into the garden through which el Presidente was to appear. Dogwood in the garden looked over the brick wall, somewhat startled at the noisy gathering.

At last the tall smiling figure, flanked by secret service men, appeared. He sat at a table. The newsmen crowded around him, completely cutting off the cameras. The newswomen's huge hats completely screened the klieg lights. A controversy of no little heat ensued and no little heat exuded from the high candle-power bulbs and the normal radiation of a hundred or so energetic human beings.

Finally the newsmen were pushed back and the cameras set to work. Some of the reporters were pushed clear out of range and I saw one helpless, hapless gentleman wedged tightly between the bar and the backs of three husky Mexican pressmen. The poor fellow's right hand was pinioned so note-taking was impossible. Only his left arm was free, and that was deep in the middle of a nest of scotch-and-sodas. What else could he do about it? (Salud y pesetos!)

The photographing continued. The photographers in front wouldn't stop.

The newsmen cried, "Enough!" One reporter, reversing the ancient proverb sighed, "One word is worth a thousand pictures."

The photographer yielded.

"Do they do this in Mexico?" asked an American reporter, archly.

"They do this in Mexico," answered a Mexican reporter, in per-

Little news was brought out beyond what Aleman had said to congress or what was in the joint statement concerning loans for Mexican industrial and agricultural development.

But there was one, last question: "What impressed you most on your visit, Mr. President?"

"Arlington and Mount Vernon," he replied, "The enduring lessons of George Washington, the great father of your country, must be constantly taught and rehearsed in your country."

And so the Truman gesture at Chapultepec was reciprocated.

Mexico Embarking On Six-Year Plan

Mexico still has some credit previously approved by the Export-Import bank which she hasn't used. She has borrowed 68 millions largely used for highway construction, transportation and industry; she has repaid 13 millions; still has 30 millions in the bank.

More will be needed to carry out Aleman's six-year plan, which includes increased irrigation and power facilities—two TVA's will be constructed, Mexican style.

Mexico is an agricultural country without too much arable soil; she needs to raise more to feed herself properly To do this will require six times as many irrigated acres as at present.

The joint statement also indicated that the two presidents were working out an arrangement to stabilize exchange which would permit Mexico to buy American dollars when she needs them to buy American goods, and sell them back when she

'GOOD NEIGHBOR'
Warns Aggressors

can spare them. In wartime, when she was selling us more than she was buying, she built up a supply of dollars. But now she's buying more from us than she's selling to us. By allowing her to buy dollars at the rate of five pesos to the dollar, Mexico's money will be kept stable—otherwise individuals might start bidding up the dollar, which would decrease the value of the peso.

What did it add up to? Good sense between good neighbors who want to continue to be good customers. Mexico is farther to the left politically than we are, but it is by no means one hundred per cent socialist.

As for Aleman's political philosophy, it was plain what he thought about the one-party totalitarian states when he said before congress:

"Civilization wanes when the state curtails individual freedom. . . . to impose its will or that of a political party on its citizens."

It appears that Aleman's brand of democracy is near enough to our to make him the good neighbor we Washingtonians who met him think he is.

LINED UP FOR SUN BATH . . . The Henn quadruplets, children of Mr. and Mrs. Charles Henn of Baltimore, line up for their daily sun bath in the nursery of a Baltimore hospital. Left to right, they are: Tommy, smallest at birth; Donald, the heavyweight; Joan, lone lady in the group, and Bruce, possessor of the biggest, brownest eyes.

NEWS REVIEW

Oklahoma Senator Shot; Telephone Strike Settled

PHONE STRIKE ENDS:
Workers Accept $4.40

Long distance telephone operators agreed to accept a compromise pay increase of $4.40 a week, thereby ending the month-old strike that has been tying up the nation's communications. Quick settlements of 28 other disputes followed the acquiescence of the long lines workers to the new terms. The increase means about 11 cents per hour pay boost, vacation benefits and certain other concessions, such as seniority rights. About 22,000 workers in 42 states are affected.

The agreement was announced by Asst. Secy. of Labor John Gibson and Conciliation Director Edgar Warren, after a 7½ hour night session with representatives of the unions and the American Telegraph and Telephone company. Strikes against local companies of the Bell system were settled on substantially the same terms.

Besides the wage hikes and other benefits the contract with the long distance workers was practically a renewal of old terms, which were extended for one year. A clause permits either the union or the company to begin negotiations, after September 1, for reclassification of towns to readjust wage schedules.

Officials of the long lines workers' union indicated the members would not cross picket lines of striking local telephone workers.

BOX CARS:
Shortage Easing

Slowly but steadily the boxcar situation is improving, declares John Hayden, Chicago district manager of the American Association of American Railroads. Midwest freight conditions, he said, are the best they have been for a long time. Grain cars are moving in adequate numbers to the Southwestern wheat belt, where cutting of the new crop has begun.

"We hope to have several thousand empties stored there ready to handle the wheat when it comes from the combines," said Eugene Coughlin, assistant to the chairman of A.A.R. "The carriers are in considerably better condition to handle grain traffic than they were last year."

OKLAHOMA:
Shooting in Senate

A hometown feud exploded into gunplay on the floor of the Oklahoma senate house in Oklahoma City. When the smoke cleared, elderly Sen. Thomas Anglin was lying wounded, shot through the hip. His assailant, Rep. James Scott, a marine veteran, was arrested a few minutes later in a washroom.

The shooting occurred before the afternoon session had opened, when about half the senators were on the floor. Scott apparently fired twice, with one shot going wild. Some senators were under the impression that Anglin returned the fire, but this has been denied.

State Sen. Anglin

Both legislators come from Holdensville, Okla. Anglin is 64, the oldest senator in the chamber in point of service. Representative Scott, 34, is heir to an oil fortune. Only motive that has been discovered for his action is that Anglin's law firm represented Scott's former wife in her divorce suit and property settlement.

GERMANY:
U. S. to End Army Rule

Control of the U. S. zone of Germany soon will be transferred from the American military government to civil authority. Secretary of State Marshall is preparing to take this long-delayed step as soon as possible. The move will reverse the state department's 158-year-old tradition. Heretofore the department has vigorously resisted taking on any functions except formulation of policy.

Former Secretary Byrnes wanted administration of Germany left with the war department, but Marshall, himself a veteran of the war department, is willing to change that. He has not revealed any details of the civil government setup that he has in mind. Obviously a considerable military force will be needed in Germany for some time, in case of outbreaks.

Marshall denied that American and British officials had run into difficulties over basic policy in plans for merging the American and British zones, as reported from Berlin.

RECORD OUTPUT

Farm Productivity Increases

CHICAGO.—Measured on a volume basis, farm output in recent years has been 30 to 35 per cent higher than the 1935-39 average, according to an article in the Northern Trust company's monthly publication. The gain, it is pointed out, was recorded despite a decline of 10 per cent in the number of farm workers.

Although generally favorable weather and longer hours in the fields aided in the production record, the article contends that more important factors were greatly increased mechanization of farming methods, wider use of improved crop varieties of the hybrid type, shifts to crops and livestock requiring relatively less labor per unit of output and increased use of fertilizer and lime for soil enrichment.

Approximately twice the amount of fertilizer used 10 years ago is being used now, use of lime has increased threefold and acreage planted with hybrid seed corn, for example, has increased from "less than 5 per cent of the total corn acreage 10 years ago, to more than 65 per cent now." Since the yield from hybrid seed is about 20 per cent greater than from common strains, "the effect upon overall output is clearly evident."

Further, farm productivity was increased because production of meat animals, requiring about one-third as much labor per unit of production as dairy products, has gained.

The tremendous advance in mechanization of farming methods is one of the most important factors in bringing about the record production of recent years, however, the article stated. Between 1940 and 1944 tractor production increased more than 25 per cent, mechanical corn pickers more than 35 per cent and grain combines and milking machine installations more than 50 per cent.

Increased productivity and lowered costs coming from mechanization "give hope that the farmer may through increased per capita production, attain the same standard of living as the industrial worker does with the large assortment of tools provided for him," the article concluded.

VACATION WONDERLAND

California Parks Embrace Masterpieces of Nature

WNU Features.

Nature created her greatest masterpieces in California and many of them are incorporated into the national park system. Unsurpassed mountain scenery, embracing rugged peaks, imposing waterfalls and untouched wilderness areas, and the famous "big trees" are among the major attractions in national parks of the High Sierras.

In 1890, three national parks were formed, all in the Sierra Nevadas of California. They were the first parks created since establishment of the original national park, Yellowstone in 1872.

National Parks Third In a Series

The three additions were Yosemite, already famous for a single magnificent valley; General Grant, a little area of only four square miles containing the General Grant grove of big trees, and Sequoia, dedicated chiefly to preserving much more extensive stands of these forest giants, but possessing also mountain scenery of superb quality In 1940, Kings Canyon, a great untouched wilderness of deep canyons, rushing streams and more sequoias, directly adjoining Sequoia National park, was established, and little General Grant was absorbed in it.

'BIG TREES' . . . Man is dwarfed under the forest giants of the Congress group of Sequoia giganteas in Sequoia National park.

The "big trees," found at their best in all of these parks, often are called redwoods Actually they are closely related, yet distinct species The Sequoia sempervirens, usually called redwood, grows only near the coast of California, with a few in southern Oregon The Sequoia gigantea grows only in a narrow belt from 4,000 to 8,000 feet in altitude, along the west slope of the Sierras. The sempervirens grows to greater height, although some of the giganteas are more than 300 feet tall. Many of the latter exceed 30 feet in diameter

The General Sherman tree, probably at least 3,500 years old, in the Giant Forest in Sequoia National park, is believed to be the largest as well as the oldest living thing. Only a little more than 272 feet high, it has a base circumference of over 101 feet; its greatest base diameter is 36.5 feet. Sixty feet above the ground its diameter is 17.5 feet; at twice that height it is still 17 feet through. Its largest branch, 130 feet above the ground, is nearly 7 feet in diameter.

Many trees in Sequoia approach the General Sherman in size, and thousands of others deserve the name of giant. A fallen sequoia, burned hollow centuries ago, and known as the Tharp log, was converted into a cabin by Hale Tharp, a California pioneer, in the late 50s, and he occupied it for many years.

• • •

THE FAMOUS Yosemite valley and the Mariposa grove of big trees comprised the first state park in the United States, having been given to the state by the federal government for that purpose in 1864, by an act signed by Abraham Lincoln. Although Yosemite National park was established in 1890, neither the valley nor the grove was a part of it until 16 years later, when California redeeded it to the United States.

Hardly less famous than Yosemite's Half Dome, towering sheer above the valley nearly—a mile, and El Capitan, nearly 4,000 feet of perpendicular granite, are the waterfalls of this magnificent park. Upper Yosemite fall has an unbroken drop of 1,430 feet; Ribbon fall is even higher, with a 1,612-foot drop. Numerous others range from 300 to more than 600 feet in height. Unfortunately, for the late summer visitor, many of these waterfalls go dry by mid-August when there has been little rain or snow in the high country.

According to geologists, the deep valleys of the west slopes of the Sierra were carved by the rushing waters of the same streams which now flow down them. Originally V-shaped and narrow, the Yosemite and others were invaded by glaciers during the ice age and these, moving forward with inexorable force and power, ground away the sides of the valleys to give the present-day canyons their U-shape.

Yosemite valley is probably one of the most heavily used areas in the entire park system. On some days, as many as 30,000 persons have been in the valley at one time; as many as 12,000 persons have occupied its campgrounds in a single night. These, of course, are weekend and holiday crowds; consequently, the visitor who wants to avoid them will plan his visit at other times.

• • •

IN ALL THREE of the High Sierra parks there is good fishing, for which a state license is required. Each also contains a great variety of wild animal and bird life. As in a number of the other parks, too great familiarity with the larger species, particularly black bear and deer, and the feeding of these animals by visitors are discouraged by National Park service.

The "gentle deer" is possessed of razor-sharp hooves, which can and do cause serious injuries to incautious visitors. The bears also should be viewed at a distance, for their apparent tameness is deceptive. Feeding these animals is no kindness to them; foods prepared for human consumption cause them serious digestive troubles as well as getting them out of the habit of seeking their normal and natural foods.

Both Sequoia and Yosemite have a wide variety of public accommodations, ranging from simple housekeeping cabins on up. Both offer accommodations throughout the year and are very popular in winter since they offer excellent snow and ice sports. Accommodations for visitors to Kings Canyon are found only in what was formerly General Grant National park, although many use facilities at Giant Forest in Sequoia, 30 miles farther away.

FAMED CATARACT . . . Nevada falls is one of the many spectacular waterfalls in Yosemite National park.

School Bell Ends Insistent Clang

TULSA, OKLA. — Another remnant of the little red schoolhouse, the insistent bell, has stopped ringing at Webster high school here. Moreover, blow to tradition though it may be, pupils are getting to their classrooms much more promptly.

Decision to eliminate all bells and similar signals was made by T. Harry Broad, principal, after the school's electric bell system broke down and tardiness decreased.

"Removing school bells is simply a matter of removing excuses for tardiness," he explained. "As long as the bells ring, pupils rely on them, and while relying on them, pupils are tardy and promptly blame the bells."

His argument carried added weight when, after two weeks of the no-bells rule, tardiness hit the lowest level in nine years of the school's operation.

Serve Crabmeat Party Loaf for Luncheon
(See recipe below.)

Spring Luncheons

Now that spring housecleaning is over and we are proud of our shining, spic and span homes, it's time to return obligations for luncheons which have piled up within the last several weeks. There is truly no season during which it's more fun to entertain than these lusciously warm days when garden foods are plentiful.

If you want to carry luncheons off successfully, plan light in-season foods. Use sufficient fruits and vegetables to keep the menu seasonal, and let your table decorations carry out the theme.

Lamb chops and chicken, asparagus and strawberries, and a few other foods are reigning favorites. Around them you can build a luncheon menu that will be both eye-appealing and tasty. Plan to do most of the cooking ahead of time so you won't be ruffled by the time the guests begin to come in.

If you want to serve a nice meat dish you might like to start off with a stuffed lamb chop, follow it with a tomato aspic or tossed salad and asparagus, then top off with strawberries and cream.

***Stuffed Lamb Chops.**

4 double-thick lamb chops
2 canned peaches
1 cup crushed pineapple
½ cup soft bread crumbs
¼ cup butter or substitute

Brown lamb chops in skillet on both sides. Toss together finely chopped peaches, pineapple, bread crumbs and butter. Pile on top of chops which have been placed in a casserole. Bake in a moderate (350-degree) oven for 20 minutes.

Asparagus Vinaigrette.
(Serves 4)

3 tablespoons vinegar
1 teaspoon salt
½ teaspoon paprika
½ cup salad oil
1 tablespoon minced parsley
1 tablespoon chopped pickle
1 tablespoon minced chives
1 bunch asparagus (1 pound)

Combine seasonings, add vinegar and salad oil. Beat until thick and smooth. Add remaining ingredients and let stand for ½ hour. Clean asparagus and cook in boiling salted water until tender. Heat sauce and serve over asparagus.

A luxury luncheon for special guests uses both chicken and ham in the main dish. However, you can keep the rest of the luncheon cost down by serving simply a tossed salad and a rhubarb compote for dessert.

Chicken DeLuxe.
(Serves 4)

4 thick slices ham
4 breasts of chicken, cooked
4 tablespoons melted butter
4 tablespoons flour
2 cups rich chicken stock and milk combined
1 teaspoon salt
⅛ teaspoon pepper
Whole sauteed mushrooms

Arrange breast of chicken on top of ham slices. Melt butter, blend in flour and seasonings, then add chicken stock and milk. Cook until thick and smooth. Cover chicken and ham with sauce and top with mushrooms.

LYNN CHAMBERS' MENU

*Stuffed Lamb Chops
Fresh Peas in Cream
Lettuce with Bacon Dressing
Hot Biscuits Strawberry Jam
Chocolate Chip Ice Cream
Beverage
*Recipe given.

Rhubarb Compote.
(Serves 4 to 6)

4 cups cubed rhubarb
1 cup sugar
⅛ teaspoon nutmeg
¼ teaspoon cinnamon
2 whole cloves
Juice, pulp and grated rind of 1 orange

Combine all ingredients and place in baking dish. Cover and bake in a moderate (350-degree) oven for 40 minutes or until rhubarb is tender. Serve warm or cold with cream and crisp cookies.

A more economical luncheon, but one just as pretty, consists of this salad loaf done with aspic and crabmeat. This is delicious served with hot biscuits and topped off with pineapple sherbet with fresh strawberry sauce.

Crabmeat Party Salad.
(Serves 6)

Part I: Aspic
2 tablespoons gelatin
½ cup cold water
2½ cups hot consomme
2 tablespoons lemon juice
⅛ teaspoon white pepper
¼ teaspoon celery salt

Soften gelatin in cold water. Add hot consomme, lemon juice, white pepper and celery salt. Stir until dissolved. Pour into an 8½ by 4½ by 2½-inch loaf pan enough of the aspic to make ½ inch deep. Chill until firm. Place a smaller loaf pan or container within the 8½-inch loaf pan; anchor firmly with weights or tie in place. Pour remaining aspic in the space between the two pans. Chill until firm. Remove inner pan by loosening aspic with a small knife. Chill for 10 minutes and fill center with the following.

Part II: Crabmeat Filling
1 tablespoon gelatin
2 tablespoon cold water
¼ cup cream or top milk
½ cup real mayonnaise
2 tablespoons lemon juice
½ teaspoon salt
1 tablespoon onion, minced
1½ cups crabmeat, flaked
1 cup celery, chopped fine
¼ cup parsley, chopped fine
Tomato slices
Watercress

Soften gelatin in cold water. Add cream and heat over hot water until gelatin is dissolved. Add real mayonnaise, lemon juice, salt and onion. Add crabmeat, celery, parsley and mayonnaise to gelatin. Pour into center of aspic mold and chill until firm. Unmold and garnish with slices of tomato and watercress. Serve with additional mayonnaise.

Variation: Pour aspic into ring mold, and crabmeat mixture into a smaller mold to fit in center of ring mold. Or, use chicken or tuna in place of crabmeat filling.

Released by Western Newspaper Union.

LYNN SAYS:

Add Imagination to Serving Garden Vegetables

Asparagus takes on extra glamour when served with a white sauce, crowned with grated hard-cooked eggs.

To use asparagus as a luncheon dish with first quality protein food, wrap several asparagus stalks, cooked, in thin slices of boiled ham, which has been made tasty by grating some American cheese into it.

Green beans cooked until tender may be served with a mustard sauce made by preparing a medium white sauce, adding to it leftover uncooked egg yolks for color and nourishment, and seasoning to taste with mustard.

Green beans take on a southern note if they are served with chili sauce seasoned with salt and a bit of oil to facilitate blending.

Leftover green peas are delicious mixed with bits of crisp crumbled bacon and a bit of heavy cream.

1616 Eye St., N. W.

Will of People Is Final Sanction for All Laws

AMID the turmoil and uncertainty which is obvious in the deliberations of congress and the hurly-burly of the vast government scene in Washington, your home town reporter attended three events here which impressed him with the oft-repeated but little-heeded truism that "you cannot legislate faith or morals."

One event was the annual dinner of the Southern States Industrial council, representing some 6,000 leaders in business and industry from the 16 southern states. At that dinner at the swank Statler hotel, 500 more or less self-satisfied representatives of southern industry, with senators, congressmen and other "distinguished southerners" as guests, heard an excellent address by one of them, T Russ Hill of Kentucky, president of the Martin-Parry corporation of Detroit. Hill, a forceful after-dinner speaker, damned the lack of faith and the "what's the use" attitude of many business men and others about the future of this nation. He castigated labor leaders and labor "monopoly," deplored a defeatist attitude and our present tax system and then he said this in discussing labor-management difficulties and the labor bill now before congress:

"Law alone will not suffice. Our congress has been much concerned about a labor law. 'Tough' and 'mild' are the two types mentioned. No labor law alone can solve this problem any more than prohibition and controls solved those problems. . . . The will of the people, not law, is the remedy."

Prayer and Good Will

The following afternoon, in one of the most beautiful settings imaginable, with the shaft of towering Washington monument as a backdrop, the dome of the national capitol gleaming in the afternoon sun and the mall a picture of lovely velvet greensward, some 30,000 people gathered in a public demonstration of prayer. . . prayer for a lasting peace, prayer for the Russian people and prayer for America.

It was both dramatic and symbolic, and the lesson those 30,000 people carried away was that prayer, not laws alone, would bring lasting peace.

On the same day, Pres. Miguel Aleman of Mexico, addressing a cheering, whistling joint session of congress, said, ". . . we have learned that the most powerful force to uphold democracy lies not in tanks and ordnance, but in the conviction in the hearts of men who, when conflict finally breaks out, will drive the tanks and fire the cannon. . . ."

And there we have it—from Hill, an industrial leader: "The will of the people, not law, is the remedy You cannot legislate will in the minds of the people."

From Rt. Rev Msgr. Fulton J. Sheen of Catholic University of America: "Prayer, not laws, and good will in the hearts of men, not assembly deliberations, is the remedy. You cannot legislate prayer and good will in the hearts of men."

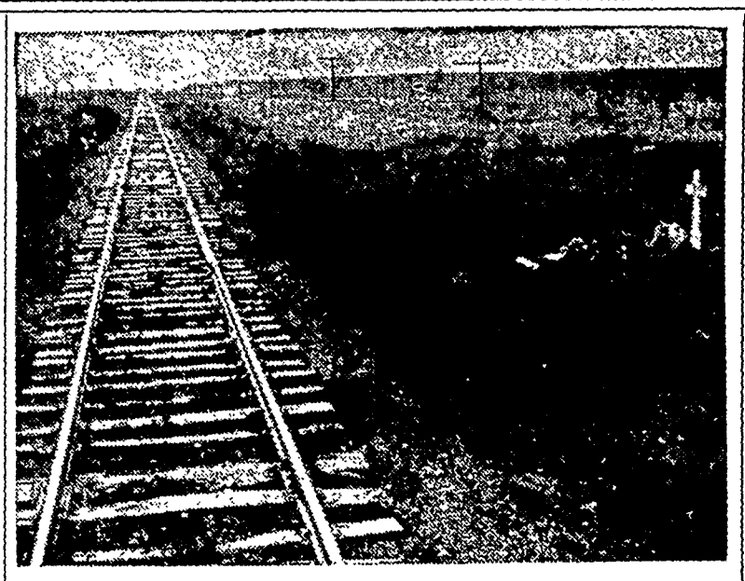
From the President of Mexico: "Conviction in the hearts of men, not tanks and ordnance, is the powerful force which must uphold democracy. You cannot legislate conviction in the hearts of men."

'Morally Right' Laws

So from these three sources we have the same answer: "You cannot legislate faith or morals". . . Faith in God, faith in American democracy, faith in the dignity of man. Good will in the hearts of men is a moral question; tolerance and convictions and prayer are moral forces. Whether it be a labor law, a tax law, a housing law, a health law or whatnot, the basic question is whether or not the law is morally right. Is it fair and just? Is it tolerant of the rights of men? Does that law protect and defend the integrity and the dignity of men and of the individual?

It was Eric Johnston, former president of the U S. chamber of commerce, who o dly recently said that our capitalistic system must change its process of thinking for the privileged few to recognize its responsibility to the public interest and that the primacy and dignity of man come first.

Which brings us to wonder, in the midst of the kaleidoscopic Washington picture, what is the will of the people? Is it being carried out? What are the convictions in the hearts of the American people? Do we recognize the primacy and integrity of the individual? Do we legislate for the public interest or for the privileged few? Are we motivated by hate for other men and other nations? Is intolerance a part of our national backdrop? Where is our good will manifest? Above all, as a christian nation, do we pray. . . and for what?



A STOP BY THE SIDE OF THE ROAD . . . At this tiny grave on the lonely prairie near Elrod, S. D., a train stops every Memorial Day while the crew conducts simple rites memorializing the friendship of "Big Bill" Chambers and "The Little Fellow."

SAGA OF FRIENDSHIP

For 58 Years, Mighty Railroad Remembers 'The Little Fellow'

WNU Features.

Every Memorial Day since 1888 a passenger train has come to an unscheduled stop on the lonely prairie near Elrod, S. D., and while passengers wait and wonder, members of the train crew visit a tiny grave along the right-of-way.

There, a moment of silence is observed, a few brief prayers are said and flowers are laid on the grave. The trainmen return to their train and the trip is resumed

When curious passengers ask about the stop, they learn the story of how a railroad man's sympathetic understanding of a small boy's fascination for railroading led to a friendship that has been memorialized for 58 years even though both the railroad man and the small boy died years ago.

The man's name was William F. Chambers, better known as "Big Bill" Chambers, and the small boy is known only as "The Little Fellow" Back in 1888, Big Bill was a brakeman on the train hauling track ballast for repair work under way in the area. "The Little Fellow" was the 12-year-old son of the couple who had charge of the kitchen and mess cars for the construction gang.

Every day when Bill's train pulled into the railroad camp, the boy ran to meet him and Chambers would spend hours telling him tales of the big cities and of railroading. Then, in August, the boy became seriously ill and died. He was buried there along the right-of-way and Bill promised the boy's parents he would take care of the grave until they were able to return and remove the body.

They never returned, but Chambers kept his promise even when he became freight conductor and later passenger conductor Section crews helped him by keeping the grass and weeds away from the spot. Someone put up a boulder to mark the grave

Eventually Bill reached retirement age; yet he still visited the grave regularly on Memorial Day as long as he was able. Others took up the task for him and continued the practice even after his death in 1939. Vince J. Ford, conductor, married Chambers' daughter. Every Memorial Day Ford has taken Chambers' place, although he, too, now is retired. The flowers are sent by his wife and Mrs Lydia Benson, another daughter of Chambers, both of whom reside at Redfield, S. D Together with the train crews, these people have kept alive the friendship of "Big Bill" and "The Little Fellow"

For 58 years the Chicago and North Western's train 106 has stopped on the prairie near Elrod, as it will again this year. Passengers have waited and wondered. They have heard the story and seen the ceremony Not once has a protest been heard.

Boy With 30 Names Is 'Bobby' for Short

WHITESBURG, KY. — A 14-year-old eighth grade student here boasts one of the longest names in the world.

Because they thought he'd be the last child and the family Bible still had four lines unfilled in the portion left for family records, his parents, Mr. and Mrs. W. L. Stallard, gave him this name:

Hugh Alexander Morris Gene Saul Ralph Giles Gilbert Motoer Marquis Miles Marion Mayo John Charles James Gordon Bennett Adams Christopher Columbus Elijah Green Eversole Bradly Kincaid Robert Jefferson Breckinridge Stallard.

Classmates call him Bennett or Bobby for short.

Woman's Initials Serve As Reminder of Storm

LITTLETON, COLO.—Mrs. E. E. E. A. Shell, who first saw the light of day during the great blizzard of '88, has a constant reminder of that tragic storm. For that's what her initials stand for: "Eighteen Eighty Eight Ann." No doctors could reach her parents' home to be present at her birth. Her father, overjoyed that both mother and daughter survived, named her for the event.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

For the first time since 1934, Sioux Falls, S. D., will have air races in connection with a Civil Air Patrol air fair at the municipal airport Sunday, May 25. Other highlights of the event will be competition in "bomb" dropping and spot landing, a mass parachute jump by local ex-paratroopers and the marriage of a couple aloft in a plane. The Sioux Falls squadron is endeavoring to raise funds for a plane to be placed at disposal of the city, Red Cross and police or for use in emergency search and rescue missions. . . . Newest of the Rocky Mountain empire's air transport services, daily flights between Denver and Salt Lake City have been inaugurated by Challenger Airlines company Stops are made at Cheyenne, Laramie, Rawlins, Rock Springs and Kemmerer, Wyo. The company plans to open routes from both Denver and Salt Lake City to Billings, Mont., in the future. . . . Mrs Clara Frick of Goshen, Ind., experienced "the most thrilling day of my life" on her 80th birthday anniversary She went for a plane ride with her son. . . . Mrs. Sarah Lunsford of Cobbs county, Georgia, utilizes her Piper Cub for a school bus. Because the roads are "terrible," the school bus leaves too early and the family car "went out of commission anyway," Mrs. Lunsford last fall started flying her two children five miles to the schoolhouse The plan worked out so successfully that she decided to continue it indefinitely. "The children don't even get a thrill out of it any more," their mother admits.

* * *

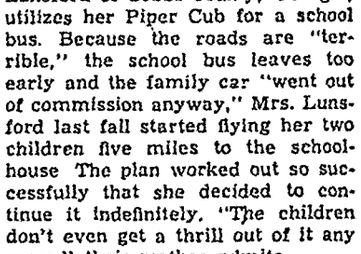
AIRPORTS ARE QUIETER

The noise nuisance from low-flying aircraft has been reduced substantially in many parts of the country, T. P. Wright, Civil Aeronautics administration head, reports in reviewing progress of the anti-noise campaign.

Much of the annoyance can be avoided by changing the traffic patterns around airports and by pilot cooperation in using suitable power and propeller-pitch settings, Wright declares. In many cases the traffic pattern has been altered to provide that planes travel over water, industrial districts or wastelands rather than over residential areas.

The campaign, he reports, has resulted in a substantial drop in the number of complaints against noisy airplanes.

* * *



TROOP CARRIER . . . This Fairchild C-82 Packet, one of the latest-type troop carrier planes developed for army air forces, is demonstrating latest developments in air-borne equipment and techniques on a 60-day tour of the Pacific area.

* * *

SAFETY RECORD

More than two-thirds of the scheduled international airlines, which operated in all parts of the world, had a record of "absolute safety" in 1946, International Air Transport association reports. Sixty of the member airlines flew a total of 8,346,000,000 passengers miles during the year. The scheduled airlines reported 33 fatal accidents, resulting in 298 casualties, which would equal 28,314,000 miles per passenger fatality. Forty-two of the airlines had no fatal accidents.

Adorable and Cool Play Dress for Tot

AS ADORABLE as her smile is this easy-to-make play dress for the sand-box set. The bottom is cut all in one piece, forms panties and ties in front. Wing sleeves are so cool—note the pert keyhole neckline, the ribbon bow.

Kidneys Must Work Well-

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try Doan's *Pills*? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. At all drug stores.

Mrs. Paul Stille and daughter, Barbara, of De Ridder, La., came last week for a visit with her mother, Mrs. Herman Bridges, who underwent a major operation at the Mercy hospital.

TEACHERS RESIGN

The school board at McIntire in Mitchell county faces an unusual situation this spring, with the resignation of the entire school faculty of seven teachers. There was no trouble; it "just happened" that each of the teachers, from the superintendent on down, has made other plans for the coming year.

3RD ADJOURNED APRIL MEETING

Garner Iowa
May 5, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with F J Schoun, John Chambers and George Th Gerdes, present

The minutes of the last meeting were read and approved as read.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D D. No. 9, Lateral No. 1.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D. D. No. 54

This being the 5th day of May a date heretofore fixed for a letting on the construction of D. D No. 145, Hancock County, Iowa, the hour for said letting having arrived, the proof of publication being on file and the board being fully advised, said letting was held as scheduled. The chairman of board proceeded to open all bids on file and after duly considering all bids on file the bid of Schram Bros of Titonka, Iowa, was found to be the lowest and best bid on labor and the bid of Concrete Products Corporation of Humboldt, Iowa, is the lowest and best bid on material.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of D. D No. 145 that the bids of Schram Brothers of Titonka, Iowa, for labor and the Concrete Products Corporation of Humboldt, Iowa, for material are hereby accepted as the lowest and best bids for the construction of D. D No. 145, Hancock County, Iowa. All other bids are hereby rejected.

BE IT FURTHER RESOLVED THAT contracts are hereby awarded to Schram Brothers of Titonka, Iowa, and Concrete Products Corporation of Humboldt, Iowa, and Chairman John Chambers is hereby authorized to execute said contracts in behalf of Hancock County, Iowa.

C. F Merten is hereby appointed construction engineer as commanded in section 455.89, Code of Iowa, 1946, and iawa amendatory thereto.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by Supervisor Gerdes whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, George Th Gerdes and John Chambers, aye Nays none. Whereupon the chairman declared the resolution duly adopted

This being the 5th day of May a date heretofore set for a hearing on the report of the Engineer and the final estimate on D D No. 143, the hour for said hearing having arrived, the proof of publication being on file and the board being fully advised, said hearing was held as scheduled

It appearing that there is a hole on the main tile which needs repair, said hearing is hereby continued to 10:30 A M, on the 19th day of May, A D., 1947, to enable contractor to complete the repair necessary for the acceptance of said contract.

On motion and second the board adjourned to the 8th day of May, A. D., 1947, at 9o'clock A. M.

JOHN A. CHAMBERS,
Chairman.

ATTEST: FRED C MISSAL,
County Auditor.

4TH ADJOURNED APRIL MEETING

Garner, Iowa
May 8, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with Supervisors F J Schoun, John Chambers and George Th. Gerdes present.

The minutes of the last meeting were read and approved as read.

On motion and second the contracts with Schram Brothers, Titonka, Iowa, for labor on D. D. No. 145 and with Concrete Products Corporation, Humboldt Iowa, for material, on D. D. No. 145 are approved.

On motion and second the bond of C. F Merten, Construction Engineer, on D D. No. 145, is approved

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 1 and 2, lateral No. 1

Supervisor John Chambers is appointed a committee to investigate and cause repairs to be made in D D No 58

On motion and second a right of way agreement with Mrs. Charsty Anderson on the West 41 feet of the South 2060 feet of the Northwest quarter of section 24-96-26 and West 41 feet of the North 100 feet of said Northwest quarter of Section 24-96-26 is approved and Chairman John Chambers is hereby authorized to execute said agreement in behalf of Hancock County, Iowa.

This being the 8th day of May, A D., 1947, a date heretofore fixed for a letting on the casting, blading, end haul, and incidental on trunk and local roads in Hancock County, Iowa, the hour for said letting having arrived the proof of publication being on file and the board being fully advised, said letting was held as scheduled. The chairman of the board proceeded to open all bids on file and after duly considering all bids on file the Board finds the bid of Buns and Son of Woden, Iowa, on section 1, and the bid of Harry Rehm, of Garner, Iowa, on section 2, and the bid of Clair Nelson on section 3 and 4, are the best bids on file.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the bids of Buns and Son on Section 1, the bid of Harry Rehm on section 2, and the bid of Clair Nelson on sections 3 and 4, be and the same are hereby accepted as the best bids for the casting, blading, end haul and incidentals in said sections. All other bids are hereby rejected

BE IT FURTHER RESOLVED THAT John Chambers, Chairman, be and he is hereby authorized and ordered to execute contracts in behalf of Hancock County, Iowa with Buns and Son on section 1, and with Harry Rehm on section 2, and with Clair Nelson on section 3 and 4.

On motion and second the Board adjourned to May 12 at 9 o'clock A. M

JOHN CHAMBERS,
Chairman

ATTEST: FRED C. MISSAL,
County Auditor.

6TH ADJOURNED APRIL MEETING

Garner, Iowa
May 10, 1947

The Hancock County, Iowa, Board of Supervisors met in session pursuant to adjournment on above captioned date with Supervisor F. J Schoun, J. A. Chambers and George Th. Gerdes, present.

The minutes of the last meeting were read and approved as read.

On motion and second the contracts for grading Hancock County roads with Harry Rehm, Buns & Son and Clair Nelson as approved by the State Highway Commission are approved.

This being the 10th day of May, A. D., 1947, a date heretofore fixed for a continuation on the final hearing on D. D. No. 143, the hour for said hearing having arrived and the board being fully advised, said hearing was held as scheduled.

It appearing that a hole on the main tile needs a repair and Engineer Henschen estimates the sum necessary to make said repair, is $15.00.

BE AND IT IS THEREFORE RESOLVED that the County Auditor be and he is hereby directed to withold $15.00 from the final estimate due Joe Needles on contract to construct D. D. No. 143 until said repair is made. The balance of said estimate is ordered paid as by law directed and the report of the engineer approved.

This being the 19th day of May, A. D., 1947, a date heretofore fixed for a letting on the construction of 13 wooden bridges to be constructed on Hancock County roads during summer of 1947, the hour for said hearing having arrived, the proof of publication being on file and the board being fully advised said letting was held as scheduled. The chairman of the board proceeded to open all bids on file and after duly considering all bids on file, the board does find the bid of Leo Becker to be the lowest and best bid therefor.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, that the bid of Leo Becker be and the same is hereby accepted as the lowest and best bid for the construction of 13 wooden bridges on certain Hancock County, Iowa, roads. All other bids are hereby rejected

BE IT FURTHER RESOLVED that Chairman John Chambers be and he is hereby authorized and ordered to execute a contract with Leo Becker for the construction of said bridges.

On motion and second the board adjourned to June 3d, A. D., 1947, at 9 o'clock A M

JOHN CHAMBERS
Chairman.

From where I sit ... *by* Joe Marsh

Want to Run a "Collective" Farm?

Was reading the other day about the "collective" farms they have in certain countries. It seems the folks who run them have plenty of help . . . good hours . . . and the best equipment.

Sounds pretty nice—till you learn that the "farmer" doesn't own his land, or even farm it, in our sense. He takes orders from the state; produces whatever they want him to produce, at prices they set. Even his off-hours are spent according to state regulations.

No, that would never go here. We're willing to work hard, but we like to farm the land our own way, put our own value on the crops, and relax as we like—if only with a temperate, companionable glass of beer.

From where I sit, collective farming may produce results. But the American way—freedom to work and relax as we see fit—is what makes this country a great place to live. So let's not change it!

Joe Marsh

OFFICIAL COUNTY PAPER

THE KLEMME TIMES

Volume 52. KLEMME, IOWA, JUNE 4, 1947 Number 29.

County Auditor's Daughter Bride In Church Ceremony

OROTHY A. MISSAL BRIDE F DEAN KLOOK AT BRITT

Miss Dorothy A. Missal daughter of Mr. and Mrs. Fred C. Missal, and Dean S. Kloock, son of Mr and Mrs. Otto Kloock, were married at the Fisrt Lutheran Church in Britt by the pastor, the Rev. John Mohr, May

The couple was attended by Mrs. Don Missal of Mason City, matron of honor, and Joseph Boeft. Bridesmaids were Miss Barbara Anne Williams, Garner, and Miss Bobby Mostrum of Mason City Kenneth Lubben, LeMars, and Luvane Stott of Mason City, the former a cousin of the bride acted as ushers. The flowers girls were Diana Hicks, Crystal Lake, and Sherry Steenhard, Britt. Candlelighters were Colleen Fritz, Mapletown, Minn., and Gene Steenhard, Britt, both cousins of the bride. Nuptial music was played on the pipe organ, a gift to the church from the bride's paternal grandfather, the late Fred Missal, by Mrs. Arthur Musgjerd. Don Missal, brother of the bride, sang, accompanied by Mrs. Musegjerd. The bride, who was given in marriage by her father, was attired in a white satin dress fashioned with a train. She wore a fingertip veil held with a tiara of net and pearls and a gold necklace, a gift from the bridegroom. She carried a single white orchid with satin shower in a white Bible

A reception was held in the parlors of the church immediately following the ceremony. Hostesses were Mrs. W. G. Williams, Colleen Fritz, Margaret Prull and Dolores Steenhard.

The bride is a graduate of Garner high school, attended Waldorf, Drake and Luther colleges and taught in the Hayfield and Crystal Lake consolidated schools

The bridegroom graduated from Garner high school and attended Iowa State college. During World War II he served several years with the armed forces, a part of the time with the army of occupation in Germany and Austria. He is employed in the Osceola Co-Operative Creamery at Sibley.

Following a short wedding trip Mr. and Mrs. Kloock will make their home in Sibley.

MR. AND MRS. KLOOCK

KLEMME YOUNG MAN WEDS GIRL AT GREEN BAY, WISCONSIN

Rev. and Mrs Calvin Grosshuesch, Gertrude and Edward left last Friday for Green Bay, Wisconsin to attend the wedding of Calvin Grosshuesch, Jr., son of Rev and Mrs. Grosshuesch, and Miss Vivian Jubert.

Mr. and Mrs Calvin "Bill" Grosshuesch are now residing in Cedar Falls where both are attending Iowa State Teachers College.

Rev. Grosshuesch and family returned to Klemme Sunday evening Grandma Grosshuesch, who accompanied them, remained in Wisconsin for a visit.

BRIDGES FAMILY REUNION HELD SUNDAY IN KLEMME HOME

The Bridges family reunion and picnic which was planned to have been held in the Klemme Park Sunday, was held at the Orville Bridges home instead, because of the cool weather

Those present were Mrs. Herman bridges; Mr and Mrs. Elmer Beier and family of Liberty township, Mr and Mrs. Orville Bridges and daughters, Mr and Mrs. Glen Bridges and childen, Mr. and Mrs Cecil Bridges and children; Mrs. Paul Stille and daughter, Barbara, and Miss Irene Bridges, of De Ridder, La., and Mrs. Walter Drake and daughters Marlene and Annette of San Diego, California

All enjoyed a fine time visiting and it was the first time in several years that all of Mrs Herman Bridges's children had been together.

Newlyweds Honored

Mr. and Mrs Walter Gast were honored at a dance and reception held at the Community Hall Thursday evening which was attended by a large crowd The young couple received many nice gifts from their friends

Ernie Henschen's New Building Nearly Complete

The double garage south of the Roths Cafe being built for Ernie Henschen is about completed. The building, 22 x 28, constructed of building tile will house both of Henschen's oil trucks and will provide storage space for merchandise.

No Baseball Sunday

The game between the Klemme Merchants and Clear Lake was called off Sunday because of rain. A double-header will be played later at Clear Lake

Granted Twenty Year Franchise

Voters at Wiota in Cass County held a special election on May 29th at which time they granted the Central States Electric Co. a 20-year franchise. The vote was 88 for and 12 against.

New Telephone Directories

The Times has completed the printing of the new 1947-48 directories and they are being mailed out to subscribers.

KLEMME MERCHANTS DEFEAT GARNER 9-1

The Klemme Merchants defeated the Garner Independents in the season's opener for the Garner team on the Garner diamond Friday afternoon 9-1. The Garner team committed 11 errors which were instrumental in the one-sided score.

Auchampach, on the mound for Garner, allowed 4 hits and Anderson, who relieved him in the seventh, allowed but 2 for a total of 6 hits for the Klemme merchants. Garner collected a total of 5 hits off the pitching of Brinkman, who went the route for Klemme.

HELLO, FOLKS!

Mr. and Mrs. Ardell Waddingham, who live north east of Klemme are the parents of a baby daughter, weight 5 lbs. 7 oz. born Wednesday, May 25th.

Mr and Mrs. George Smith are the parents of a 7lb. 10½ oz. baby boy born at the Mercy hospital at Mason City on May 23rd. They have named him Terry Dean.

The Smiths reside in the tenant house at the Mitchell Bock farm east of Klemme.

Marguerite Feller, Van Meter student nurse, ransacked the family attic on recent week-end trip home, and is showing Martha La Favre, Des Moines, Barbara Coffman, Keota, and Dorothy Moore, Lewis some of the baseball equipment that helped make her brother Bob, Cleveland Indian pitcher, famous

Miss Feller says "I like nursing about as well as Bob likes baseball, mainly because there is always a place for nursing, even if you don't go into active practice" Statistics show that about 85 per cent of nurses marry and find their training invaluable in the home

Klemme Residents Should Also Consider Fly Control

FLY CONTROL CAMPAIGN SAVED MONEY AT AMES

Any doubts about the effectiveness of a well-conducted fly control campaign ought to be dispelled by a look at the city of Ames, said Paul Henderson, county extension director, this week

Last year Ames tried a plan similar to the one now under way in Hancock County towns and liked it well enough that it is going to repeat the process this summer

Merchants were particularly pleased Many volunteered signed statements of the benefit which they had received from the campaign

"Absolutely no flies all summer It's the best thing we ever did," said Tom Constantine of the Rainbow Coffee Shop.

"A few flies get in when doors are opened, but all are soon dead. It saves fixtures and merchandise To us it was worth $100 but it only cost $20," volunteered Virgil McPherson of the Fareway Grocery.

Over at the Community Produce Company, Bert Ller testified, "This was one of the greatest and best programs ever undertaken by the Chamber of Commerce We wouldn't pass this up if the cost was $100. It eliminated our fly problem, which is a big one in this business."

T W Frazier at the Ames Hatchery had a similar story. "One spray inside gave perfect fly control," he said "We could have left the screens off"

A hog concentration yard furnishes a good test of control, but J. H Dodds of Walter Reynoldson & Co. thinks the DDT and clean-up program is the finest thing that can be done in his type of business.

"We left our screen door nailed open all summer, and had no flies to bother," he said At the Woodland Dairy, the fly control program got the whole-hearted endorsement of Mrs. E. E. McClure. "It cost us $25 and was worth hundreds of dollars in good will. Our place was much cleaner It saved us hours of labor," she reported.

"This is the first time I ever worked in a market without flies," added Ray Ller of the Community Market Grocery.

Thus it went, all up and down the business section of Ames. That's one reason the Extension Service and the State Department of Health decided to push a statewide campaign in Iowa this year.

It takes the co-operation, and effort, they discovered, but a fly-free town is well worth it.

"Let's plan to have our Hancock County towns fly free in 1947," says Henderson. Fly days are being planned in a number of towns Britt's fly day is June 10th, when is your towns fly day?

METHODIST BIBLE SCHOOL CLOSES WITH PICNIC JUNE 13

The Klemme-Liberty Methodist Bible School will come to a close next week Friday, with a picnic at the Liberty Church. A program will be given by the Bible School pupils in the Klemme church on Sunday, June 15th

The following are teachers in the Bible School: Rev. H. E Harvey, Mrs H. E. Harvey, Bernice Tanner, Mrs. Lee Ridder, Mrs. Wesley Patterson, Leona Lau, Mrs. Carold Larson and Marjorie Lau. Over 90 young people are enrolled.

Bible School Continues Through Month Of June

The Bible School started in the Garner Reformed Shurches last week, Monday. School is held each morning in the Peace Church and each afternoon in the Zion Church. The school will continue for four weeks during June.

Those helping Rev. R. D. Stubbe, pastor, teach in the Peace Church are Miss Judith Habercamp and Miss Roberta Goll; and in Zion Church Miss Eunice Ax. Fifty-seven young people are enrolled in the course.

LIGHTNING RODS

Lightning rods should be checked and gotten into serviceable condition, now that the thunderstorm season is here again, county extension director, Paul Henderson warns.

Air terminals, conductors, ground and metal connections need most attention. A survey conducted from 1934 through 1939 showed 36 percent of the metal connections inspected to be faulty. About the same was true with air terminals, conductors and ground connections.

"This is risky business when we consider that, as Farm Protective Institute figures show, show, nearly 30 million dollars worth of farm property is destroped every summer by fires started by lightning," Henderson points out.

Nearly all barn fires are started by either lightning or spontaneous combustion, he reports.

Immediate checking of lightning rods and connections, as well as cleaning up other fire hazerds will pay dividends.

It's no trouble to STOP a fire that never STARTS, but it's not so easy the other way around.

AROUND IOWA

TO AFRICA

In Albia recently, Rev. and Mrs. Robert D. Hunt were consecrated to foreign mission service and will sail soon for Freetown, South Africa. Rev. Hunt is a native of Albia

ESCAPED IN JEEP

The army's famous "jeep," which won the war but figured in many military accidents, nearly claimed six lives at Clarinda last week. A staton wagon overturned, crushing the top. The car had to be lifted off the occupants.

TRUCK LIT UP

A city streets department truck got all lit up at Storm Lake recently. The vehicle was loaded with lighted salamanders (flares, not lizards, that is) which were being distributed to various spots around town. One of the flares upset and the burning oil spread over the truck bed: The truck was saved.

DOESN'T PAY

At Charlton, Fred Keeney has decided that slugging the sheriff doesn't pay. Keeney objected when Sheriff Paul Laing took a bottle of whiskey away from him on the streets there last week and swung his fist with good effect, knocking out five of Laing's teeth. Keeney has been bound over to the grand jury.

WHITE CROSSES

In Kossuth Couty, Hagg Post of the Legion is erecting white crosses at the scene of all fatal accidents. Two of the signs, covered with aluminum paint for better visibility at night, went up last week.

CARS FAULTY

Highway officials made a spot check of traffic in Waverly for two days recently and found 138 cars to be faulty from standpoint of public safety. Approximately one out of every four cars needed work done on it.

LOST RECEIPTS

At Marathon, Wayne Butler, oil station attendant, made no profit on his last customer of the day there recently. A chap who came in to inquire about candy bars hit Butler on the head, brandished a pistol and made off with $140.

FOUND BILLFOLD

A billfold, found on a battlefield in Sicily after the owner had been killed, was returned to the dead warrior's parents at Red Oak last week. Mr. and Mrs. Guy Baker remembered the billfold which had been carried by their son, Everett, prior to his death. It contained his motor vehicle operator's permit and a good luck piece he had acquired before leaving the states.

STOCK TANK

The stock tank claimed the life of another Iowa youngster last week. At Rock Valley, little Wanda Wesselink, 18 months old, fell into a stock tank and was drowned while playing in the farm yard.

RUINED TULIPS

Pella, nationally famous for its tulip festival, is looking this week for a culprit who came along in an anutomobile and "mowed down" one of the city's best tulip beds with a stick. Whoever did it, with the tulip festival only a week away will probably get "life" if Pella catches him or them.

FALLS FROM TREE

Like all boys, Neil Kleinmeyer, Williamsburg, likes to climb trees. One day last week, while climbing a tree, Neil fell, hitting the edge of a house roof and falling onto the sidewalk. The boy suffered a possible skull fracture and will not be doing any tree climbing for some time.

EFFIGY

James Hinman and Eugene Dull of Monona got quite a shock one night recently about 11 p. m. when they found what appeared to be the body of a man hanging from a street light bracket. They broke all speed records getting up town to call the officials, who found that the corpse was nothing but a dummy. It was "cremated" the next day.

Hancock County 4-H Girls Will Hold Rally Day

League Schedule

Home Games:
June 15, Rockwell
June 29, Hansell
July 13, Hampton
Aug 3, Latimer
Aug. 17, Popejoy

Games Away:
June 8, Latimer
June 22, Popejoy
July 20, Geneva
July 27, Clear Lake
Aug. 10, Rockwell
Aug. 24, Hansell

NO BARGAIN

Charles Feldman, Cascade farmer, had opportunity to get a real bargain in a used car recently and paid one Henry McDill $1,000 for a delux Ford sedan with less than 25,000 miles on it. Later developments has brought out that the car had been stolen in St. Louis and the Iowa license plates and registration stolen from Wapello. McDill has not been located.

HALF CENTURY

Dr. F. W. Kiesau of Postville will observe the 50th anniversary of his enterance into the medical profession on May 29 Dr Kiesau has practiced 33 of the 50 years in Postville. Associated with him now is his son, Dr. F. M. Kiesau.

SKUNK ATTACK

Mrs. R. C Roupe of Story City was attacked recently. She was carrying a basket in her yard and hit the animal with it, rolling it over, then ran into the house

The skunk has been reported in the town and warning has gone out to kill it, as it might have rabies.

COCKLEBURS NOW MAY POISON PIGS

Reports Coming in of Losses From Eating Of Young Plants Or Sprouts

Cases of cocklebur poisoning of pigs are being reported, especially in southeastern Iowa, K. W. Stouder, Iowa State College veterinarian, said this week.

From now on until midsummer Stouder says there will be danger of poisoning if pigs are allowed to run in fields containing sprouting cocklebur seeds.

"Cockleburs, from the time they are about sprouted until they are about 2 weeks old, are tender enough for hogs to eat, and that's when they are the most poisonous. Hogs are hungry for something green about then too, and can quickly pick up a fatal dose of poisoning," Stouder says.

Symptoms

Symptoms of cocklebur poisoning are stretching, weakness, rapid breathing and usually spasms Death generally occurs within 24 hours.

Little can be done to save a poisoned hog. An ounce or two of melted lard, or some type of oil, poured into the mouth if the pig can swallow, may help sometimes.

The best remedy Stouder can give is too keep the hogs out of fields containing cockleburs until the burs have passed the two-leaf stage. By then they will be tough enough that hogs will leave them alone.

Danger Spots

Look for cocklebur sprouts in the mud of receding ponds.

Muddy depressions in barnlots and along ditch banks are also places cockleburs can usually be found growing, Stouder says.

Cocklebur seedings have slender, straight, whitish-green stems with two strap-shaped leaves on top. They grow in scattered formation and look like a mass of young grass shoots.

4-H GIRLS RALLY DAY SET FOR JUNE 10

The 4-H Girls of Hancock County will stage their annual Rally Day at Duncan Tuesday, June 10. Mrs. Helen Morling of the Iowa State College Extension Service will assist the county 4-H committee local leaders and girls with their program.

The activities will start with registration at 10:00 A. M.

Mrs. C. J. Wille, county chairman, will start the formal meeting at 10:30. Miss Ruby Schram is in charge of group singing. Picture studies, election of the county officers will all take place before noon. A planned luncheon will be on deck at noon.

The afternoon program will include remarks by County Extension Director, Paul Henderson, County Organization Director, Chas. F. Jackson, and skits by the various local clubs, installation of new officers and remarks by Mrs. Morling. Every 4-H girl leader and parent should attend.

Thirty-One 4-H Boys and Girls Attending District 4-H Camp At Clear Lake

Thirty-one 4-H boys and girls are attending the district 4-H camp at Clear Lake, scheduled for June 3-4-5 Three local leaders, Ramond Hobbs, Crystal twp., Mrs. Elmer Jante and Verle Brown, Garfield twp, Mrs. C. J. Wille, county 4-H girls committee chairman, and Paul Henderson county extension director, are accompanying the 4-H groups at hte camp. They are as follows: La Vaune Verlo, Rudy Pihl, Eldon Schutjer, and Herman Limberg, Bingham twp; Beverly Habercamp, Gloria Haefner, and Norman Stromer, Liberty twp; Harriet Ostendorf, Avery twp; Beverly Mewes, Marjorie Nelson, David Smith, and Duane Jordanger, Amsterdam twp; Mercedes Formanek, and Eleanor Jakoubek, Madison twp; Ailene Oxley, Carolyn Campbell, Leland Davis, and Bob Weston, Magor twp; Lois Gatch, and Betty Hejlik, Britt twp; Fred Korte, Jr. and Marvin Schauf, Crystal twp; Maynard Dorow and Carroll Hall, Concord twp; Bennis Thovson, Ellington twp; Glenn Wille and Alan Anderson, Ell twp; Violette Eisberg, Velma Johnson, Edwin Chizek, and Raymond Prohaska, Garfield twp.

BORAX SAFE TO USE ON MANURE AS FLY CONTROL

A borax treatment for the farm manure pile will do a lot to keep down the fly population around the farm and it can't harm your poultry.

Asked if chickens would be harmed by scratching in manure piles treated with borax, Harold Gunderson, Iowa State College entomologist, said "Absolutely not."

He pointed out that borax will stop the breeding of maggots which the chickens seek as food. That will discourage them from gathering around the pile in the first place. Anyway, the borax can't hurt them, Gunderson said.

He thinks there is a remote possibility that a large application of borax might hurt the soil when the manure is spread in the fields. However, at the recommended rate of an ounce of borax to a bushel of manure Gunderson believes that neither chickens nor soil will be harmed.

DDT can also be used to treat manure piles and will not cause harmful effects to either poultry or soil, Gunderson said.

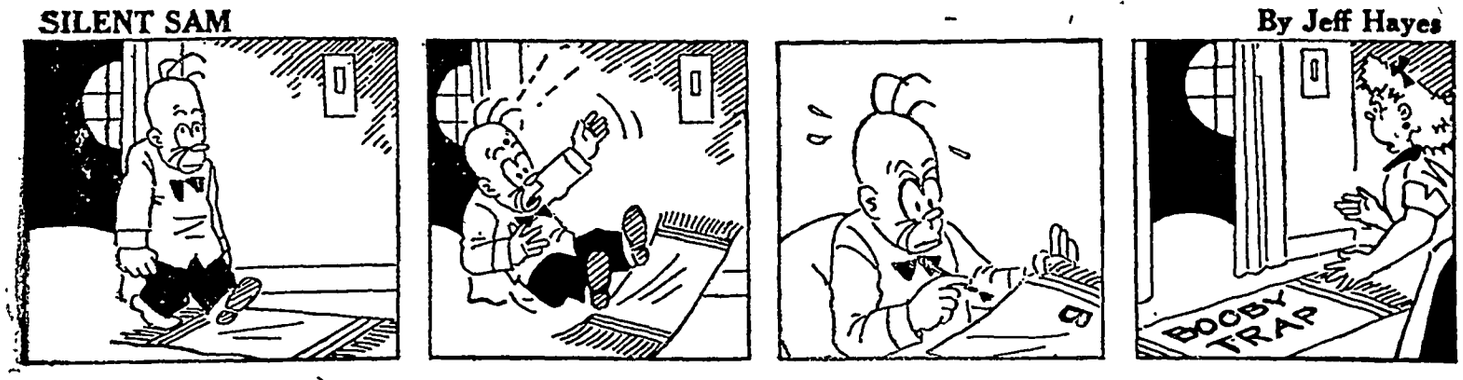
SILENT SAM — By Jeff Hayes



The Perfumed Circus

We have made our inspection of the 1947 circus and here is our verdict It is colossal, stupendous and spine-tingling, but it smells too good.

—•—

The trend has been on for a decade now and the greatest show on earth while more death-defying, breath taking and sensational than ever, has been so beautified, prettied, embellished and glamourized, air conditioned and perfumed that the smell "so dear to the heart of my childhood" has been removed. And it's too bad

—•—

A circus should smell like a circus. We have been a circus addict from the age of six up. In our childhood you could smell a circus as it pulled over the hills into town. There was no smell so distinct, so overpowering, yet so pleasant. And it smelled in all departments, not just in the camel, seal and elephant areas.

—•—

In case you couldn't get to the circus lot you could got out on the porch, take a deep breath and feel that you were present. But now all is changed this season more than ever They finally have got the circus where it smells sweet and looks clean We are glad it didn't happen sooner

—•—

The circus to be correctly catalogued now falls somewhere between such things as a Rodgers and Hammerstein musical, a superman broadcast, a beauty parade and a child's dream of a wild night in the Roman coliseum, with Nero permitting Hans Christian Andersen to come on the program as a guest artist.

—•—

But we saw it at Madison Square Garden, N Y. On the road it may get its odors back and its costumes dirtied up. The trip to a circus in New York is a journey by cut rate drugstores, ham and eggeries, parking lots and honky-tonks A trip to the circus on the road is a journey across green pastures and over stone fences, with the scent of apple blossoms, home-cooked chicken pies and the fresh-turned earth. That's sumpin.

• • •

Super Sirloin

"Sirloin steak . . . $4."

That's what the menu appeared to say. We put on our glasses. It still seemed $4. We called the head-waiter. "What is this figure here, beside the steak item?" we asked.

"Four dollars," he replied.

"It is not a typographical error?" we asked.

"No," the head-waiter replied. "We had a typographical error here once and are very careful now. It resulted in something being listed at $2.75."

—•—

"Now this steak," we pressed. "There's nothing imported about it? It didn't come from a mine or an estate or anything"

"I think not, sir. Maybe you would prefer lamb chops."

"Back to the $4 steak," we shouted. "It wouldn't be from the cow that jumped over the moon, would it?'

"I am willing to admit our $4 steak is from a relatively minor jumper," said the waiter weakly. "Would you be interested in some fried eggs?"

"Be a man," we urged, "and tell me why any restaurant should charge $4 for a steak?"

"Don't you know there's a PEACE ON?' was the reply.

• • •

Well, Herb Hoover has got his name on that dam again. Mr. Ickes took it off in the early New Deal days. He renamed it Boulder dam after first making sure there was no Republican of prominence named Boulder. Now justice has been done and it is Hoover dam again. We think the ex-president must feel pretty good. It is hard to get anything back these days, and to get a great dam back is quite a trick:

• • •

The army air colonel who was convicted of stealing the Hesse crown jewels has been sentenced to 15 years in prison. On the "rock" pile in other words.

—•—

We have always contended that the colonel may have taken too literally the wartime appeal to leave no stone unturned in the destruction of Germany.

• • •

Set 'Em Up!

It is just possible that Harry Truman had that bowling alley put in to show he has something on the ball.

—•—

Speaking of the Presidential bowling alley we hear that the President has a recurrent dream that is quite wonderful. He dreams that he flings a ball down the alley at terrific speed while Henry Wallace has his thumb caught in it.

Sealing Leaks in Dam

Several leaks that developed in the cofferdam of the Grand Coulee dam in 1937 were sealed with bentonite, a soft porous volcanic ash that, when moistened, rapidly swells into hard compact clay 15 times its original mass.

GEM OF BEAUTY . . . Once a fiery volcano, Crater lake in Oregon now ranks as one of the beauty spots in national parks of the West. The lake, which gives the park its name, is the deepest on the North American continent; its color is a mysterious blue. Sheer sides rise 1,000 to 2,000 feet to the rim from the lake surface. Llao rock, on the rim of the lake, is shown in this picture, with Mount Thielson in the background.

NATURE'S HANDIWORK

Pacific Coast Parks Show Results of Volcanic Action

WNU Features.

Volcanoes have been a dominant factor in shaping the American landscape, especially in many parts of the West. Three of the major volcanic exhibits of California, Oregon and Washington have been incorporated into the national park system.

It was 40 years ago that Theodore Roosevelt, using the authority granted by congress the preceding year, established Lassen peak and nearby Cinder Cone as national monuments. Five years later these two attractions of nature were incorporated into Lassen Volcanic National park, containing 103,269 acres.

The greatest single distinction of the park is the fact that it contains the only recently active volcano in the United States. Starting May 30, 1914, a series of eruptions continued until February, 1921. Most spectacular in the seven-year-long series were the 1915 eruptions, which were accompanied by extensive flows of hot lava. These created the "devastated area," which still ranks as one of the park's points of principal interest to tourists.

National Parks Fourth In a Series

The great cone of Lassen peak rises 10,543 feet above sea level. As does the "devastated area," the Cinder Cone, which was last active about 100 years ago, and its immediate surroundings are almost wholly devoid of vegetation.

Underground fires have been active in this region for a long time and they have exerted their power in a variety of ways. This is suggested by Bumpas Hell, a colorful hot springs area, Boiling Springs lake; Red Cinder Cone; Crater peak, and the privately owned sulphur works, which lies within the park.

* * *

AT CRATER LAKE National park, in southern Oregon, on the crest of the Cascade range, is presented the spectacle of a lake of deepest blue in the crater of Mount Mazama, an extinct volcano. Many geologists have concluded that the basin occupied by the lake, which has neither inlet or outlet, resulted from collapse of the volcanic cone of the ancient peak.

The lake is supplied with water by rainfall and snowfall as well as by spray which is blown into it from the rim. Collapse of the mountain's summit did not mean the end of its volcanic activity. Wizard island, a symmetrical cinder cone, was formed later and rises 780 feet above the surface of the lake. Covering an area of 20 square miles, Crater lake is six miles across, it has a shore line of 20 miles and the multi-colored walls of the crater's rim rise 500 to 2,000 feet above it. The park contains 160,290 acres.

* * *

THE HIGHEST OF ALL volcanic peaks in the western United States is Mount Rainier, 14,408 feet in elevation, which is the central and dominating feature of Mount Rainier National park. Although it has long been dormant, steam still issues from vents on its summit, and several hot springs are found nearby at the picturesquely named Ohanapecosh hot springs.

From the lofty central cone radiates the greatest single-peak glacier system in the United States, with 26 active rivers of ice. On of these, the Emmons, which starts from the summit of ice and snow fields, is 5½ miles in length, the longest glacier in the United States. Most of them extend far below the timberline.

John Muir, who perhaps did as much as any one person to further the spread of the national park idea, considered the wildflower fields of Mount Rainier the finest he had ever seen in all his wanderings throughout the mountains of the West. The most extensive and colorful displays are found in the mountain "parks" which lie between the long rivers of ice and above the dense forests which clothe the lower elevations of the park. The forests themselves, virgin stands of gigantic Douglas fir, western red cedar and western hemlock, are a distinguished feature, particularly attractive to eastern and midwestern visitors.

* * *

ALL THREE of these parks are almost as popular during the winter as in summer. All of them have very heavy snowfall and all have open slopes that offer the skier every variety of skiing experience, which extends into late spring and even early summer. Roads are kept open in each park to permit winter sports enthusiasts to reach them, although the expense of plowing out the roads after every snowstorm is rather high.

* * *

IN LASSEN Volcanic National park there are public accommodations near Manzanita lake, close to the northwest entrance of the park. At Crater lake, similar accommodations are situated within a short distance of the rim. At Mount Rainier they are found at Longmire, about 2,750 feet above sea level, at Paradise valley, 5,557 feet elevation, and at Ohanapecosh hot springs in the southeast corner of the park. Public campgrounds, for which no fee is charged, are to be found at a number of points in each of these parks.

As in most of the other national parks, National Park service provides staffs of ranger-naturalists whose job it is to help the visitor gain a better understanding of the plant and animal life of the parks and of the geological phenomena found in them.

RIVER OF ICE . . . Nisqually glacier flows down the south side of Mount Rainier, focal point in Mount Rainier National park in Washington.

Realistic Acting

OGDEN, UTAH.—La Moine Wall, 15, was rehearsing for a school play, the script calling for him to be "knocked out" in a fight. He didn't get up when the rehearsal ended. He had bumped his head a little too hard when he fell to the floor. First aid treatment brought him around.

Animals Are 'Ears' for Deaf Woman

GOODING, IDA. — Deafness has proved no great handicap to Mrs. Janet Gooding, for she has Inky, a cat, and Impy, a dog, to serve as her "ears."

The amazing thing about the two animals is that they have been trained in the universal sign language of the deaf. There are no spoken commands in Mrs. Gooding's training. Her hands do the commanding.

No doorbell warns of impending visitors. When someone at the door presses a button, a red light comes on in the living room. If Mrs. Gooding doesn't notice it, Impy or Inky do—and notify their mistress. Impy awakens Mrs. Gooding every morning by patting the bed covers.

Mrs. Gooding, who lives alone, is self-supporting, working for the State School for the Deaf and Blind here. Her husband died in 1937.

The FICTION Corner

SITTING AT THE WINDOW

By RUBE GOLDBERG

ACE HAWKINS and Sam McQuade were discussing Grace Leland. Ace and Sam were the two roving philosophers of Milldale. The beautiful Autumn sunsets and the changing colors of the poplars entirely escaped their unimaginative attention. They asked nothing more of life than the privilege of peering lazily through doors and windows and making casual deductions about what was going on inside. That's how they happened to see Grace Leland.

"Gosh, that's Grace, all right! She looks faded," observed Ace.

"What's she doin' back here, anyway?" asked Sam. "That's what I'd like to know. She don't see nobody but the butcher boy and Chic Myers, the postman."

"The way she used to traipse around I thought she'd grab herself a millionaire or something'."

"I calc'late she wasn't the sort to settle down. Fact is, I heard somewhere she's been leadin' a pretty fast life these last fifteen or twenty years. Been associatin' with stage people and such."

This Week's Best Fiction

"Then what's she doin' back here?"

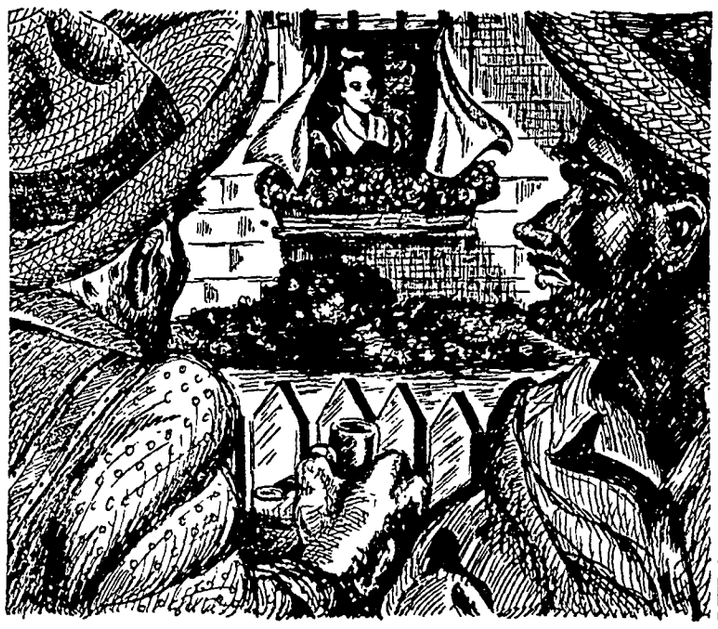
"That's what I'd like to know."

Ace spat on the sidewalk and screwed up his face in a knowing grimace. "Maybe she's waitin' for one of them rich fellers. Keeps lookin' out the window all the time."

"Let's mosey over to Chet's and get a cup of hot soup. Gets kinda cold waitin' around for somethin' to happen."

Grace had come back to Milldale after an absence of eighteen years and had rented a room in a small white house next to the drug store. Her friend, Thomas Slater, would soon return from Europe and then she would not have to hide any more. Meanwhile, it was very quiet in Milldale.

As she sat at the window she thought of her son's brown wavy hair, the slight tilt of his nose and his six feet of muscle and sinew. She was desperately anxious to make up for the fact that a headline-making divorce case had smashed the Leland home and left sensitive young David deeply hurt and fatherless. Her love for him was not a sufficient answer to the questions of his classmates who wanted to know about the big, black headlines and his folks. She must give him all the wordly things the other boys had—and more, too. Sweaters, pictures for his room, an electric phonograph and tails. She sent him an overstuffed chair. And cakes and a set of evening studs. It was all simple and exciting until David said he wanted a car.



"What's Grace doing here?" asked Sam. "She keeps lookin' out of the window all the time."

DAVID must have a good car in which his friends could ride and sing and forget to ask questions. Once David had made the request she knew it must be granted. She must keep giving until she made up for the one thing that was lacking.

She found herself more and more noticing automobiles on the street. Some were well-proportioned. Some were clumsy. Some drivers steered easily and naturally. Others drove as though they were the lineal descendants of the fool Icarus who scorched the aborigines of Africa with his celestial juggernaut. David would drive gracefully. David was David.

She looked in a large display window on Broadway and saw the car. A long, light-blue sedan with the smooth curving sides of a yacht and a tan collapsible top all fresh and youthful and clean like David. But the price was three thousand dollars!

There was only one person to whom Grace Leland could go for three thousand dollars. Thomas Slater had been her friend since the days when no massage was required to smooth out the puffy little bags under her eyes. She called up Thomas Slater's office and was told he had gone to Europe.

Grace looked at her thin wrist where once dangled a wide diamond bracelet. If only she had that bracelet now. She went around to the display window on Broadway and again looked at the long, sleek, light-blue sedan with the collapsible tan top. She saw David at the wheel. She saw him driving places where he could meet the fathers of his friends and feel the bracing contact of a masculine arm around his shoulder. Each time she went back to look at that car she was fearful it might have been bought by another mother for another David. A rash resolve was born of her desperation. She knew what she would do.

She studied the signatures on the many letters Thomas Slater had written her. Then she signed his name to a check for three thousand dollars.

It wasn't forgery because she felt she could explain everything to Slater when he returned from Europe. There couldn't be anything wrong about what she was doing.

When she received David's letter telling her she was the grandest mother in the world for buying him the most beautiful car in the world she choked up with emotion. She decided to go quietly to Milldale to await the return of Thomas Slater. He would understand.

Grace Leland was looking out of the window, absently musing over the boy and the car. Ace Hawkins and Sam McQuade stood on the sidewalk. A man walked up the front stoop of the little white house and tried the door. It was open and he walked in.

GRACE opened the inner door and saw the man in the hall. She thought it strange he did not remove his hat. "Are you Grace Leland?" he asked abruptly.

"Why, yes," she answered not quite prepared for the interrogation.

"Well, here's my badge," he said, pulling aside his outer coat. "I'm from headquarters. You forged the name of Thomas Slater to a check for three thousand dollars and cashed it at the Textile Bank and Trust Company. I'm afraid you'll have to come along with me."

Grace's face went white. It could not possibly be as serious as all that. The man just didn't know what he was talking about. "This is a terrible mistake," she almost screamed. "I had to sign Mister Slater's name to the check. There was nothing else to do. He will straighten it all out when he returns from Europe. He has often loaned me money. He's a fine, sweet gentleman. Why, why, Mister Slater and I used to be—"

"Madam, save your breath. Mister Slater died in London last week and the bank has taken charge of his affairs." The man put his hand in his coat pocket and Grace heard a metallic rattle.

"Look," said Ace Hawkins. "Here they come out together."

"And holdin' hands," too, chuckled Sam McQuade. "Same old Grace."

Why Not Have More Things

Three persons called on me last week, all with the same problem. Two were women, the third a man.

What all wanted to know is how they could get more out of life.

Neither of the women could play or sing. Neither could swim. The older woman couldn't dance. The man confessed he was a humar "dud"—as he put it.

To each I told the same story—the story of Alexander Graham Bell, the man who developed the telephone. Mr. Bell called one day on his friend Joseph Henry, secretary of the Smithsonian Institution in Washington. His purpose was to lament the fact that he was being held back in his work by a lack of knowledge of electricity.

With two words Mr. Henry disposed of that lament and put Alexander Graham Bell on the road to his great renown and riches, for he said, "Get it."

There's no such thing as an ideal personality or a successful person unless that personality or person is accomplished.

If you want to improve yourself you have to become more accomplished. Learn how to do everything; swim, dance, fish, ride, row, talk about stamps and flowers and books and music and art. Let no subject be entirely foreign to your life and knowledge.

You don't have to be a champion or an expert at any one thing. You don't want to be a champion. It's far better to be a third-rater in half a dozen fields than an expert in only one.

MAY NEED SEDAN GRASS FOR SUMMER THIS YEAR

Sudan grass will play an important part in supplying pastures for livestock this summer, predicts M. L. Peterson of Iowa State College.

Because grass was slow in growing this spring and stock was turned on before it was sufficiently matured, permanent pastures will show damage this summer. Therefore temporary grasses must be used heavily to supply summer pasture, Peterson thinks. He recommends sudan because it is the highest midsummer producer.

Sudan should be seeded from mid-May to mid-June on land which has had the same preparation as for corn. Seeding rates of from 15 to 25 pounds per acre are recommended. Peterson warns farmers that there may be some scarcity of good seed this spring. Partly because of the drouth and also because low prices discouraged production the past few years, seed may be hard to find this year if growers wait until planting time to locate their supply.

Fertile soil, prepared and seeded as recommended, will support two cows to the acre throughtout the summer, Peterson reports. This is better than any other temporary pasture crop, and is far above bluegrass for summer.

Peterson says best results are obtained when the sudan is allowed to grow to 18 inches before turning on stock. Waiting until then will give the greatest production returns and will eliminate the danger of prussic acid poison.

A new variety, called "sweet sudan," is showing great promise in Iowa. Sweet sudan, which was developed by the Texas Agricultural Experiment Station is a cross between sudan and Leoti (a variety of sweet sorghum). Seed is available in only limited quantities n Iowa.

The grassy characterstics of sudan grass have been coupled with the sweet, juicy stem, non-shattering seed and disease resistance of Leoti to produce what may become an even better midsummer grass than our present sudan, Peterson thinks.

PROTECT EARLY-PLANTED CORN FROM CORN BORER

Get ready with DDT if you planted your corn before May 15 or after May 25. That's the advice of Harold Gunderson, Iowa State College entomologist.

Corn which goes into the ground between May 15 and May 25 usually stands the best chance of escaping damage from the corn borer, according to Gunderson. So farmers who planted corn just a little later than usual this year may find they picked the best time.

He says the first brood of corn borer moths in June finds the early-planted corn just about right to attack. The second brood of corn borer moths in August gets the lat-planted corn.

Gunderson says it would be a good idea to investigate a source of supply of DDT and place a tentative order. If it isnt' needed the order can be cancelled or the DDT stored safely in a dry place until it is needed.

Should the borer appear, the farmers will be ready to dust at the proper time to save the crop.

Reprint FS-155, entitled "Feed Corn Borers Poison," gives additional information on how to plan for protection this summer. The leaflet can be obtained by writing the Bulletin Office, Iowa State College, Ames.

KLEMME YOUTH HAS FINE RECORD AT MISSION HOUSE

"Bill" Grosshuesch, who has been a student at Mission House College, Plymouth, Wisconsin. the past year lets the Times in on a bit of good news regarding one of our home-town boys.

Allen Barz was elected president of the Beta Chi fraternity on May 12th and was installed on May 25th. Allen is also president of the sophomore class of the past year and played a major role in the spring production: "The Little Minister."

Allen has also been active in athletics at the college and is a major letter winner in both basket ball and track.

He is a son of Mrs. Clara Barz of Klemme.

SOME WEEDS ARE TOUGH FOR 2,4-D

Usually Will Not Kill Canada Thistle or Creeping Jenny In Year

Good as it is, the new weed-killer, 2,4-D, is not perfect.

Tests conducted at Iowa State College and elsewhere show that the chemical works well on some plants and poorly on others.

Strangely, it may do a good job against a certain weed in one part of the country, and fail against the same weed in another area. Different soils apparently make a difference in its effectiveness.

Poison ivy, killed by the chemical in Iowa, is not as easily killed in eastern United States.

Two of the worst weeds in Iowa are Canada thistle and the European bindweed (creeping jenny) Tests conducted by A. L. Bakke and E. P. Sylwester, Iowa State College plant pathologists, showed that two sprayings will kill about 70 percent of these weeds in the first year Two more sprayings the next year will give about a 90 percent kill. Experiments were carried on in patches where the weeds had been growing many years. The pathologists think a better kill might be obtained where the weeds had only started.

Cost Is Low

It probably will take more than two years to eradicate well-established weed plots, but it can be done in time, Bakke and Sylwester maintain. Even if it takes several years, the cost is low with 2,4-D, they point out. Besides it won't hurt you or the soil. It won't kill most kinds of grass. You could spray your pasture regularly without fear of hurting livestock.

In fields of small grain it may be possible to spray to hold back the bindweed plants and prevent them going to seed. Effect of such spraying on the germination of small grain seed has not been determined, however. The pathologists think it might be best to spray when the grain is 6 to 10 inches high rather than later.

May Injure Crops

Last year an oat field was sprayed when the oats were 12 to 18 inches high. Sprayed plots yielded 68 bushels per acre, and unsprayed plots 78 bushels. The field had many smartweeds in it, which in the unsprayed portions made harvesting difficult.

Another oat field infested with a lot of wild buckwheat, was sprayed when the oats were 12 inches high and the wild buckwheat was up about 3 or 4 inches. The grain harvested had no wild buckwhea t seed in it, and the yield was not cut by spraying.

Experiments on spraying weeds in corn have produced no definite results. Tests at Iowa State differ from those in other states. It does appear that if corn is not over 5 to 15 inches high it probably will not be hurt much by spraying. If the corn is growing fast, better not use 2,D-4, the plant pathologists warn.

The only real safe time to use 2,4-D on corn is after the ears have reached the milk stage.

Pitchforks can be dangerous. Carry them over the shoulder or stick them into the ground when they are not in use.

MUCH CORN WILL BE CARRIED OVER

That Is Because of Smaller Exports and Reduced Feeding Demands

A good-sized carry-over of corn from the bumper crop of 1946 seems likely, Iowa State College agricultural economists Carl Malone and Francis Kutish have concluded.

They say corn is not disappearing rapidly, and much of it probably will be on hand when the 1947 harvest rolls around.

Less Livestock

Additional exports may cut down stock somewhat, but the economists point out that export accounts for only a small portion of our corn outlet. By far the largest part is fed to livestock, and numbers are are lower than a year ago. Last fall's pig crop was 11 percent below that of the previous year. Poultry numbers are down slightly. We are raising fewer turkeys this year.

Will Affect Oats

From these figures, the economists believe that with normal crop prospects, pressure on corn prices will be downward as the crop season progresses. Oats, too, will be down if corn prospects are good, they say. This will happen in spite of the cut in oat acreage this spring.

RATION CALENDAR

SUGAR—Spare stamp No. 11, ration book 4, became good for 10 pounds of sugar April 1. Stamp No. 12, good for another 10 pounds of sugar became valid May 26 Another stamp will be validated not later than Aug. 1.

All stamps listed are contained in war ration book No. 4 and the new sugar ration book.

Stamp books to replace lost ones, for soldiers returned from service or for new additions to the family may be obtained by writing to the Office of Price administration, 700 Liberty Bldg. Des Moines.

Ell Township Farm Bureau Hears Talk On Library Service

The Ell Township Farm Bureau group at their monthly meeting held May 27 were informed of the library service available at the Garner library. This discussion given by Mrs R. J. Fritsch, librarian. Mrs. Addis Greiman gave a report of the Christmas seal sale. Musical numbers were given by Shirley Greiman, Patty Greiman, Doren and Doreen Lackore. Paul Henderson, county Extension Director showed a moving picture "Death To Weeds" and discussed the use of sprays in the control of weeds.

OUTCOME WATCHED

Automobile dealers, as well as prospective purchasers of new cars, are watching with interest a suit brought against the Creston Buick Sales Co. and General Motors Corp. Leo Kelly of Creston has brought suit against the two companies seeking delivery of a 1947 Buick car. Kelly claims that he holds a signed contract for delivery of a 1946 Buick. After the long delay in delivery, Kelly now asks that a 1947 car be delivered to him.

Star To Hold Initiation

The Eastern Star at Garner will hold their regular meeting on Tuesday evening, June 10th. The Initiation degree will follow the meeting and lunch will be served. All Klemme Stars are urged to attend.

Returns To Goodell

Mayme White returned to her home at Goodell last week from Lingle, Wyo., where she spent the winter with her sister, Mrs. Gordon Sherman. The Shermans brought her home in their car and spent a few days in Goodell.

Earl Kahlers Are Grand Parents

Mr. and Mrs. Earl Kahler, Garner, former residents of the Klemme community, received word of the birth of a daughter to Mr. and Mrs. Harvey J. West at Orchard, Minn., May 7. Mrs. West is the former Gladys Kahler.

Total corn supplies on April 1 were second largest on record.

Family Reunion Today

The annual Hartbeck family reunion was held today, Wednesday at Waverly, Iowa, with a large group of relatives from this vicinity attending.

Ladies Will Have Picnic

The Ladies Aid Societies of the Ell, Garner and Klemme Reformed Churches will hold their annual picnic on Thursday at the Peace Reformed Church north of Klemme.

Family Gathering Held

Mr. and Mrs. Harvey Barz and children joined thirty-five other relatives at the Ben V. Greiman home Memorial Day where they enjoyed a buffett picnic dinner together.

House Enclosed

The new house being built in Klemme by Frank Schultz south of Mrs. Lena Help's residence has been enclosed; shingled and part of the siding put on Asbestos shingles are being used for the siding.

Light Form of Mumps Provides Adult Immunity

Thirty per cent of the American people probably have had mumps without knowing it, the result being a high degree of immunity to epidemics of this common, but sometimes quite serious, disease of childhood, according to University of Pennsylvania and Harvard university medical scientists under a contract with the surgeon general's office of the army.

Mumps and measles usually are paired as childhood maladies. Each is caused by a specific filterable virus. Both diseases are very contagious. One virus presumably is as widely disseminated in the population as the other. Yet the studies show that about 33 per cent of young adults have a probable acquired immunity to the disease indicating some past infection of which they were unaware. One attack of mumps is believed to protect an individual against further attacks of the virus for the rest of his life. Statistical studies have shown that whereas about 90 per cent of the American population suffer from measles at some time or other only 60 per cent are victims of mumps.

The immunity of a person was determined by the so-called "complemenfixation" test of the blood serum with mumps virus cultivated in incubated chicken eggs, and also by a skin test with similar material. In this hidden reservoir of acquired immunity, mumps seems to bear some likeness to poliomyelitis, also a virus disease of children. It is believed that about 90 per cent of the population have had polio in a subclinical form at some time, with the result that they are permanently protected against it.

A Times Want Ad Brings Results

DHIA SUPERVISOR GETS FIRST-CLASS TRAINING

"For the man interested in sound, down-to-earth training in dairy management, a year or two working as a Dairy Herd Improvement Association supervisor is time well spent," says Lyle Jackson, Iowa State College extension dairyman.

Jackson points out that experience gained in working with dairy herds, keeping production and feed records, is excellent training for anyone planning to become a dairyman.

Opportunities for placement of supervisors are excellent, Jackson reports. While there are about 80 associations in the state at the present time, this is only about 75 percent of the number that could be formed were qualified supervisors available.

Periodic supervisors training schools are given tuition-free by the Dairy Husbandry Extension Service. The next training course will be held July 7-26, Jackson says.

Men interested in finding out more about this opportunity to learn dairying and earn a good salary at the same time should write Lyle Jackson, 202 Morrill Hall, Iowa State College.

Bond Sales Quota Set In Hancock County For 1947

Sales quota for United States savings bonds in Hancock county for 1947 has been set at $2,053,899 it was announced today by H. C. Armstrong, chairman of the county's savings bonds division. The state quota is $3,000,000,000.

Total sales of series E, F and G savings bonds during 1946 was $1,161,758 while redemptions were $576,367. However, during January, February and March of 1947, the county sales total was $619,174.00.

"Despite the increased ratio of sales, bank deposits in Iowa have increased by approximately 50 percent since 1945, and there is a dangerous surplus of money in circulation throughout the state," Chairman Armstrong said.

"During June and July a special sales campaign will be sponsored by the treasury department in an effort to channel this surplus money into safe investments in United States savings bonds. Recognized economists, bankers and agricultural leaders believe that investments in savings bonds is the most logical method of preventing further inflation in consumer goods, services and farm land prices."

"Never before has there been so many reasons for citizens to save and invest in United States savings bonds, and I should like to urge everyone in this counyt to buy extra bonds during June and July."

Mrs. Henry Medaus entered Mercy hospital at Mason City this morning for treatment. Mr. and Mrs. John Lemke accompanied her

CHARACTER, NOT SKILLS, MEASURE JOB SUCCE

How well a young pers succeeds at his job often may traced back to his parents a their concern about training hi in fundamental habits and cha acter traits.

Only 10 percent of you people lose their jobs because a lack of specific skills. T other 90 percent fail because "unfriendly" habits, a survey 1,000 young persons employed various industries reveals.

Chief reasons for their inabi ty to hold a job are carelessne non-cooperation and lazine In a similar study 75 perce failed in promotion due to po habits and personality trai Only 25 percent remained whe they were because their ski were deficient, which was t direct responsibility of schoo and educators.

While it is apparent from th that job failures are frequent to poor character traits it not as obvious to most peop that home and parents are mo responsible than the school for child's character developmen According to Mrs. Alma Jones, extension specialist child development, Iowa Sta College, that is the home's co tribution to education In th matter of habit building, paren are the teachers of greatest im portance; they are first and lon est on the job and have the ea liest and most intimate conta with children.

The home, which trains th child in the three H's—healt happiness and helpfulness, shoul determine right attitudes towa work and authority, responsibil ty, initiative and consideratio for others. All of these are trai essential to success in any occ pation.

TOO RAPID EATING CAUSES BLOATING

Cattle Need Fill of Other Feed Before Being Put On Legume Pasture

With the bloat season fast approaching, C Y. Cannon, Iowa State College dairy husbandman, warns farmers against turning hungry cattle directly into alfalfa or clover pastures.

Feeding grain, dry hay or silage before putting cattle on legume pasture will help prevent overeating and, in turn, bloat, experimental work at the college indicates.

Bloating apparently is entirely a physical problem It is caused not because sweetclover, red clover and alfalfa contain a "poison," but rather because cattle eat too much of these legumes in too short a time

Gas Always Forming

Regardless of what cows eat, hay, grain, bluegrass or legume pasture—gas is continually forming Normally, a cow through belching from time to time rids herself of the gas

But, in bloating, the theory is that a cow on succulent green legume pasture loads up so heavily and gas forms so rapidly that the opening of the esophagus into the rumen is closed and the gas can't get out—she can't belch

To help keep cattle from loading up too fast, Cannon recommends turning cows on grass pasture for half an hour or more before turning them on the legume.

Another aid is to let cows drink before going onto the legume, and if they have loaded up quickly, not to let them finish filling up with water after feeding.

Treatment

Bloated cows should be kept on their feet and moving if possible. Putting a bit in the mouth, in much the same way as in horses, aids belching Inserting a piece of smooth heavy hose in the mouth and carefully working it down the esophagus into the paunch, taking care to keep it out of the windpipe, helps the gas to escape After the gas has escaped, drench with a recommended antiferment and check with a veterinarian

If the cow is badly bloated and other methods fail, a trocar (or knife if a trocar is not handy) should be inserted in the left side at the highest point of the bloat. Do not remove the cannula covering the trocar (or rubber tube if a knife has been used) until all danger of bloat is past.

Salt, soda, lime and similar "bloat remedies" will not prevent bloat because they are too mild in their action. Remedies which are powerful enough to prevent gas formation interfere with normal digestion and should not be used.

Ell 4-H Boys and Girls Met At Oscar Greimans

The Ell 4-H boys and girls held their regular meeting Monday evening, May 26 at the home of Gloria and Jack Greiman. The boys discussed 4-H camp and appointed a committee to set up a program for the June Farm Bureau meeting in Ell township. The boys selected to attend the district camp were Glenn Wille and Doran Lackore. The boys also discussed the state 4-H boys convention.

A film "Death To Weeds" was shown by Paul Henderson, County Extension Director

FORMER KLEMME BOY MARRIES GIRL AT WATERLOO, SUNDAY

Miss Virginia Oren and Larry Van Syoc, son of Mrs. Roy Smock and formerly of Klemme, were united in marriage in a double ring ceremony in the Buron Avenue Baptist Church at Waterloo, Sunday, with the Rev. Wilbur Brook officiating.

The bride is a daughter of Mrs Grace Oren of Mt. Auburn, Iowa.

Mr and Mrs. Van Syoc are now at home at Sunset Village, in Cedar Falls, where the groom is attending Iowa State Teachers College.

DRIVE CHIGGERS AWAY WITH DUSTING SULFUR

Chiggers, those pesky bugs that sometimes turn the aftermath of a picnic into an orgy of scratching can be defeated

Harold Gunderson, Iowa State College entomologist, says that sulfur, dusted at the rate of a pound for every 50 square feet of ground, will keep chiggers away from your yard or favorite picnic spot.

One application should last a season unless rains are extremely heavy.

DDT won't kill chiggers, Gunderson explains.

RECORD PIKE

Carl Karlgeiler, 1527 N. Jefferson, Mason City, caught a 9 lb. walleye from a boat off the North Shore Tuesday morning about 8:30 A silver Prescott and minnow did the trick, and Mr Karlgeiler has the honor, for a time, of catching the biggest walleye to date this season.

Washington Picnic

The Washington Group held a picnic at the home of Mr. and Mrs. Lew Weaver Sunday afternoon Mrs. Eunice Kurtz was re-elected President and Mrs. Minnie Pensen was elected Secretary. A motion was made to hold our picnic the 1st Sunday in August at Clear Lake. Motion was made to adjourn.

They all brought well filled baskets for a picnic supper that was enjoyed by all.

Missionary Spoke At Klemme Church Sunday Evening

Rev. Armond Meyer, missionary of India gave several talks at the Klemme Evangelical and Reformed Church. Sunday evening he gave an address and on Monday morning spoke to the Bible School Monday evening he gave another talk before the Adult Bible Class. All of his lectures were very interesting and instructive.

Bobbie Larson Celebrated Ninth Birthday Saturday

Bobbie Larson was nine years old Saturday and in honor of the event his mother, Mrs. Carold Larson, assisted by Mrs. Fred Kluckhohn, held an afternoon party for him at the Klemme Park. A large number of boys and girls enjoyed the games after which they had a fine lunch Bobbie had a decorated cake with nine candles on it. He received lots of nice gifts.

EARLY MARKET FOR HOGS LOOKS BEST

More Than Usual Price Drop Predicted For October To December

Marketing hogs early next fall probably will pay exceptional dividends.

That is the opinion of Francis Kutish, Iowa State College farm economist.

He pointed out this week that hog prices probably will drop more than usual during the period from October to December The pickup hog marketings next winter, following the short 1946 fall crop, will be greater than usual.

Spread Widens

The spread between the prices of light and heavy hogs has widened in recent weeks, due to a weakening in lard prices and pressure on the price of heavier pork cuts.

In spite of this, Kutish predicts farmers probably will market their hogs at heavier weights than a year ago because of high hog prices and large feed supplies.

Cattle, Lambs

Turning to other livestock, Kutish noted that cattle slaughter during 1947 may be the highest on record for a single year. We apparently are in a period when farmers are cutting down numbers of breeding stock.

Lamb slaughter will be down sharply in 1947, he says. The 1947 lamb crop probably will be the smallest in 20 years. That will help keep lamb prices high

Grain Supplies

As for the grain outlook, tot corn supplies on April 1 we second largest on record, up percent from last year. The al time peak was in 1943. Stoc this year on April 1 were 1,3 million bushels. All but 8 million bushels were on farm

Oats supplies April 1 wer down 9 percent from the recor high of last year.

Carry-over of grain stocks the end of the current feedin season probably will be large than a year ago, Kutish said.

Albuquerque Venture Is Successful

Vet Cooperative Provides Homes at Reasonable Cost

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

(This is the fifth of a series describing how American ingenuity is helping to solve one of America's biggest problems—the G.I's No. 1 headache—the housing shortage.)

WASHINGTON.—As congress prepares for the home stretch, some veterans' organizations are promising that lifting the rent and construction controls will start such a rash of construction that everybody's housing problem will be solved. Others say that would be the knell to any kind of a veterans' housing program.

Rep. Jesse Wolcott of Michigan, who wrote the bill modifying restrictions passed by the house, told me he believed that the veterans wanted not priorities, but houses. His bill, he thinks, will make the latter possible. Opponents claim the opposite — that two and a half billion dollars worth of building applications for higher priced construction has been built up as a backlog. With restrictions off, opponents say chances for cheap house-building will go with the wind. At this writing, the senate has not yet said its say.

Baukhage

Meanwhile, some veterans are getting houses on their own.

Drawing for Homes Climaxes Project

For example, a few weeks ago in Albuquerque, N. M., a man put his hand into a hat and pulled out a house. It happened on a bright sunny Sunday, when the New Mexico Housing Cooperative association held a drawing for the first house completed under its new building program.

There were 58 members of the housing association who had a chance to move into that first house—the 58 people who were paid-up members. They gathered on the sandy lot where the house stands. There were more than 200 persons, counting sweethearts, wives, kids and friends, attending the drawing.

The lot is on Arvada avenue in northeast Albuquerque. You can see the desert from there and the purple mountains rising in the distance. The house is a single-story bungalow of Spanish style with a low-pitched roof like so many of the homes you see in the Southwest. It is made of concrete block, covered with white stucco.

The drawing was a gala affair. The people, dressed in their Sunday best, perched on the piles of lumber or sat on the hoods of automobiles to watch the association's president, M. E. Holly, place the 58 slips of paper in his hat. Assistant City Manager Arthur Staton drew the first name—Duward E Lee.

There were whistles and shouts of congratulation. By coincidence, it happened that Lee had been the first man to put up his money to buy stock when the association was organized. Real poetic justice that he should get the first house.

The drawing continued. All 57 remaining numbers were drawn. The name drawn second was to get the second house completed, to the third name drawn went the third house, and so on.

Soon each association member would have a house similar to the Lee's—a comfortable five-room bungalow with hardwood floors, steel casement windows and an attached garage. Lee said he couldn't possibly have bought the place if it hadn't been for the co-op. It cost him $6,350, complete with lot.

The New Mexico Housing Cooperative association developed from the idea of Veteran Paul Robinson, a tall rawboned engineering graduate of the Colorado School of Mines. When Robinson returned from a several-year tour of duty with the navy, he couldn't find a home in Albuquerque.

Remember York?

L. L. Coryell of Lincoln, Neb., couldn't believe a two-bedroom bungalow could be provided for veterans for only $5,250. To him goes a copy of the third story in this series—how they did it in York, Pa.

Finally he bought a lot, designed and personally supervised construction of a two-bedroom house. When he had finished, he found he had spent $4,300 (making allowance for a salary for himself) for a house that compared favorably with what was costing other Albuquerque veterans about $7,000 in the open market.

Robinson thought a veterans' cooperative through which men could build houses for themselves might solve the problem for other veterans. He took this idea to Max Kaslo, who operates the local veterans' referral center. Robinson also talked to Virgil Judy, local housing expediter.

The idea clicked. Interested veterans got together; drew up a constitution and by-laws; filed papers of incorporation.

Community Aids Vet Enterprise

As word got around, the Albuquerque community pitched in to help. A local architect donated his services on the first house and pledged to provide blueprints, floor plans, et cetera at special rates for subsequent houses.

A concrete block manufacturer furnished the blocks for one dwelling; a landscaping firm offered to do the landscaping without charge; an awning company contributed the awnings.

Other business firms wished the association well; promised to sell it materials at reduced prices. But the contributions and reduced prices don't apply to any single house. They are to be prorated among all houses, so that each association member will benefit from the savings.

So far the association has the second and third houses almost completed; the fourth about half-finished.

Membership has swelled to 75, and because the association feels that a new house in Albuquerque means a vacant house for rent or sale eventually, the membership isn't limited to just veterans.

Association operations are flexible. A person may become a member by buying one share of stock for $100. (This is credited toward his house.) He may buy more than one share of stock if he wishes, although he is not permitted more than one vote.

Each member buys his own lot and has the privilege of selecting the design of his own house. However, the house cannot be any bigger than 1,200 square feet (around average size), and construction must meet FHA standards and building code requirements. Members can have the co-op build for them, or they may merely purchase the materials through the organization.

All labor is paid for, but members can reduce the cost of their houses by working on their own or other houses under construction. If a plumber who is working full time on other jobs spends Saturdays doing plumbing work on one of the cooperative houses, he will be given credit at the standard plumbers' pay for the hours he works. Quite a few members have done this but most of them are men with office jobs, anxious to pitch in and get the houses built. When they work on the project, they are assigned as laborers and receive credit at laborers' pay. There are a few unaccustomed blisters and callouses, but they enjoy the novelty, and houses are going up fast.

M. E. Holly, president of the Albuquerque, N. M., Housing Cooperative association, reads the name of the lucky veteran who will occupy the first house constructed by the organization.

'FLYBOYS' OF THE FUTURE . . . These Philadelphia youngsters listen avidly as Victor J. Fritz, Philadelphia youth leader and head of the model aircraft meet for the world air show, tells about the miniatures. These youngsters are too young to participate in the model plane competition, however, participation being limited to boys of 16 or over.

NEWS REVIEW

Farm Land Prices Soar; Portal Claims Outlawed

PORTALS CLOSED:

Back Claims Denied

Almost six billion dollars in back claims for portal-to-portal pay was erased from the books when President Truman put his signature on congressional legislation designed to relieve employers, as well as the government, from such claims—now and in the future.

Although he opposed the wishes of organized labor and overrode an appeal for a veto by Secretary of Labor Schwellenbach, the President emphasized that he was certain that it was not the intent of congress to nullify past gains made by labor.

Explaining his reasons for signing the bill, he said, "Businessmen will be able to plan with assurance for full production and price reductions. This will be of real value to labor and management in a continued high level of employment."

At the same time he repeated his plea to business for lower prices and requested congress to take immediate steps to increase the statutory minimum wage from 40 to at least 65 cents an hour.

TOO MUCH SMOKE:

Can't See Stars

The nation's capital city is getting just too smoky, dusty and crowded for the U. S. naval observatory, which is getting ready to move to a more sylvan neighborhood.

Because big cities radiate heat, which is bad for delicate astronomical instruments, the new location for the world-famous observatory must be no nearer than 25 miles to any metropolitan area. Officials estimate that it will take about eight years to find a site, put up the necessary buildings and install equipment.

In addition to providing the nation with the world's most accurate time checks, the observatory warns the radio industry of sun spot activity, puts out almanacs, supplies data on tides, phases of the moon and sunsets and sunrises, and figures out calendars.

FLU STOPPER:

New Mold Tested

A possible cure for influenza may be forthcoming from a newly discovered green and black soil mold, according to an announcement by the Society of American Bacteriologists.

So far, although there are preventive vaccines for flu, no specific cure has been developed. Not yet tested on humans, the mold is said to have shown a curative effect on chicken embryos and mice with influenza.

There is one hitch, however. The mold-bearing earth, according to the two scientists who made the discovery, was one of numerous samples which came to them from all over the world. Just where that particular bit of dirt came from they do not know.

Dentists Are in Pain, Too

Pity the poor dentist when he sneaks in behind your teeth with that savage little drill and tries to unseat the top of your skull.

Chances are his feet hurt. And his back aches. And his legs are weary. That, at least, is the contention of Northwestern university school of dentistry, which is starting to teach its student dentists to work sitting down—on a specially constructed stool.

A standing dentist is of no more advantage to the patient than a sittin dentist, the school asserts. If dentists can be brought to a sitting position, the university believes, their professional lives will be extended by five years.

FARM LAND:

Prices Go Up

Continuing the steady trend upward begun early in the war, farm real estate prices are nearing a level double the average for the 1935-39 period, a survey by the U. S. bureau of agricultural economics shows.

During the year ending March 1, farm real estate prices rose 12 per cent for the country as a whole. That figure is compared with a 13 per cent rise for the corresponding period in 1946, 11 per cent in 1945 and 15 per cent in 1944. Fifty-six per cent of the recorded sales in the past year were for all cash, it was revealed in the survey.

OUTMODED DEFENSE:

Rockets Far Ahead

Ever-improving rocket weapons already have rendered obsolete the best anti-aircraft guns of the army and navy, Paul W. Martin, an ordnance expert, has asserted.

The big strides made in development of rapid-firing automatic, radar-directed guns have been far outstripped by atomic energy and guided missiles, he said.

Three important features of a good defense were cited: A long-range detection system; a defensive rocket to intercept the enemy missile, and destruction of the enemy missile at a safe distance.

Record Slaughter

A new record for slaughtering of cattle and calves was set during April in all federally-inspected plants in the country. Hog killings were lower, however, reports the department of agriculture.

Cattle killed reached the all-time high during April of 1,203,137 head, compared with 714,860 for the same month a year ago. Calves slaughtered numbered 678,440, compared with 445,049 in April, 1946.

Hogs killed dropped from 3,857,872 to 3,615,746, and sheep declined from 1,735,882 last April to 1,326,589 this year, lowest since 1939, the department reports.

EVIDENCE OF LETUP

Income and Output Hit Peak

WASHINGTON. — Although both the national income and the national turn-out of services and finished goods rose to record peaks during the first three months of the year, there is evidence the boom is slackening, it is pointed out in a commerce department report.

Since the income and production are measured in terms of money, higher prices and higher wages were in part responsible for the showing.

The "gross national product," defined as "total output of final goods and services in the economy at market prices," was advanced to an annual rate of $209,000,000,000.

This, said the department, approximated the peak recorded in the second quarter of 1945 when huge quantities of war material were being produced.

Also, it topped the fourth quarter of 1946 by $4,300,000,000, principally because of increased consumer spending, but nevertheless represented "the smallest quarterly gain since the bottom of the reconversion decline was reached in the first quarter of 1946."

National income reached a record total in the first quarter of this year at the annual rate of $180,500,000,000, an increase of $3,000,000,000 over the fourth quarter of 1946, the department said.

Income payments to individuals rose by $3,500,000,000 to an annual rate of $177,000,000,000. Wages and salaries accounted for the largest part of the gain, $2,600,000,000 at an annual rate.

Relief and social security payments and veterans' allotments also were up by $600,000,000, reversing their downtrend through 1946. Dividends, interest and net rents of landlords were down $500,000,000. Net income of business owner-operators was up $200,000,000.

SMART AS A FOX

Farm Youth Snares 135 Foxes To Win Championship Laurels

WNU Features.

ITHACA, N. Y.—Old-timers among the ranks of trappers may well take a cue from Huck Spaulding, 18, of South Westerlo, Albany county. Despite his age, Spaulding has snared 135 foxes during the past winter to rank as champion fox trapper of New York for 1946.

Second place was taken by Robert H. Hark, 18, of Dalton, with 51 foxes, and third by George Rathbun, also of Dalton, with 28. Both are 4-H club members. Hark also received first prize for the best prepared pelt.

Winners receive cash awards and medals in the contest for farm youth sponsored by the State Farm bureau federation and the American Agriculturist, farm magazine.

Purpose of the contest is not just to kill wild game but to teach farm boys and girls how to control surplus wildlife in areas where damage is being done to poultry and livestock. Another aim is to encourage practices among rural youth that recognize wildlife as a farm crop which may add income to the farm business.

D. B. Fales, assistant state 4-H club leader, reports that an estimated 2,300 foxes were taken in the state by the youthful trappers during the contest year.

Second and third places for the best-prepared pelt were won by Edward Bartlett of rural Lockport and Francis Simpson of rural Port Jervis.

This, the second year of the contest, far surpassed last year's when

CHAMPION TRAPPER
Outfoxes Foxes

an estimated 1,500 foxes were caught, Fales reports. All three state winners also trapped more than the previous high winner, who accounted for 21 animals.

Spaulding, Hark and Rathbun will be guests at special activities on the Cornell campus.

School Constructs Houses To Assure Getting Teachers

CRAWFORDSVILLE, ARK.—Plagued by a shortage of school teachers resulting from a lack of housing accommodations, Crawfordsville's school board finally solved the problem—by building a seven-family apartment.

The board received several "no housing-no job" responses to its offers of employment; other teachers resigned because they couldn't find a place to live. If housing was the trouble, board members decided, then they would build houses.

Now, the seven-family apartment, conveniently located across the street from the school, has been opened for inspection of teachers. The apartments are new and modern and, best of all, rentals are as low as $25 a month.

The new apartment is a school board job from start to finish. When contractors refused to handle the project except on a cost-plus basis, the board hired its own building supervisor, carpenters, bricklayers, masons and other laborers. The board bought all materials through the school. The finished building cost about $50,000, which board members figure is a saving of about $8,000 to $10,000 over a contractor's cost.

The school board rejected barracks and boarding-house type buildings "because congeniality does not seem to exist where a large group of adults is forced to live together."

Money for the project came partly from the revolving loan fund of the Arkansas department of education, partly from the school board cash. Even with low rentals, the board figures the building will pay for itself in 20 to 25 years.

Application on Towel Indicates 'Clean Job'

CLINTON, IOWA.—To assure officials that he intends to do "a clean job" if appointed, Ralph M. Primmer, Clinton contractor, filed his application for appointment as county supervisor on a paper towel. Primmer is an applicant for a vacancy in the supervisorial post which will occur in June. His application, filed with the county auditor, was written in pencil.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

When the temperature dropped to 26 degrees, J. J. McDonald, Cashmere, Wash., apple grower, called in a pilot and his dusting plane to "blow the frost away" from the orchard. The pilot flew just over the treetops for several hours until the sun rose. The propeller, stirring the air, sent the temperature up to 30 to 31 degrees. . . . Dedication of the new Iowa Falls, Iowa, municipal airport and an air show are scheduled for May 30. A flight breakfast at 7 a. m. will open the day's activities, which are expected to attract pilots from all parts of the state. . . . J. J. Schecter, rancher near Alamosa, Colo., utilized a plane to sow a section of land. Crested wheat grass, clover and brome grass were sown from a plane flown by Norman Kramer. . . . With recent acquisition of a $16,000 war surplus link trainer, Augustana college at Sioux Falls, S. D., is planning to offer a two-semester course in civil aeronautics . . Five Holstein heifers, all "expectant mothers" and valued at $11,000, have been shipped to Uruguay breeders. They were sent from Seattle to Milwaukee by train and from there by plane. Breeders in Uruguay bought the cows with the stipulation that they arrive before giving birth to their calves.

• • •

Dodge City, Kas., fabled cattle town of the early days and site of Boot Hill cemetery, stressed modernity at its recent 75th anniversary celebration. An air show, featuring everything from stunt flying to dummy bombing, provided a modern touch to the colorful old-time celebration. Pilots from Colorado, Oklahoma and Kansas gathered for the event.

• • •

STANDARD RISKS

Of 100 life insurance companies surveyed by Institute of Life Insurance for current practices in connection with aviation risk, two-thirds accept as standard risks without limitations applicants who contemplate air travel on U. S. scheduled transports in the western hemisphere.

• • •

M. Harding James of Binghamton, N. Y., likes to fly—but he also believes in keeping a promise to his wife. When he flew from Binghamton to Toronto, he kept one foot on the earth all the way. The earth was in a small box.

• • •

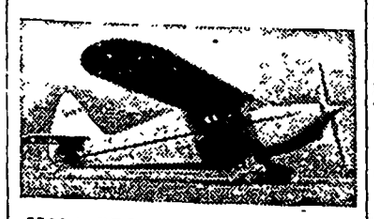
BETTER TRAVELERS

Babies are better air travelers than grown-ups, according to Pan American World Airways stewardesses.

Babies, they claim, seldom get airsick or restless. They sleep peacefully or play near their seats. Stocks of baby foods and a baby kit with comic books, rattles and games keep them happy. Some toddlers even have crossed the Atlantic unaccompanied.

Difficulties do arise occasionally, the stewardesses admit. On a recent trip "emergencies" exceeded the emergency supply of diapers. One small traveler debarked wearing the plane's fanciest dish towel.

• • •



MASS PRODUCTION . . . Dramatic new aviation assembly line methods, patterned after the Detroit type which once before changed the nation's form of transportation, have resulted in peak production at the Stinson division of Consolidated Vultee Aircraft corporation in Wayne, Mich. A new production record of 316 multi-purpose personal airplanes, like the craft shown above, was set during April.

• • •

SMALL AIRPORT GAINS

Progress in design and manufacture may be relied upon to reduce production costs, improve performance and decrease noise of small aircraft, it was brought out at the national personal aircraft meeting of the Society of Automotive Engineers in Wichita, Kas. To reduce costs, Beech Aircraft representatives recommended that costs be considered during the design stage and that manufacture of planes be coordinated by engineering and production departments.

Find 16th Century Figures In Rare Medieval Armor

Since the 16th century, the church of the Madonna delle Grazie, near Mantua, Italy, has had the upper part of its interior walls lined with life-sized human figures that custodians believed were made of papier-mache. But in 1937, an authority on antiques examined the military figures and discovered they were dressed in excellent suits of rare medieval armor.

Lobbies Have Spent Million Dollars on 80th Congress

DURING the first quarter of 1947 some 124 organizations spent almost a million dollars lobbying the 80th congress on one issue or another. Almost half of this amount was spent by 10 organizations. Paradoxical as it may seem, in view of the fact that we are supposed to operate our government under the constitution, the Committee for Constitutional Government spent the largest amount, $137,910, to "ward off Communism and collectivism," to urge passage of a 20 per cent tax reduction bill and to seek passage of a bill to break "the strangle hold of labor monopolies." The committee expects to raise $720,000 to pay for its 1947 program. While $58,368 was spent by Rural Electric Cooperative association to urge further development of public power, National Association of Electric Companies was spending $65,081 looking after the interests of the private power companies

Many expenditures come under the head of lobbying. For instance, National Association of Real Estate Boards, which has been fighting all housing controls, includes an expenditure of $612.50 for initiation fees and dues into Congressional Country club for one of its lobbyists, C. K. Snyder.

National Home and Property Owners foundation, which reported an expenditure of $4,443, is part of the active lobby of real estate and building interests seeking to end all rent and building controls. With National Association of Real Estate Boards and Producers council, an organization of building supply manufacturers, it supported the Wolcott bill, which already has passed the house and which would, if finally enacted, remove nearly all building controls and seriously impair continued rent controls

* * *

Labor Bill Squeeze Play

THE GOP labor bill likely will go to the President sometime in late June. And on June 30, the government is expected to turn back the coal mines to the private operators. Two questions arise. Will President Truman veto the tough labor bill and will John L. Lewis call a coal strike and shut down industry? If the President vetoes the labor bill it means that the nation will have no new labor legislation out of this congress, and that is precisely what the GOP leadership is banking on. They are putting the old squeeze play on the President in an attempt to force him to sign the labor bill although it goes far beyond a labor reform bill and has become in many respects a punitive labor bill. There's politics spread thickly on both sides of the bread.

* * *

THE mematorphosis of Sen. Joseph E. Ball of Minnesota is a continual subject of discussion here. The tall, lank, broad-shouldered Minnesotan came down to Washington a disciple of then Gov. Harold Stassen who first appointed him to fill the unexpired term of the late Sen. Ernest Lundeen. Senator Ball was a political writer for a St. Paul newspaper, considered as a liberal and acted it. But in 1942 he was elected to a six year term on his own. He began to turn more and more toward the conservative faction of the party and has fostered the toughest and most punitive section of the senate labor bill. He, with Senators Taft of Ohio and Donnell of Missouri, likely will be the senate conferees on the final labor bill draft.

The gossips have it that Mrs. Ball, the former Elisabeth Robbins of Minneapolis, is highly influential in guiding her husband's thinking.

* * *

Party Regularity

SENATORS Morse of Oregon and Taft of Ohio have different ideas on party regularity Senator Taft chided the Oregonian on his votes against the majority of Republicans in the senate labor committee and his stand in seeking to break up the omnibus labor bill into four separate measures Said Senator Morse:

"After all, should not the test of party regularity be decided according to what is best for the party in terms of what is best for the country, rather than in terms of whether or not the leaders of the party in the senate, by an appeal to party regularity, can carry enough votes in their pockets to play politics with an issue as vital as this one."

* * *

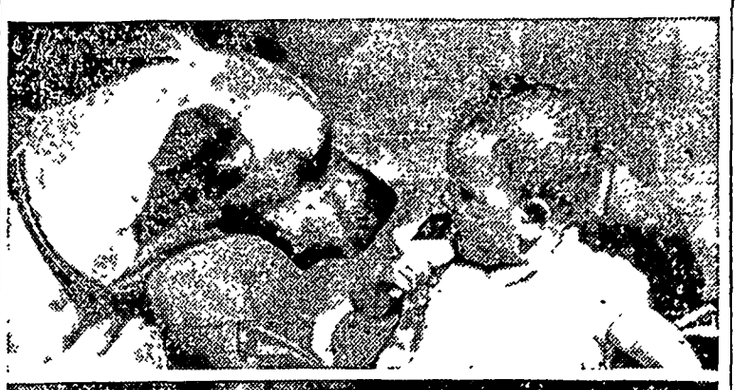
THE house vote on the Wolcott rent control bill was one of the closest of the session, 202 to 182. In a vote to recommit (which might have killed the bill) the house had to reverse itself, after once voting in favor of recommitting, to save the bill.

* * *

ALTHOUGH there has been no indication as to what the President may do, the experts profess to see in his action on the portal-to-portal pay bill, an indication of what he may do to the labor bill.

VEGETABLE GROWERS SERVE . . . Five hundred pounds of seeds donated by National Junior Vegetable Growers association are destined for the youth of Greece. James Spell, 17, Columbia, Miss., president of the junior growers organization, presents, in the name of his organization, the seeds to Jason Dracoulis, Greek vice consul in New York City. National Junior Vegetable Growers association played an active part in garden work during the war.

IN THE SPRING A YOUNG MAN'S FANCY . . . Young Bobby Horan, 7, yearned for a bike ride, but does not have a bike of his own, so he is seen trying to thumb a ride from Elsie Malcolm, 5. Elsie's sister Beverly, 8, looks on. The late spring arrived in New York City as this photo shows the kids eating ice cream.



IT IS JUNE DAIRY MONTH, SHE SAYS . . . Little Margaret Mary Blacksher, New York, turns to ice cream to do her share during June Dairy Month, and shares America's No. 1 food with her Great Dane. When the U. S. Junior Chamber of Commerce selects the dairy queen, they might check on Margaret, who would prove an ideal one.

MOVIE PROBERS . . . Chairman J. Parnell Thomas, seated, Rep. John McDowell, left, and Chief Investigator Robert E. Stripling of the house un-American subcommittee, who are investigating the possibility of Communist influence in the motion picture industry. Leading stars, directors, bit players, motion picture union officials, producers and others connected with the industry testified before the subcommittee.

NEW PREXY . . . Dr. Lyndon O. Brown, recently inaugurated as president of 110-year-old Knox college, Galesburg, Ill. Dr. Brown, 44, left a successful business career in New York to become president of the college.

STARTED WAR . . . Gen. Kanji Ishihara, chief of staff in Japan's Kwantung army, who gave the signal that caused the Mukden incident of September 19, 1931, when Japanese troops attacked the Chinese garrison of the Manchurian city.

MOTHER FOR 1947 . . . Mrs. Lucille Herman, wife of a G.I. and mother of a 5-month-old daughter, who was chosen "Pin-up Mother for 1947" in contest conducted in the Bronx. There were more than 600 candidates.

TURN PROFESSIONAL . . . Pauline Betz, Los Angeles, left, shakes hands with Mrs. Sarah Palfrey Cook, New York City, as they start professional tour. They were both former U. S. amateur tennis champions.

NAVY NURSE HEAD . . . Capt. Nellie Jane Dewitt, Susquehanna, Pa., who has been appointed as the first director of the new navy nurse corps. She will serve four years. Her big problem will be to secure more nurses.

Sportlight by Grantland Rice

CHICAGO is steaming up for the hottest midsummer sport carnival in recent history.

First, there will be another big-money All-American open golf tournament, involving heavy cash. Then the all-star ball game arrives, where there will be an entirely different attitude on the part of the National league for a big change.

Grantland Rice

While these maneuvers are taking place, Tony Zale and Rocky Graziano will begin the final stages of their training, for what should be boxing's best show in many years. Certainly Tony and the Rock topped the book last summer, including two heavyweight championships. And the flop there wasn't Louis' fault. It belonged entirely to a pair of palefaces known as Conn and Mauriello.

After the Zale-Graziano melee is out of the way, the $100,000 Arlington classic will arrive. This may be one of the biggest races of the season, coming along at a high spot of the racing year.

So here we have Chicago crowding in golf, baseball, boxing and racing, all in the championship mold, through a three-week stretch.

The Zale-Graziano meeting will be the standout. It should be one of the most dramatic middleweight contests in the long history of the ring. It may not carry all the fury and destruction of their first meeting, but it can't miss as a thriller. There have been some great middleweight fights in the past, but none had the color this pair can take into the ring.

And you can wager a few sesterces this time that the National league isn't going to concede the all-star game in advance.

* * *

Star Coach Missing

Spring football practice, which draws little publicity despite the many thousands getting ready for next fall, has an absent star who will be missed badly in the home of the Crimson Tide. His name is Frank Thomas, Alabama's able leader, who has had to retire because of illness and now is the athletic director of the southern institution Red Drew, who happens to be another coach of class, is in charge of the squad.

Sixteen years ago, back in 1931, Thomas succeeded Wallace Wade at Alabama, when Wade left for Duke. An ex-Notre Damer, Thomas was short and stubby with a pair of keen, alert eyes and a thorough knowledge of football in every department.

Alabama couldn't have picked a better man. For in Thomas' 10 years at Alabama, the Crimson Tide from Tuscaloosa won 111 games against 22 defeats. Five games ended in tie score. In seven bowl games, which include Rose, Sugar, Cotton and Orange bowl contests, the Thomas-Alabama record is five victories against two defeats. These are pretty fair marks in big-time competition.

It also might be added, that in this period, Thomas developed such all-Americans, or near all-Americans as Don Hutson, Jenkins and Don Whitmire (later with Navy), Johnny Cain, Hupke, Dixie Howell, Bill Lee, Riley Smith, Tarzan White, Holt Rast, Vaughn Mancha and Harry Gilmer. He rates Gilmer, who has one more year, as the best college passer he ever saw, and predicts a brilliant pro future for his 160-pound back in case he decides to take up professional play.

In addition to strong intersectional competition, Tommy had to battle his way through a fast-moving circuit that included such stout opponents as Tennessee, Duke, Georgia, L.S.U., Tulane, Vanderbilt and many others who always played for keeps.

One reason for football strength in the South has been the quality of its coaches, with such leaders as Bob Neyland of Tennessee, Frank Thomas of Alabama, Wallace Wade of Duke, Wally Butts of Georgia, Bill Alexander and Bobby Dodds of Georgia Tech, Red Sanders of Vanderbilt, Henry Frnka of Tulane, Carl Snavely of North Carolina and many others who knew their stuff.

With his former aid Red Drew at Mississippi, Thomas made a brave attempt to leave a sick bed and coach his team from a stretcher last fall, an impossible assignment.

* * *

Dixie Hangs On

It has been a matter of 19 years since a kid ballplayer by the name of Fred ("Dixie") Walker reported to the Albany, Ga., club of the Southeastern league. Dixie blew in from his home hamlet, Villa Rica, Ga., at the age of 18.

His record shows that in his 18 years of wandering Dixie has been delivering base hits for 13 different clubs. But, with such hitting stars as Stan Musial, Joe DiMaggio and others far down the list, Walker is still baseball's leading combination hitter, meaning batting average and runs batted in.

Touch Typewriting Can Be Self-Taught

WHETHER you plan to make office work your career, or hope to enter some other field eventually, you have to know typing to get a foothold.

Remember, an experienced eye can instantly detect the uneven touch of a hunt-and-peck typist, so better master the touch system without delay.

* * *

The Weekly Newspaper Service booklet teaches touch typing with charts, exercises and speed drills. Simple to learn. Send 25 cents (coin) for "Touch Typewriting Self-Taught" to Weekly Newspaper Service, 243 W. 17th St., New York 11, N. Y. Print name, address, booklet title and No. 13.

HOUSEHOLD HINTS

A little olive oil or glycerine poured on a soft cloth and rubbed on bathroom fixtures keeps them in excellent condition and makes them easier to polish.

—•—

In using a hacksaw best results are obtained if the stroke is done in such a manner as to bring into play virtually the entire length of the blade.

—•—

Hard woods, and especially oak, are not good for framing jobs since they split easily and do not stay straight.

—•—

Cause of paint cracking usually is that the top coat is harder than the undercoat. This often results when one paints over a surface that is not dry.

—•—

Paint thinned with turpentine spreads readily and dries quickly without leaving a high sheen.

—•—

A damp sponge rubbed lightly over upholstered furniture will remove surface dust, dog or cat hairs.

—•—

Never wring woolen blankets—in fact—never wring any woolens. Blankets are best hung on the line to drip.

—•—

Save the lids from baking powder or lye cans. Paint them a bright enamel color. Use assorted colors to give a Mexican air. These "play dishes" will be a grand gift for a small housekeeper.

Food Prices Not Due To Price Supports, Says Josten

Stories going around that Government price supports are causing high food prices show a complete lack of understanding of the program's provisions, according to Alfred Josten, Chairman of the Hancock County AAA.

"Government price supports are to provide a floor, so that prices of farm commodities won't fall below what farmers need in order to stay in business, Mr. Josten said. "For most of the major products the floor is fixed at 90 percent of a "party" price. Actually, market prices for most commodities today are well above the price-support figure."

To illustrate his statement, Mr. Josten pointed out that on April 15 the average price farmers received for a bushel of wheat was $2 40, whereas the average amount advanced to farmers who stored 1946 crop wheat loan was $1 45 per bushel. The fact that loans on only 4 million bushels of the 22 million placed under loan are still outstanding is another indication that wheat is going into the market and not being held under loan as a price-support measure.

"The food price situation today is generally the result of strong demand, both at home and abroad, for the things that farmers produce," Mr. Josten explained "But farmers have the assurance that the program is there to protect them if they need it."

Regarding the Government's program for potatoes, which "is being used to support prices," Mr. Josten said that enormous supplies were unduly depressing farmers' returns. The large production was due to favorable combination of good weather and extremely high yields. On April 15 the average price received for potatoes was 14 percent less than the parity price, which made it mandatory under price-support legislation for the Government to take action.

Previous price-protection measures were expanded during the war to enable farmers to increase their production to fill almost unlimited needs for certain commodities.

"And, as Secretary Anderson recently said, prices for food today might be much higher if farmers hadn't succeeded in breaking one production record after another," Mr. Josten commented.

Clearing Lots For New House In Klemme

Virgil Cook, who some time ago purchased two residents lots in Klemme from John Day, had the lots cleared of small trees and undergrowth the first of the week, preparatory to building a new house on one of the lots.

These lots are located directly south of the Becker Sisters' home. A barn on one of the lots will be torn down or sold and moved away.

From where I sit ... *by* Joe Marsh

How to Go to Sleep

We were sitting around Bill Webster's parlor Friday evening and the talk turned to the best way of overcoming sleeplessness...like breathing real slow and deep, imagining that you weigh a ton, or simply throwing away the pillow.

The consensus favored counting sheep. But right away was the question: what *kind* of sheep? There were some votes for countin' Merinos, Shropshires, Oxfords and Dorsets. Ed Mapes said he had best luck counting crossbreeds.

Finally, Bert Childers spoke up with his formula: A light snack and a mellow glass of beer at bedtime. Sort of puts you in the mood for quiet thoughts and peace of mind. Lets you relax . . . and "ho hum," off to pleasant dreams!

From where I sit, there's nothing like a temperate glass of beer to smooth away the creases of the day, relax a body, and pave the way for a good night's sleep. Try it, and see if I'm not right.

Joe Marsh

Wheel Balancing
Increase Tire Mileage
Makes Driving Safer
On our machine each wheel is revolved at high speed and it positively detects every spot on the wheel which is out of balance.
Unbalanced wheels are dangerous to safety cause tires to wear out 50 to 100 percent quicker
Dy-namic unbalance causes the wheels to vibrate rapidly sideways, producing abnormal wear on tires, bearings, kingpins, tie-rod ends, steering gear and all connecting links.
Static unbalance causes wheels to hop up and down, resulting in excessive vibration and hard steering.
There Are 2 Kinds of Wheel Unbalance

Mr. And Mrs. Julius Priebe Celebrate Golden Wedding

DINNER HELD SUNDAY AT REFORMED CHURCH

Celebration Attended By Over 120 Relatives And Friends

The Golden Wedding Anniversary of Mr and Mrs. Julius Priebe of Klemme, was celebrated Sunday, June 8th, 1947 at the Klemme Evangelical and Reformed Church. About 120 relatives and friends registered in the guest book and were ushered into the Church dining room during the noon hour.

The dining room and tables were decorated in gold and white. A four-tier wedding cake, decorated with the numeral "50," had been provided by the children and was used as a centerpiece at the table. The flowers for the occasion were presented by Mr. and Mrs. Priebe's grandchildren.

After the noon meal the guests gathered in the church auditorium where a program was given with Verner Lau presiding.

The Program

Song, "Jesus Lead Us Onward" by Mrs. Victor Huenemann, Mrs. Irving Haupt, Mrs. Rudolph Bienert and Mrs. Fred Becker

Poem "Your 50th Anniversary," by Mabel Schuldt.

Historical Sketch, by Rudolph Bienert.

Song, "Sing Them Over Again" by Irene Schmidt, Beulah Goll, Marvin Schmidt, and Lu Verne Schmidt.

Address, by the Rev. Calvin Grosshuesch, pastor.

Song, "God Be With You," by the audience.

Were Married June 8, 1897

Julius Priebe and Bertha Stromer were married at the home of the bride's parents near Klemme, Iowa, on June 8, 1897 by the Rev. John Gaterman. Their first farm, about 4½ miles southwest of Klemme remained their home until they retired 17 years ago and moved to the town of Klemme.

Julius Priebe was born September 13, 1867 at Redlin, Hinter Pommern, Germany. When he was 13 years of age he came to America with his parents. The sea voyage lasted 15 days, and five of them were stormy days. They landed in New York and traveled by rail to Detroit, Michigan, and from there by boat to Milwaukee, Wisconsin. After residing in Milwaukee for a few months, the family moved to Hancock County, Ia., where the father had bought a farm.

Mrs. Priebe was born January 26th, 1875 at Chicago, Ill. She came to Hancock County at the age of 4 with her parents, who settled on a farm near Klemme.

Lost On Stormy Night

Both Mr. and Mrs. Priebe are numbered among the pioneers of this community. Our modern highways and roads were unknown in those days. Mr. Priebe can remember when he was sent to one of the neighbors for medicine on a stormy night and lost his way. He finally saw a light in the distance and when he came to the house found that it was his own home. In the snow storm he had walked about in a complete circle.

Owned Threshing Machine

At one time in the early days Mr. Priebe was part owner in a horse-drawn threshing machine. His partners were Herman Priebe, his brother, and Henry Stromer. The rates for threshing at that time was 1½ cents per bushel for oats; 4 cents for wheat; 7 cents for flax, and 2 cents for barley.

Long, Weary Driving

In those early days they had to travel a long ways with horse-drawn vehicles for some of their provisions and supplies Fuel was scarce; they often drove to Ellington, near Forest City for their supply of wood The nearest flour mills were at Rowan, Fertile and Clear Lake During the winter months they drove over frozen Clear Lake to save a few miles.

Active In Church Work

Mr Priebe proved himself to be a good farmer and cattle feeder. Both are faithful members of the Klemme Evangelical and Reformed Church. Mr Priebe served his congregation as deacon and elder In 1930 when the new church was built he was elected chairman of the building committee. Under his able leadership the building was erected and paid for before the day of dedication

He also served as director and secretary of his school district and as township trustee for many years. When he moved to town he was elected as councilman, and served as such for several years.

Mr. and Mrs. Priebe are the parents of four children, all of whom are living on farms in the neighborhood of Klemme Esther (Mrs. Fred Schmidt), Erwin, Erma (Mrs. Paul Goll), and Edna, (Mrs. Herman Schmidt) There are six grandchildren and one great grand child

MR. AND MRS. E. J. ARNOLD MARRIED 35 YEARS

Surprise Dinner Held In Their Honor Sunday

June 6th was the 35th wedding anniversary of Mr. and Mrs. Elmer J. Arnold, and in honor of the event their daughter, Evelyn, planned a surprise dinner for them Sunday noon

When Mr. and Mrs Arnold arrived home from chuch Sunday they found waiting for them a large group of relatives who had brought well filled baskets of good things to eat for the big dinner

Those present besides the E. J. Arnold family were Dr and Mrs. Elmer Larsen of Centerville; Dr. and Mrs. C. B Tice of Mason City; Mr. and Mrs. Fred A. Arnold; Mr. and Mrs. Fred J. Arnold and Bobbie, Mr and Mrs. Asa Arnold and Clarice, Mr. and Mrs. Albert Koerner and Kemit; Mrs. Martha Bredbenner; Mr. and Mrs. Lloyd Lau and Cozette; Miss Leona Lau; Glen Bridges and family, Lee Ridder and family; Orville Stokesbary and family; Gerald Koerner and family, Mrs. C. A. Arnold; Miss Minnie Lenz, and Mrs. Ella Schneider.

Elmer Arnold and Nellie Lau were married at the home of her parets, Mr. and Mrs. Henry Lau on June 6th, 1912 at 4:00 p. m. by the Rev. Schneider. They began housekeeping on their farm southeast of Klemme where they have lived the past 35 years.

They are the parents of five children: Wilbur and Roy who help operate the large farm; Evelyn, who teaches school in Meservey; Bruce, who is with the U. S. Army stationed in Japan, and Curtis, their first son who died a number of years ago.

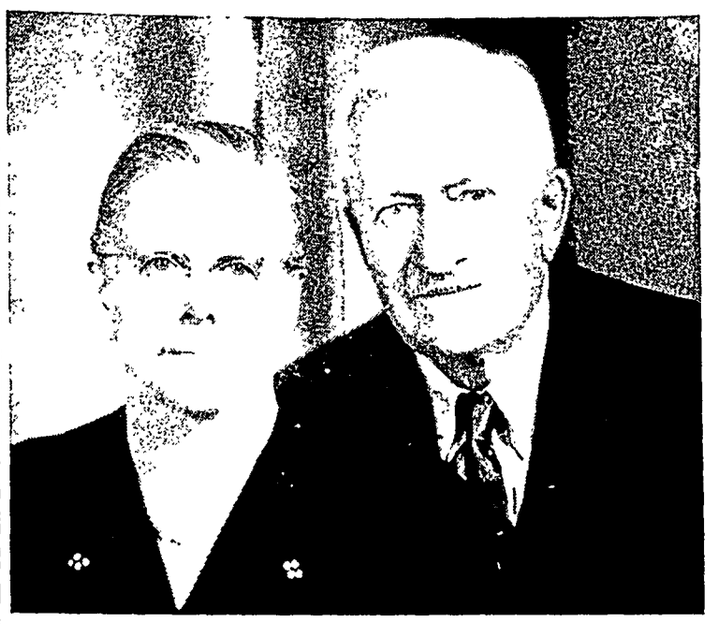
The afternoon was spent informally and all enjoyed visiting and talking over the good old days.

KLEMME MERCHANTS WIN GAME AT LATIMER

The Klemme Merchants defeated Latimer there Sunday 9 to 1.

They meet the strong Rockwell team here Sunday in another league circuit game.

CELEBRATED GOLDEN WEDDING JUNE 8



Mr. and Mrs. Julius Priebe

Adala Wille June Bride At Ceremony Sunday

KLEMME R. N. ATTENDED CONVENTION AT GARNER

Klemme members of the Royal Neighbors Society went to Garner last Wednesday evening to attend a convention

Each town represented put on a stunt as part of the program. The Klemme ladies put on a very clever skit, "Formal Opening of the Run Way Trap Co." In this stunt two ladies were dressed like Mickey and Minnie Mouse, and they had the large Run Way trap Ed J. Thompson uses for display purposes Mr Thompson sent up a large number of his gaily colored traps which were given to all the ladies present as a sovenir of Klemme's manufacturing plant.

The Britt ladies put on "Hobo Day," and the Clear Lake ladies featured bathing beauties in their stunt.

LARGE CROWD ATTENDED ALUMNI BANQUET

The annual Klemme high school alumni banquet was held at the community hall Friday evening with 140 attending.

The evening was spent informally and the grads who had been absent during the war years enjoyed visiting with old classmates.

For the first time in the history of the alumni a member of the second generation was present, Roger Ridder, a graduate of 1947. His mother, Mrs. Lee Ridder, a graduate of K. H S. was also present.

At the business meeting Ray Jorgenson, Jr was elected president for the coming year; Lyndon Kilgore, vice president and Irene Schmidt, secretary and treasurer

The outgoing officers were Gertrude Grosshuesch, president and Lester Neuberger, secretary and treasurer.

HELLO, FOLKS!

Mr. and Mrs. Francis Dahlstrom, 706 6th N. W, Mason City, are the parents of a baby son born Sunday at the Mercy Hospital. This event puts Mr and Mrs. Nels Back, Klemme, in the Exhalted Order of Grand Parents.

Mr. and Mrs. Roy Arnold are the parents of a baby son, wt. 7 lbs. 13 oz. born at the Mercy hospital at Mason City on Tuesday, May 10th. He has been named William Dean.

Mr. and Mrs. E. J. Arnold and Mr. and Mrs. John Chambers are now grandparents, and they are quite elated.

ADALA WILLE WEDS RUSSEL BAILEY OF BRITT

Ceremony Took Place At The Evangelical And Reformed Church, June 8th

Miss Adala Wille, daughter of Mr and Mrs. C. J. Wille of near Klemme, became the bride of Russel Bailey, son of Mr. and Mrs. John Bailey of Britt, on Sunday, June 8, 1947 at 12:00 o'clock noon, at the Evangelical and Reformed Church parsonage at Klemme, with the Rev Calvin Grosshuesch officiating at a double ring ceremony

Miss Marjorie Dirksen, of Mason City as bridesmaid, and Ray Sevyter of Mason City, as best man attended the couple

The bride wore a grey suit with navy and white assessories and her corsage was of white carnations and sweetpeas. Miss Dirksen wore a dark suit with matching accessories and a corsage of pink carnations and sweetpeas.

The bridegroom and best man wore carnation boutonniers.

Following the wedding the couple left on a honeymoon trip after which they will be at home in Garner.

The bride who is a graduate of the Klemme high school, attended Omaha College and has been employed for some time in the Farm Bureau office at Garner.

The bridegroom served in the U. S Air Corps and was overseas and has been employed in the Britt Paint and Body Shop

FAMILY REUNION HELD AT COMMUNITY HALL

A picnic dinner was enjoyed by members of the Blumer family at the Klemme Community Hall on Sunday on June 8th. The afternoon was spent visiting, taking pictures, and seeing moving pictures taken by Emil Blumer.

Those attending were as follows:

Mr and Mrs. James Rea, Detroit, Michigan; Mrs, Edwin Maurtiz and son Gary, Marshfield, Wisconsin; Mr. and Mrs, Leo Blumer, Ames; Miss Minnie Blumer, Jewell; Mr. and Mrs. Alvin Halverson, Forest City; Mr. and Mrs. Merlin Neuberger and Dean, of Ventura; Mr. and Mrs. Roy Baack and Bennett, Thornton; Mr. and Mrs. Emil Blumer, Mr. and Mrs. Carol Brager and Daryl, Mr. and Mrs. Curtis Waddingham, Mr. and Mrs. John Lemke, Mr. and Mrs. Jacob Blumer, Ivadell, Robert, Donald and Harold, Mr. and Mrs. Caris Kropp, Cortia and Carrol, Mr. and Mrs. Raymond Wille all of Garner; Mr. and Mrs. Walter Blumer, Ivan, Mary Ann, Glenn and Marlene, Mrs. Anna Waddingham, Mr. and Mrs Herman Baack, Robert and Richard and Mr. and Mrs. Paul Baack and son Larry of Klemme.

League Schedule

Home Games:
June 15, Rockwell
June 29, Hansell

HARTBECK REUNION HELD AT WAVERLY JUNE 4

The annual Hartbeck family reunion was held at Waverly on June 4th with about 55 present. Because of the bad weather a large number who had planned to be present, were unable to attend.

Those from this community who attended were Mrs. Esther Barz, Grandma Wille, Mr. and Mrs. Milvern Barz, Mr. and Mrs. Edmund Josten and baby, Mr. and Mrs. Walter Rosendahl, Mr. and Mrs. Harvey E. Barz and Myrna, Eugene Greiman and family, Les Hartbeck and family, Mr. and Mrs. Louis Jurgameyer, Mr. and Mrs. Fred Barz.

All bought well filled baskets of food and a bounteous dinner was served at noon and all enjoyed a fine time.

It was decided to hold the reunion again next year.

FUNERAL SERIVCES HELD FOR BEN BUEHLMEYER 63

Ben Buehlmeyer, 63, died last Thursday and services were held at the Klemme Methodist Church Sunday afternoon, 2:00 o'clock, June 8th, with the Rev. H. E. Harvey officiating.

Interment was in the Ell Township Cemetery. The casket bearers were Lloyd Lau, Emil Lau, Walter Lau, Henry Greiman, Ben F. Greiman and Wm F Greiman. Wellemeyer was in charge of the arrangements.

Obituary

Frederick Benjamin Buehlmeyer was born July 20, 1883, at Elkport, Clayton County Iowa, the second of two sons born to his parents, William and Christina Buehlmeyer.

When Ben was one year old and his brother William was four, a double tragedy occurred which broke up their home.

First the Mother died of Appendicitis at th eage of 27, and then the Father died suddenly while on a trip to Germany; the two children thus orphaned, were taken in by their Grandparents, Christian and Dora Lau, who provided a home for them until they were grown.

Christian nd Dora Lau and their family including the two grandsons moved to Klemme in 1892, when Ben was 9 years old.

Ben completed his common school education in Klemme, and also attended religious instruction at the German Methodist Church

As a young man Ben rented several small tracts of land west of town and farmed. Later he worked as a farm hand for Val Josten, Sr. and for John Lauden. During the last few years he worked by the day for the Klemme Grain Co. and for Lloyd Lau. Ben Buehlmeyer was a faithful and willing worker at the humble job of "Common Labor."

Ben became ill about four weeks ago and was confined to his bed, the end came Thursday evening, June 5th 1947.

He reached the age of 63 years, 10 months and 16 days.

He leaves to mourn his passing: one brother, William Buehlmeyer, Klemme, Iowa; two Uncles, Lewie and Frederick Buehlmeyer of Elkport, South Dakota; two Aunts, Mrs. Doris Greiman, Garner Route 4 and Mrs. Lena Reusch, South Haven, Mich. and a host of cousins and other relatives.

The Belgian Congo exports to the United States large quantities of copper, tin, cobalt, radium, industrial diamonds, palm oil, fibers and rubber.

NEW SCHOOL LAW ENDS RE-ORGANIZATION BY THE LOCAL BOARDS

County Superintendent Tells Of School District Reorganization Laws

Two years ago most public schools in Hancock Conty maintaining a high school enlarged their services to public in the rural areas surrounding their respective schools by offering bus transportation to pupils. Schools not offering bus service in 1945 did offer it in 1946, until today every part of Hancock County is in a bus service area. Before 1945 only two Indept schools and the consolidated schools of the county offered bus services

With the coming of buses, school boards and patrons alike, began to talk school and school districts. To clarify the picture, as we see it, the following summary is given for your information:

The 52nd General Assembly passed a law, Senate File 392 which amends chapter 275, Code 1946, with regard to the reorganization of school districts.

Sect. 4. From the effective date of this act until June 30th, 1953, no new school districts may be formed, nor shall any school district boundary be changed either by consolidation, merger, or otherwise under the laws of this state, except under the provisions of this chapter."

Since this act became effective May 8, 1947, by publictaion that means an end of ALL reorganization, consolidation, or boundary line changing activities as of that date, except under the provisions of the Chapter 275 as amended by Senate File 392.

From May 8, 1947 until June 30, 1953 all reorganization must be the result of detailed studies and surveys carried on by the county board of education under the provisions of Chapter 275 which now provided among other things that the state superintendent shall prepare plans and suggestions for organization within six months of the effective date of the act. All reorganization must be approved by both the county board of education and the department of public instruction BEFORE being submited to the vote of the affected districts.

Under this law, $500.00 is appropriated by the state to each county board of education to begin carrying out the provisions of this act. Under the provisions of Senate File 245, the County Administration Bill, the new county board will have authority to levy funds for its work.

(Summary by Chas. S. Whitney, Co. Supt., June 2, 1947.)

TIMES LINOTYPE OPERATOR IN VET'S HOSPITAL

Elwood Geary, linotype operator at the Times shop, left Sunday for the Voterans Hospital in Des Moines where he will have an appendix operation performed.

The duties of linotype operator is being taken over by Bill Montgomery and the Editor until Geary returns to his job.

The Times is operating short handed and the publication may be a bit late until his return.

FOUR BIRTHDAYS CELEBRATED WITH DINNER

Mr. and Mrs. Stewart Hevilin entertained a number of relatives at a dinner Sunday at the Art Johnson home honoring Joe Johnson, Ginger Kudje, Mrs. Robert Johnson, and Jerry Nan Hevilin, who had birthdays recently

Those present besides Art Johnson and the Hevilin family were O. D. Potter and family of Mason City; Mr. and Mrs. Art Kudje and Ginger; Mr. and Mrs. Dwight Hummel and children; and Mr. Joe Johnson of Klemme; Mr. and Mrs. Clarence Johnson; Mr. and Mrs. Robert Johnson; Mr. and Mrs. Ernie Pergande of Renwick, and Miss Emily Johnson, of Klemme.

MAYOR RESIGNS

W. C. KERAUS

W. C. Keraus, Mayor of Klemme for the past six years, Monday evening handed in his resignation to the Town Council at the regular meeting of that body.

Mr. Keraus was first appointed Mayor of Klemme by the Town Council to succeed Paul Grange who moved to Mason City. Mr. Keraus was then re-elected two times to the office.

In an interview with a Times reporter he stated that his work demanded his full time.

Stille Appointed Mayor

Upon accepting Mr. Keraus' resignation the Council then appointed J. E. Stille as Mayor to fill the unexpired term. Mr. Stille has been a former Mayor of Klemme.

Voters at the Town Election next March will vote on Mayor and Councilmen.

DELEGATES TO STATE 4-H GIRLS' CONVENTION

Hancock County will be represented at the eighteenth annual state 4-H Girls' Club Convention at Iowa State College by 10 local club delegates and 1 adult leader, Paul Henderson, County Extension Director, announced this week. Dates for the convention are June 18 to 20.

All girls attending the convention are required to be active club members and more than 15 years of age, Henderson said. Attendance of leaders has been limited this year to one for each 10 girls.

"Learning to Live in a Changing World" is the theme of this year's convention. This is one of the ten national guideposts for 4-H work adopted two years ago. The entire program for the convention has been developed to give the delegates a clearer understanding of the changes which are taking place and what adjustments individuals must make in meeting the changing situations.

Features of this program will include addresses by prominent speakers, discussions by panels of the members and other individuals, the annual election of state officers and a fun night.

To give the delegates an insight into the world of tomorrow an exhibit, "Previews of Progress" is being brought to the convention by the General Motors Corporation. It will include many scientific marvels developed in research laboratories of the nation.

There will be special chourses and other musical numbers for the convention sessions and special project sessions for the delegates. In these meetings the girls will have an opportunity to meet with specialists and faculty members of Iowa State College and learn of the newest developments in the home economics field.

Red School of Sabotage Exposed

Soviet Trains Foreigners To Wreck Own Countries

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON.—It was one of those strange, foggy nights that sometimes descend over the eastern part of America—not like a London smoky fog, nor the clean white stuff that rolls in like giant breakers so artistically against Yerba Buena in San Francisco bay, nor yet like the mists on the ricefields, nor the clammy North Atlantic "weather" that drips over crow's-nest and quarterdeck, turning ship and sky into cold, wet drizzling steel.

The point is that I was stranded in York, Pa., (mentioned recently in these columns for its hospitality to veterans) It was simply hopeless to try to inch along through the condensed milk that enveloped us. I knew there was a genial hostelry there, so we edged up to it, were decanted and, sure enough, met no less a person than Junius Wood, lolling in the lounge.

Baukhage

Of course, you are likely to meet Junius Wood anywhere, on an atoll in the Pacific, tapping his pipe into the crater of Mount Vesuvius, fording a fjord in a borrowed car, lost in Grand Central or sipping vodka in the Kremlin. So it wasn't strange to find him in York, Pa.

As I write these lines, I have just left Mr. Wood (at the National Press club this time). He informed me that some of the former "students" about whom he writes in the article quoted below testified recently before a congressional committee. Rep. Karl Mundt of South Dakota read Wood's article into the Congressional Record, thus making it a "public document."

(Today a lady who signs herself "Just Mary" writes me saying that I should pretend I'm a "nice ole Beagle hound" and "keep that beezer" of mine "pointed down the middle of the road." She claims I have the "darndest habit of "schroochin over to the right." I hope the following won't hurt her feelings.)

Here are the quotes from the Wood story, which originally appeared in the April issue of "Nation's Business" under the title of "Trained to Raise Hell in America." Background I know was gathered by Wood while he was reporting from Russia and I was bending over a copy desk in the old Chicago Daily News office whither Junius directed his daily dispatches:

"Attention, ambitious young men and women," says Wood. "A well-established and liberally endowed university offers you free courses in factory sabotage, bomb making, kidnaping, train wrecking, bank robbery, fomenting armed mutiny—and other techniques of violence and treason. Scholarships cover all expenses, including recreation and annual vacations at summer resorts. This university is the West Point of world revolution—the International Lenin school in Moscow. This university teaches the youth of other lands to go back home and wreck their countries. Over the years it has trained and returned to the United States an estimated 800 disloyal Americans. They are the leaven of some 50,000 Communists and 100,000 pinkos in our land; they are the high officers of a secret army now being drilled to overthrow our government and social order."

Wood describes the super-secret surroundings of the school, and what happens to Russians who get curious about it (Siberia or the firing squad) and goes on to describe the hush-hush atmosphere into which a student is inducted:

"With matriculation, each student takes a revolutionary or party name by which he will be known in Communist circles and outside activities. Mark Aldanov in 'The Fifth Seal' tells of a party worker who had so many aliases he forgot his baptismal name."

According to Wood, the school has a three-year course devoted primarily to intensive indoctrination. But there are also courses in labor activities, party organization and propaganda, as well as military tactics and weapons.

When the student returns to his own country, says Wood, "he must join trade unions or liberal societies—attend all meetings, pay dues promptly, be eager for work, unite others by party discipline until the organization is blindly following the party line in which he (the student) is so well grounded."

Wood points out that Moscow does not consider revolution imminent in this country.

But he claims they are preparing for the psychological moment . . . "and these peaceful preparations go on for years through capable party members burrowed into trade unions, public offices, the police force, liberal clubs and other sources of information." When the time comes to attack a city, "the needed knowledge of where to attack to paralyze it will be at hand—even such facts as the knowledge that a watchman has a dog will have been recorded."

"According to the time schedule of the Communists," says Wood, "a city like Chicago could be captured in less than 48 hours."

Despite these frightening words, Wood says this in conclusion: "The Soviet schools for foreigners are not too alarming when they are stripped of mystery. It would be well to know their 800-odd American alumni, also their instructors and what secret plotting is behind the formal handshakes over a conference table or the clink of cocktail glasses at a banquet board. It also will help when they know that we know—an interesting long-range job for our state department and FBI."

End of quotation. These words are the author's and the views expressed not necessarily those of your columnist. But Junius Wood is a source "hitherto reliable" and I offer him for what his report is worth. He assured me today that his sources are "old grads," not necessarily Leningrad and Stalingrad, but real alumni of this somewhat-too-progressive school.

War-ravaged Nations Need Food

A few weeks ago a physician said that the British people were starving to death on their present rations. We know what has been happening these past weeks in Germany. Other European countries are in no better position, some worse.

I have seen what being too hungry does. I have seen it in the United States army, on shipboard and among foreign peoples. It does something to your brain that just can't be explained in terms of everyday, easy American language.

The American people will do their part, collectively, to help the rest of the world over this ugly gulch, partly because we are decent people, partly because we don't want that "something strange" to happen to their brains which will make them the prey of any evil political influence which exists.

The American people, individually, can help in another way. They can send some food to the people whose addresses they know and they can do it efficiently, cheaply, quickly, through an institution called CARE.

C-A-R-E stands for Cooperative for American Remittances to Europe.

It is a non-partisan, non-profit institution which has the blessing of the United States government.

Through CARE you can send packages, well packed, containing carefully chosen food of the kind most needed and other materials of which there is a tragic lack.

A $10 food package delivers 40,963 calories. (The minimum ration in Germany is 1,500 calories a day. They aren't getting that.)

A blanket package at the same price provides two all-wool army blankets, scissors, needles, thread and two sets of heels and soles for shoes.

A new package, same price, delivered, contains 17 yards of cotton goods, needles, thread, thimble, scissors and thread. And how they want cotton goods! Clothes are still not available.

Here are the countries to which you can send the cotton package: Austria, Belgium, Czechoslovakia, Finland, France, Greece, Italy, Hungary, Netherlands, Norway, Poland, Romania and Germany (all zones except Russian).

The food packages can be sent to all the above, plus England, Wales, Scotland and northern Ireland.

You'll help Uncle Sam's food problem, too, if you send a package to someone whose address you know in these countries—if you CARE.

TYRO THESPIANS . . . Roanoke island youngsters, some of whom have never seen a stage play in their young lives, try out for parts in Paul Green's "The Lost Colony," an outdoor spectacle staged annually in a waterside amphitheater on the North Carolina island. More than 52,000 persons saw the symphonic drama last year in its postwar revival.

NEWS REVIEW

Postal Boost Foreseen; Economists Decry Slump

POSTAL RATES: *May Go Up*

A measure embodying the first general revision of postal rates since 1879 which would add about 110 million dollars a year to post office revenues has been introduced in the house of representatives.

The bill provides for a 30 per cent increase in parcel post rates and would revise the air mail rate from five to six cents an ounce. In addition, the new plan would add about 30 per cent a year to present scales for second-class mailing of newspapers and periodicals sent outside the county in which they are published.

Another provision would maintain the current three-cent local and non-local rate for first class mail beyond the July 1 deadline when those rates were slated to revert to the former two-cent level.

The new rates would go into effect 60 days after the bill is passed and signed by the President.

READJUSTMENT: *No Depression*

Not a depression but a price "readjustment" is in store for the United States, the federal reserve board has predicted.

Reserve board economists explained that heartening news by pointing out that a downtrend in prices is "necessary, healthy and inevitable." The inconsistencies in the national economy, which have arisen out of the fact that our economy is part rigged and part free, will have to be eliminated.

For instance: About 14 million organized workers have derived benefits through forcing higher wage levels. Twice that many unorganized workers have not shared to an equal extent in the wage increases.

A number of industries, able to control prices, have driven them upward. Others, at the same time, have been held down by government controls.

The main reason that farm and food product prices soared after the war was that there was little else the consumer could purchase. Now, with production making a comeback, the previously scarce radios, refrigerators, automobiles and so on are competing for the consumer's money.

Federal reserve board economists say that farm prices are expected to stabilize about 25 per cent under the 1946 peaks. They also express confidence that they can put the brakes on any further inflation if congress provides the necessary assistance.

GIANT'S DEATH: *End of an Era?*

The battleship Oklahoma, first of the so-called "super-dreadnaughts," might well be recorded in history as an accurate symbol of the era during which it ploughed the seas for the U. S. navy—heroic but futile.

In her 31 years of steel-clad existence she never fired a shot at an enemy.

Based at Berehaven, Ireland, during World War I, she saw no action; and on December 7, 1941, five Japanese torpedoes sent the sturdy old ship lunging to the bottom of Pearl Harbor before her crew could man the guns.

Raised to the surface and then abandoned as not worth salvaging, the Oklahoma was consigned to the scrap heap and taken in tow for the last long voyage across the Pacific.

Suddenly, 540 miles northeast of Pearl Harbor, the tragic battleship listed heavily, as if tired of war and its aftermath, and slipped into the sea, three miles deep at that point, for her final escape from the era of violence that had been her lifespan.

END THE WAR: *Students Riot*

Demonstrating violently in open defiance of Chiang Kai-shek's order to quiet down, thousands of university students in several Chinese cities fortified their demand that the civil war be ended immediately by calling for a general strike.

Declaring sternly that the student riots were instigated by Communists, Chiang said they would be quelled forcibly if necessary. The students reacted with further parade and violence in Shanghai, Nanking and Peiping.

About 25,000 students were on strike from 16 universities, with their demands including everything from a better system of grading papers to higher government living allowances and an end to the war.

'JOE COLLEGE' . . . This is the Japanese version of "Joe College." In the Nippon capital, the smart college lads like to look like something out of the poorhouse. This student wears a tattered suit and sloppy cap and lets his hair grow long.

EXPORTS MUST CONTINUE

World Food Outlook Is Critical

WASHINGTON.—Because of foreign crop losses, the world food situation will remain critical for the 1947-48 crop year, according to a warning issued by the department of agriculture. Although an increased output among the principal producing nations is foreseen, this gain will be offset by declines in grain production in nations which normally import part of their food requirements.

This shift in the supply picture will mean a "somewhat greater movement of grains in international trade during the coming year if supplies in importing countries are to be maintained at the relative low levels of 1946-47," the office of foreign agricultural relations said.

The gloomy picture was presented as the administration was in the midst of an all-out effort to send additional supplies to both Germany and France to avoid a crisis that could force reduced rations throughout most of northern Europe.

Officials abroad railed at failure of the German government to push properly internal food collection, and charged German producers with hoarding their output.

The department sounded one cheerful note in predicting some increase in sugar, potato, and fats and oils production, but reminded that "the supply of all these commodities will continue below prewar."

The same situation was reported for rice, with the surplus producing areas of southeastern Asia still not in full production.

Finance will be a major problem in agricultural trade in 1947-48, the department said. With the temporary wartime expedients of lend-lease and United Nations Relief and Rehabilitation administration out of the picture, the volume of foreign imports will depend on the amount of United States funds appropriated for foreign relief, the buying power that importing countries can muster out of the receipts from their own exports, out of gold and dollar reserves, and out of loans.

BRAVO, BUCCANEER

Corpus Christi Fete To Revive Spirit of Colorful Pirate Days

WNU Features.

CORPUS CHRISTI, TEX.—Spirit of swashbuckling Pirate Jean Lafitte, often termed the most romantic and colorful figure in modern history, will again cross the American scene with the revival of Buccaneer Days at Corpus Christi, June 12, 13 and 14. Discontinued during the war, Buccaneer Days will be revived this year, with nationally famous entertainers, leading dance bands, colorful pageants, star-studded stage shows and other events added to emphasize the "fun and entertainment" theme of the celebration.

Although Jean Lafitte's crew was the scourge of the gulf during the early 1800s, their contribution to Gen. Andrew Jackson's defense of New Orleans in the War of 1812 won them a full pardon from Pres. James Madison. Later Lafitte moved his pirate band to Texas, and historians agree that in 1821 he established his headquarters on the present site of Corpus Christi. From time to time old Spanish coins have been found along the beaches surrounding the city, lending credence to the numerous stories of his buried treasure here.

Pirate Jean Lafitte and his crew, portrayed by leading citizens of South Texas, will be the central characters in the celebration. Festivities start as the pirate brig sails

'MISS BUCCANEER' *Modern Version*

into Corpus Christi's harbor to "lay siege" to the city. As they storm the harbor, the "Pirate Chief" will publicly proclaim that the city has been taken over in the name of all good pirates.

From that moment on, during the next three days, a series of events will be staged along the city's bayfront. At least two events will be staged simultaneously to insure diversity of entertainment.

One of the features of the '47 Buccaneer Days will be the Miss Texas bathing beauty finals, with the winner going to Atlantic City's Miss America contest to represent the Lone Star state.

Sail boat races, annual Galveston-Corpus Christi open sea race, a professional aquatic show, a night-time water parade with floats and boats colorfully decorated with flowers, hidden treasure hunts, several national radio network programs originating from the huge floating stage, motor boat races, gigantic street parades, barber shop quartet contest, swimming and diving contests, fireworks displays, old fiddler's contest, square dancing exhibitions and dancing to three name bands will complete the celebration program. This year's Court of the Queen of the Seas will be one of the most lavish pageants ever presented.

Iowa Centenarian Sounds Challenge As Garden Champ

OELWEIN, IOWA. — Belying his 106 years, Peter Duffy once again has issued his perennial challenge that he can pull weeds faster and out-hoe any gardener in Oelwein.

Despite his age, Duffy has the vigor of a man in his twenties and doesn't even need glasses to read the evening paper. His only physical handicap is deafness.

Of his original family of nine children, seven still are living and from here on out the Duffy progeny are numerous.

"I sure started something," commented Duffy, as he counted his 24 grandchildren and 25 great-grandchildren.

Duffy came to Iowa with one of his 12 brothers and his three sisters to work on the farm of relatives. But his wanderlust wasn't satisfied. It took a trek to the West and a little silver mining to get traveling out of Duffy's system before he came back to the Tall Corn state to make his permanent home.

Duffy also is a booster of air travel. One of his granddaughters took him for a plane ride eight years ago and he never forgot the event.

Grandfather Tops Law School Class

NEW YORK.—After 25 years as a traveling salesman, Harry L. Donnelly, 51-year-old grandfather, took up the study of law "just for a gag." Now he has been graduated summa cum laude as valedictorian of his class from the law school of St. John's university in Brooklyn. Donnelly led his class in scholarship despite the fact he was graduated from high school in 1912.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

Work has been commenced on lighting, seeding and fencing of the new $2,500,000 municipal airport at Dubuque, Iowa. There will be 116 contact lights along two runways, with 16 cone-mounted range snow lights. A 51-foot tower will be equipped with a rotary beacon light 36 inches in diameter. . . . The former naval airfield at Arlington Heights, Ill., has been taken over by Illinois Aircraft Services and Sales company for civilian training purposes. It will be known as the Arlington Flying Center. . . . Colorado Flying Farmers and Ranchers held their second annual meeting at Christman field, the Colorado A. and M. college airport at Fort Collins. Program highlights included discussion of legislation affecting aviation, survey of uses of airplanes in agriculture and an outline of the purpose and program of the Flying Farmers organization. . . . Mayors, airport managers and aircraft dealers from 10 midwestern states gathered at St. Louis for an aviation clinic sponsored by Parks College of Aeronautical Technology. The clinic was arranged in connection with the regional air fair, held in the St. Louis arena. . . . The Lenox, Ia., airport, operated by Al Wurster and John Kendall, is being improved to meet government requirements to permit flight instruction for war veterans.

'DOGS IS DOGS'

Ellis Parker Butler's classic, "Pigs Is Pigs," the story of the express agent who found more pigs in a shipment than he bargained for, was bound to have its modern counterpart, especially with all the pets and puppies, pedigreed cats, spiny ant-eaters and such traveling in air express service these days. And so it happened one day recently on a Toledo-New York flight. A valuable cocker spaniel, en route from Toledo to Mt. Desert Island, Me., gave birth to a litter of four puppies as the plane sped towards New York. Upon arrival at LaGuardia field, the sky-born spaniels were pronounced fit to continue to Bangor.

The Home Town Reporter in WASHINGTON

By Walter Shead
WNU Correspondent

WNU Washington Bureau
1616 Eye St., N W

Beauty of Spring Contrasts With Ugliness of Politics

WASHINGTON has been described as a city within a forest. Certainly to your home town reporter, springtime is the most beautiful time of the year in this most beautiful of all cities. From the first warm days when the cherry blossoms burst into triumphant loveliness, on through the spring, summer and into late autumn, the city is a riot of color from the flowers and blooming trees, and its streets and parks are oases and wide avenues of welcome shade.

This particular day is a lazy, balmy day and out in LaFayette park the power lawnmowers whirr over the smooth lawns. Across Pennsylvania avenue, the slowly whirling sprinklers make the closely clipped White House lawns deeper pools of greenness, beneath the towering, age-old elms.

As I stand in the shade at the west end of the White House awaiting the call to a Presidential press conference and drink in the loveliness of the White House grounds, gardeners working amid the flower beds, traffic sounds muffled, the heated debate and bombastic oratory on Capitol Hill seem indeed far removed and somehow apart.

But it is there, the pulling and hauling, stresses and pressures . . . labor, taxes, appropriations, politics, 1948 an election year with Democratic national headquarters in the Mayflower hotel pulling the strings one way and Republican national headquarters, with its old red brick Georgian mansion at 1337 Connecticut avenue, pulling the other.

Business Lobbyists

Speaking of pressures, the fight on the house and senate labor bills brought into conflict the most powerful group of lobbyists and the greatest nationwide and local campaigns for and against the bills probably in the legislative history of the country.

Business lobbyists have been campaigning for months, some of them since 1938, for changes in labor legislation, and they likely won out from sheer weight of numbers if for no other reason, for there were 304 business and industrial lobbyists registered and 134 labor lobbyists, a total of 438 registered lobbyists to work on the 531 senators and representatives in congress.

On the business and industrial side, National Association of Manufacturers planned and conducted its campaign on a nationwide basis from Washington and New York The United States chamber of commerce, with 2,713 member organizations and with representatives in every one of the 435 congressional districts in the country, organized at the grassroots to bring pressure to bear on congress. Chief of the C. of C. campaign was gray-haired, $15,000-a-year Clarence Miles, who has been with the organization since 1929. For NAM, Walter Chamblin Jr., $28,000-a-year vice president, directed the fight to pass the labor bills. He is an ex-newspaper man and has been with NAM since 1938. These two organizations bore the brunt of the fight to pass the labor bills.

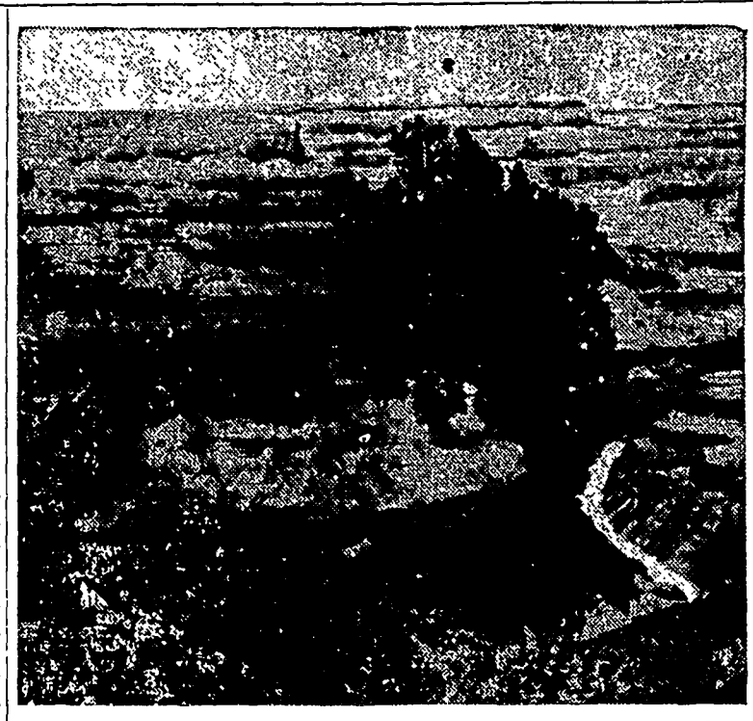
A Ph. D. in CIO Camp

For American Federation of Labor, white-haired, 64-year-old William C. Hushing led the fight against the labor bills He has been working on legislation in Washington for 30 years and is a $7,280-a-year man. He is a former pattern-maker from Litchfield, Ill.

For the CIO only one lobbyist is credited to the national organization, Nathan Cowan, director of the legislative department at $4,280 a year. Probably the top-flight man on the CIO side is young, good-looking Robert K. Lamb of the United Steelworkers, who draws $8,000 a year, has three degrees from Harvard, A.B., A.M. and a Ph. D. in Economics, and has served the CIO in Washington for almost four years. He is a member of American Federation of Teachers, Harvard local.

The AFL conducted its campaign on a nationwide basis while the CIO, like the Chamber of Commerce, operated on the local level by personal contact and mail from the states to congress. The CIO opened its campaign by bringing state delegations to Washington to work on their individual congressmen and senators the week of April 27.

The labor group didn't really get started nationally until along in April when the Hartley bill passed the house. The cards were somewhat stacked against them for they had no control of the 20 southern senators or southerners in the house who voted against them, and then they had the opposition of Ed O'Neal, mild-mannered but tough. As president of American Farm Bureau federation, he is one of the most influential men in Washington. Then there was John L. Lewis. His record and his threat of a new coal strike were no help to labor.



THE MASTER CARVER . . . The elements, at work since the beginning of time, have carved this gigantic trough in the Grand Canyon of Colorado river. One of nature's most spectacular sights, the canyon is 297 miles in length, a mile deep and at some places 18 miles wide.

NATURE'S MASTERPIECES

Erosion Carves Stupendous Spectacles in Three Canyons

WNU Features.

From the beginning of time, wind and water have combined to carve the earth's surface in a small section of northern Arizona and southern Utah into three of the most stupendous spectacles in the world, the Grand canyon of Colorado river, Zion canyon of Virgin river and the great horseshoe-shaped amphitheater known as Bryce canyon.

Each area in this scenic triumvirate is now a national park and as such belongs to the people of the United States. These parks may be counted among the incomparable jewels in the national treasure—to be enjoyed by us today and to be held in trust for the benefit of generations of Americans yet to come. Grand Canyon National park in northern Arizona is the largest of the three parks, containing 645,000 acres. Zion National park in Utah is second in size with 94,000 acres and Bryce Canyon National park, also in Utah, is the smallest with 36,000 acres. In 1946 more than 825,000 people visited these parks.

National Parks Fifth In a Series

Grand canyon is 297 miles in length, a mile deep and in some places 18 miles wide. Mighty mountains, rising thousands of feet from the depths of the gorge, are dwarfed by the enormous proportions of this titanic trough. From the rim of the canyon the visitor may look down on the summits of these mountains Wave on wave they reach to the horizon, garnet, purple, topaz, like a stormy sea on fire. And a thousand feet down real storm clouds may lash these mountains, lightning may sparkle and thunder may reverberate from wall to wall, while above the sun shines in a cloudless sky

* * *

BRYCE CANYON presents a sharp contrast to Grand canyon. Here the visitor enters a fairyland of pink, white, red and lemon yellow, a land of minarets and towers, a land of castles and cathedral domes, a dreamland of goblins and grotesque shapes. There are 30 miles of pink cliffs carved and sculptured.

The main amphitheater, three miles long and about two miles wide, is crammed with fantastic figures and kaleidoscopic color. Trails lead to such places as Sunrise Point, Fairy Castle, Queens Garden, Peek-a-boo Canyon, and Silent City.

* * *

AGAIN IN SHARP contrast, Zion canyon is like a vast cathedral. The dome of heaven seems to rest on its sheer stone walls Considered by many people the most satisfying of all national parks, Zion, by the splendor of its scene, invariably commands silence from all who enter Approaching by Mount Carmel highway, the first view is from the wall of the canyon through windows in the highway tunnel. From the south the visitor enters along the course of Virgin river passing between the huge rock masses called the East and the West Temples.

Once inside these gates, the traveler stands in a level valley enclosed by almost perpendicular walls which rise more than half a mile above him. Side canyons cut these walls into tremendous blocks, which rise from a blood red base, changing to reddish brown and, two thirds up, to gleaming white, tinted with buffs, grays and reds.

As the visitor proceeds along this monumental valley he passes the Sentinel, the Mountain of the Sun, the Court of the Patriarchs, the Great White Throne, Angels Landing, the Weeping Rock and finally the Temple of Sinawa.

This mystical amphitheater is completely surrounded by stone rock walls. The level floor is green with trees and in early summer bright with blossoms. In the center of the circle stand two large stone pillars. The larger one is called the altar and the smaller one is known as the pulpit. The visitor instinctively listens for the sermon and waits for the sacrifice. The early pioneers, deeply religious Mormons, were so impressed by the solemnity of the scene that they named the canyon "Little Zion."

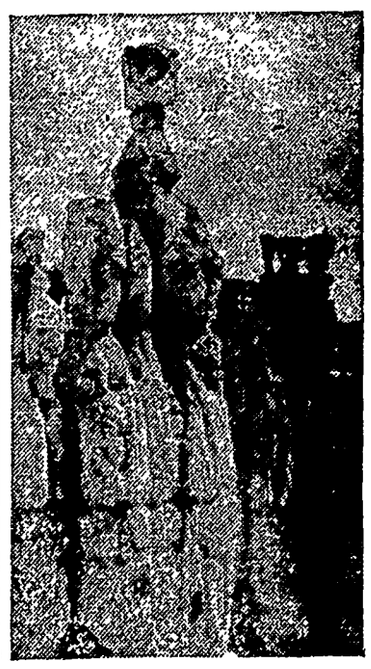
* * *

THESE THREE national parks are readily accessible by paved highways, but the roads on the north side of Grand canyon are closed by snow from October 15 to May 15.

Accommodations of all types, including hotels, lodges, cabin camps and cafeterias, are found on the south rim of Grand canyon. Lodges and cabin camps also are available at the north rim and in both Zion and Bryce. Free campsites for motorists bringing their own equipment are maintained in all of the parks by National Park service.

Excellent paved highways within the parks make it possible for all travelers, without physical exertion, to see many of the principal wonders of each park. For hardier persons, there are miles of foot trails, and the adventurously inclined may explore more distantly on horseback. It is possible to cross on foot, by mule or horse from the south rim to the north rim of Grand canyon, but this trip and all trips down into the canyon should be taken only by persons in excellent physical condition.

In each park, ranger-naturalists give frequent talks, and in the evenings they conduct entertaining programs around the campfires.



VERITABLE FAIRYLAND . . . Fantastic figures and kaleidoscopic color prevail in Bryce Canyon National park in Utah.

Old Fort of 'Lost Colonists' Unearthed

WASHINGTON. — Recent archeological excavations at the traditional site of the fort of Sir Walter Raleigh's "lost colonists" within Fort Raleigh national historic site on Roanoke island off the North Carolina coast have revealed positive evidence of an old earthen fortification which may be the one constructed by Raleigh's colonists, according to Newton B. Drury, director of National Park service.

Three exploratory trenches have been excavated at the fort site. Visible in each trench was the profile of the ditch or moat of the fort, approximately 10 feet broad and 5½ feet deep. The depth and character of the fill indicate that the fort is indubitably of great age, in contrast to the remains of Civil war forts of earthen construction discovered elsewhere on Roanoke island.

You Should Know Your Government

GOVERNMENT QUIZ

White House Marriages

HAS a President ever been married in the White House?

Yes, Grover Cleveland married his ward, Frances Folsom, in the White House on June 4, 1886.

Do you know which two Presidents died in the White House? Why the secretaries of agriculture, labor and commerce cannot succeed to the Presidency, while other cabinet members can?

* * *

Our Reader Service Booklet No. 202 answers hundreds of interesting questions about our government history, tradition, facts and figures Send 25 cents (coin) for "Know Your Government" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. Print name, address, booklet title and No. 202.

JUST LAUGHING

Kept His Eye on It

The teacher had written 92.7 on the blackboard, and, to show the effect of multiplying by ten, had rubbed out the decimal point.

"Now, Alfred," she said, "where is the decimal point?"

"On the duster," replied Alfred.

Or Not?

The employer, on leaving his office, was instructing his new secretary what to say if anyone called while he was out.

"I may be back this afternoon," he told her. "And then again, I may not."

The girl nodded brightly.

"Yes, sir," she said. "Is that definite?"

Short Reach

Two men were discussing a mutual acquaintance.

"Nice fellow," said one, "but have you noticed how he always lets his friends pick up the dinner bill?"

"Yes," replied the other. "He has a terrible impediment in his reach."

An intelligent girl is one who knows how to refuse a kiss to her boy friend without being deprived of it.

Al or Nickel

The telephone operator answered an agitated summons from a call box.

"Oh, miss," came a tearful feminine voice, "can I have my nickel back, Albert won't talk to me!"

Guinea Pig

Diner—I beg your pardon, but why do all these girls stare at me?'

Waitress—I'm not supposed to tell you, sir, but we got some of our food from the school of cookery next door, and if you get sick after that omelette you have just eaten, those girls will have failed in their examination!

LOOSE PLATES?

RECOGNIZE DAIRY FOODS AS "TOPS" IN NUTRITION

Ames—Milk butter and other dairy foods retain their position as nutritional "tops" it was stated at a recent meeting of the Iowa State Dairy Association held at Iowa State college. Speakers included dairy leaders from the Iowa Dairy association who reported on research into nutritional values of various foods.

"Milk has gained increasing acceptance as nature's most nearly perfect food," according to reports "because it is more broadly provided with the essentials of nutrition for human beings. This includes not only carbohydrates, proteins and fats—but also many of the minerals needed to sustain and build strong bone and tooth structures when they work with Vitamin D, the sunshine vitamin. Research is being done with other vitamins besides Vitamin D present in milk, and on mineral content. It was stated, and partial reports were given.

Research specialists also pointed out that the valuable mineral content and other food values are present in cheese, ice cream and other products derived from milk.

WE SERVE YOUR NEED FOR BETTER FEED

As an essential part of Iowa's great Dairy Industry, we too, hail June as Dairy Month.

In Dairy Month as in every month, we're happy to have our Dairymen neighbors drop in and discuss feeding programs with us.

We're at your service, and hope we'll be serving you!

NOTICE TO DESTROY WEEDS

To All Land Owners and Tenants and Those in Possession of Property in Hancock County, Iowa.

The following dates were set by the Board of Supervisors for the destruction of Canada Thistle June 8, 194? There are large sprayers and small sprayers available also 2-4-D material. The time to spray with 2-4-D is while the plant is growing and full of vitality. The coming week or ten days is a good time to spray.

Please see to it that your thistles are cut or sprayed on or before said date. June 30, 194? By

RAY HUNSLEY,
County Weed Commissioner.

Dated June 1, 194? 1p

GO AFTER WEEDS WITH 2, 4-D NOW

Since It Does Not Injure Grasses It Is Ideal for use On Lawn

If you haven't tried that "magic" compound, 2,4-D, that kills lawn weeds but doesn't harm grass, better do so right now, while the spring dandelion crop is beginning to flourish, says Iowa State College plant pathologist.

2,4-D is deadly to practically all broad-leaved weeds, yet causes no injury to grasses. Sylwester says it is ideal for lawns, golf courses, cemeteries, airfields, fence rows, ditch banks, and roads.

Many Compounds

There are now about 40 different compounds of 2,4-D available. Some are liquid, some powder, others in tablet form. All are designed to be mixed with water, making a relatively cheap spray.

For small lawns, a sprinkling can may be used to apply the material. For large lawns a 3 gallon knapsack sprayer should be used. For larger areas, powder sprayers will be necessary.

Pick a quiet day in May or June, Sylwester says, when the temperature is about 75 or 80 degrees. Spray under low pressure to avoid "fogging" which would allow some of the solution to drift to nearby gardens or fields containing valuable domestic plants. Use only enough spray to wet the plants.

Water Thoroughly

After the lawn has been sprayed, wait 4 or 5 days and then water it well. This helps thicken the grass to replace the dying weeds.

Sylwester advocates good cultural practices on lawns to supplement sprays as weeds control. Heavy turf will discourage weeds.

Leveling the lawn, top-dressing with rich soil or peat, fertilizing and judicious watering are good practices. Another valuable tool is to cut the grass high, allowing the clippings to remain as a mulch to conserve moisture and protect the soil from heat and drouth.

With a good turf program, Sylwester estimates 2,4-D need be applied only about once every 2 or 3 years.

It is best to use one sprayer for 2,4-D and nothing else.

YOUTH ASSISTANT TO START WORK IN HANCOCK COUNTY JUNE 15

Edgar W. Darrow has been appointed Hancock County Extension Farm Assistant for the summer months and will devote his full time to 4-H club work, assisting the boys with their projects, 4-H meetings, club tours, and demonstration teams.

Darrow is agriculture student at the state at Iowa State College, Ames. He is the son of Mr. and Mrs. W. F. Darrow, who live northeast of Garner.

While a 4-H member in Concord Township Darrow had help need dairy heifer, Western horse feeding, and market pig projects.

After graduating from Ventura High School in 1938 Darrow spent several years alternately assisting in his father's farm and attending Iowa State College. He spent three and one-half years in the Army Air Forces.

Each Hancock County 4-H Club should plan now to organize their clubs and Demonstration teams.

DAIRY QUALITY PROGRAM DISCUSSED AT MEETING IN BRITT

The creamery managers and their boards of directors met with Karl Wester, and A. W. Rudnick, Iowa State College Extension Dairyman, and Paul Henderson, County Extension Director, to discuss Quality Improvement in Dairy Products. This meeting was planned at a meeting held in May.

A temporary organization of all the creameries in Hancock Co. was set up. Each organization appointed a director from their group as follows: C. J. Wille, Klemme Creamery, Wm. Riemer, Garner Creamery, Jens Jenson, Britt Creamery, Norman Hanson, Crystal Lake Creamery, Olaf C. Eliason, Kanawha Creamery, and Clarence Attig, Woden Creamery. This group elected the following temporary officers: Jens Jensen, Pres., C. J. Wille, V. Pres., and Norman Hanson, Sec. Treas.

The purpose of the organization of creameries will be to employ a fieldman to assist all of creameries with a quality program. The consuming public is demanding a better quality product and the aim of the creameries in Hancock Co. is to produce the best.

NOW THERE'S PLENTY OF

BUTTER!

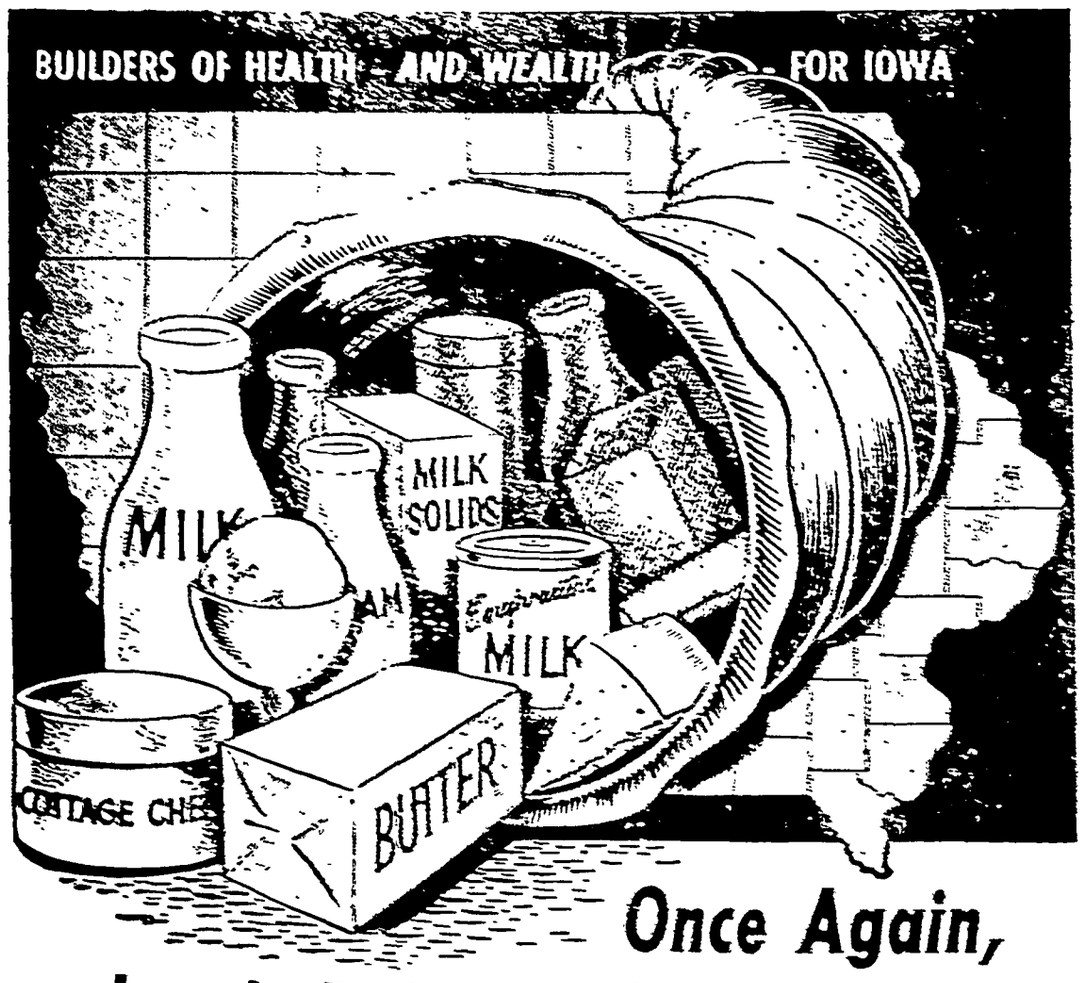
Nothing in the world can take the place of butter—for flavor, for golden goodness, for health-building nutrition!

And June Dairy Month is an ideal time to begin using butter more generously. Spread it thick on bread, toast, rolls, and sandwiches. Use is freely in cooking, to give that final richness and smoothness that can't be duplicated! See that children get lots of it, for carotene and Vitamin A! In almost every case, no matter what you cook or serve—"it's better with butter."

For years, butter was scarce, but now there's plenty once more—so good and nutritious that it's a good buy for your budget, too! Use lots of delicious, high-score Iowa butter—starting today!

Klemme Coop. Creamery Company

JUNE IS DAIRY MONTH — 1ST IN FOODS



Once Again, there's PLENTY for Everyone

so start eating MORE DAIRY FOODS during June Dairy Month

How good to have ALL the dairy foods you want one time, especially BUTTER . . . to "spread a thick" without any haunting thought of shortages . . . to get that EXTRA pat at restaurants . . . to begin again using your favorite recipes, the ones calling for plenty of butter.

And while you're using them—you'll be discovering new taste delights and health values—and you'll also be observing the month dedicated to recognition of our great Dairy Industry, that added $125,000,000 to the income of Iowa last year!

Almost 200,000 Iowa farmers are engaged in dairying—thus doing double service. For their produce builds strong and rugged Iowa bodies—while its income is holding the economic well-being of the state as a whole.

During June and every month—enjoy the finest "eat drink" there is. cool, refreshing milk—and all the fine foods that come from milk—rich golden Iowa butter—delicious cream—ice cream, a treat for every day—tangy, flavorful cheese—nutritious cottage cheese—evaporated milk, the product of 1,000 uses. Your baker knows that dried milk adds rich richness to bakery products.

Especially, serve plenty of milk to the family—doctors say, "a quart a day for each child—a pint a day for each adult."

"IT'S BETTER WITH BUTTER"

IOWA DAIRY INDUSTRY COMMISSION

EQUIPMENT for every dairying need

This is Dairy Month with us, too—for we've got a big stake in the dairy industry we are so proud to serve.

Now that restrictions are a thing of the past, and shortages are being leveled off fast—we can again offer, to our dairy friends, complete stocks of equipment for producing milk, butter, and other dairy foods.

Why not come in and see for yourself how much time and money you can save through up-to-date dairy equipment. You'll be pleasantly surprised!

NEED MORE FALL PIGS THIS YEAR

Breeding Extra Sows Even If Late, Seems Desirable, Quaife Believes

Have more fall pigs this year even if some of them must be farrowed a little later than usual. They look like a good gamble if you have room for them, in the opinion of. E. L Quaife of Iowa State College. He points out that the govenment is asking for 15 percent more sows to farrow this fall than in 1946.

Fall pigs usually should be farrowed not much later than September 15

It is desirable for sows to be picking up in flesh after weaning and before being bred. If they have been bred thin, they should be brought up in weight as quickly as possible

Corn, Legume Pasture

Old sows will get along on car corn and a good legume pasture, Quaife says. During the latter half of the pregnacy period ¼ pound of supplement needs to be fed.

Where the sows are kept in a pasture some distance from the feedlots, the self-feeding of ground ear corn might be practiced.

Gilts on legume pasture will also do well on ear or shelled corn. It is a good idea. Quaife points out, to feed them ¼ pound of protein supplement the forepart of their pregnancy period and ½ pound the latter part.

Iowa swine producers are in a more favorable position than those of any other section to meet the 15 percent requested increase, Quaife feels, because Iowa's carryover feed supply will be enough to feed out a good fall pig crop.

Spring Crop Small

The requested 15 percent increase which seems necessary in order to be reasonably certain of a supply of meat in 1948 at fair prices to the consumer and yet profitable to the producer, does not mean so much, Quaife figures, because the 1946 fall pig crop was light. Furthermore, the 1947 spring crop will be somewhat below expectations.

This is a fine opportunity to bring a better balance between the spring and fall farrowing for a corn crop now, but farmers who breed sows for fall farrow and find in August that corn supplies look as though they will be short can put the bred sows on the market.

MARKET NOT SURE FOR BEEF CATTLE

Immediate Future Is Bright But Fall and Winter Not Predictable

Most livestock men are optimistic about the beef cattle situation in the immediate future, but are not willing to forecast continuing strong markets for the long pull.

In summarizing opinions voiced at the recent cattle feeders' day at Iowa State College, R. C. Bentley, agricultural economist, points out that there were a good many "ifs" in the fall and winter picture.

Optimistic factors on the short-run include high employment, continued high income of workers, and strong export demand. Storage stocks of meat as of May 1 are low compared with the 5-year average, yet a little above last year. Some think that numbers of livestock on the range at present are not as large as indicated.

Lower Prices

Factors pointing to lower livestock prices later in the year are the shifting of income from foods to the purchase of other goods now becoming more plentyful and a gradual reduction in employment. International relations will have an effect on export demand. Finally, there is the usual uncertainty of weather and crop conditions.

Beef cattle prices seem to be following the normal seasonal pattern again this spring. Top grades are coming down in price, and lower grades are strengthening. We are fast reaching the seasonal turning point, Bentley says, when top grades normally show seasonal strength, and the lower grades level off or turn down. Recent cattle markets indicate this advance already is under way.

All-Time High

There apparently is plenty of optimism on the part of those taking out feeder cattle during the past few weeks, Bentley observes. New all-time highs have been reached almost weekly this spring. Stocker and feeder cattle received in the eight Corn Belt states during the first 4 months of the year were 545,498 head, or 38 percent above the same 4 months last year.

Of cattle going out for futher feeding, a much higher percentage are of lighter weight than last year. In fact, says Bentley, nearly all of the increase comes in those weighing between 500 and 700 pounds.

CONSERVATION COURSES OFFERED FOR TEACHERS

Looking towrd increased conservation education in the public schools, Iowa State College this summer for the first time is offering conservation courses for teachers.

The summer school schedule will contain five such courses, which will carry college credit for instructors in elementary and secondary courses.

Individual courses will cover soils, forestry, animal life, minerals and the teaching of conservation. They will be offered during the first summer session this year, beginning June 16 and endng July 23.

BIBLE SCHOOL PICNIC AT LIBERTY FRIDAY

TRACTOR NEEDS PROPER CARE IN HOT WEATHER

There are at least four essentials of a good operating program for farm tractors during the hot, heavy woking season, according to Dale Hull, Iowa State College agricultural engineer.

They are (1) proper maintenance of the radiator and cooling system, (2) correct crankcase lubrication, (3) regular service of the air cleaner and (4) good battery care.

To prevent overheating of the engine, and to eliminate consequent knocking, anti-freeze mixtures should be replaced during summer months with plain water.

Hull recommends that the instructions of manufacturers be followed closely in the selection of the proper SAE grade of lubricating oil. The instruction manual that comes with the tractor tells specifically what grade of oil to use during each season of the year.

In general, manufacturers have been recommending 120-hour oil drains in farm tractors. The oil should be drained while the engine is hot, the oil filter element should be changed, and the recommended grade of good-quality lubricant placed in the crankcase.

More tractors have been ruined because of poor air cleaner service and air system maintenance than for any other reason, Hull believes He advocates keeping the oil-bath aircleaner cup filled with the recommended SAE grade of clean motor oil. A daily inspection of all airintake passages to see that they are dust tight is also a good practice.

The storage battery can easily suffer, Hull says, from lack of water, overfilling and overcharging Lack of water will shorten the life of a battery considerably. Tod much water causes an overflow which results in corrosion around the battery case.

To prevent overcharging, the generator should be set at about two amperes. The lower the rate of charge, the third brush of the generator should be moved against the direction of the rotation of the armature. On most tractors, a higher charging rate can be obtained when needed simply by pulling the light switch out a notch.

NO NEED TO BE HARD OF HEARING

Do you know that terrific strides have been made in the hearing aid industry in the past MONTH?

AGRONOMY FIELD DAYS ARE TO BEGIN JUNE 17

The 1947 Agronomy Field Days, sponsored by Iowa State College Agricultural Extension Service and Experiment Station, start June 17 with the pasture Improvement Farm Field Day at Albia.

The Albia Field Day will show pasture renovation methods; grazing experiments on birdsfoot trefoil; bromgrass and alfalfa; strains, varieties and mixtures of grasses and legumes.

June 18 is Grass-Clover Field Day at the Agronomy Farm and Soil Conservation Nursery, Ames. On the schedule there are a grass-legume silage demonstration; dusting alfalfa for seed production; improved varieties of red clover, alfalfa, reed canarygrass, sweetclover, lespedeza and bromegrass; rotation and fertilizer treatment for soil improvement

Schedules of other field days will be announced later.

Agencies cooperating with the Agronomy Section in sponsoring the field days are: Agricultural Engineering, Animal Husbandry, Entomology and Botany departments from the college, and Soil Conservtion Service and Bureau of Plant Industry, Soils and Agricultural Engineering of the U. S. Deprtment of Agriculture.

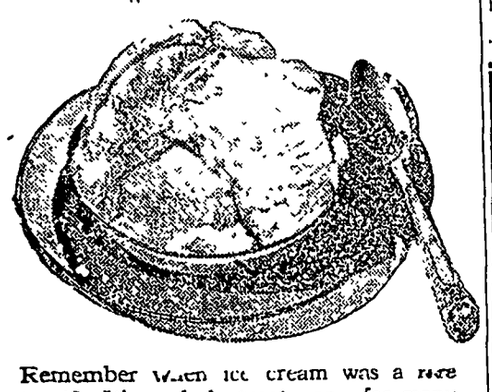
ONCE A *Rare* TREAT . . .
IT'S A *Daily* TREAT NOW!



Remember when ice cream was a *rare* treat? It's a *daily* treat now—for many good reasons!

First reason of all is ice cream's goodness — rich, smooth, delicious! And so many fine flavors to choose from!

But just as it's good to eat, ice cream is good for you. It's an ideal way of getting the nourishment of milk. Besides, on warm days, it's cooling and refreshing.

So, during Dairy Month and every month, eat Ice Cream regularly It's a *daily* treat, that's good for you, too!

Wheel Balancing

Increase Tire Mileage

Makes Driving Safer

On our machine each wheel is revolved at high speed and it positively detects every spot on the wheel which is out of balance.

Unbalanced wheels are dangerous to safety cause tires to wear out 50 to 100 percent quicker

Dy-namic unbalance causes the wheels to vibrate rapidly sideways, producing abnormal wear on tires, bearings, kingpins, tie-rod ends, steering gear and all connecting links.

Static unbalance causes wheels to hop up and down, resulting in excessive vibration and hard steering.

There Are 2 Kinds of Wheel Unbalance

IF THERE are any upsets, any reversals of form, in baseball this season, the same will come from the pitching side.

For example, if anything happens to the Boston Red Sox, the trouble won't come from their infield or outfield. It will come from a pitching staff that is still uncertain.

H. Newhouser

Last season Dave Ferriss, Tex Hughson and Mickey Harris won many well-pitched games. But they also won a flock of games that only savage hitting and run - making saved, games in which they were hammered into pulps.

Tex Hughson, before the war, was rated as one of baseball's best. Last season, Tex needed the help of Red Sox bats to save him, game after game—and so did Dave Ferriss. In the season's opener, the Red Sox gave Hughson a 6-0 lead, and yet he couldn't finish.

It is more than probable that Joe Cronin will need some extra help from some of his younger pitchers, if he is to win again, even if he has more good ballplayers on his team than any other rival by a two to one ratio.

Red Sox pitching hardly belongs in the same class with Cardinal or Tiger pitching. These are the two strong staffs in baseball, well beyond any other collection of right and left arms.

Newhouser is the best pitcher in baseball today. Bob Feller is sure to have a good year. But he isn't sure to have a great year, as great a pitcher as he has been in the past.

The Tigers have at least four high-grade pitchers who also have strong supporting aides. So have the Cardinals.

Durable Hurlers

When Red Munger opened his new season, with a well-pitched game, you could almost hear Eddie Dyer's sigh of relief drift in from the Midwest. For Munger, over 6 feet, weighing 200 pounds, is the type that can work in 35 or 40 games. He is also the type that might win 25. This means that such slender and somewhat fragile workmen as Pollet, Brecheen and Dickson can get all the rest they need.

It is quite possible that, with the addition of Allie Reynolds and the showing of young Johnson, the Yankees' pitching staff will be the strongest section of the squad. If they are to get anywhere it will have to come through with better than average pitching.

As far back as 1906, the White Sox, known as the Hitless Wonders, proved what good pitching could do. Their team batting average was .228. Yet, Ed Walsh, Nick Altrock and Doc White carried the team to a pennant, and then to a world series victory over the powerful Cubs. The White Sox, starting from last or near last place, won 19 straight in their flag drive. Pitching did it.

In 1914, Rudolph, Tyler and James pitched the Braves from last place to the pennant, and then a four-game sweep in the big series.

In each case you'll notice that three pitchers did most of the work. Few pitchers today get half enough work. A good pitcher should be worked every fourth day, to keep his condition and build up his control.

Credit for Connie Mack's star teams of some 40 years ago was always given to his brilliant infield. I'd give even greater credit to Bender, Plank and Coombs, three of baseball's best. His infield wasn't great enough to protect an only average pitching staff.

Worked 45 Games

All you need, to discover what the power of good pitching means, is to look through past world series records, and see what happened to Ty Cobb, Hans Wagner and many other stars up through Ted Williams and Stan Musial. Giant pitchers held even the mighty Babe to a mark of .118 in one world series.

Most of the great pitchers of baseball, those with the stronger arms, could work through 45 or 50 games a year. This list includes Cy Young, Matty, Johnson, Alexander, Walsh, Chesbro, Feller, Newhouser and Dizzy Dean.

The tendency today is to lift a pitcher the moment he begins to wobble a trifle. This is often a necessary move. But it doesn't help the pitcher's confidence nor bring him the work he needs.

In past seasons, looking well back, good pitchers were allowed to stick. This accounts for the fact that many of them were able to win from 30 to 40 games a season. Matty, Alexander and Johnson turned this trick at least twice.

Feller insists that the heavy pressure he put on his arm last year from January to December had no harmful effect. Everyone hopes Bob is right. But there is also such a thing as overwork.

NEEDLEWORK PATTERNS

ASK ME ANOTHER ?

A General Quiz

The Questions

1. How far below the surface of the earth do earthquakes start?
2. What is white gold?
3. How long does it take an orchid to bloom?
4. Did the Italians invent macaroni?
5. What word in the English language has the most definitions?
6. Bobby Feller was clocked as throwing a ball at what speed?
7. When was the Dominion of Canada established?
8. Which Italian city is known as the "Bride of the Sea"?
9. What is the area of the Sahara desert?
10. Is a peacock's beautiful train of feathers his tail?

The Answers

1. No more than 6 or 8 miles down.
2. Gold combined with nickel and zinc.
3. Ten to twelve years.
4. No, the Chinese did. It was introduced into Europe by the Germans, who taught the Italians how to make it.
5. The word "set." In Webster's New International dictionary it has 235 major definitions.
6. At 98.6 miles per hour.
7. July 1, 1867.
8. Venice.
9. Approximately 3½ million square miles.
10. No. The "eye" feathers that make up the fan are technically called tail couverts. They grow over the bird's real tail.

Rigid Arm Punch on End Of Swing Barred in Boxing

A punch never used before nor since by a professional pugilist was employed by George Le Blanche in a bout with the first Jack Dempsey in San Francisco in 1889, says Collier's.

With his right arm held out rigidly from the shoulder, Le Blanche whirled completely around and knocked out Dempsey with such force that the brutal punch was thereafter barred for all time.

Need King's Consent

Until 25 years of age, the r princesses of England cannot ry without the consent of the After this age, they marry wit it, provided that parliament, in a year after notification, not disapprove of the prop consort.

reckoned on his fingers. "Let's I was forty-eight when Tom orn. That would make him—ten, twenty—Tom's thirty-five now if he's a day. He ain't been home for seven years." Something like a sigh sounded. "But he'll come. The Hendricksons always come back. He'll take the inn here when I'm gone. He'll marry and have sons. And like as not he'll burn the candle for 'em when they grow up and go away to sea."

"It's a nice custom," I said inadequately.

"Custom?" said the old man. "Yes, that's what it is. A custom. Always done it. And I expect we'll go on doing it. Until we don't own this old inn any more or, maybe, until all the Hendricksons are gone. I don't know." His voice trailed. "I don't know."

The old man was still in his chair—but his head seemed to have dropped further on one side.

"Have you any other sons?" inquired Hurlow.

"No. No more sons and no daughters at all. Just the one. Just Tom."

Outside the sea was banging the cliff with more force. Ponderous, smacking blows. There was a whine in the wind.

"It's getting rough out there," Hurlow said.

I looked at the old man. He had fallen asleep in his chair.

"He's pretty ancient," I said.

Hurlow was walking around.

"This is an eerie place," he said.

All at once the candle flickered.

"That candle's getting low," I remarked. "Think we ought to wake him?"

"Why?"

"I don't know. But he mightn't want it to go out."

Hurlow began exploring in a corner.

"Hello," he said presently. "A radio."

"Turn it on and you will wake him," I said.

"I doubt it." Hurlow spun the dials. Low silky music stole into the room. The old man never stirred.

The candle flame wavered again.

"Let's take that candle away from the window," I said. "The wind must be getting at it through the chinks."

"How can it with that glass dingus?" said Hurlow. "Ah ha, here's a news commentator."

The news commentator came on crisply. A strike in Minneapolis. I listened without much interest. Suddenly, unexpectedly, the news commentators voice rose higher.

"Port of Spain, Trinidad. A violent hurricane struck Trinidad this afternoon, destroying property valued at half a million dollars. But so far as can be learned only one life was lost and the man, unfortunately, was an American. Able Bodied Seaman Thomas Hendrickson was swept to his death from the tanker Pocohontas when the gale struck Port of Spain harbor. . . ."

THE words seemed to crash like strayed lightning into the room. For a second we stared at one another in stunned silence Then Hurlow gasped, "Hendrickson" and snapped off the radio.

I wheeled around then. The old man was still in his chair. But his head seemed to have dropped further on one side and he had slumped down.

Suddenly Hurlow darted across the room and took hold of his wrist. But he straightened up presently and turned to me, a puzzled, half-frightened expression on his face.

"Something's wrong, Jimmy," he said. "I—I can't find his pulse. And he—he isn't breathing."

I leaped to my feet, but stopped before I could take a stride. A queer, gray shadow seemed to steal across the room. There was a faint flicker of light, a faint hiss. The hurrican candle guttered and went out.

KEEP A GOAL IN SIGHT

In one of the largest cities in the United States there is a doctor who has had considerable success in putting distrait and unhappy people back on the right track to happiness and success. His method is beautifully simple.

Whenever a person, feeling he needs a doctor's advice, comes to this doctor, the doctor puts pieces of plain white paper and a sharpened pencil in front of the patient.

"Before we start with your case," he suggests, "I want you to write down on that paper your goal in life. When we get it down in black and white I believe we can really go somewhere."

Nine persons out of ten cannot define their goal at all, much less write it. In other words, nine out of ten men and women lead purposeless, goalless lives The doctor believes they can't find happiness until their goal is clear and in full view.

"If your goal in life is clear, you will adjust yourself to the goal, but if your goal isn't clear or if it's an unworthy goal, how can you expect to be very effective or attractive to others?" he asks

I realize that what I have said here might sound a little bit theoretical and academic to you. I assure you, however, that it is neither. Setting the goal and keeping it in sight is one of the big secrets of attaining the kind of personality and winning the kind of success and happiness that you most want.

Suppose your goal is the general goal of a business and social success. That's a very common goal. All right. It's worthy. Write down exactly what you want to get out of life—write down your goal boldly.

To attain that goal you've just written down, you know that you have to make yourself acceptable to certain persons—perhaps to customers in your business or to the kind of men and women you want to associate with in society.

To be acceptable to them your personality must be the kind which they will approve. It must include certain traits—generosity, charm, graciousness, magnetism, other positive qualities.

The next thing you have to do is spend an honest half hour in self-inventory, trying to decide what, in the final analysis, you have to do to attain the goal which you set for yourself.

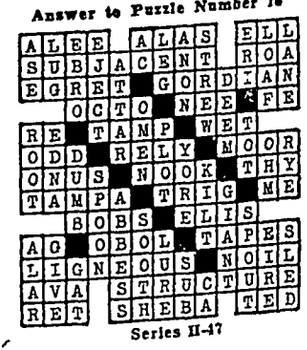
Answer to Puzzle Number 16



Series II-47

HOUSEHOLD MEMOS... by Lynn Chambers

Summer Weddings Will Be Incentive For Many Parties

For a simple bridal shower refreshment, a punch bowl with floating orange slices and slivered strawberries makes a pretty picture. Serve this with cake or cookies.

Bridal days are once more with us, and there's hardly any circle of friends where at least one wedding does not take place. A good friend of the bride usually gives the honored girl a shower, and it is with such pleasant doings that we are concerned.

Whether it's a lingerie, kitchen or personal shower, the theme of the party refreshments should be daintiness. If you can carry out the theme with a centerpiece of bride and bridegroom, well and good, but it isn't necessary. Use your daintiest linen and fresh, fragile flowers, and your table is bound to be pretty.

Pastel color combinations in table settings and refreshments are highly favored as they carry out the theme of the occasion. Food, however, need not be elaborate, because the girls probably will be too excited to eat much. Do, however, make everything delectable, and you will be well rewarded for your efforts.

• • •

A SIMPLE afternoon or evening party might consist of a light delectable cake and punch as follows:

Whipped Cream Angel Food.

1 cup whipping cream
3 egg whites
½ cup water
1 teaspoon vanilla
2 cups flour
1½ cups sugar
3 teaspoons baking powder
½ teaspoon salt

Whip cream until stiff; beat whites until stiff and combine carefully Add water, vanilla and dry ingredients, which have been sifted together at least three times. Bake in layers at 350 degrees about 30 minutes or until done. Use the following filling:

Lemon Filling De Luxe.

¼ cup shortening
1 cup sugar
3 eggs, beaten slightly
Grated rind of 1 lemon
6 tablespoons lemon juice
⅛ teaspoon salt

Place shortening in pan over hot water to soften. Add remaining ingredients. Cook over simmering water, stirring constantly, until well thickened and of good piling quantity. Cool before using.

Strawberry Punch.
(Makes 4 quarts)

1 quart water
½ cup granulated sugar
½ cup corn syrup
2 quarts strawberries
3 cups chilled orange juice
1 cup chilled lemon juice
4 cups ginger ale
2 thinly sliced oranges or limes

Combine first three ingredients. Bring to a boil and add the washed, hulled strawberries, and boil, covered, for 3 minutes. Remove and strain through a sieve, without pressing, and chill. Just before serving, combine with remaining ingredients, using orange slices for garnish, and additional slivered strawberries, if desired.

LYNN CHAMBERS' MENUS

Sliced Cold Roast Chicken
Potato Salad Vegetable Salad
*Whole Wheat Muffins
Beverage
Berry Pie a la Mode
*Recipe given.

ANOTHER EASY but satisfying answer to the refreshment problem is a salad served with homemade hot-from-the-oven muffins that take just a few minutes to bake. But first, consider the salad, made with easy-to-use canned shrimp:

Shrimp and Avocado Salad Ring.
(Serves 6)

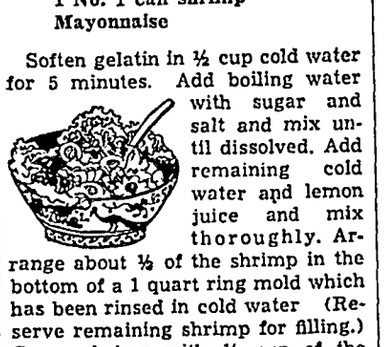
2 tablespoons plain gelatin
1½ cups cold water
1½ cups boiling water
½ cup sugar
1 teaspoon salt
½ cup lemon juice
2 ripe avocados
½ cup chopped celery
1 No. 1 can shrimp
Mayonnaise

Soften gelatin in ½ cup cold water for 5 minutes. Add boiling water with sugar and salt and mix until dissolved. Add remaining cold water and lemon juice and mix thoroughly. Arrange about ½ of the shrimp in the bottom of a 1 quart ring mold which has been rinsed in cold water (Reserve remaining shrimp for filling.) Cover shrimp with ½ cup of the clear gelatin mixture and chill until firm. Chill remaining gelatin until thickened. Peel and mash 1 avocado and fold into slightly thickened gelatin mixture. Peel and dice other avocado and add to mixture with celery. Pour over jellied shrimp and chill until firm. Unmold on crisp greens and place Shrimp Filling in center. Serve with mayonnaise.

Shrimp Filling.

Remaining ⅗ can of shrimp
1 cup diced cucumber
½ cup diced celery
Salt and pepper

Combine ingredients and season to taste. Place in center of shrimp-avocado ring.



Combine shrimp and avocado for a pretty salad. Make your salad in the morning and save last minute flutter when the guests appear. Bread and butter sandwiches made finger style, or whole wheat muffins are a good accompaniment.

• • •

YOU'LL FIND these whole wheat muffins nourishing as well as a delightful change from other types because they're less well known.

***Whole Wheat Muffins**

¾ cup all-purpose flour
1 cup unsifted whole wheat flour
4 teaspoons baking powder
½ teaspoon salt
4 tablespoons granulated sugar
1 egg, well beaten
1 cup milk
4 tablespoons melted shortening or salad oil
½ cup raisins

Mix together dry ingredients. Combine remaining ingredients. Add all at once to the flour mixture, stirring, not beating, quickly and vigorously, until just mixed and of a lumpy appearance, but no longer. Over-stirring will make your muffins coarse. Fill greased or oiled muffin pans ⅔ full and bake in a moderately hot (375-degree) oven for 35 minutes.

Released by Western Newspaper Union.

LYNN SAYS:
Make Baking Easy

Give your biscuits a rich, brown crust by brushing them with milk or cream before baking. This will prevent your baking them to the drying point by making them brown more readily.

To prevent boiled frostings from becoming sugary, add 1 teaspoon of vinegar or ¼ teaspoon of cream of tartar to the syrup while cooking.

Custard pies should be cooled on a wire rack to prevent them from steaming and becoming soggy.

To save sugar used in icings, sprinkle a small amount of sugar on the cake before baking. This, in turn, may be sprinkled with finely shredded nuts or coconut shreds.

Fruit pies as well as berry pies will have better flavor if the juice of half a lemon is sprinkled over the filling before baking.

Bread and rolls will be much more quickly made if the yeast in them is doubled. Four teaspoons of vinegar also will help speed the process and keep bread better during the summer months.

HOUSEHOLD HINTS

In buying fish, select the ones with bright bulging eyes, if you want tasty ones.

—•—

Have several round pot holders on hand as well as square ones. These are very handy for removing pies and puddings from the oven as there are no corners to drop into the food and make the holder sticky.

—•—

Soak table linens to be laundered in clear cool water before placing them in hot suds. The cool water will help remove stains before hot water sets them.

—•—

It's all right to leave opened canned goods in the original tin cans in the refrigerator for a short period. But cover the can to prevent absorption of other flavors and odors.

—•—

Corned beef, tongue, and fish dishes are given an unusual zest with horseradish salad dressing. Combine one-half cup cooked salad dressing or mayonnaise with two tablespoons grated horseradish to achieve a new dressing.

—•—

Lunch-box vegetables (such as carrot strips and celery) stay fresh longer if they're sliced small enough to fit into a waxed paper cup. An ice cube in their midst will keep them ice-box fresh. This will make a hit with lunch-box diners.

Yours truly,
1tc Lester Stille, Secretary.

"JUNE IS DAIRY MONTH" THROUGHOUT ALL IOWA

Doubling Amount Of Deduction To Increase Nation-wide Use Of Iowa Butter

Iowa dairymen are taking aggressive action to stimulate increased butter consumption as Dairy Month is observed throughout the state. "Sales, Not Surplus!" is their slogan, and merchandising drives in metropolitan markets throughout the nation are included in their plan.

In this effort, Iowa is cooperating with thirty-five other states, all represented in the American Dairy association Pointing out that about 78 percent of Iowa butter is exported outside the States, Chester Schoby, Chairman of the Iowa Dairy Industry commission, said, "facts must be faced, even when unpleasant. Due to conditions of wartime, we lost markets for butter, and we have to build them back. National per capita consumption fell off from 17.3 lbs. to 10 lbs. during the war, and has only started upward The lost markets won't rebuild themselves, so we'll have to rebuild them by effort. Iowa has a major stake in this plan."

Objective: More Butter Sales

Chief element in the plan is aggressive sales promotion of butter on a national scale, with the Thirty-six state organizations which cooperate in the American Dairy association, all taking part. Iowa's part in the drive will be financed by deductions from production of butterfat at the rate of 1 cent per pound the month of June. In Iowa, the deduction on butterfat produced between June 1 and June 15, is made by law. Deduction for the period from June 15 to June 30, is voluntary. In states which do not have laws similar to Iowa's, voluntary deductions will be made during the full month of June.

As provided by Iowa law, the June 1-15 deductions will be paid to the Iowa Dairy Industry commission. The June 15-30 deductions, being on voluntary basis, will be paid to the Iowa State Dairy association for use in the cooperative campaign.

"Sales, Not Surplus" was the theme chosen at the meeting of the American Dairy association at Chicago recently, where reports were made of studies on the surpluses which followed a similar lowering of per-capita butter consumption following World War I. "The way to keep out of trouble is to steer clear of surpluses," the Association's statement said, "and the way to avoid surpluses is to advertise and merchandise aggressively.

The leader of the first crusade was a Belgian, Godfrey of Bouillon, who became the first king of Jerusalem.

LIBERTY W. S. C. S. MET WEDNESDAY AFTERNOON

The Liberty W. S. C. S. met at the home of Mrs. George Schoenwetter Wednesday afternoon. Nearly all the members and several visitors previously members of the Liberty society were present. Mrs. Schoenwetter enjoyed having them meet at her home as she had been a member of the society for over thirty years.

FIRST DISTRICT 4-H CAMP A SUCCESS

A new procedure in 4-H camp programs took place at Clear lake when 411 4-H boys and girls from northern Iowa joined forces by attending the same district camp. This is the first district camp at which both the Lake when 411 4-H boys and girls and boys have been included.

The camp was developed by the extension agents of the eleven counties in this district for the purpose of producing additional social, recreational and educational activities for local 4-H club officers and older club members.

Fay Meade, chairman of this camp administrative committe, said that it was the intention of the committee to establish and continue this as an annual camp for our district. The natural facilities of the Methodist Camp Grounds lends itself as an ideal site for 4-H camps.

The following topics were taken for study and discussion: Leadership, Insect Control, Highway Safety, Forestry, Social Courtesy , Weed Control, First Aid, Clean Milk, Landscaping, Parlimentary Procedure, Recreation, and Fire Arm Safety.

The 4-H members from Hancock attending this camp were LaVaune Verlo, Ruby Pihl, Beverly Habercamp, Gloria Haefner, Harriet Ostendorf, Joan Lowenberg, Beverly Mewes, Marjorie Nelson, Mercedes Formanek, Eleanor Jakoubek, Ailene Oxley, Carolyn Campbell, Lois Gatch, Lois Pigman, Eldon Schutjer, Hehman Limberg, Norman Stromer, David Smith, Duane Jordanger, Leland Davis, Bob Weston, Fred Korte Jr., Marvin Schauf, Maynard Dorow, Dennis Thovson, James Meyers, Glenn Wille, Alan Anderson, Edwin Chizek, Raymond Prohaska, Violette Eisberg, and Velma Johnson.

Leaders attending this camp were : Mrs. C. J. Wille, Co. 4-H Girls Committee Chairman, Mrs. Elmer Jante, Miss Verle Brown, Buster Cooper, Raymond Hobbs, and Paul Henderson County Extension Director.

During World War II it is estimated that American pilots in American planes shot down more than 4 enemy planes for every one they lost.

YOUTH RALLY AT CLEAR LAKE

Many Klemme young people attended the Methodist Youth Rally at Clear Lake State Park Sunday evening. After an hour of recreation, a devotional program was conducted. A delicious picnic lunch was served by the host fellowship. Election of officers was held with the following result:

President: Alice Mae Anderson, Klemme

Vice-Pres:, Jean Henningson Belmond

Sec'y - Treas· Gloria Haefner

The newly elected officers will be in charge of next years program beginning next fall. It is hoped that all will attend the Methoji Institute at Okoboji to train for their respective offices.

INFANTS BAPTIZED HERE

The following infants were baptized at the Evangelical and Reformed Church Sunday:

Nancy Jean, daughter of Mr. and Mrs. Wm. Reinhart, Larry Lynn, son of Mr. and Mrs. Kenneth Kluckhohn, Connie Rae, daughter of Mr. and Mrs. Elmer Kuhlers, and Leon Joseph son of Mr. and Mrs. Edmond Blanchet.

Sprayers used for 2,4-D must have a thorough, careful cleaning if they are to be used for other spraying work.

From where I sit ... by Joe Ma

Here's to the Women-Folk!

There's a line at the heading of the Woman's Column in my paper that reads:

"Women through the years have stood Keepers of the flame . . ."

Pretty easy to see what it means; whether it's the flame on the hearth, or the candle in the window, or the feeling of warmth that surrounds a home.

It's the women who are guardians of the things we cherish about homelife—who are tolerant of ashes on the rug; the rings a glass of beer can leave on tables; or the comfortable but too-worn that we can't bear to throw

From where I sit, those satisfactions become mor more important in this wo strife and change. Smoke curling from a mellow pipe; of beer; a comfortable cha fore the fire. And I'd like to the housewives — "keepers flame" — whose tolerance a derstanding helps preserve

Joe Ma

ncock County Girls Attend th Annual Convention

GIRLS ATTEND STATE CONVENTION

legates from Hancock Co. he eighteenth annual state Girls Convention at Iowa e College, attend the first on of the 3—day gathering nesday afternoon.

ingling with more than 1,000 local club delegates are ock County members. Re- nting the county were: Dor- Moll, Garner, Joan Lowen- Goodell; Ardis Bailey; Cor- Betty Schulz, Garner; Rita phrey, Garner; Betty Hject, ; Charlotte Brown; Garner; Ruth Holck, Kanawha. They e accompanied to the Iowa e campus by Paul Henderson, nty Extension Director, and Lester Bonnstetter, Corwith, der

his year's convention program uilt around the theme" Learn- to Live in a Changing World," of the 10 national guideposts he 4-H program

radition dominated the open- day's session with Prof. Tol- McRae, head of the college ic Department, opening the ram with group singing.

H. Kildee, Director of the icltural Extension Service, Ruth Streicher, state 4-H 's president, welcomed the s to the convention and point- out the "Opportunites for ming" which the convention vided.

o further set the stage for the gram P Mabel Nelson, dean the Division of Home Econ- ics, spoke on the topic "Find- Your Place in a Changing rld." A third speaker, Mrs. . Van Bloom, Dayton home- er and member of the Iowa islature, pointed out to the egates, "A Citizen's Respon- lity in a changing World."

Other traditional numbers of e convention programs were singing of the "Four Leaf ver Song," and the reading of he Country Girl's Creed" by o 4-H girls.

Wednesday evening the dele- es, "Frolicked on the Green" Clyde Williams Field on the lege campus and then marched the central camp area. Grouped und the Campanile they were eted in another singing ses- n by Prof McRae and turned meward to the sound of a car- n concert, played for their nefit by Ira Schroeder, college illoneur

Principal speaker of the Thurs- y session was Dr. Dale S. Welch, sident of the University of buque, Iowa who developed e topic, "Enduring Values in a anging World."

Mrs. F G. Murray, Cedar Rap- , American Mother of the Year ked on "Challenges Ahead" at e Friday session. Appearing on e same program was Dr. Char- E. Friley, President of Iowa te College, who spoke on Contributions of Science in a anging World."

Thursday's program brought to e convention Mrs. Thomas awford, Postville, homemaker d former French opera singer, o interpreted in song and story Learning to live in Your Coun- y."

"Previews of progress" an ed- ational exhibit provided by eneral Motors Corporation, imed the attention of delegates hursday evening. The annual siness meeting also was held this time. Greetings from the fe 4-H boy's organization were ought by Durward Lyon, Tol- o, president, and G. A. Line- eaver, state boys' leader. A essage from the campus 4-H irls' organization at Iowa State as given by Mary Jeanne Meyer, esident, and Mae Zarr, Chero- e, vice-president of the Iowa ral Young People's Assemgly, presented her group.

Initiation of Miss Florence For- r, former member of the state 4-H staff, as an honorary member coutinued another long-standing convention tradition.

Hancock County girls and lead- ers attended Home Furnishing subject matter sessions 2 days where they learnd of nw devel- where they learned of new devel- economics.

RIPE CHERRIES BEST FOR HOME FREEZING

Picking and freezing cherries all in the same day is advised, but cherries picked with the stems on can be held in the re- frigerator for a day, then frozen

Select tree-ripened, fully-colored cherries to freeze Sweet cherries need not be pitted, but the stones should be removed from sour cherries Wash the fruit throughly and pack in containers immediately after pitting.

Berry and stone fruits put up without sweetening are not satisfactory for desserts, Jewel Graham, Extension Nutritionist, Iowa State College, points out. If the cherries are to be used for pies, weigh the fruit and add sugar equal to one third the weight of the fruit. One pound of sugar may be used for 4 or 5 pounds of cherries to stretch short sugar supplies. Cherries put up for sauce should be sweetened with a sugar sirup that combines 1 quart of water with 7 1-2 cups of sugar.

Pits may or may not be removed for canning Bring the fruit to a boil in a medium sirup, pack hot and process for 15 minutes in a boiling water bath A medium sirup calls for 1 cup water or cherry juice to 1 cup sugar. Honey can replace as much as one-half the sugar and corn sirup as much as one-tnird

METHODIST BIBLE SCHOOL CLOSED WITH PROGRAM AND PICNIC

The Liberty-Klemme Bible School came to a close with a picnic at the Liberty Church Friday with a capacity crowd present. Because of bad weather, the picnic was served in the church.

Program Sunday

A program presented by all the students of the Bible School was given in the Klemme Methodist Church Sunday morning

A special collection was lifted and the money divided among the following teachers according to the time they spent in the Bible School:

Mrs. Carold Larsen, Marjorie Lau, Bernice Tanner, Mrs. Lee Ridder, Mrs. Wesley Patterson, Leona Lau, Mrs. Dwight Hummel and Mrs. H. E. Harvey The above group are to be complimented for the very fine work they did to make this the largest Bible School ever held.

NEED SOY BEAN SEED FOR FARMERS IN FLOOD AREA

The local AAA office was advised by telegram the latter part of the week to contact local dealers and handlers of early maturing corn and soybeans, and to notify the State AAA office of any seed that they have on hand in excess of local needs, according to Alfred V. Josten, Chairman.

Since soybean seed is generally handled by the farmers, the office will appreciate hearing from either farmers or dealers in the county who have surplus soybean seed or early maturing seed corn on hand.

"We have been very fortunate in escaping the floods that have brought disaster to other parts of the state, and we will be glad to help the little we can by making any surplus seed we have on hand available to those areas," Mr Josten said.

June Is The Month For

Delicious Dairy Desserts

Time out for a midafternoon snack of milk-made pudding plus cookies is a good idea these hot summer days. It's sometimes difficult to get as much milk into the youngsters meals as they need, so here's your answer.

No need to tell the youngsters that these are ice cream days. Nor do tney need a second invitation to pause in their play for same homemade milk drinks or an afternoon snack of refreshing puddings and cookies.

June, the month when milk production goes up, is the time to make the most of all diary products—cheese, butter, cottage cheese, ice cream and other milk-made desserts.

For one thing, say food and nutrition authorities at Iowa State College, keeping dairy products is no longer a problem in most homes. The refrigerator is now a common piece of equipmnet in most kitchens, and the home freezer locker is rapidly proving itself useful for keeping dairy products at low tempertures for longer periods of time.

Plan Milk In Meals

Thus, what it really comes down to is the homemaker who is going to see her family get tne right mount of milk, in one way or another, is going to have to do some menu planning in the days ahead. Good—health charts say that the youngsters should have 3 or 4 glasses of milk apiece daily to keep them growing strong and sturdy The grown-ups need two or more glasses of milk apeice a day

Now not all of his milk needs to be in the form of milk drinks. Cheese, ice cream and even main dishes can be prepared with milk can make up some of the amount needed But of course, nothing goes better on a hot summer's afternoon than ice cold milk drinks flavored with fruit juices.

Iowa homemakers are luckier than many it seems. They live in a state where milk production is a main industry Thus they can see to it that there families, unlike many others, will continue to get plenty of milk produots to eat.

What is happening around the country is that many folks are not drinking as much milk as they did last year. Nor are they eating as much ice cream. The reason for that is they are spending more of the family dollar for other household needs; items they haven't been able to buy until just recently. This report comes from the Bureau United States Department of United States Dopartement of Agriculture.

Need Milk Daily

Of course, these household items are probably needed, say the nutrionists. But when the family cuts down on getting its daily quota of milk and milk products, it's cutting short on two very important items needed for good health. These are calcium and riboflavin. Milk is the main source of these body building factors. It is also the cheapest source.

Calcium does a good share of the task of forming and maintaining healthy bones and teeth. It works along with phosphorus and vitamin D to carry out this important job for young folks as well as older people. Without enough calcium in the diet, older people are more apt to have brittle bones which may fracture easily.

Calcium is also needed to help the blood coagulate, and it is vital for normal heart action and for the proper function of all muscles and nerves.

Riboflavin (vitiamin B2) helps to maintain healthy skin and eyes It also helps build strong nerves and promotes general well being of the body.

Milk does more than supply these two aids of health. It also gives the most for the money in protien, thiamin (vitiamin B1) and vitiamin A. Without plenty of milk, the family can't very well get the full amount of these much needed aids from other foods.

ROSE SOCIETY TO HAVE SHOW AT I. S. C. JUNE 21

The Iowa Rose Society will include a flower show and a business session in its short course to be held on the Iowa State College campus at Ames, June 21.

Amateur rose gardeners from all parts of the state will compete for honors in 40 different classes Single blooms, groups of three blooms, and collections of blooms will be judged on size, form, color, substance and stem and foliage. A special division for artistic arrangement will be featured

To the exhibitor of the queen of the show will go a gold certificate from the American Rose Society and plaque from the Iowa Rose Society.

Following the rose show in the morning will be colored movies taken by Harry Lytle, Davenport, a tour of the American Rose Society trials and a domonstration on pruning dormant rose bushes by E. C. Volz, Iowa State College horticulturist. H. F. Gulliver, Ames, will demonstrate bud grafting.

In the afternoon the Society will hold its annual business meeting and elect officers. Guest speaker Richard Wilcox, president of the Minnesota Rose Society and consulting rosarian of the district 10 of the American Rose Society, will talk on "New Trends in Rose Breeding."

Volz will preside at a "rose clinic." Serving with him are Mrs. Harry Page, Mason City; John Hanssen, Davenport; Harold Gunderson, Iowa State College entomologist, and a plant pathologist not yet named.

L. C. Grove, Iowa State College horticulturist, is president of the Iowa Rose Society; Dr. A. A. Plagman, Davenport, vice-president; and William H. Collins, Des Moines, secretary-treasurer.

TWO CARS WRECKED ON HIGHWAY 69 THURSDAY EVENING

The drivers of two cars in a collision near the Ben V. Greiman farm north of Klemme on Highway 69 were in the Mason City hospital Friday, but escaped serious injuries but their cars were badly wrecked.

Vern Butz of Garner, with Mrs. Butz and Mr. and Mrs. Bill Templeton, also of Garner, as passengers were southbound to Clarion when he collided with a car driven by Henry Maglehout, Watertown, So. Dakota.

Templeton reported that Maglehout's car went off the paving on his side of the road and in attempting to get back on the paving it swerved into the path of the Butz car.

Butz suffered cuts and bruises and a broken shoulder while Manglehout suffered a broken arm and sheared knee cap while the other occupants escaped with minor injuries. A Klemme physcian was called who treated them and sent them to the hospital.

Sheriff L. M. Brower investigated the accident.

DAVID VOIGTS HAD BIRTHDAY PARTY LAST TUESDAY

Tuesday, June 10 was David Voigts' 5th birthday and in honor of the event his mother had a nice lunch and party in and Karen and Mrs. Harvey Obrecht, Gary and Glenn, Hampton; Mrs. Nordman, Joyce, Joan, the following from this community. Mrs. Art Pringnitz and unity· Mrs. Arthur Pringnitz and Karen; Mrs. Clarence Swalve, Linda, Dickie and Darwin; Mrs Albert Ausborn, Leonard, Donnie and Billie; Mrs Claude White and Karen; and Mrs. Lloyd Lau and Cozette

The table was decorated in pink and white and a nice angel food cake decorated with 5 candles served as the center piece.

David received many nice gifts and wished that birthdays would come much oftener.

College Student At Resort

Miss Eunice Larsen, Iowa State College student, is spending the summer at Cedar Point, on Lake Erie, near Sandusky, Ohio, where she is employed as a waitress at the Breakers Hotel. Quite a number of girls and young men from Iowa State College are employed at the resort each year.

Lightning Hit Monday Night

During the electrical storm Monday night, lightning struck with force in the northeast part of town. The bolt was so severe it knocked medicine out of a wall cabinet at the Ronald Barz home and damaged the radio at the Bert Jones home.

BUILDING RECREATION GROUND

The young people of the Liberty Methodist Church are building a recreaton ground west of the church and have a soft ball diamond laid out. They also expect to put up field lights so night games can be played.

Frank Bredlow is chairman of the organization; Emil Blumer Raymond Schoenwotter, H. E. Harvey members, and Harold Abele, manager of the team.

The grounds will be extended 50 feet north of the church and full width of the grounds. Mr. Hauko Barkeman donated the extra ground needed.

FLY CONTROL CAMPAIGN GOT A GOOD START IN KLEMME TUESDAY EVENING

KLEMME KIDS PLAY SOFT BALL EVERY WEDNESDAY EVENING

All Young Boys Invited To Take Part In The Fun At The School Grounds

There was a rip-snorting, exciting ball game at the school grounds Wednesday evening between the "Stickers" and the "Stuckers," soft ball teams made up from boys in the 4th to 8th grades. The final score was 47 to 39 in favor of the "Stickers".

This is no doubt a record high for any ball game ever played on the Klemme diamond

The boys will play every Wednesday night during the summer. The games are supervised by men from the school and the two churches and they invite all boys of Klemme and the surrounding community to come and enjoy the sport. They hope that the games will prove popular and that several teams can be formed. About 24 boys were out for the game last Wednesday. The men hope that more than twice that number will show up for future games.

STUDY GROUP HELD MEETING THURSDAY

The Methodist Study Group held its June meeting at the R. A. Jorgenson home.

The meeting opened with the group singing, "Let The Lower Lights Be Burning," after which the history of the hymn was given by the Chairman, Mrs. E. J Arnold.

Mrs John Chambers led the devotions.

The lesson on the book, "Sense and Nonsense About Race," was very ably given by Mrs. Vern Bisom.

Questions and answers were in charge of Mrs. Frank Sandry.

A card was signed by everyone present and sent to Mrs. Roy Arnold and baby son

The music of special numbers were furnished by Maurice Jacobs, La Nelle Harvey and Shirley Bisom.

There were 27 present.

A delightful lunch was served by the hostess, Mrs. R. A. Jorgenson.

YOUTH FELLOWSHIP ELECTS NEW OFFICERS FOR THE YEAR

At a meeting held at the church last Tuesday, the young people of the Youth Fellowship group held their annual election, choosing as their president Erdene Nelson; Lois Stille, Vice president; Rose Schaefer. Secretary and Treasurer; Ruth Smith, Worship Chairman; Irene Menage, World Friendship; and Don Finders, Recreation.

The Youth fellowship will have a picnic and roller skating party this Wednesday evening at Bayside Park, Clear Lake.

"PAPA'S FAMILY" HOLDS 10 TH ANNUAL PICNIC

The Washington, D. C. Group of "Papa's Family" held its tenth annual Picnic Sunday, June 1 at the home of Mrs. L. F Weaver This was a reunion of the original 29 women who attended the "Conference of theWomen of The World" in Washington in 1936. Each responded to roll call by giving some outstanding incident of the trip.

Those present were Mrs. Lydia Weaver, Garner; Mrs. Mary Wille, Klemme; Mrs Tillie Glener, Forest City; Mrs. Ruby Stromer, Garner; Mrs. Minnie Jensen, Joice; Miss Belle Lore, Garner; Mrs. Mildred Ax, Ventura; Miss Lizzie De Grau, Mason City, and Mrs. Edna Thada ,Klemme.

Mrs. Eunice Kurtz was reelected president and Mrs. Minnie Jensen, sceretary for the coming year.

Perfect Record

At LeClaire, Carol Ahlgren has completed seven years of school without being absent or tardy.

THREE BUSINESS PLACES TREATED TUES. EVE

Others Will Probably Join The Campaign In Klemme

The Fly Control Program being carried out in nine North Iowa counties this summer, got a good start in Klemme Tuesday evening when Bob Hartzel, an authorized operator, treated 3 business places with DDT: The Corner Store; Klemme Food Market and the buildings back of the store; Dr. A. H. Dulmes' office and also his residence. Other business places will probably join in the campaign to make Klemme fly-free.

Food stores, restaurants, etc. are urged by the Public Health Department to treat their premises with DDT.

Residence owners can help by painting their screens with DDT and spraying entrances, garbage cans and refuse piles.

Let's all help make Klemme fly-free.

4-H RALLY DAY HELD JUNE 10 AT DUNCAN

The girls 4-H Rally day was held at Duncan Tuesday, June 10 with approximately 133 attending.

The 1947 officers elected were as follows:

Phyllis Jurgensen, Corwith, President.

Harriet Ostendorf, Goodell, Vice-President.

Madelyn Lundy, Klemme, Secretary and Treasurer

Darlene Schultz, Garner, Historian.

There were 82 girls taking part in picture recognition with 9 clubs represented.

Miss Ruby Schram led in the music of the day, consisting of community singing and was also in charge of the picture appreciation contest.

Various skits were presented by the different 4-H clubs.

WORK CIRCLE WILL MEET

The Work Circle of the Klemme W. S. C. S. will meet Thursday, June 19th at the church with Mrs. Bisom as leader. The hostessess are Mrs. Lester Stille and Mrs. Anna Waddingham.

KLEMME MERCHANTS DROPPED GAME TO ROCKWELL HERE SUNDAY

The Klemme Merchants met defeat on the home diamomd Sunday when Rockwell took them 10 to 4. The defeat puts the locals in about third place in the league.

RECEIVED CABLEGRAM

George Schoenwetter received a cablegram from his son, Howard on Father's day. Howard is stationed in Guam He also sent a cablegram to his mother on Mother's day.

YAHNKE REUNION HELD

Mr. and Mrs. C. A. Larsen and son, Clarence Jr. and Mr. and Mrs. Marvin Isvik and daughters, LaVohn Caroline and Mary Ellen, drove to Blue Earth, Minnesota Sunday where they attended a reunion of the Yahnke family.

PUBLIC HEALTH NURSING COUNCIL HELD MEETING IN KLEMME

The members of the Hancock County Public Health Nursing Council held their regular meeting at the Community Hall Monday evening with a good attendance. Mrs. John Chambers and Mrs. R. A . Jorgenson served lunch after the meeting.

CAR CAUGHT FIRE HERE SATURDAY

Wesley Suckow's car, which was parked in front of the Northern Lumber Co., caught fire about 4:30 p. m. Saturday. The blaze was extinguished with a small chemical gun. The wiring under the dash was damaged.

CROSS TOWN

By Roland Coe

"First time in my life I've ever entertained the feelin' of bein' overdressed!"

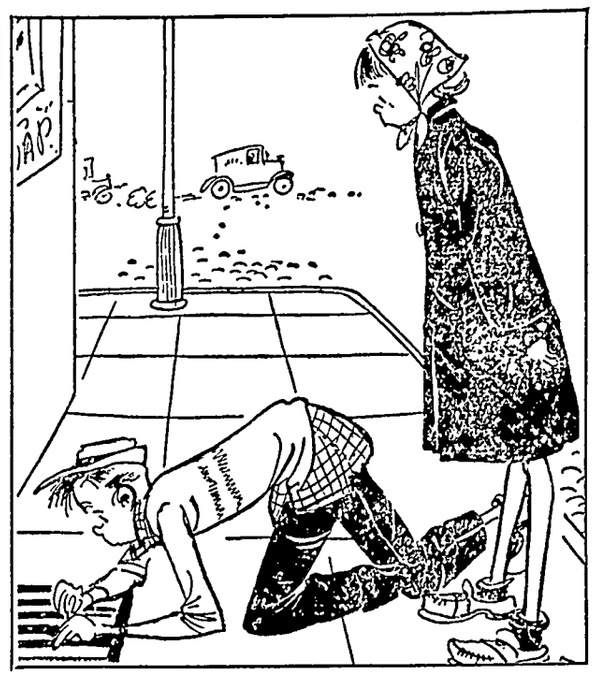
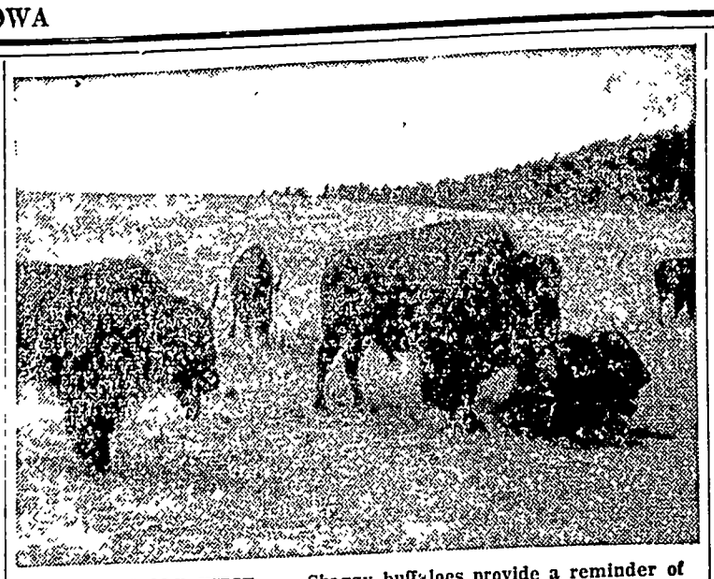
By Marty Links



"Are you SURE we can't go to the show without that dime?"



TOUCH OF OLD WEST . . . Shaggy buffaloes provide a reminder of the Old West for visitors at Wind Cave National park in South Dakota, one of three parks embracing the nation's mysterious cave systems.

MECCA FOR TRAVELERS

Mysteries of Underground World Beckon Adventurous

WNU Features.

Caves have fascinated man from the dawn of antiquity to the present day. Stories of them abound in history, folklore and mythology, yet these mysterious underground worlds still beckon the adventurous and the weird scenes to be discovered there fire imaginations.

Three great cave systems in the United States have been established as national parks—Mammoth cave in Kentucky, Carlsbad caverns in New Mexico and Wind cave in South Dakota. In 1946 these three national parks were visited by more than half a million people.

National Parks Sixth In a Series

Mammoth cave has been world famous for more than a century. It is believed to have been discovered in 1799 by a pioneer named Houchin who followed a wounded bear into the cave entrance. A few years later salt petre taken from the cave was used in the manufacture of gunpowder for American troops in the War of 1812, and not long after that the great passageways and domed chambers of Mammoth cave became an international mecca for travelers. There are galleries on five distinct levels in Mammoth cave and during the course of the underground trip, the visitor descends 360 feet to the lowest level where the Echo river winds its tortuous way in eternal darkness. Echo river is probably the most distinctive and interesting feature of the cave and a short trip is made on it in a flat-bottomed boat. Strange eyeless fish live in the river.

There are now more than 150 miles of explored passageways in Mammoth cave and the visitor is offered a choice of several tours which vary in length from 2½ to 7½ hours. On the all-day trip one has lunch at the Snowball Dining Room, 267 feet below the surface. An indication of what one may expect to see is given by the names of some of the formations in the cave: Bottomless Pit, Fat Man's Misery, Ruins of Karnak, Frozen Niagara, Violet City, Jenny Lind's Armchair and Martha Washington's Statue.

Long under private ownership, Mammoth cave became a national park in 1941 largely through the foresight and generosity of the people of the State of Kentucky, who through personal contributions made possible purchase of the cave property and its donation to the federal government.

• • •

CARLSBAD CAVERNS was proclaimed a national monument in 1923 and given national park status in 1930. Probably its earliest explorer was Jim White, a cowboy, who entered it in 1901. Seeing a dark, moving column issuing from the top of a mountain, White investigated and found a natural opening in the earth which led him down to the caverns. The dark, smokelike column proved to be alive, a moving stream of bats from down in the darkness of the caves. This spectacular flight of bats, may be seen every afternoon at dusk during the warm months of the year.

The descent into Carlsbad caverns from the natural entrance is an unforgettable experience. From a point well below the surface one may look back through the semi-gloom to see an endless procession of people zig-zagging downward amid huge boulders and grotesque rock formations. The scene reminds one of descriptions from Dante's "Inferno." Elevators are available for those who do not wish to descend or ascend on foot.

Everything in Carlsbad caverns is on a vast scale. The rooms are huge and the stalactites and stalagmites are larger than in any other known cave. Some of the stalagmites have the shape and size of church spires. The dominant colors in Carlsbad are varying shades of tan. The descent from the natural entrance to the 750 foot level is made via the Green Lake Room, the King's Palace, the Queen's Chamber and the Papoose Room. After lunch in the underground cafeteria comes the main event, a tour of the "Big Room." This tremendous chamber is about 4,000 feet long, 500 feet wide and 300 feet from floor to ceiling. In this room many city skyscrapers would seem small. Here one sees the Temple of the Sun and the pagoda-like stalagmite, called "Rock of Ages." The trip takes about seven hours.

• • •

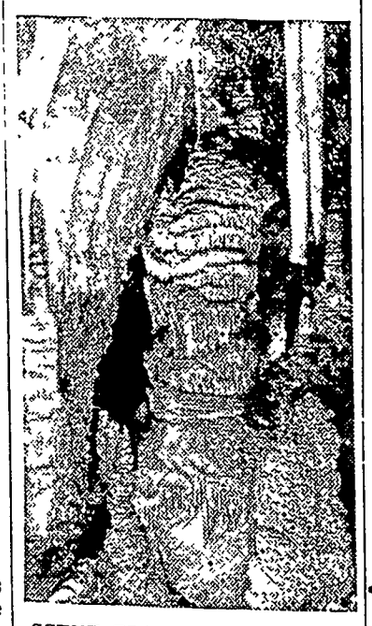
WIND CAVE near the Black Hills in South Dakota, a national park since 1903, is much smaller in extent than either Mammoth cave or Carlsbad caverns, but it has unusual formations known as "box work" found in no other caves in the United States. The tour of Wind cave requires from one to two hours and the return to the surface is made by elevator.

An additional interesting feature of Wind Cave National park is a large buffalo herd which may be seen from the park road.

• • •

MAMMOTH CAVE, Carlsbad caverns and Wind cave are accessible by paved highways, and all have bus or taxi connections with one or more railroads. There are no overnight facilities at Carlsbad caverns, but there are tourist camps near the park entrance and hotels in Carlsbad, N. M. A free campsite is provided in Wind Cave National park, but the nearest hotels or cabins will be found in Hot Springs, S. D. At Mammoth Cave National park hotels, cottages and park transportation are furnished. Here also National Park service has free campsites and picnic areas.

All three caves are illuminated by modern electric systems; however, in the historic section of Mammoth cave parties still are guided by the traditional lanterns and flickering pine torches. There are no elevators in Mammoth cave and visitors in poor physical condition should not descend to the level of Echo river as the climb to the surface is steep. All trips in the cave are conducted by National Park service guides and rangers.



SCENE FROM 'INFERNO' . . . Like a scene from Dante's "Inferno," giant stalagmites and grotesque rock formations abound in Carlsbad caverns in New Mexico.

Scenic Wonders Lure Many to Arizona

PHOENIX, ARIZ. — A treasure trove of scenic wonders plus a full program of western entertainment await vacationers this summer in this land of striking contrast.

Strongest bid for summer travelers in the state is being made by northern Arizona, which boasts such sights as the famed Grand Canyon, Painted Desert, Petrified Forest, Canyon de Chelly, picturesque Oak Creek Canyon, Meteor Crater and other natural wonders set aside in national park and national monument areas.

Outstanding among the celebrations scheduled this summer are the Frontier Days celebration and rodeo at Prescott, July 3-6; the all-Indian Pow-Wow at Flagstaff, July 4-6; the Smoki Indian ceremonies at Prescott, August 10, and Hopi snake dances at Indian villages near Winslow, August 15-25.

*Recipe given.

Butterscotch Ice Cream.
(Makes 1 quart)

3 tablespoons butter
½ cup brown sugar
1 cup milk
1½ tablespoons cornstarch
2 tablespoons cold milk
Pinch of salt
¼ teaspoon vanilla
1 cup heavy cream, whipped

Cook butter and sugar in top of double boiler, until butter is melted and well blended with sugar. Add milk and heat to boiling. Mix cornstarch with cold milk and stir into butter and sugar mixture; add salt and cook until thickened. Cool and add vanilla. Fold in whipped cream and turn into refrigerator tray and freeze, stirring once during freezing.

Marshmallow Delight.
(Serves 8 to 10)

½ pound marshmallows
1½ cups diced or crushed pineapple
1 pint whipping cream
2 tablespoons sugar
2 teaspoons vanilla
¼ cup maraschino cherries, cut up

Cut marshmallows into quarters. Add pineapple and place in a covered container overnight. Whip cream, add sugar and vanilla. Fold whipped cream into marshmallows and pineapple, add cherries. Pour into freezing tray and allow to chill thoroughly or partially freeze before serving.

***Grapefruit Sponge.**
(Serves 6)

3 eggs, separated
½ cup sugar
¾ cup canned, unsweetened grapefruit juice
1 tablespoon unflavored gelatin
¼ cup cold water
Berries

Beat egg yolks until light. Add ¼ cup sugar and beat well. Add grapefruit juice and cook mixture over boiling water until it coats a spoon. Stir constantly. Soften gelatin in cold water for 5 minutes. Add to hot grapefruit juice mixture and cool until slightly thickened. Beat egg whites until stiff but not dry. Gradually beat in remaining sugar. Fold into cooled mixture and pour into a one-quart mold. Chill until firm. Unmold on a plate and serve with sliced or crushed berries in season.

Fresh Peach Cream.
(Serves 8 to 10)

2 cups fresh peach pulp
1 cup granulated sugar
¼ teaspoon almond extract
1 tablespoon lemon juice
3 tablespoons cold water
1½ cups coffee cream

Combine peach pulp, sugar, extract and lemon juice. Add coffee cream. Pour into tray and freeze. Remove tray and stir once during freezing process. The stirring may be done in the tray.

Released by Western Newspaper Union.

Pewter best when rubbed with a paste made of whiting and lemon oil. Wash in hot water, rinse in hot water and then polish for lustre.

Summer curtains keep cleaner if the screens on the windows are cleaned of cobwebs and dusted with a clean dry cloth.

Waxed artificial flowers are cleaned easily by dipping in cleaning fluid several times, then allowing to dry.

To remove white spots from a shellacked surface, wipe with alcohol.

The FICTION Corner

PERFECT STRANGER

By JACK MOSHER

It was as if every word he spoke was scraped from the walls of his stomach, left some mark.

THE first thing Celia Brandon noticed about him was the way he sat. As if, she thought, studying the man at the corner table across the top of her menu, he had been propped up in his chair and was likely, at any minute, to go sliding off on the floor.

"Does he come in often?"

"Yes-a, Miss," said her waiter. "Every night this-a week, he come But he does not eat. He just-a sits and sits."

Celia examined her find more closely Saw that his skin was stretched altogether too tightly across his high cheekbones for him to wear good health

And his hair was greying much too rapidly, and his clothes were much too shabby for Garibaldi's, which was on 52nd just around the corner from the theatre district—a place where only the famous could afford to be shabby and where the really shabby rarely came

This Week's Best Fiction

"Perhaps," she said, "he hasn't the price of a meal"

"Then why does he come?"

The waiter's attitude Celia felt, was a coldly commercial one The way most folks with something to sell looked upon those who had no money to buy And determined to put the waiter in his place, she said, "I thought his face was familiar Yes, of course! It's Freddy Malone

Tell him" she said, "that I'd like him to join me"

"Yes-a Miss'"

For a moment after the waiter had delivered this invitation uncertainty marked the man's lean features There was a frightened expression in his deep-set eyes as they met hers But when Celia countered with just the right degree of warmth in her own—the degree one would extend to a man friend not seen in many years yet warmly remembered—he rose and came toward her table

He walked unsteadily and she wondered if he might be intoxicated If that explained his propped-up appearance of a moment ago Then he was alongside bowing just a little from the waist and she was saying "It's so good to see you again Fred"

"Yes," he said "Thanks for inviting me over"

His tones made her feel that he was hungry It was as if every word he spoke was scraped from the walls of his stomach left some mark And it was that he was closer she could not mistake the suffering which lined his face It was the kind that comes to those who find themselves alone in the world's largest city when dark closes in.

More than food she felt certain, was needed here He needed good cheer Someone to talk with To make the joke with To cry with Someone who would supply the things people needed so badly here in New York during the long lonesome months of waiting for a break that sometimes never came.

"How about a coke?" she said. "A pepper-upper, as they say."

He turned to the waiter, chuckling miraculously.

"A pepper-upper," he ordered, "for the lady." Then, when the waiter had gone off and leaning closer across the white tablecloth, "Look! It's nice of you. Having me like this, I mean. But I can't accept—"

"Forget it," Celia said, trying her utmost to spare him. "I don't know about you, but I'm hungry. Let's concentrate on dinner"

"Yes, of course. The dinner."

"How about some sea food?"

"Not for me" He made a wry face "I've just come from there. Maybe you took notice of my roll."

"I wondered what it was"

"IT'S THE genuine article," he assured her "A Clyde-Mallory Line freighter just brought me back from the Far East . You see," he hurried on as if he had just so much time in which to tell it, "I struck it tough in Singapore Went out there to work for a big oil company It wasn't so big, because it folded a few weeks after I arrived I was on the beach three months, broke to the wide, before I got this chance to work my way home—"

"Forget that now" Celia said, judging from his tones that every word must be an effort for him "This Spaghetti Italienne sounds mighty good to me"

"But I can't forget," he insisted. "And I think you should hear me out Have you ever," he demanded, while Celia could find not a word with which to check him, "known what it is to be hungry, to starve?

"Did you ever go for days with nothing but what black servants hand out at kitchen doors? Do you know what it feels like to be. . . ."

"I can well imagine." Celia interrupted, more firmly this time. "I've heard New York is no different than Singapore if it comes to that. But let's get on with ordering now, eh?"

"Yes, of course Ordering."

He sounded the least bit let down. As if he were offended by her apparent lack of interest in his story

But he bucked up as the meal progressed from soup through Spaghetti Italienne with meat sauce, as only Garibaldi's can make it, to dessert. He grew quite genial and mellow, in fact.

"I must see more of you," he said "You do me good."

"We do each other good, you mean."

"THAT'S IT!" He was an enthusiastic as a school boy attending his first grown-up date.

"I could get a job in Mexico. There's a fellow—"

"But why not try here in New York?"

"In an office?"

"Not necessarily."

"Then what?"

"Had you ever thought of acting," Celia said as the waiter returned with a small silver tray containing a half dollar and three thin dimes "You know what they say? If you can't make a go of anything else you're sure to click on the stage And it seems to me," she added, making a fine show of waving the waiter and the eighty cents away, "that with the experience you've had knocking around the world you could put a lot of punch into playacting"

He smiled broadly.

"Maybe you're right. In fact, I know you're right."

"What do you mean?"

"Simply," he told her, "that I AM stage I've just been putting on an act here. Rehearsing for my new play . . I need a girl to play opposite me She's rich as all get out. Money doesn't mean a thing to her . . . That's exactly the kind of girl you are in real life. So how about coming around in the morning to sign a contract? I'm Noel Howard—"

"Noel Howard?" Celia didn't spare the name mentioned with awe around casting offices where she had spent months trying to get a small part in his new production—in any production. "Then, listen you!" she flung at him. "How about buying me another dinner right now? I couldn't eat a bit of that one for thinking I'd spent my last five dollars. . . ."

What to Do With An Inferior Complex

You may think that you alone are in possession of an inferiority complex, but nine out of ten persons also have one.

Probably most inferiority complexes start in babyhood. There you were, small and weak and helpless and inarticulate, and you looked up. Above you, you saw a creature towering, your mother or father, strong, self-reliant, able, while you were so weak and dependent. Right then and there you acquired the beginning of an inferiority complex, and as you grew older, your complex became stronger.

Some psychologists, rather than see in the inferiority complex a personality handicap, actually look upon one as a good thing. They have, indeed, dubbed it the "golden complex," because as one of their number explains, "A personality complex is the spark that disturbs the clod."

What he meant was that our personality complex makes us conscious of our shortcomings, causes us to set up resolutions to improve, to compensate for our inadequacies, and as we develop, we develop our mental and physical strengths. We really become somebody because of our complexes, don't you see?

What should you do right away with yours? Analyze to see where it started and when. And then go about getting rid of it for good.

CONFLICT NEW REASON FOR CHILD ACCIDENTS

Young Johnny who has had one serious childhood accident will likely have another, and it may be due to something more than just happenstance. The newest angle on the "why" of children's accidents blames personality, scientific evidence indicates.

The tense, impetous child who never stops to think before he acts and runs away from emotional conflicts is very apt to have bad accidents, says Mrs. Alma H. Jones, extension specialist in child development, Iowa State College. After a conflict with authority in the home, the child, do to his mixed-up feelings, walks out on the situation and walks into trouble. At this crucial moment accidents are apt to occur

According to Mrs. Jones, the accident-prone child is apt to be fidgety and squirmy, irritable and unhappy. She points out that any number of safety programs will not make a "safe" child Parental understanding and good relations with the child are needed, particularly in the first years of the child's life when personality patterns are woven.

Parents who are concerned about a child's numerous accidents, such as breaking an arm or falling off a bicycle, should perhaps examine their own attitudes and behavior for inconsistencies which in turn affect the child. For example, parents may unconsciously take out their own disappointments and frustrations on the child in their relations with him in the home.

INSPECTIONS FOR SEED CERTIFICATION DELAYED

Field inspections for seed certification will be late in getting under way this year, reports Joe Robinson, Iowa State College agronomist.

The late, cold spring has put small grains a week to 10 days behind schedlue and will necessitate setting inspection dates back at least that long, Robinson says.

Over 1,600 applicants for oats certification have been accepted this year An additional 300, which came in after the final filing day were returned. Although applications this spring have been far above normal, Robinson expects his crew to be able to handle all requests accepted.

There is an enormous amount of work, not only in the actual field inspection, but also throughout the year, in cleaning, laboratory analysis and tagging the grain, he points out.

Nearly all the requests for inspection have been on Clinton Oats, with a few for Benton but practially none for other small grains.

A good many corn certification applications had been received by the final filing date, June 10.

CELEBRATED 87TH BIRTHDAY

Monday, June 16th was Geo. Born's 87th birthday anniversary That evening Mr. and Mrs. Fred Nuehring and Charlotte; Mrs. Clara Barz and son, Allen, and daughter, Mrs. Eldon Hagen; Mr. and Mrs. George Thieman, and three of Mr and Mrs. Evert Barz's children who are visiting here, spent the evening with Mr. and Mrs. Born.

At a late hour a nice lunch was enjoyed by all.

Trend in U. S. Agriculture Is Toward Bigger Farms

Economists of the department of agriculture say that the family sized farm is larger, more mechanized, and more commercialized than ever before. The average farm is now 20 acres larger than it was five years ago and 50 acres bigger than it was 25 years ago. The big, spreading ranches of the west and the small farms of the east are, of course, figured into this average.

The west has shown the greatest jump in size of farms, with nearly 10 per cent of the farms in the west now more than 1,000 acres. These big farms account for four-fifths of the farm land of the west. Even in the midwest a fifth of the farm land is in units of over 1,000 acres. A strong demand for practically all farm products during the last half dozen years in combination with speedy progress in machine farming has caused farmers to expand their acreage Very little new farm land has become available in the period, so large farms have become larger by taking in other farms or parts of other farms Even with all this expansion in farm acreage, the small farm is not immediately doomed; at least, not for a while. Farms of from 10 to 100 acres still account for a large proportion of all farms in all regions. Two-thirds of the farms in the south; one-half in the east; two-fifths in the west; and a third in the midwest are still small farms.

Hardwood Flooring Gave Impetus to Use of Rugs

Up until about 1900, floors in middle class American homes were usually of soft wood, which soon became worn and unattractive Because of this shortcoming, wall-to-wall carpeting at that time was popular as a floor covering The use of rugs was confined largely to mansions having parquet and other attractive hardwood floors

About half a century ago strong public interest developed for better small homes, and maple and oak flooring, in boards of narrow width, became popular. This trend in floors stimulated widespread use of rugs The hardwood floors are easy to keep clean and attractive, and the rugs make spring housecleaning easier because they eliminate dust-catching corners and are easy to keep tidy. The position of rugs in a room can be turned so as to bring about even wear.

Increased use of hardwood flooring stimulated greater use of both domestic and hand-woven oriental rugs. From 1900 to 1915 there was a ten-fold increase in imports of hand-woven rugs from the orient

Milk Dishes

To achieve a smooth consistency in some dishes made with milk, adding the ingredients in the right order is an important detail. The wrong order of adding can cause separation or curdling. When milk is to be combined with an acid food, the right order is to put acid food into milk. For example, in making cream of tomato soup, the hot thickened tomato should be added gradually to the cool milk Then heat the mixture just briefly and serve immediately. Likewise in making milk sherbet with an acid fruit juice such as lemon, the fruit juice after sweetening is added gradually to the milk. In all such mixtures the combining should be done gradually with constant stirring to avoid separation. When the mixture must be heated, the heating should be as brief as possible and at a low temperature.

Saving Effort

If you are doing some daily task that could be cut in half by a new method, take a tip from time and motion studies in work improvement. Instead of making a bed by the old criss-cross route, make one corner at a time and cut down considerably on the walking and effort. Toss on the bottom sheet but don't march from side to side Just smooth and tuck in one corner, complete the corner even to the spread and then move on. Cutting down steps in such a simple task as making breakfast coffee can amount to miles of travel over the years. For example, in one work improvement study made last year, it was found that storing the coffee maker and coffee near the sink saves time and effort. Another test of storage of sewing materials in the simple task of getting ready to cut out a dress brough out that it made considerable difference just where and how such tools as ruler, scissors, tape measure and paperweight were stored.

Colorscope Aids Shoppers

The lady shopper, who has difficulty describing to a clerk just what color she wants, may get a helping hand from science from a new device known as a colorscope, which electrically blends primary colors in various intensities to produce on a screen any shade of color in the visible light spectrum. Whether the lady is trying to match the color of something at home or merely starts talking about something in a "sort of salmon pinkish," the clerk simply turns on the colorscope, and as the various shades flash on the screen the lady can select the desired one.

Reaction to Powder Charge Makes Gun Kick, Says Expert

"That which goes up is bound to come down" is an old statement of a recognized fact, but this doesn't mean that "all that goes out has to come back."

However, when a firearm is fired a certain amount of "come back" is bound to happen. This, in shooting parlance, is known as recoil, more commonly called "kick." To understand it, all that is necessary is a little knowledge of elementary physics.

To every action there is an equal and opposite reaction. This is one of the so-called laws of motion and is the basic cause of recoil," says Dr. C. S. Cummings, ballistics expert for Remingtom Arms company.

The gases generated by the burning of the powder in a shotshell exert a force which pushes the shot charge and wads out of the barrel, Cummings said. In so doing an equal force is exerted in the opposite direction against the breechblock. If the gun is free to move then the above law of motion tells us that the weight of "charge" (shot, wads, and one-half the powder) times its velocity equals the weight of the gun times its velocity. Thus the speed with which the gun recoils is inversely proportional to the ratio of the gun and charge weights, i. e., the heavier the gun, the slower it recoils, the heavier the charge, the faster the gun recoils.

Pork Liver Helps In Regulating Person's Nerves

Pork liver, often neglected by the housewife, is worth almost its weight in gold in food value, according to nutritionists. Lean meat and liver of pork contain the B-complex vitamins — riboflavin, niacin and thiamine — which are essential in keeping the nerves on an even keel. So necessary are these regulating substances that even a slight deficiency may result in "nerves." Other sources of supply are milk, cheese, whole grains and meat.

When the family's nerves begin to get on edge, serve them a good meal of well-cooked pork liver, baked potato, green beans, whole wheat bread and milk, nutritionists advise. One serving, or a fourth pound of liver, whether it is fried, baked, canned or boiled, provides an excellent supply of the B-complex vitamins. Although brining and smoking destroy some of these nerve regulators, cured ham still is a good source of them. Pound for pound, spareribs supply lesser amounts than do ham or shoulder cuts because of the greater proportion of bone.

Only the lean meat and the liver of the hog, or about one-fourth its total weight, supply these nutrients. The remainder of the carcass has no value as far as B-complex vitamins are concerned.

Fireproofing Precautions

For fireproofing Christmas trees and greens, weigh your tree or greens. For every four pounds of tree or other Christmas greens use one pound of ammonium sulfamate or calcium chloride. Put the chemical in a large vessel and dissolve it, using one quart of water to each pound of chemical. Stir until thoroughly dissolved. Stand the tree or greens in the solution in a cool place and let it absorb the chemical solution. Many dangerous burns may be prevented by fireproofing children's cotton clothes and other very inflammable cotton garments such as cotton flannel or other fleecy garments. To fireproof cotton articles, dissolve seven ounces of borax and three ounces of boric acid in two quarts of hot water. Stir until liquid is clear. Dip dry articles in solution until thoroughly saturated. Hang up to dry. They may be pressed with a warm iron when nearly dry. When garments are washed they should be dipped again.

V-D Bars Marriage

Illinois anti-V.D. laws barred 1,000 couples from marriage out of more than 25,000 given premarital blood tests in Chicago in 1945, a city health department report disclosed. The Council of State Governments reports that anti-V.D. marriage laws are now effective in 30 states. The Illinois premarital examination law requires tests be made to detect not only syphilis but other venereal diseases. This is true also in 11 other states. The remaining 18 states of the 30 total require examination for syphilis only. In all cases, marriage is prohibited at least as long as the disease is in the communicable state, or until properly treated.

Transplanting Evergreen

If you plan on landscaping your yard with evergreen trees, these trees can be moved during any season of the year, although October to May is best. Evergreens, however, require some special handling. Their roots, which contain a substance known as resin, must not be left exposed to the air because the resin will harden. This prevents the tree from taking needed moisture and nourishment from the soil because water will not dissolve the hardened resin, and even though the evergreen may appear to be in good shape, it will die during that same season or at the beginning of the next growing season

Repairing Rugs

Frayed edges, worn hems or fringe—such damages as these are often among the first to develop in rugs. They can be repaired by sewing on new carpet binding. Starting where the damage is deepest, cut off the worn edge of the floor covering. Large shears or, if you're careful, a single-edged razor blade or knife may be used, and cutting should be done from the wrong side, following a crosswise or lengthwise yarn as the case may be. Overcast the raw edge. To sew on the binding, lay its right side against the right side of the carpet, edges even. Using a heavy darning needle and carpet thread and working from the wrong side of the carpet, sew them together with slanting stitches The needle should come out through the binding about one-eighth inch from the edge. Fold the binding to the underside, and sew the loose edge to the carpet back, catching only a few yarns of the carpet; or you may fasten the binding with household cement.

Searched in Vain

Searches rivaling those for the Fountain of Youth and the Seven Cities of Cibola in North America furnished a pretext for extension of Spain's empire in South America where exploring parties hunted the fabulous empire of the Caesars of Patagonia. The legend told of a mysterious European city deep in Patagonia whose residents, known as "Caesars," were extremely wealthy and long-lived. Spanish governors equipped many expeditions during the early 17th century to search for the city and sporadic quests continued until the close of the 18th century. Although such searches were naturally fruitless, they provided early geographic and ethnic information concerning South America and in opening the way for future settlement of the region

Mandarin Oranges

The mandarin-type orange (tangerine and satsuma) belongs to the citrus fruit family and is a good source of vitamin C. The mandarin orange, because of its deep orange coloring, has valuable amounts of vitamin A, too, and iron content. Because mandarins may be peeled easily they are usually eaten right out of the hand. This method of eating makes available the full measure of vitamins and minerals contained in the fruit, without the loss which occurs when citrus fruits are squeezed for juice.

If you haven't drained the the antifreeze from your tractor or automobile engine, it may be the cause of that knock youv'e been hearing.

The best time to train a cow for fast milking is when she freshens with her first calf.

LIBERTY BUSY BEES

The Liberty Busy Bees met at the home of Bethel Habercamp, Saturday June 7.

The meeting was called to order and nine members were present.

The two-leaders were presented with a check. Mrs. Aaron Stromer gave the girls a test on picturres for picture study. The leaders handed out some pamphlets on color design. Beverly Habercamp gave an illustrated talk on "Flower Arrangement and Winter Bouquets." The two girls who attended 4-H camp, Gloria Haefner and Beverly Habercamp told their experiences while at camp.

Next meeting is to be held at the home om Gloria Haefner, July 17.

SHOULD VACCINATE PIGS AS CHOLREA PRECAUTION

Although hog cholera outbreaks have been decreasing, Iowa farmers should not fail to vaccinate this spring.

K. W. Stouder, Iowa State College Extension Veterinarian, says hogs are too valuable this year to take any chances on a cholera outbreak.

Spring pigs can be vaccinated more easily and cheaply when they are 8 to 10 weeks old. Stouder cautions against trying to do too much at one handling. Castrating, ringing, vaccinating and weaning all at the same time is hard on young pigs.

Stouder says it is worth the extra cost to vaccinate the entire herd. This work, while it should be as soon as possible, need not be at any special time.

An exchange says there are two periods when fishing is good, before you get there and after you leave.

Each June, we celebrate Dairy Month, honoring Iowa's great dairy industry.

Celebrate it? Sure! But by itself, that's not enough; let's DO something about it! For example:

Let's all drink the milk the doctors tell us we ought to have: "A quart a day for each child—a pint (two glasses) a day for each adult." Let's order milk in restaurants. Lets take our pie with ice cream, or with a slice of fine-flavored cheese.

Let's have a milk-shake for that mid-afternoon break—and let's take home some ice cream for dessert!

And, at every meal and in every kitchen, let's enjoy lots of golden, delicious Iowa butter!

Let's observe Dairy Month, as well as celerbate it. And we'll all benefit from better nutrition—for milk, butter and other dairy products are "first in food!"

JOLLY WORKER CLUB MEETS

The Jolly Worker Club met at the home of Mrs. Freda Lass Wednesday June 11th, 17 members were present and Mrs "Bill" Johnson was a visitor

Roll call was answered by the members giving a recipe of a helpful household hint.

Minutes of the last meeting were read by Luella Boelman.

Bessie Marshall the vice-president took charge of the business meeting.

Our president Lily Pearson was with us again and thanked the ladies very kindly for thier kind deeds done for her during her recent illness Mrs Alvina Helps brought pictures and a letter from a family in Holland Everyone enjoyed looking at the pictures

After the business meeting a social hour was enjoyed

Nice refreshments were served by Mrs Lass and Jennie Nelson as co-hostess The July meeting will be held at the home of Anna Conners with Dorothy Helps as co-hostess.

Likes Guns

At Harlan, attorney Leland White collects fire-arms as a hobby. He now has about 20, of varying degrees of antiquity Mrs White also enjoys the hobby as for every dollar Mr. White spends on guns, she receives an equal amount for her own use.

Decorates Graves

Raymond Knowlton, Stuart mail carrier, took over the job of decorating soldiers' graves 23 years ago because "some one had to do it" and he is still at it. Each spring he paints the crosses and places flowers in three cemeteries at Stuart and also in cemeteries at Morrisburg, Fairview, Wahwa, Jefferson Center and Menlo He has worked out a map showing the location of each of the graves in the Stuart area

Now that warm weather is here, try to get your milk and cream into the cooling tank as quickly as possible after milking

Iowa has more than 2 million acres of timberland

The Methodist Church
Herschel E. Harvey, Pastor

KLEMME

Thursday:
Choir meet at the church at 7:30
Work group at 2:00 p. m

Sunday:
Worship at 10 00 a m
Church School at 11:00.

Monday:
Methodist men meet at Klemme at 8 00 p. m.

LIBERTY

Sunday:
Church School at 10 15 a. m
Worship service at 11 15 a. m

Monday:
Methodist men meet at Klemme at 8 00 p. m

Attend the special services at the Civic Auditorium in Forest City to hear the Lacour Evangelistic party thru next Sunday evening.

Tax Exemption

Deadline Is July 1st

All applications for HOMESTEAD TAX CREDIT and all applications for SOLDIERS EXEMPTION must be on file in the Office of the County Auditor on or before July 1st 1947, in order to receive credit on the 1947 taxes payable in 1948

If you have not filed with your assesor or at the office of the County Auditor and are eligible, you should do so at once.

AMOUNT OF EXEMPTION	
World War II	$ 500.00
World War I	750.00
Spanish American War	1800.00
Civil War	3000.00

Under the present law after you have filed once for military exemption, additional filing is unnecessary in the same county Application for Homestead Tax Credit must be made each year.

Discharges from service must be recorded in counties where application for exemption is made

The County Auditor's Office will be glad to give any other information desired regarding tax exemption

ACT NOW after July 1st it will be too late.

Fred C. Missal
COUNTY AUDITOR

WE SALUTE

Iowa's Dairy Industry

We're mighty proud of the dairying achivements of our Iowa dairy farmers and we think Dairy Month is a good time to say so.

We know dairying brings "new dollars" into the state—hundreds of thousands of them each day! We know those dollars build Iowa business, Iowa schools, churches, institutions, of every valuable kind.

We know that dairying makes men and women—builds character as it builds wealth—and as dairy foods build health!

So—more power to Iowa's Dairy Industry. Let's all observe Dairy Mnoth, by using plenty of Iowa's fine dairy foods.

Card Of Thanks

THANK YOU!

We wish to thank our children, grandchildren, relatives, and friends who planned and attended our Golden Wedding Anniversary celebration and dinner, and all those who helped to make it an affair which we will alwant to thank all who rememways remember. We want also bered us with cards and gifts. Mr and Mrs. Julius Priebe 1tp

Lots Of Pennies

When Joel Benson, Cherokee cigar store owner, got around to banking some pennies he had accumulated, there were 17,430 of them. In a kidding letter, the bank advised him that three counting machines were broken, four tellers and three stenographers laid out to get the job done. Benson sent the bank a bouquet of flowers.

Secret Hoard

When 84 year old Eva Hurd of Alta died last week, five days after the death of her husband, neighbors went around and collected 25c donations for flowers for the "poor old couple." The community was astounded to learn that a satchel which Mr. Hurd took with him to the hospital contained $58,000 in cash and securities.

Unwanted Pacific Atoll Now Valuable Air Station

Tiny Palmyra, the low atoll 1,100 miles southward from Honolulu, used to be an "island without a country," says the National Geographic society.

Whaling ships often sought the atoll's limited shelter in the early 19th century. One of the earliest visitors was the American ship Palmyra in 1802. At various times thereafter, the tropical pinpoint was claimed for the United States, for Great Britain, for the one-time Hawaiian kingdom, and by private individuals for themselves.

Declarations by Hawaii in 1862, by Great Britain in 1889, and by the United States in 1912 were sovereign claims among many private ones. All lapsed, however, because the atoll was not worth holding By 1936, the trans-oceanic phase of air transport had arrived, and the United States raised the Stars and Stripes over Palmyra, prospective way station on the New Zealand air route.

More than 50 islets make up Palmyra's land total of 250 acres. They are links in the five-mile-long horseshoe-shaped platform of coral and hard sand that encloses three separate lagoons. Largest islands, Cooper, on the north, and Eastern, on the east, cover less than 50 acres each.

Britain Changed Calendar in 1752 and Lost a Week-End

When England changed New Year's Day from March 25 to January 1 in 1752 and adopted the Gregorian calendar, thousands of Englishmen suffered a prolonged "lost weekend." According to the Encyclopaedia Britannica, the change in the calendar made it necessary to wipe out 11 days of the year, which was done by declaring that the day after September 2 was September 14, not September 3 This brought England into step with the Catholic countries, which had adopted the Gregorian calendar in 1582.

During the early Middle ages, March 25 was considered the first day of the new year by most Christian peoples, but in Anglo-Saxon England, the Britannica points out, New Year's Day fell on what is now Christmas—December 25. At the time of the Norman Conquest of England, however, William the Conqueror ordered that the year should start on the first of January, possibly, it is believed, because his coronation was scheduled for that date.

Still later, England reverted to the custom observed by the rest of Christendom and began her year on the 25th of March, and that date remained the first of the legal and ecclesiastical year until 1752, when the calendar was adjusted to the Gregorian system which is still in use today.

Major Cause of Blindness

The single most important cause of blindness is cataract. It accounted for almost 25 per cent of the cases in a sampling of 20,000 blind adults. Congenital cataract accounted for 15 per cent of the cases among a large group of blind children. A cataract is an opacity of the crystalline lens—all or part. The lens is behind the pupil. It is the part of the eye that focuses rays of light on the retina. When the cataract is fully developed, light will not pass through the lens but is reflected back. This makes the pupil of the eye—ordinarily black—look white. The onset of a cataract seems to be closely tied up with a person's general condition Teeth, sinuses, blood, glands—trouble in these or in almost any other part of the body may be behind the trouble in the eyes Or the trouble may be centered in the eye itself as the result of eyestrain or an accident.

New Heaters

Long-awaited improvements in room and home heating now are coming to us in disguise, judging from the new oil space heaters. Instead of looking like stoves used to look and having the embellishment, the gingerbread and the gadgets you might expect, these new heaters have been designed to the taste of an interior decorator. Streamlined, finished in modern tones, available in numerous sizes, they are built to fit, unobtrusively, in room settings and to harmonize with furniture and home decorations. But design, according to the manufacturers, is only one feature of the 1947 model oil heaters. Having the advantage of assured supplies of a clean, economical fuel, the heaters operate on the vaporizing, "pot-type" burner principle in which the oil itself does not burn, but instead the oil vapor which is mixed with air to produce an even and easily controlled flame.

New Plastic Eye

New plastic artificial eyes for one-eyed persons have been developed by the optical industry. These new artificial eyes move in unison with the good eye, and by new methods of coloring they have a life-like appearance. Colors of iris and sclera are matched. Even the vein markings are duplicated. The curvature of the cornea of the good eye is measured, as is also the diameter of the pupil in daylight, not facing the sun. All the outstanding features of color and shape of the normal eye can be duplicated in the new plastic eyes.

Storing Jellies

Honey jellies and marmalades, contrary to the usual notion about storing perishable foods, should be kept in a warm, not a cool, place, according to findings based on work by E. J. Thiessen, foods and nutrition worker at the Wyoming Experiment station. Room temperatures are preferable to 40 to 50 degree temperatures for storing jellies and marmalades in which honey is used, Miss Thiessen reported. Low storage temperatures, she said, caused some crystallization. Otherwise, Miss Thiessen indicated, jellies and marmalades made with honey had excellent storing qualities and kept for a long period of time.

Best to Burn

If you're wondering what woods will burn best in your fireplace, here are a few suggestions. Softwoods from cone-bearing trees generally make a quicker and hotter fire but also a shorter-lasting fire than do hardwoods. The lighter hardwoods make a hotter and shorter-lasting fire than do the heavier hardwoods. Woods that give the most heat for their weight are: oak, hickory, sweet birch, hard maple, rock elm, locust and longleaf pine. A combination of hard and soft wood, such as oak and pine together, makes a successful fire. Woods that throw off sparks are chestnut, butternut, tamarack, and spruce. These should be burned only behind a screen.

Produce Tung-Oil

Tung-oil culture was started in the United States by Dr. David Fairchild, agricultural explorer for the department of agriculture. The principal tung growing land lies a few miles inland from the Gulf of Mexico, extending eastward from Baton Rouge, La., into northwestern Florida. These groves total 12 million trees and cover 250 square miles of land. Because of the concentration of groves in Pearl River county, Mississippi leads the six producing states with 20,000 tons of nuts—nearly half the 1946 crop. Louisiana, producing 14,000 tons, is second. Florida, with 10,500 tons, is third.

AROUND IOWA

Her Centennial

Mrs Sue Richardson, of near Delta in Keokuk county, celebrated her own private "centennial" last week. She reached her hundredth birthday on June 4. She moved to Keokuk county when two years of age and has lived in that vicinity ever since

From Eagle Grove

In the crash of a DC-4 at LaGuardia field just before Memorial Day, all of those aboard the big plane except five, were killed. One of these was the stewardess, Marjorie Oldson, of Eagle Grove She is expectd to recover.

New Rinkle

Last week, Mrs. Inga Kalvig of Kanawha was in a car with the Walter Lundbergs of Austin, Minn., euroute from Minneapolis to Austin. A second car with a wailing siren overtook them and Mr Lundberg pulled up, thinking it was a police car The driver pulled a gun and made off with a small amount of cash

Died of Burns

At Marengo, eight year old Alice Lynn stood by the kitchen stove, toasting a slice of bread. A sudden explosion sent flames out on all sides of the burner and set fire to her clothing. The child died of burns 3 days later.

Young and Old

At Manly, W. S. Lemer has been a barber for 38 years. His youngest customer during that period was 8 months old and his oldest customer was just over 100 years old.

54 Years

Frank Eischen of Van Wert had the pleasure of entertaining his three brothers there recently. The occasion was especially memorable since it was the first time in 54 years that the four brothers had been together. The family was broken up following the death of their mother many years ago. One brother lives in Minnesota; another, Nicholas, in Seatte and two live in Van Wert.

First Baby!

For being the first baby born in the Dr. Hovenden hospital at Laurens, little Linda Kilbourn received more than $80 in cash and dozens of gifts. Linda Ellen took the hub-hub in stride, slept through the presentations.

One Way

Here's the hard way to catch fish. At Independence, Leroy Methhaler cut down a tree near his apartment house on the river. The tree fell into the water, stunning a 15-inch carp, which he gathered in with a rake.

Met Death

As he drove his tractor from the field, Milford Lansink, 16, of near Ida Grove, was killed when a shotgun he was carrying on the machine was accidently discharged. The gun was carried for hunting squirrels.

Pussy in the Well

While trying to rescue her pet cat from a well, Mrs. Bert Dawley, 72, fell into the 12 ft. well and spent 40 hours there before she was found by a brother-in-law. Mrs. Dawley lives at Charles City. Weak and stiff, she was hospitalized after her ordeal.

Spoiled Record

Jerry Dykstra of Sleiton was recently given a diamond-studded pin for eight years of careful driving while operating a bread-truck. Last week a Clay county resident smashed into his truck, damaged it $250 worth. What made the circumstances particularly aggravating to Mr. Dykstra was the fact that the collision resulted from a snow storm in May!

Kill The Pests

Get rid of bugs, flies and other pests around your premises . . . clean up that patch of noxious weeds and join the campaign now in progress. We have the materials you need:

Bug Blaster Dust Gun, filled with inseticide power

Presto DDT Insect Dusting Power

Presto DDT Liquid Insect Spray

Presto DDT For Painting Screens and Garbage Cans

Weed-No-More Kills obnoxious weeds

Red River Potato Mix

Arsenate of Lead

Aero-Sol Bombs . . . . Kill Flies, Mosquitoes, Bed Bugs, Cockroaches, Moths Etc.

We also have on hand a nice line of Electric and Hand Household Sprayers and Hudson Spray Guns in several sizes.

Jacobs Hdw.

Quality and Service Since 1919 Klemme, Ia.

Controls Necessary in Food Crisis

Export-Import Regulations Vital for Curing World Ills

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON.—The sudden descent upon Columbia's shoulders of the mantle of world leadership has forced the President to add all sorts of odd jobs to his other extra-constitutional functions. Traveling salesman is one of them. Almost before he learned his way around the White House, he had the United Nations assignment at San Francisco. Hardly was he back from the Golden Gate when he was ordered to Potsdam. He already has become our "flyingest" chief executive. The Mexican trip was scarcely over when he was called to the wearying vigil at his mother's bedside.

Baukhage

Meanwhile he has conducted White House business without encountering too much criticism for being absent without leave. In fact, his popularity with the public has grown.

But at this writing some of his followers are growing a little restive about what they call his apparent neglect of certain issues which ought to be brought emphatically before the public.

What was considered a crisis in world affairs was met successfully by overwhelming congressional support for the post-UNRRA relief and Greek-Turkish aid bills. Although at times it has balanced upon a rather thin edge, the solidarity of bi-partisan foreign policy has been maintained. But there is another matter which those most concerned declare has not been brought home to the public — the world food situation.

There are two important facts:

1. Two years have passed since the end of the war and the world food situation is no better.

2. Although congress (the people) has been willing to vote huge funds for relief, it appears unwilling to continue certain controls on business, without which the machinery for helping the stricken countries to their feet will break down.

The first job is to bring home the seriousness of point one The second job (which has been dumped into the President's lap) is to convince congress of the importance of point two.

Press and radio have been asked to help with the first job. They are trying. Here's one small contribution: In terms of dollars the destruction caused by World War II was seven times that of World War I. Recovery is, therefore, at least seven times as hard. Economic difficulties are multiplied more than sevenfold because of political difficulties. It is impossible to estimate the "destruction" in terms of what has happened to social and political values.

As to point two, that becomes a concrete issue which ought to be in debate before these lines are printed; namely, the question of extending certain wartime controls over exports and imports.

Briefly, if export controls go off, foreign nations can bid against each other for food. Wheat, for example. That will send the price of wheat skyrocketing What does that mean? In the first place it means the country with the most money gets the most wheat, regardless of its need. Others go hungry. It means the American taxpayer will have to pay a fancy price for the wheat the government buys. It means extra American dollars which could be used to buy other American products, which would encourage production, will be sucked out of foreign pockets and world trade will be stultified by just that much. That is on argument for extending controls on exports.

Fortunately there are also a lot of "selfish-interest" reasons for controlling some exports. It's this way: The man who extracts oil from soy beans, although he is quite willing to have his oil exported, probably can sell it here anyway. But he doesn't want beans from which he gets the oil sent out of the country. The man who refines the oil doesn't mind having his refined product exported but he doesn't want the unrefined oil (his raw material), which he has to buy, exported; the man who uses that refined oil to make margarine doesn't want to compete with foreigners for it, although he's quite willing to have foreigners buy his margarine. These mixed motives don't add up to a very good argument for congress, because the only controls desired are for the other fellow. It doesn't generate too much pressure because there are enough "agins" to balance the "furs."

But when it comes to imports, it's a different story. Take fertilizer Britain and the United States, straining to increase production, now are using twice as much fertilizer as in prewar years. That is all right. But the destitute European countries with their very tired soil need every ounce they can get—and if there were no import controls they would get less—the rich buyers would get more The pressure on congress is all against limiting importation of fertilizer.

Some imports into America are, of course, highly desirable—to get those American dollars abroad in order that foreign nations may buy raw materials and other things. But if we are to keep the rest of the markets alive until they can feed themselves, what we give out and what we take in will have to be made to fit the needs of the situation, not the desires of the American businessman who doesn't realize that if he is given too free a hand he'll be cutting off his own nose with it.

★ ★ ★ ★

Humanity Is at the Crossroads

Two reports in the news recently caused some interesting comments in Washington on the international situation.

Charles Reese, extension apiarist of University of Ohio, recently reported that because of the late season and resultant scarcity of pollen on which bees feed, many of the drones (who do not work and are preserved for social purposes only) have been pushed out of the hives by the workers Picket lines have been formed and the drones are not allowed to re-enter. They die in the damp and cold.

"Theirs (the bees') is not a very pleasant society," says apiarist Reese. "Hive activity is communistic and utterly ruthless."

A statement by Andre Visson, French writer who syndicates a column in American newspapers, was the second inspiration for unofficial comment. Visson said:

"The world has indeed entered into a contest between Americanism and Communism."

This pearl of wisdom laid beside the dispatch from Columbus moved a certain engineer-economist-philosopher to the observations which follow:

For the first time, this pundit pointed out, the human race is really at the crossroads. Life has followed two paths, one taken by the animals, another by those who have in them something that distinguishes them from the beast. One path has been clearly visible to materialistic philosophers, Nietzsche, Hegel, Marx and the monster who was created out of their theories, Hitler. The other is the one illumined by the thought and action of those who from cot or castle, from work-bench or cloistered hall, lived in the belief that the activities of the state, or the individual, should be measured against something other than material forces.

It has been shown that animals, when they master technology, tend to form a perfectly regimented, totalitarian state. Take the ants and the bees. They long ago were able to do what Hitler planned and had begun to practice—change the nature of species, not only by creating a special environment for the young but also by feeding it certain foods.

The bees carefully segregate the babies (the eggs) and by feeding them three different menus produce three different classes, the workers, the drones and the queen. Hitler had well-worked-out theories for producing a slave-class by feeding the children certain vitamins, withholding others, weeding out all those undesired by the Nazi state, feeding and training a ruling class (Fuehrerprinzip).

And now, the followers of Marxist-Leninism are set up to carry out the principle.

LIVING BARRIER PROTECTS CHILDREN . . . Whether the danger come from tigers or autos, mothers always are ready to protect their young. When a narrow residential street in Columbus, Ohio, became a speedway for motorists, aroused neighborhood mothers formed a living barrier to traffic to permit their children to cross the street from the school bus in safety.

NEWS REVIEW

Farm Budget Cuts Hit; Train Fares Increased

FARM FUROR:
Stormy Weather

Possibly the most violent storm of the year, according to the economic and political barometer, is the one which was raised when the house appropriations committee recommended a 32 per cent cut in department of agriculture funds for the coming year.

Slashing more than 383 million dollars from the amount asked by President Truman, the committee opened the floodgates for a deluge of protests from Clinton Anderson, secretary of agriculture, and Democratic congressmen, who claimed they would fight the action right up to next year's elections, if necessary.

Anderson

Declaring that the reduction "directs a sharp cut at the interests of the American farm family and the general welfare," Anderson said that the "greatest harm" would be to the soil conservation program, the farm price support program and programs designed to help veterans and low income families become better established.

The 32 per cent cut would eliminate the Agriculture Adjustment administration by July 1, 1948. Currently, the AAA is carrying on its basic program of promoting soil conservation on 3,500,000 cooperating farms by paying farmers for following practices intended to increase soil fertility and, hence, to increase production. The proposed fund slash would mean that farmers this year would be paid about 50 per cent of what they previously had been promised.

In answering the criticism, the house appropriations committee said that its recommended cuts are "selective" and reasonable—based on actual farm needs.

HOUSING:
Unfounded Hope

Popular belief that any substantial reductions in the cost of new housing will occur in the near future is not founded on realities.

That assertion was made by James C. Downs Jr., president of the Real Estate Research corporation, who explained that besides being geared to a high national debt, housing costs, like prices of other hard goods, are directly affected by the large demand for American capital and production by other countries.

"The housing shortage today is worse than a year ago," he said, "and it will continue to grow progressively worse for some time."

He pointed out that increased earning power has put a greater number in the market for new homes, but at the same time builders are afraid to start new construction because of high costs. The theory that prices would drop kept many persons from buying or building homes last year, Downs said.

TRAVEL PAY:
Train Fares Up

To offset increased operating costs, Interstate Commerce commission authorized an approximate 10 per cent increase in basic passenger fares for 60 railroads operating east of the Mississippi and north of the Ohio and Potomac rivers.

The change will boost one-way passenger rates from 2.2 to 2.5 cents a mile in coaches and from 3.3 to 3.5 cents a miles in sleeping and parlor cars, There will be an increase of about 15 per cent in coach round-trip rates and about four per cent in Pullman round-trip fares.

In granting the increase, ICC noted that those railroads which requested the new rates incurred a deficit of 54 million dollars from passenger train operations last year.

IT'S WONDERFUL:
Long Time Peace

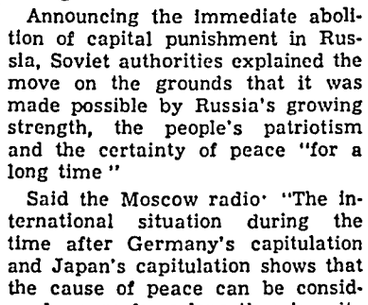
Announcing the immediate abolition of capital punishment in Russia, Soviet authorities explained the move on the grounds that it was made possible by Russia's growing strength, the people's patriotism and the certainty of peace "for a long time"

Said the Moscow radio: "The international situation during the time after Germany's capitulation and Japan's capitulation shows that the cause of peace can be considered secure for a long time in spite of attempts by aggressive elements to provoke war."

Meanwhile, Herbert Hoover looked on the other side of the mask to charge Russia with attempting to bleed the United States through relief channels and blaming her for the economic paralysis of Japan and Germany.

He declared that futher relief will remain necessary as long as the Soviets continue their obstructionist tactics and demands for reparations, thus blocking peace treaties with the two countries and keeping their economies paralyzed.

French Honor



Vincent Auriol, president of France, decorates opera singer Lily Pons with the rosette of the Legion of Honor. The French-born artist has been making a concert tour of France.

APPALLING WASTE

Mounting Fire Loss Predicted

CHICAGO.—With fire losses continuing to mount, damage may exceed the billion dollar mark by 1950, Frank A. Christensen, president of National Board of Fire Underwriters, warns in urging support of the federal action program to save life and resources which was the result of President Truman's conference on fire prevention.

The increasing fire waste was attributed by Christensen to two causes, one physical and one psychological.

"The physical factor tends to increase the number of fires of all kinds, and the size of losses where flames gain headway because of delayed alarms, poor fire protection, negligence or bad housekeeping," he explained.

"The psychological factor arises out of our careless and reckless habits," he explained.

Christensen pointed out that since 1941, national waste by fire has more than doubled, rising to 616 million dollars for the 12 months ended April of this year from 300 million dollars for 1941.

"Even more appalling," he said, "is the indication that the loss of life may have risen to a figure never experienced before. Loss of life in hotel fires in 1946 was greater than in any year in our history."

Despite a 22 per cent increase in arson investigations, the national board had found a sharp decline in the number of fires started for profit during the last year.

The board pointed out that in the year ended April 30, juveniles accounted for almost half of the persons arrested because of incendiary fires, and persons mentally irresponsible for another large share.

JUST LIKE MOTHER'S

New Red Cross Class Designed To Appease Cake-hungry Vets

WNU Features.

JAMAICA, N. Y.—It will be luscious home-baked cakes for returned G.I.s in this suburban area of New York City from now on, thanks to the nutrition service of the central chapter of Queens Red Cross. The new epicurean slant is the result of the recent poll conducted by the local Red Cross among its hundreds of G.I. brides, all graduates of the chapter's two-year-old "School for G.I. War Brides," originally initiated to indoctrinate young wives and sweethearts of G.I.s with the rudiments of housekeeping.

The poll was intended to gauge opinion among these women as to reaction of their husbands to the tutored domesticity of their wives, and to discover the "inner yearnings" of returned and discharged G I s along domestic culinary lines Signed returns to the widely distributed poll amazed Red Cross nutrition officials.

A majority of the pollees reported that their husbands were elated with their "homebody" wives, and that the former soldiers craved most their mother's old-fashioned "home-baked" cakes. The result was a determination to refashion the Red Cross school, changing it to the "Red Cross School for Cake-Hungry Vets."

Amid a great deal of fanfare, Red Cross officials formally opened the school. The first wave of "students" overwhelmed Red Cross executives. Not only war brides but also grandmothers, mothers and sisters attended. It indicated, in the opinion of the school supervisors, a "definite trend back to home baking and cooking as the best way to a man's heart."

EAT IT, TOO . . . War brides, mothers, sisters and even grandmothers flock to the Red Cross school to learn how to bake old-fashioned cake.

Baking experts were pressed into service at the school as "professors." Topping this list were Miss Dorothy Wettemann, nutrition director for the Red Cross, and Grace Lohmann, heralded as the nation's top "amateur baker." Miss Lohmann baked thousands of delicacies for G I.s during the war.

The school, according to Miss Wettemann, will continue indefinitely, and classes will be arranged in groups of 25.

Horseback Trek To Follow Trails Into Adventure

BELLE FOURCHE, S. D. — Unsurpassed mountain scenery, western companionship and a well-stocked chuck wagon combine to make the horseback caravan from Belle Fourche to Devils Tower, offered for the first time this summer as a tourist attraction, an interesting diversion from the run-of-the-mill vacation.

Nine trips are planned during the months of June, July and August, departure dates being the 1st, 11th and 21st. Each caravan, it is expected, will be comprised of 25 to 30 riders The rides are sponsored by Western Trails, Inc, an organization of Belle Fourche businessmen.

Traversing Black Hills National forest, the trail passes through mile after mile of virgin Ponderosa pine, up and over the Bear Lodge mountains, along sparkling creeks and through grassy lowland meadows.

Western terminus of the eight-day trip is the unique and awesome upthrust of rock known as Devils Tower in eastern Wyoming. The first monument to be incorporated in the national park system, Devils Tower is a majestic sheaf of rock columns that rises 875 feet above its base.

For the benefit of "dude" guests on the adventuresome ride, cowboys wrangle and saddle the string of range-wise western ponies, a trail boss guides the caravan and a crew travels ahead in chuck and duffel wagons to set up each night's camp.

Overtime Parkers Get Opportunity To Repent

CHILLICOTHE, MO. — One lone parking meter has been installed at the local police station to give a second chance to overtime parkers who repent in haste. When a motorist gets a ticket, he can gain forgiveness by going to the station within one hour and depositing his nickel in the parking meter there. But if he waits 61 minutes, he must pay a dollar.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

Sixty-eight youngsters competed in a model aircraft contest in Kansas City, Kas, under auspices of Model Aircraft institute and sanctioned by Academy of Model Aeronautics in Washington. . . . A civic campaign has been launched in Du Quoin, Ill., to raise $10,000 for purchase of a 93-acre site and development of an airport. Backing the project, the Lions club has arranged temporary financing for purchase of the site, which had been used as an airport until early 1946. The club voted $1,000 toward the campaign. . . . Expansion of civil air patrol activities is contemplated during the coming year, wing commanders of the group were told at their annual meeting in Washington. Highlight of the three-day session was the second annual congressional dinner, when reports were made to congressmen on activities of nearly 1,500 CAP units throughout the United States CAP is an auxiliary of army air forces. . . Airplanes were utilized to inspect land devoted to summer fallow in western Kansas. Glenn H. Johnson, state director of the Kansas Production and Marketing administration in Manhattan announced that summer fallow practice was performed by about 18,000 farmers on 2,500,000 acres of land. Use of airplanes expedited checking to determine that farmers complied with all requirements.

* * *

Once again the airplane has come to the aid of law enforcement officials. An Arizona highway patrolman, from whom three youths in a stolen car managed to escape, got his men recently by rushing to an airport and taking a Cub plane aloft for a survey of the desert into which they had disappeared. He spotted the youths hiding beneath a desert bush, made note of the spot and in a few minutes had landed and apprehended them.

* * *

MODERN PROSPECTORS

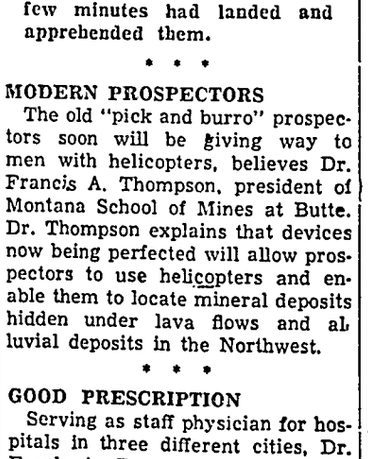
The old "pick and burro" prospectors soon will be giving way to men with helicopters, believes Dr. Francis A. Thompson, president of Montana School of Mines at Butte. Dr. Thompson explains that devices now being perfected will allow prospectors to use helicopters and enable them to locate mineral deposits hidden under lava flows and alluvial deposits in the Northwest.

* * *

GOOD PRESCRIPTION

Serving as staff physician for hospitals in three different cities, Dr. Frank A. Brewster of Holdridge, Nebr., finds that time is valuable. Consequently, he resorts to a plane for rapid transportation between Holdridge and Lexington, Nebr., and Oberlin, Kas, the other cities in which he serves on hospital staffs. Each is more than 100 miles from Holdridge.

Dr. Brewster, 73, bought his first plane, an old Jenny, in 1919. Now he pilots a Fairchild F-24 Ranger four-place personal plane This permits his wife and nurse assistant to accompany him on many of the flights. In addition to his regular professional trips, he has made flights to Chicago, El Paso and points in Kentucky.



FLYING DOCTOR

Watch Your Kidneys
Help Them Cleanse the Blood of Harmful Body Waste
Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.
Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

Confusion Prevails On Hospital Issue

PRESIDENT TRUMAN, in making his second appeal to this congress for a nationwide medical aid program, included the controversial health insurance question as well as establishment of more hospitals and securing of more doctors in areas where they are needed. And these areas are in rural districts.

Insofar as the hospital question is concerned, it is most confusing. The last congress passed a national hospital act which provided for an annual appropriation of 75 million dollars a year for five years for construction of hospitals on a state-aid matching-dollar basis.

Under the act then, there should have been available 75 million dollars for the 1946-47 fiscal year, another 75 million dollars for the 1947-48 fiscal year, or a total of 150 million dollars as of now. As a matter of fact, however, no appropriation was made.

To complete the confusion along comes this congress and in the labor-federal security appropriation bill again failed to appropriate any money, instead authorizing "the amount of contract authorizations." In other words, under this ambiguous language, a state that had set up a hospital program under the national hospital act for say four million dollars, approved by the public health service, would "be deemed" to have "contractural relationship with the federal government for that amount."

The senate, taking note of the loose language, amended the bill by limiting the "contractural obligation" agreement to 40 million dollars. So it turns out as a result of this involved legislative tinkering that, although under the law there is supposed to be 150 million dollars now available for hospital construction, actually no money will be available after contracts totalling 40 million dollars have been approved.

• • •

Sen. Claude Pepper of Florida is considered one of the most able debaters on the floor of the senate and many senators taking issue with him have found they come out second best in the encounter. But recently, after the Floridian had completed a particularly impassioned speech, Sen. Alexander Wiley of Wisconsin arose to his feet and drolly remarked:

"Mr. President, I never rise in the senate after listening to my distinguished friend from Florida, but I wish that his great abilities and great fecundity of expression were devoted to what I call a little more level-headed thinking."

• • •

Education Suffers

THE story behind the scenes is that despite weeks of hearings, listening to scores of witnesses, teachers, educators, farm and business leaders who came here from all sections of the country, there likely will be no federal aid for either teachers or schools at this session of congress although a dozen individual bills on the subject have been introduced.

Mrs. R. C. F. Weagly, representing more than a million rural women and president of the American Farm Bureau Associated Women's organization, told the house education-labor committee that neglect of the education of rural children will result in weaknesses in efficiency of both urban and rural people.

"For, within three generations," Mrs. Weagly said, "80 per cent of the people of America will have come from a farm home and rural school."

The irony of all these hearings is that when the bill comes up next session the committee will do the whole thing over, probably calling the same witnesses. The obsolete, expensive way house and senate committees do business indicates they do not trust each other. A house committee will hold an extensive hearing and, when the bill gets to the senate, the senate committee holds the same kind of a hearing, calling the same witnesses instead of doing the obvious and taking a transcript of the house hearings.

• • •

Senator Taft of Ohio was in a state of pique when vote came for final passage of the national science foundation bill in the senate. After debating in support of the bill, which provides for a 20 million dollar annual appropriation for training young scientists in basic scientific research, he lost out on an amendment which gave the President the power to appoint the director of the foundation. The amendment was adopted 42 to 41 and so resentful was Taft that he voted against the whole bill on final passage.

Sportlight by GRANTLAND RICE

BASEBALL has known over seventy-five spring starts, but in all that time Dr. Abner Doubleday's discovery has never before known the tangled knot that belongs to the National League race of 1947.

As a starter, the National League still has a 3 to 5 shot trailing the pack by many lengths with corn on the cobb and watermelon just around the corner.

Grantland Rice

Eight National League managers are reeling around with the look that follows the arrival of a blunt instrument at the base of the brain. They can't find pitchers who can protect a 5-or-6-run lead. They find a flock of normally .300 hitters swinging savagely at a .123 clip, often lucky to get a foul. It is nothing to see pitchers hand out 4 or 5 passes in one inning, forcing over important runs. Star pitchers are far behind the 50-50 mark, struggling desperately to last three innings.

No one seemed to know whether the first-division teams had slipped, or the second-division teams had moved far up. There was no way to tell them apart, except to keep wondering how the tail-end Cardinals stayed where they were, as long as they were allowed to carry bats to the plate.

Anybody's Race Now

We have made a careful check of the long list of games played in recent weeks, and from this roundup, it is impossible to locate a sure first-division team, or to name a team that can't win the pennant by breaking just a trifle better than even.

Of course, this bizarre state of affairs can't last much longer. One or two teams are pretty sure to stumble over the lost element of consistency and move on forward. But no one can tell you who these teams will be.

The once ridiculed Giants suddenly rushed in with the best offense in either league, backed up by greatly improved pitching. Picked by many as repeating tailenders, they have been the best all-around team in baseball through the last few weeks. Mel Ott is due a number of rousing cheers for the late stand his hired men have made against some rasping luck, where the ball they have been playing most of May could easily win the National League flag.

Tigers and Red Sox have made the American League race the more consistent scramble with the Indians crowding in. The Red Sox are far from their stampeding form of last season. The Tigers are now favored as the best team in the circuit—certainly the team backed up with the best pitching, which is a pretty vital matter.

Joe Gordon, as one could figure in advance, has been one of the main factors in Cleveland's challenge—once more the Gordon that ranked high among the best.

It should be Tigers or Red Sox in the American League and you can do your own nominating in the now bewildered rival circuit.

Cards Should Come Back

No one expects the Cardinals to keep fluttering around the cellar and the swamps for any extended length of time. But their earlier crash-up has left the National League race wide open. Any pretty-fair ball club could step out and win this pennant against so much ragged and jittery opposition. No flag winner has much to beat, unless Dyer's young men suddenly throw aside their winding sheets and play the ball they should have played from the opening pitch.

On copy paper, they are still the class of the league in every department of play. But you don't win pennants on copy paper.

This 1947 National League pennant race may not be the fanciest joust on record, but it should make up in the way of action and upsets what it lacks in class and form. Giant power has been a spring surprise. So has improved Giant pitching. Here seems to be a pennant that almost any team can win—any team willing to hustle and work a little.

As the old philosopher, Dizzy Dean, puts it—"There are a lot of good ballplayers around, but no good ball teams."

What looked to be a one-club stampede has now turned into a four-or-five-club scramble—meaning Cubs, Braves, Cardinals, Giants and Dodgers—with such teams as the Phillies, Reds, and Pirates still "dreaming of the hour."

• • •

More Than Power

The great majority link Babe Ruth's name with the word "power." They think of a 235-pound giant hammering out more than 700 home runs, with a ball much less lively than the one in use today. Too many forget that the Babe also had an all-around skill, a matter of touch and timing, often approaching the delicate side, that certainly matched his power.

From where I sit ... by Joe Marsh

Can't Break His Good Habits!

Bert Childers was saying, it's funny how so many of our wartime habits stick with us.

Bert likes plenty of butter on his bread, but even now he can't get over spreading it like it was scarce as hen's teeth. And as a war-worker, Bert used to stick to a temperate glass of beer on time off; and he still holds fast to beer and moderation.

Same way with Bert's wife. She not only has no trouble saving used fats, and waste paper. She's earned from wartime necessity to save every single thing that might possibly be used again.

From where I sit, it's mighty good that so many of these common-sense habits like thrift and moderation have stayed with us. Because they *belong* in America—along with tolerance, and mutual respect for one another's rights. They're habits that have helped to make this country strong and neighborly and free.

Joe Marsh

FARM LAND PRICES HAVE BEEN RISING

Increase in Last 6 Months Is About $8 Per Acre Land Men Say

Iowa farm land rose $8 per acre in the last 6 months, and on June 1 stood at an average of about $157

That is the combined judgement of appraisers, farm loan representatives and real estate brokers who attended soil management and land valuation short courses at Iowa State College recently.

Top grade land continues to go up faster than the poorer grades Those at the conference estimated top land went up $9 per acre. Poor land, they said rose only $2.

This trend checks pretty well with a survey made of 376 farm estate brokers last November, according to W. G. Murray, Iowa State College agricultral economist.

Buyers want good land, well located, with good improvements, he said.

78 Percent Increase

Land at $157 per acre is up 78 percent from the 1940-1941 level.

Reports have reached Murray of sales at $300 to $375 per acre Enough of these have come in to warrant a word of caution, Murray said this week With farm income setting new record he feels a growing number of farmers might easily take on more land and more debt than they could handle with lower farm incomes.

Those lower incomes, he warns are probable

Murray believes most farmers will refrain from going on a wild land buying spree He thinks they will see the wisdom of using their money to improve farmsteads and make living conditions better, instead of investing in high-priced land Tenants probably will continue to save until they have a large cash reserve before investing. The foreclosure trouble of 27 years ago seems unlikely

Some Loans High

Records of the federal Bureau of Agricultural Economics show that half of the Corn Belt land sales in 1946 were for cash Of the remainder only 25 percent involved loans of more than 75 percent of the purchase price

Nevertheless, the number of sales at current prices is higher than average The land market is active.

Murray warns prospective buyers to be cautious.

Farms financed at more than 50 percent of the present market price are in danger, he says. A slump in farm income might mean that these farms would have a debt nearly as great as the re-sale price of the farm.

It is important for buyers to avoid long term obligations based on high values.

Garfield Lively Workers Met

The Garfield Lively Workers 4-H club met at the home of Mrs. Elmer Jante on June 18. Marilyn Nedved was pro-tem president. Roll coll was read by protem secretary Blanch Nedved, nine members answered by "One New Health Habit." The date of meeting was changed from Wednesday to Tuesday evening There was discussion of the subject for the demonstration team. A picture talk was given by Marylin Nedved on the "Mondonna of the chair." Two class reports from the 4-H camp were given by Violetta Mae Eisberg.

A demonstration on flower arrangement was given by Marie Hadoceck. Recreation was given by Mrs. Jante. A delicious lunch was served by Mrs. Jante.

Jubert-Grosshuesh Wedding Performed At Green Bay

JUBERT-GROSSHUESCH VOWS EXCHANGED MAY 31

More About The Wedding Published Earlier In Times

(Editor's Note At the time of the Jubert-Grosshuesch wedding, published a couple of weeks ago, all of the facts were unavailable. The following is from the Green Bay, Wis Daily)

At a 6 o'clock candlelight service in First Presbyterian church Saturday evening, Miss Vivian Jane Jubert, daughter of Mr and Mrs. Harry Jubert, 317 S Oakland avenue, became the bride of Calvin William Grosshuesch, son of the Rev and Mrs Calvin Grosshuesch, Klemme, Iowa The bridegroom's father performed the ceremony

Mr Jubert gave his daughter in marriage She was attended by Miss Pearl Schroeder, Appleton, Miss Helen Whitman, New London, and a cousin, Diane Schilling, who served as flower girl

The Rev Ruben Grosshuesch, brother of the bridegroom, was the best man Groomsman was Allan Barz, Klemme, Iowa John Naber, Tipton, Iowa, Ewald Grosshuesch, another brother of the groom, ushered with Robert Schoonover.

Farl Schilling, uncle of the bride, sang "O Promise Me" and "I Love You Truly"

The bride wore a white gown with finger-tip veil and carried a white Bible on which was placed a single orchid Her attendants wore aqua dresses and carried Colonial bouquets The flower girl wore an identical dress like that of the bride.

A reception was held at the church after the ceremony

The newlyweds will live at Cedar Falls, Iowa, where they will attend the Iowa State Teachers college, entering for the June 4 term. They both attended Mission House college, Plymouth, before their marriage Mrs. Grosshuesch is a West High School graduate and served a year as a Navy Wave. Her husband was overseas in the U. S. Army

Among the guests were the bridegroom's family from Klemme, Iowa; the Rev. and Mrs. Ruben Grosshuesch and Judith, Melbourne, Iowa; Mr and Mrs. Emil Leschensky and John, Waukon, Iowa; Prof. and Mrs. Carrol Rusch, Mission House college, Carroll Olm, Elkhart Lake; Prof Walter Kuentzel and Miss Mabel Anderson, Mission House, the Rev. and Mrs. Victor Grosshousch, Marion and Rose, Oconto; Mr and Mrs. August Rittershaus, Marilyn and Beverly, Menno, S D, Neil Park, Hartford; Mr and Mrs. William Naber, John, Grace and Bill; Robert Schoonover, Waupun; Miss Betty Stahl, Sheboygan and Dr and Mrs. Paul Grosshuesch of Plymouth, Wisconsin

BOND SALES UP IN THIS COUNTY

H C Armstrong, Hancock County chairman of the savings bonds division of the treasury department reported today that total sales of Series E, F, andG saving bonds in the county were $138,933 during May.

This brings the county's total sales for the first five months to $981,714, 47 79 per cent of its 1947 quota of $2,053,899

"We have done a good job so far, but if we are to go over the top of our 1947 quota we must continue to invest our surplus dollars in United States savings bonds," Chairman Armstrong said

" With living costs as high as they are today, it is not easy for the average family to save. Nevertheless, everyone agrees that the theory of thrift and systamatic saving is sound, and the next step is to put those thoughts into practice Payroll savings has offered an easy, automatic method for most of us, and now the bond a month plan makes it possible for everyone to invest in savings bonds systamatically and automatically

C. J. WILLE, KLEMME PRESIDENT OF HANCOCK R. E. A.

In the Times last week the Hancock County Rural Electric Cooperative ran a large ad to boost June Dairy month

At the bottom of the page was also a list of the officers and directors of the R. E. A In setting this list of officers the Times made an error in using last year's list of officers and directors.

The Times wants to correct the erfor this week, so we are giving the correct list as follows:

Officers

C J Wille, President, Victor Loebig. Vice President; I. V. Rasmus, Secretary and G. E. Gaskill, Treasurer

Directors

I. V Rasmus, Wm. Haes, Victor Loebig, C. J. Wille, M. C. James, G E. Gaskill, Omar J. Maland, Alfred Boman and C. J Eisenmann.

H L. Bush, Jr. is the Project Superintendent.

FLOODS CAUSE GREAT WILDLIFE LOSS

Floods have caused great wildlife losses through central and southern Iowa. Conservation officers are attempting to determine to what extent the game bird and animal populations have been reduced It is known one of the heaviest sufferers have been the ground nesting birds, particularly those whose favorite nesting habitats are the lowlands of the rivers. Floods struck after pheasants and quail had started incubation Many nests have been drowned out and abandoned. However, game management experts expect renesting to make up for much of the quail and pheasant loss.

Oddly enough, among the fur bearing animals, the swimming species have been hit the hardest. Muskrat and beaver losses have been heavy with considerable loss to young mink Although the adult animals find safety on floating debris or high ground, many of the helpless young are quickly drowned in their burrows and nests. Other wildlife that suffered heavily from the floods include cottontail rabbits, groundhogs, and skunks. As with the game birds, some of these lossess will be compensated for by late litters.

Standard Bearers Entertained Mothers Tuesday Afternoon

The Standard Bearer Girls of the Klemme Methodist Church entertained their mothers at an afternoon luncheon Tuesday at the church.

Each mother and the leader was presented with a corsage made by Shirley Stille and Donna Hevilin. A program was presented by the girls.

Besides the Standard Bearer girls, those present were Mrs Stewart Hevilin, Mrs. Verner Nelson, Mrs. C. A. Arnold, Mrs. Ben Netland, Mrs. Harry Gibbs, Mrs. Herman Gast and Mrs. Ronald Gibbs, the leader.

W. S. C. S. WILL FEATURE SPECIAL CHILDRENS PROGRAM

The W. S. C S of the Klemme Methodist Church will meet next week Thursday, July 3rd with Mrs. C A Arnold as Worship Leader. Mrs. D. P Anderson will be in charge of the program which will feature special childrens' work, and the children will be present for their part in the program and will also serve.

The ladies will also work on a quilt.

POSTPONE HEARING

The hearing on the assessment of benefits and report of the classification commission on Hancock county drainage district No 144 which was to have been held at the courthouse at Garner Monday, was postponed to September 15, to allow the board of supervisors and engineer to make a comprehensive study of additional lands to be included in the district recently petitioned for.

KLEMME WITHOUT A JUSTICE OF THE PEACE

W. C. Keraus, ex-mayor and Justice of the Peace for Klemme, last week turned in his resignation as Justice to the Board of Supervisors, who approved the resignation. The resignation was effective as of June 16.

No appointment to fill the the vacancy has been made at this writing.

DDT Is Not Dangerous To Humans Or Animals

ANTICPATE MUCH FISH RESCUE WORK

The fish rescue program of the State Conservation Commission will be very much in evidence this year as the result of widespread stream flooding. The high water has deposited hundreds of thousands of game fish in bayous that will either die as the summer advances or will winter kill during cold weather. Sportsman throughout the state will, as in the past, be organized by local conservation officers into rescue crews, and the stranded game fish will be returned to permmanent waters to provide pole and line fishing As the waters recede sportsare asked to report stranded fish to the local conservation officer and arrangements will be made to rescue them.

FLIES! FLIES! FLIES! FLIES!

Are you controlling flies on your farm? This is the question Paul Henderson, county extension director, is asking farmers these days. He could be asking, "Are you controlling disease on your farm by fly control." Flies feed in filth and carry disease to children and adults. They also carry disease to live stock. Flies can be controlled by spraying with DDT and sanitation of buildings.

Cities and Towns in Hancock County are organizing good fly controll campaigns. Let's organize ourselves on each farm to do just as complete a job.

4-H BOYS ENTERTAIN ELL TOWNSHIP FARM BUREAU

The Ell Midgets 4-H boys entertained the Ell Township Farm Bureau at their monthly meeting June 19th. The boys put on a skit on the Soil Conservation, humorus and musical number.

Edgar Dorow, county extension youth assistant gave a short talk on his work in the county.

Chas. F. Jackson, discussed Farm Bureau program and finances.

HENRY WARD SOLD REGISTERED BROWN SWISS BULL

Henry Ward, a Brown Swiss Breeder of near Klemme has recently sold the bull " Lads Prince George, 79566" to O. M. Schmitz, Clear Lake, according to a report from Fred S. Idtse, Secretary of the Brown Swiss Cattle Breeders' Association, of Beloit, Wis.

KLEMME BOYS AND GIRLS ATTENDING CAMP QUEST THIS WEEK

The following boys and girls left Sunday to attend Camp Quest at the Methodist Camp at Lake Okoboji:

Shirley Bisom, Jo Ann Hummel, Maralee Ridder, Iris Schaefer, Elaine Nueberger, La Nelle Harvey, Maurice Jacobs, Shirley Beier, Larry Stille, Roger Howard and Janice Hummel.

ATTENDING LUTHERAN CAMP AT LAKE OKOBOJI

The following boys and girls left Sunday for Lake Okoboji where they will attend a Lutheran Camp for young boys and girls in charge of Miss Smith, a sister of Mrs. P. W. Johnson, former Klemme Resident:
Neva Ann Anderson, Janice Swanson, and Dennis Ridder.

Auxiliary Meeting

The Klemme Auxiliary members will meet Tuesday, July 1st at the Community Hall with installation of officers.

IF PROPERLY USED DDT IS PERFECTLY SAFE

DDT is practically harmless to you or your children. Nor will it hurt livestock. Only ordinary care is needed with its application, said county extension director Paul Henderson

He reported some people have been wondering if the new insecticide might not be dangerous to use.

Henderson checked with Harold Gunderson, Iowa State College entomologist, and this is what he learned:

Gunderson knows of no recorded case where a human has become ill from DDT poisoning.

The only domesticated animals which are known to have been killed by DDT are those that were fed large quantities as an experiment.

When sprayed on the walls and fixtures of stores, DDT dries in tiny crystals. In time these will fall off or will be knocked off. Any amount that can be picked up in this manner is so small it constitutes no danger.

The crystals do not dissolve in water, so that an animal or baby who might put his tongue on a DDT coated surface would pick up very little of the material.

As a precaution, it is recommended that no DDT be sprayed in rooms where food is processed.

In grocery stores and other food handling establishments, the food is covered while the spray work is done, and care should be taken not to apply it to counters and other surfaces where unpackaged food is placed.

Gunderson pointed out, too, that quantities of DDT should be stored where livestock or children cannot reach them.

ANNUAL ARNOLD REUNION HELD AT CHARLES CITY SUNDAY

The annual Arnold reunion was held at Wildwood Park in Charles City Sunday, June 22.

Fifty one of the clan were present, coming from Garnavilla, Giard, Burt, Garner, Mason City and Klemme.

A picnic dinner was brought by the group and served in the park.

Officers elected for the coming year are: T. E. Hartwick of Giard, President; E. J. Arnold, Klemme, Vice-President; and Mrs. C. A. Arnold, Secretary and Treasurer.

It was voted to meet again next year on the 4th Sunday in June at the same place

FRANKLINS HONORED AT FAREWELL PARTY

Mr. and Mrs. Floyd Franklin and Don were pleasantly surprised at the Henry Busse home on Friday evening by a number of neighbors as a farewell courtesy. A social time, and moving pictures shown by Ted Dutheridge were enjoyed by all.

Franklins are moving to Rock Falls where Mr. Franklin will be the janitor of the local school. They were presented with a beautiful wool blanket. A lunch of ice cream, cake and coffee was served.

The following were present: Mr. and Mrs. Ted Dutheridge; Mr. and Mrs. John Lass, Mr. and Mrs. Wm Green and Gerald; Mr. and Mrs. Wm. Johnson, Mrs. Irene Benson, Mr. and Mrs. Verner Nelson, Mr. and Mrs. Henry Busse and Margaret Veenstra.

Farmers who have ponds measuring up to the specifications of the State Conservation Commission are eligible to receive help in stocking the pond with fish.

MILLIONS, many millions, follow baseball records closely. This includes batting and pitching especially. But you often wonder just how much they actually mean.

Take the won and lost column. What chance has a pitcher working with a tailender or a cellar contender against one pitching for a winning team?

W. Johnson

The best way to judge a pitcher's true value is to take his average against the average of his team. Even this isn't a fair test since he naturally would have a better average with a better team

I recall in other years, that Christy Mathewson had no respect for an earned-run average.

"The main idea is to win the ball game," Matty used to say, "and to save yourself for more work on ahead. If I can pick up four or five runs, why pitch my arm off for an individual mark? This lead gives me a chance to rest my arm for other games. Pitchers who bear down all through nine innings are sure to have trouble later on."

Home-run records and strike outs are usually earned, although the quality of opposition is still a big factor.

Looking over pitchers, Phil Marchildon of the Athletics ranks extremely high. Winning four games with the Athletics puts him far above such stars as Feller and Newhouser

In checking along these lines, the two greatest pitching records belong to Walter Johnson and Grover Alexander.

Team Support Counts

Johnson won over 400 games working for a weak club, and one especially weak at bat. Washington could give Johnson few runs. He had no heavy artillery back of him throughout his long career It was Johnson who had to face the Cobbs, Ruths, Jacksons, Speakers, Lajoies, Collins and such. The stars were all on the other side

In the same way, Alexander, in his earlier years, had the weak Phillies with him, with Cubs, Giants, Pirates and other teams far better supplied with ballplayers.

His feat of pitching 16 shut outs in 1916 stands as a record that may never be touched. One reason is that he pitched many of these in the Phillies bandbox park where a long fly meant a home run.

Alexander missed the opportunity of pitching for a strong team until he was moving over the hill. By the time Pete reached the Cubs and the Cardinals his prime had passed.

It is easy to understand why no good ballplayer, with a chance for stardom, cares about landing with a weaker, second-division club.

As far as pitching records go for 1947, what about Schoolboy Rowe and his mark with the Phillies? Also Dutch Leonard?

In sizing up records, you must take in the quality of the club and the quality of the opposition. Otherwise records can mean little.

• • •

Hartung, Matty, Sisler

No, Clint Hartung hasn't yet proved that he is or will be another Matty, Sisler or Ruth. But he is a member of their order, which might be known as the Club of Shifting Positions.

When tall, blond, good-looking Christy Mathewson reported to the Giants 47 years ago from Norfolk, Va., where he had won 21 games and lost 2, he promptly lost his first three starts in major league competition. Andy Freedman, the Giants owner, thereupon decided that Mathewson was a first baseman and should be so used.

It wasn't until John J. McGraw began to manage the Giants that Matty's full skill as a pitcher began to be realized. It wasn't long before the Bucknell entry was one of baseball's all-time sensations in the box, one of the best that all the years have uncovered.

The list of those in baseball who entered the portals as a star in one capacity and then switched jobs is a long one.

George Sisler was a star pitcher at Michigan. He could have been one of baseball's best left-handers. The Browns started him in the box, switched him to the outfield and then moved him to first. His fame as a pitcher or as an outfielder would have been enduring. He finished as the star first baseman of all time, a great ballplayer in every department, where his batting and his base running left him unchallenged at first.

Almost the same thing happened to a Baltimore kid still remembered as Babe Ruth.

The Babe broke in as a pitcher with the Red Sox and he was among the brilliants for five years. It was in 1919 that Ed Barrow decided that a cannon was more useful than a rifle, so the Babe was moved to an everyday job in the outfield, where increasing crowds could listen to the musical boom of his big bat.

Are You Haunted by Unanswered Letters? Here Are Some Helpful Writing Point

Gracious Invitations

WHEN writing to invite a friend for a visit, be definite. Tell her the time for arrival and how long you expect her visit to last.

If you plan special entertainment for your guest, such as a swimming party or a dance, better advise her what type of clothes to bring along.

Do your letters express the real Or are they stiff and uninteresting? Weekly Newspaper Service booklet can help you Send 25c (coin) for to Write Letters for All Occasions Weekly Newspaper Service, 243 West St., New York 11, N. Y. Print name dress, booklet title and No. 27.

Double Spiral Stairs Rare; Found in but 2 Buildings

The rarest type of staircase is the double spiral which is found today in only two buildings—the Museum in Vatican City and the Chateau Chambord near Blois. France, say Collier's This staircase is in two sections, each starting on the ground floor on opposite sides of the stair well. But one rises quickly and directly above the other and thus they continue one above the other to the top floor.

As the staircase in Chambord encircles and is supported by a giant stone column, a person using one section cannot see a person using the other.

MODERN FARM WEED CONTRO

AGRICULTURAL WEED-NO-MORE

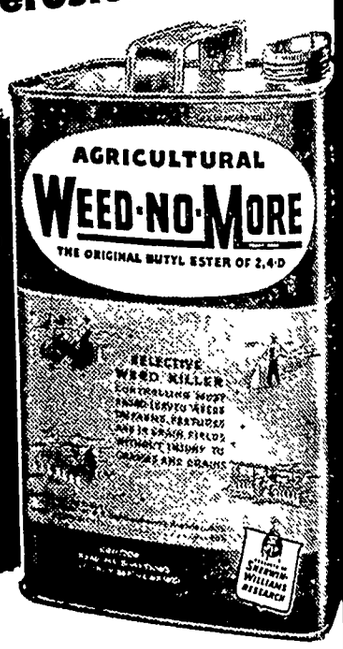
TRADE MARK

The Original Butyl Ester of 2,4-D.

The Farm-tested Weed Killer

- Increases grazing capacity of your pastures
- Improves fence rows and all untilled land
- Aids in erosion control

Weed-No-More does many jobs in addition to controlling weeds in growing grains



THIS NEW WEAPON controls many annual weeds *more effectively* and *cheaper* than other methods. It controls persistent and perennial weeds at lower cost and with less effort than by other methods. Wherever grasses grow, Weed-No-More kills broad-leaf weeds yet does not harm the soil-binding sod. It helps you get rid of weeds that harm stock, taint milk and clot wool.

PRODUCT OF SHERWIN-WILLIAMS RESEARCH

Now! Concentrated Low-Gallonage Spraying

New spraying method developed by Sherwin-Williams Research uses little as 5 gallons of water per acre! See your dealer for complete information.

could they ever know? I was
and still on the edge of the
with my feet dangling in the
ater and a cigarette between
my fingers. Behind
me sat Carl Bul-
's wife talking
dly with some
of her guests, and
behind her the
shore-line of Carl
Bullard's land
stretched away se-
rene and smooth to
Carl Bullard's
house on the opposite side
l Bullard's cove.

I stared down between my
t Carl Bullard's white body in
ater
had looked straight at me as
nt down. It was a queer, tor-
pleading sort of a look, as if
ew exactly what was happen-
him and was trying to tell me
his eyes He had opened his
to cry out, shipped a full
of water into that boyish chest
and gone down with hardly
than a ripple. Cramps, I
I'd seen the same thing be-
but not so quick.

cove was twelve feet deep at
d of the pier, and greenly
ucent to the yellow, sandy bot-
It seemed almost too clear—
nocent—to kill a man, but I
it was happening. I could see
Bullard's slow, convulsive
ing. He was not yet half-way

long would it be before he
d the sand? Two seconds?
But how eternally long a sec-
an be
stance had warned him. Said
too soon after lunch. Said he
to wait a while But he had
ed in that small-boy way he
rd chucked her under the
And then he had run across
er to jump in over my head I
still feel the little breeze of
assing. It was cold on my wet

was the chin-chucking, I think,
made me sit still while he

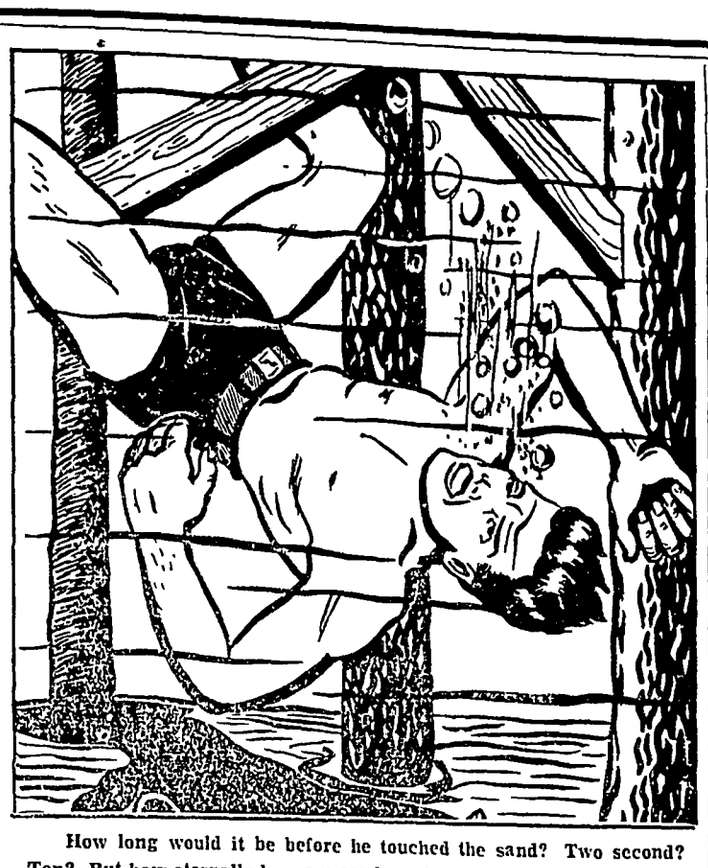
chucked under the chin. You
n't sing swing in a church,
you? That's what I mean.
a fine one to talk about
hes, but that's what Constance



How long would it be before he touched the sand? Two second? Ten? But how eternally long a second can be . . .

does to me Yesterday I saw her for the first time in three years, and it's worse with me now than it was then. A lot worse Deeper. Not boy-and-girl stuff any more Man and woman And she's married to Carl Bullard.

She would have married me if things had gone right. They hadn't, though. I thought a year in Buenos Aires—at an unbelievable salary—would give me my start. Instead of that, three years in Buenos Aires and amazing bad luck at any and all forms of gambling gave me a taste for living and little to live on. Three years. . .

There had been letters between us, the first few months. "Gee, I miss you Connie Wish my year was up." "I miss you too, Aleck. Seems like a year already. Keep writing often."

BUT the letter slowed down after a while, and then stopped altogether. My fault, I know. I couldn't keep lying to her about the money. I was supposed to be saving it.

It was well in my second year that I heard she'd been married. The news filtered down to me one way or another. I didn't mind, then. I had other diversions

Three years is a long time. Almost as long as it was taking Carl Bullard to reach the yellow sand. He was near it, now, and not clearly outlined Just a slow-moving blur. . . . Three years was enough to give me a lifetime's fill of everything Argentinian

Somehow Constance heard I had come back, and she wrote to me Just a friendly, welcome-back note That meant she held no hard feelings. The boy-and-girl stuff was done with

And yet I suddenly wanted to see her, talk with her I found her here at the cove She was still the Constance I remembered, if a little subdued, a little settled and satisfied

But there was something in her eyes, when she looked at me, that made me wish I'd never gone away from her A glow Not just friendliness More than that.

It was the glow in her eyes that kept me at the cove. I wouldn't have stayed at the Bullard place except for that.

A flock of guests as dull and chattering as guests always are. A husband who kept grinning at her like a gawky boy, and patting her arm and chucking her under the chin. The glow in her eyes—whenever she looked at me—made up for all of that.

I wanted to take my stare from Carl Bullard's body—now nearly on the sand—and look over my shoulder toward Constance. I wanted to see those glowing eyes again, meeting mine But I didn't move.

Instead I thought of something very interesting. If I were to sit still only a little longer, the pier and the house and the cove—and a great deal more—would belong to Constance She'd be wealthy, and with a glow in her eyes when she looked at me

Three years in the Argentine for nothing, and three minutes on Carl Bullard's pier—for everything I wanted Why shouldn't I let Carl Bullard drown?

IT'S STRANGE, when you're tense and still, how all your senses become sharp beyond normality While I watched the greenish-white blur that was Carl Bullard, the feminine voices behind me, which before had been unintelligible, became clear and distinct. Constance talking to her guests

"That water looks so good," she said "I wish I could go in"

"Why don't you, Connie? I wondered why you hadn't."

"Sh-h- Doctors orders"

There was a pause "Connie! You don't—?"

"You might as well know now as later, I guess . It'll be in December Haven't you noticed the way I've put on weight?"

"Why, my dear, we had no idea! But now I know why Carl has been so attentive And that sparkle in your eyes, Connie All the signs . ."

The sparkle in her eyes. The glow

Carl Bullard's body was on the sand at last, tumbling awkwardly, shapelessly

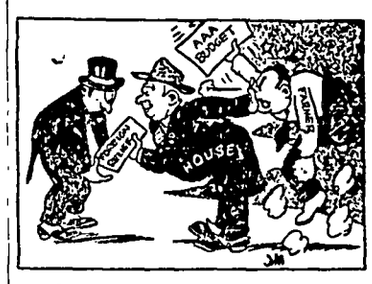
My cigarette dropped into the water I heard it hiss And then I dived in without taking time to stand Carl Bullard's grip nearly broke my arm .

THE HOME TOWN REPORTER IN WASHINGTON

WALTER SHEAD, WNU Correspondent

Foreign Demand for Food Prompts Full Production

FOREIGN DEMAND for U. S. food to prevent starvation in Europe and Asia will be greater during the next 12 months than at any time either during or since end of the war. So all-out food production is the watch-



word for at least two more years. In the meantime, American farmers are overworking the soil, depleting fertility with bumper crops in the face of a fertilizer shortage and praying for another good year of growing weather In the face of this situation the GOP budget fixers in the house appropriations committee have slashed 175 million dollars from the soil conservation program.

While some of the 375 million dollar slash in agricultural department funds made by the house committee likely will be restored by the senate, it is somewhat ironical that on the same day the house voted through the 350 million dollar relief bill for needy foreign nations.

• • •

The congressional reorganization act not only gave members of congress a fat salary increase, but also provided for a new job of executive assistant at $10,000, which called for appointment of a man of that caliber as an aid to senators and representatives. Members of congress, however, with few exceptions, merely boosted the salaries of their secretaries to $10,000 or split it up into two or three more jobs.

• • •

PLEASURE CRUISE (?)

Testimony before the house appropriations committee which slashed naval funds about 10 per cent, according to Congressman Walter Ploeser of Missouri, showed that Admiral King, top navy wartime commander, drew extra sea duty pay for living, at taxpayers' expense, in a navy yacht tied up in the Potomac river here, while the admiral did his "sea duty" at a desk job in Washington. It cost about $330,000 to maintain the vessel.

• • •

There is some agitation in Washington to make terms of congressmen the same as senators on the theory that the freshman congressman spends six months of his first year getting acquainted with red tape and then it's time to start electioneering for his next term.

• • •

ANOTHER JOLT DUE

Plans now are under way in the state department to get the American people ready to withstand a jolt of some 12 to 15 billions of dollars in the next two or three years to carry out the Truman Doctrine. The program will be presented to the next session of congress, probably in January In the meantime, a campaign will be launched to educate the people and congress on what may be needed.

• • •

Lobbying From Within

LOBBIES ATTEMPTING to influence legislation in congress work not only from the outside, but also from within. These congressional lobbies are known as "steering committees." For instance, more than 50 members of the house formed themselves into a steering committee to plan strategy and to lobby other congressional members to seek passage of the Townsend old age pension plan. Another steering committee recently was organized to attempt passage of a pension plan advocated by the American Pension committee.

Another congressional lobby or steering committee was formed of 20 representatives from western states to determine ways and means of combating the efforts of eastern "combines" to deprive western railroads of boxcars they need.

• • •

BUY A BOND

The treasury department's bond-a-month campaign runs through this month and all of July, providing an easy automatic way for every citizen to buy a bond each month. Treasury says receipts from sales of savings bonds since the victory loan have covered payments to maturities and redemptions of all savings bonds in the period and left 2 billion dollars net cash to retire other securities as they mature. Thus sale of more bonds does not increase the national debt.

NEEDLEWORK PATTERNS

Gay Fruit Cross Stitch Designs Ruffled Doily for Summer Work

Pattern No. 5486

ONE of the handsomest sets of summer tea towels you'll see. The big four or five inch fruits are done in the popular "gingham" cross stitch effect. The designs can also be used on place mats, breakfast cloths and outdoor dining luncheon cloths.

• • •

To obtain 7 transfers, color chart for working Gingham Fruit Designs (Pattern No 5486) Send 20 cents in coin, your name, address and pattern number.

Pick-up Crochet

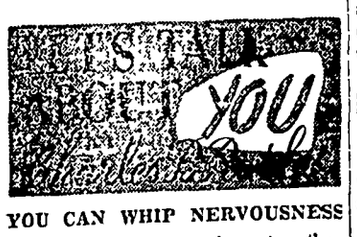
Series H-47



YOU CAN WHIP NERVOUSNESS

After we'd spent an hour together in his hotel room, this man and I, I was almost as nervous as he was. During that hour he had paced up and down, his hands shaking, his eyes glancing furtively to all corners of the room.

I don't need to tell you, do I, how ineffective a personality he was? You know, of course, that nervousness is fatal to a personality, yet nerve specialists tell me that three out of four persons "wear their nerves on the outside of their clothes."

Take the most successful person you know, the one with the most effective personality. Was not that person a serene person?

Some men and women tell me that they are nervous because they were born nervous. I think the man who had the most calmness and serenity I have ever known, when I commended him upon these things, remarked that he wasn't born with them at all. He said he had to acquire them.

"Up till three years ago I was the most nervous person in the world," he told me. "Then an old doctor put me on the right track. He advised me, each night when the day's work was done to go home, take a leisurely hot bath, put on pajamas and get into bed for twenty minutes, not to sleep, but merely to relax all over."

That practice not only robbed him of nervousness, but made him much more effective in everything he did.

YOUR USED TIRES ARE WORTH MORE AT Firestone

REGULAR JUNE MEETING

Garner, Iowa
June 9, 1947

The Hancock County, Iowa, Board of Supervisors, met in regular session as REQUIRED BY LAW on above captioned date with supervisors F. J. Schoun, George Th Gerdes and John Chambers present.

The minutes of the last meeting were read and approved as read

On motion and second, the application, bond and permits for the sale of cigarettes is hereby approved for Walter Roy Agnew

On motion and second the application, bond and permit for a Class B Beer Permit is hereby approved for Walter Roy Agnew

Supervisor John Chambers is appointed a committee to investigate and cause repairs to be made in DD No. 123 Main and DD No. 26, Lateral No. 7

On motion and second the petition for a consent highway commencing at the Southeast corner of Section 35-94-26 and running thence North on Section line between Sections 35-94-26 and 36-94-26 a distance of approximately 2 158 feet and terminating 482 feet South of the East quarter corner of Section 35-94-26 petitioned for by Peter DeWaard et al is approved as is the donation agreement for straightening and constructing said highway in the sum of $2,125.00 subscribed to by Davis Elevator Co. by Geo. Arnold Peter DeWaard, Kanawha and George Peterson of Goldfield

In the matter of the petition of Chris Gilstrap et al for a cleanout of the main ditch of Drainage District 1 & 2, Hancock County, Iowa from the Junction in Section 2 Erm township, Hancock County, Iowa South to the outlet of said ditch, C. F Merten having heretofore been appointed engineer to investigate and report on the necessity of said cleanout and said engineer did file his report on March 26th A D. 1947, which report does recommend that said cleanout be made as prayed in the prayer of the petitioners and that the cost thereof will be less than the benefits to be derived

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of DD No. 1 and 2, Hancock County, Iowa, that the report of the engineer be and the same is hereby tentatively approved and a hearing on the report of the engineer and petition will be held at the Courthouse in Garner Iowa on the 18th day of August A D 1947 at the hour of 10:30 A M The county auditor be and he is hereby authorized and ordered to give notice of such hearing by publication in the Britt News Tribune, a newspaper published at Britt Iowa, setting out the time and place of hearing all as directed in Section 455 20 and 455 21 Code of Iowa 1946 and laws amendatory thereto.

The foregoing resolution was offered and read by Supervisor Schoun, who moved its adoption was seconded by Supervisor Geo Th Gerdes, whereupon John Chambers in the chair, placed the the motion of its adoption and upon roll call the vote thereon is F J Schoun, John Chambers and Geo. Th Gerdes, aye, nays None whereupon the chairman declared the resolution duly adopted.

WHEREAS C A Frisbee, was heretofore appointed a commissioner to vacate a part of a street known as McPherson Avenue in Wellks Sub-Division to the unincorporated town of Duncan, Iowa, as petitioned for by James Drabek, et al, has reported in favor of such vacation

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County Iowa that said report be and the same is hereby tentatively approved and hearing thereon will be had at the courthouse in Garner, Iowa, at noon on the 18th day of August, A. D. 1947 The county auditor be and he is hereby authorized and ordered to publish notice in the Britt News Tribune, a newspaper published at Britt, Iowa, as commanded in Section 306 16 Code of Iowa A D 1946 and laws amendatory thereto

This being the 9th day of June, a date fixed by law for the annual meeting of the County Board of Review the Hancock County Iowa Board of Supervisors did organize as a County Board of Review and did review the assessments of the several townships cities and towns as commanded in Section 442 12 Code of Iowa A D 1946 and laws amendatory thereto and do find that all assessment as listed by the various assessors and approved by the local Boards of Review are equitable and just, except the following which are increased to bring them to county average

Bingham Township Colts 2 years old, 57% Horses, 71%, Cattle in feeding 37%, Heifers, 1 year old, 69%, Heifers 2 years old, 61%, Cows, 65% Steers, 1 year old 66%, Steers 2 years old 88% and sheep, 58% Concord swine 171%

A hearing on the foregoing changes in assessment will be held at the Courthouse in Garner at 10 30 A M, on the 23rd day of June A D, 1947 The county auditor is hereby directed to give notice thereof by registered mail to the Board of Review whose assessments were increased as by law directed.

On motion and second the County Board of Review adjourned to 10:30 A M. on Monday, June 23rd, A. D. 1947

WHEREAS Hancock County, Iowa, Drainage District No. 144 was duly and legally established as Hancock County Public Drain No. 144 on November 7th A. D., 1946 and

WHEREAS it now appears that said district in order to afford the maximum benefits should have been extended to include the following additional lands

Games and recreation in afternoon.

Wool buyers are paying more for cleaner wool. Clean wool means less production costs for the buyers and for the wool manufacturers.

There's danger of screw worms again this year, Dr. K. W. Stouder of Iowa State College warns. Screw worms work in live flesh, so dehorned or castrated animals—any animals with open wounds—should have the wounds treated with "Smear 62" or" Smear 882." both of which are made by USDA formulas.

Red clover has the most protein in it when cut for hay at the bud stage. But the yield is best when in full bloom Compromise by cutting it when the crop is about half in bloom, Iowa State College crops secialists suggest.

Explorers' Fancy Names Lured Settlers to New Regions

Explorers often have proved themselves good salesmen by bestowing enticing names on their discoveries, says the National Geographic society. The titles have stimulated the imagination of stay-at-home people and not infrequently have spurred colonization.

Greenland is perhaps the coldest area with a land-boom name. Eric the Red explored its bleak coasts for three years, and in A. D. 985 gave it a pleasant name to lure settlers to its shores.

Man's search for gold, in fact, has named spots all around the globe. The Gold Coast and Rio de Oro of Africa's western bulge, Mindoro (Mine of Gold) in the Philippines, Goldfield in Nevada, Oroville and Havilah (biblical "land of gold") in California are examples. El Dorado (the Guided One) was a fabulous land of gold and silver presumed by 16th century Spaniards to lie somewhere in the Andes highlands. From it, nearly a score of American towns have taken their names.

Silver, rivaling gold in the dreams of explorers, has its share of place namesakes. Rio de la Plata, on South America's Atlantic coast, means River of Silver. It is not a river, but the estuary of two rivers—the Parana and the Uruguay. No silver has been mined near its banks. Sebastian Cabot misnamed it in 1526, having noticed the silver ornaments worn by Indians in the region.

Kale Nutritive Vegetable, Rich in Vitamins, Minerals

For a long time kale has been recognized as an excellent source of vitamin A, the vitamin that promotes growth in the young and is important for the normal adaptation of the eyes to dim light and for good condition of the nose and throat linings and some other body membranes for people of any age

Carrots which are highest on the list in their vitamin A content have a close rival for top place. Kale contains more than half as much carotene — yellow-orange pigment which the body converts into vitamin A—as carrots and new research results show that carotene from kale is utilized by the body better than that from carrots.

By cooking the green leaves in just enough boiling, salted water to prevent sticking, and just long enough for the leaves to be tender, the return of this vegetable's vitamins and minerals are high. Cooking does not destroy the carotene in kale but some of the other food value in this leafy vegetable can be protected. By quick cooking, kale retains a good amount of vitamin C—the vitamin which is most easily destroyed with cooking. All the valuable minerals, calcium and iron, in kale are kept from escaping into the water by cooking kale in a very small amount of water.

Sharp Knife

While everyone realizes that it takes a sharp knife to do a real good job of cutting meat, many do not know just how best to sharpen a knife and keep it sharp. New knives are not sharp but they have only been ground down to a point where they are ready to be properly beveled and sharpened. First, either a grind rock or a carborundum stone can be used. Then, oil and a steel are also needed to complete the equipment. In speaking of steeling, the steel is used to straighten the edge of a knife and not to sharpen it. The knife edge is generally turned when it comes in contact with a bone or other hard object. This explains the need for frequent steeling of the knife, as the butcher does in his shop. A half-dozen strokes on each side of the knife are sufficient in steeling. Holding the knife at the proper angle to the steel is the most important feature.

Convenient Anesthetics

The use of intravenous anesthetics, such as Pentathol, was of great importance to military surgeons during the war On board ship and in hospitals near battle areas the use of explosive ether or anesthetic gas and oxygen mixtures becomes a serious hazard. The use of cumbersome cylinders, masks and carbon dioxide removing material is a practical impossibility. Two small ampules, one of Pentathol and one of distilled water, a 25-cubic centimeter syringe and a fine needle are all of the basic equipment required for anesthesia. The anesthetist may carry supplies for an entire day's work in his handbag, and replacements may be easily carried by air.

English Inns

Some of the oldest inns of England were actually built and maintained by the church for the use of pilgrims who journeyed about the land in the Middle Ages. After the monasteries were dissolved during the 16th century, many of the religious hostels became ordinary licensed houses and have continued so down to the present day. The Falstaff inn at Canterbury still stands just outside the west gate of the city, where it was built over 500 years ago. Any pilgrims who arrived after dusk, when the city ages were shut, could thus be assured of finding lodgings for the night.

AROUND IOWA

Missed Turn

As he drove north of Alton, Rev Elmer Schwart of Minn. failed to see an "overhead turn" on highway 33. He drove his car for another 250 feet north, then erroneously made his "turn" and went over an embankment. He was not seriously injured

Sawmill

Price Rex of Leon, has operated a sawmill in Decature county for nearly twenty years. Last week a 2x6 board fled off the saw, struck Mr. Rex in the side He died a few hours later

No Bandit

At Marathon, 19 year old Wayne Butler, filling station attendent, claimed he was struck by a robber and burglarized of $140 When the sheriff noted that Butler's hair was unruffled and he bore no evidence of having been clouted by a bandit, close questioning resulted. The youth has been charged with embezzlement.

Dog Lovers

Two Ames grocerymen, Orville Madsen and Brick Iler, are dog lovers But good ones! Last week they each entered dogs in the Rock Island dog show. Iler's dog won four firsts and Madsen's won a first and a second.

Fifty Years

H G Addie of Cresco, now 75, has completed 50 years of service as manager of the Northern Iowa Telephone company of Cresco and Elma After a half century on the job, Mr. Addie is still alert and active, sees a great future for the telephone company.

Barn A Day

Near Decorah, a group of about fifty friends and neighbors gathered one morning at the Robert Espe farm When they left, ten hours later, a new barn stood complete on the Espe farm lacking only the doors and some roofing.

Boy Spared

The flaring of a can of patching cement caused serious injury last week to Edward Cooper, 16 year old Winterset lad. With his companions, he was patching a life raft They had set the can of cement down about six feet from their work carrying some cement from it and in some way leaving a "trail" of inflammable cement from the raft to the container. When the boys set fire to the patch, a trail of flame raced back along the floor and set fire to the can, which badly burned young Cooper

Young Burglars

A series of burglaries at Guthrie Center was solved last week when the sheriff caught the culprits, three boys. Their ages were 14, 14 and 12.

"Off We Go" AVIATION NOTES

DUAL EVENTS

Bozeman, Mont., will rank as a hub of aviation June 20-22, with planes coming in from every portion of the state, surrounding states and Canada to attend two big air events.

Montana Flying Farmers and Ranchers association will hold its annual convention at Montana State college June 20-21. On the following day Northwest Airlines will inaugurate flight service to Gallatin field with special ceremonies.

The flying farmer program will include a tour of the college to inspect agricultural work now being done, a display of army planes and of light airplanes suitable for farm and ranch work, and a speaking program covering planes, hangars and the many uses being made of planes.

* * *

Launching an aerial war against coyotes after the animals had made heavy inroads on farm livestock, Loren McDonald, H. F. Baker and Frank Carter of Fredonia, Kas., have bagged 70 coyotes as a spare-time project. Baker, a veteran hunter, recalls his first shot from a plane, when he "missed at 10 feet." Now his marksmanship is as accurate from a plane as from the ground.

* * *

AVIATION ADVANCES

Flying has made rapid strides in northern Middlesex county, N. J., since its inception only a quarter century ago. Four new commercial airports and a sea base have been started, most of them as a result of the postwar interest in aviation. The new fields are North Brunswick, Woodbridge, Hopelawn and Fords Airpark, while the sea plane base is at Perth Amboy. Hadley airport, established in 1925, now ranks as one of the busiest in the state.

With aviation drawing many new adherents, more than 150 persons in the county now are flying. The list includes instructors, commercial, private and student pilots. Figures show that there are approximately 50 planes at the various air bases.

* * *

An increasing number of small towns are providing airport facilities for benefit of local flying enthusiasts and visiting pilots. The need for this service is pointed out forcefully by the Sarton, Minn., Herald, in an editorial, which says in part: "The town will fall far behind the procession if it doesn't look out. A bond issue or a government grant isn't needed to fill the bill. About all required is a little initiative and organization."

* * *

STILL GETTING AROUND

American pilots get around during the war and they're still going places overseas. [illegible] brought [illegible] discussed our flying systems [illegible] names [illegible] American military air-[illegible]

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

When Your Back Hurts-

And Your Strength and Energy Is Below Par

It may be caused by disorder of kid[ney] function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

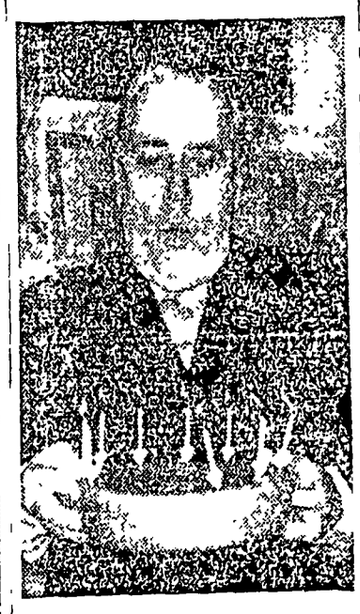
DOAN'S PILLS

DITS FOR THE CHAMP . . . Mauri Rose, winner of the 31st 500-mile automobile race at the Indianapolis motor speedway, s greetings from movie star Carole Landis and a few thousand fans as he steps from the sleek racer in which he hurtled to . His average speed over the 500-mile course was 116.338 an hour, and his share of the prize money totaled $20,000.

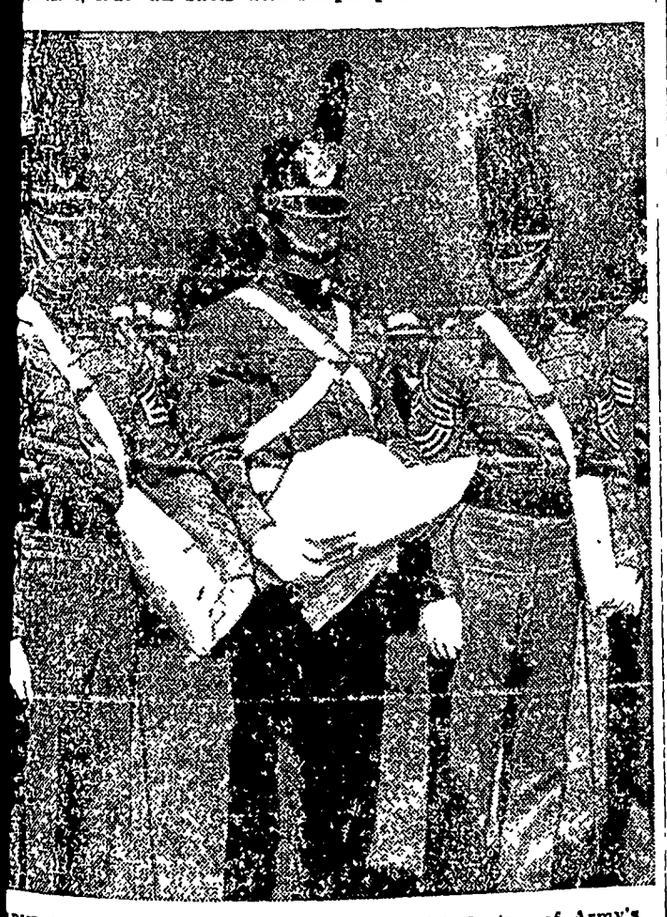
LITTLE FLOWER . . . Fiorello H. LaGuardia who, among other things, is head of the national fair rents committee, campaigned in congress against what he termed the "blackjacking" senate rent control bill.

CALL HIM TOM . . . The austerity of office is pushed aside as Attorney-General Tom Clark dons prison jacket, high hat and placard to clown for a few minutes at the luncheon of the circus saints and sinners.

K TO THE LAND . . . Wearing the costumes of Russian peas- these three persons are typical of the "Doukhobor" religious p of 70 which has purchased 140 acres of land amid the wilder- of Vancouver island, British Columbia. Following a doctrine tter love," they are attempting to found a colony managed on mmunal, share-all basis with simple peasant austerity.



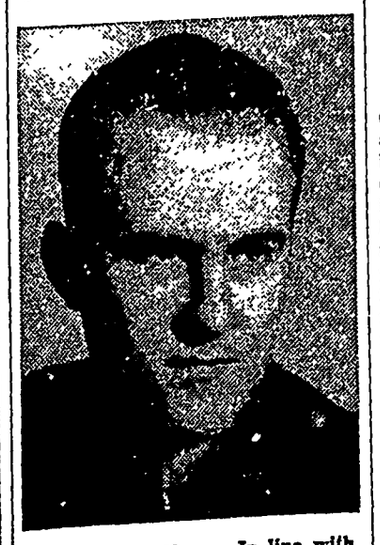
READY TO BLOW . . . Sen. Alexander Wiley (Rep., Wis.) inhales mightily and prepares to blow out candles on birthday cheesecake presented to him by his senate colleagues on his 63rd birthday.



RMY'S FOOTBALL GREATS . . . The backfield stars of Army's reat 1946 football team are shown as they paraded at the United tates Military Academy at West Point to receive top athletic awards. eft to right are Glenn Davis, Felix ("Doc") Blanchard and Arnold ucker—halfback, fullback and quarterback, respectively. They are ow ready for duty as second lieutenants.

BIG SHOT . . . Top politician in Jamaica is William A. Bustamente, leader of the Jamaica Labor party. He refers to himself prematurely as "prime minister."

SERENADE TO AN ALLIGATOR . . . Robert Bullerman, keeper at the Brookfield, Ill., zoo, blows a B-flat two octaves below middle C on his French horn in the forlorn hope that it will incite this bashful male alligator to give with a mating bellow. Bullerman failed, but a quartet of French horn masters did the trick.



CAREER MAN . . . In line with the current drive for volunteers, Lt. Col. North Callahan, AUS, has written a book entitled "The Armed Forces as a Career," listing advantages of army, navy, marines and coast guard. Book points out opportunities for careers in the various services.

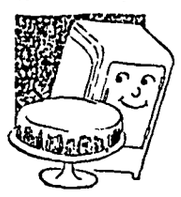
HOUSEHOLD MEMOS... by Lynn Chambers

Serve Simply; Keep Cool
(See recipe below.)

Refreshing Meals

One of the biggest problems which we homemakers will be facing these warm days is that of keeping cool and at the same time serving refreshing foods to the family.

My own rules for keeping cool on these hot days include the following which you might find it helpful to adopt: Select foods which may be served chilled, or those which cook quickly; and another, choose foods that are colorful as they stimulate wilted appetites.



Never choose foods which are fussy and that take long to prepare Mother can exert much better influence at mealtime if she appears cool and collected, and this is possible only if she has used as many shortcuts as possible.

For your main dish select food to be either broiled or chilled. Two raw vegetables in a salad are preferred to two cooked ones if you want to keep cool And, as for dessert, try ice cream or fresh fruit and berries, thus cutting preparation time to a minimum.

***Majestic Salmon Loaf.**
(Serves 6)

- 2 cups canned salmon
- 2 packages lime gelatin
- ½ cup vinegar
- 1½ cups boiling water
- 1½ cups cold water
- 3 tablespoons lemon juice
- 1 teaspoon salt
- 2 cups finely shredded cabbage
- 3 hard-cooked eggs, sliced

Place flaked salmon in bottom of loaf pan or mold. Dissolve gelatin in boiling water Add cold water, vinegar, lemon juice and salt. Pour half of the warm gelatin over the salmon and chill. When set, fill mold with alternating layers of shredded cabbage and sliced eggs. Cover with remaining gelatin, chill until set. Unmold on crisp lettuce; garnish with potato chips, sliced cucumbers and lemon.

These broiled lamb steaks don't take long to cook, so they will be a boon to the hot weather homemaker. The potatoes may be cooked ahead of time (or use leftovers) and broiled along with the meat to heat and become golden brown. Carrots are a colorful addition to the menu, and you may use the canned variety to save cooking time. Dress them up by melting butter and adding a small amount of mint jelly to it, and pour over the carrots before serving.

Broiled Lamb Steaks.
(Serves 6)

- 6 shoulder lamb steaks, cut 1 inch thick
- 3 tablespoons olive oil
- 6 tablespoons lemon juice
- 1 minced onion
- 1 teaspoon salt

Mix olive oil and lemon juice Add onion and salt and marinate lamb steaks in this mixture for two hours before broiling. Preheat broiling oven. Place steaks on rack three inches from heat. Turn oven regulator on high. When one side is nicely browned, season with salt and pepper and turn. When second side is browned, season and serve immediately . Allow 6 to 8 minutes for each side

LYNN CHAMBERS' MENU

*Majestic Salmon Loaf
Potato Chips
Lemon Cucumber Garnish
Crisp Rolls with Butter
Sliced Tomatoes
Peach Shortcake Beverage
*Recipe given.

Another quick, broiled entree which I know your family will enjoy is hamburger. This may be served with potato salad and tomato stuffed with cole slaw.

Toasted Deviled Hamburgers.
(Serves 8)

- 1 pound ground round steak
- 2 tablespoons chili sauce
- 1½ teaspoons prepared mustard
- 1½ teaspoons prepared horseradish
- 1 teaspoon minced onion
- 1½ teaspoons Worcestershire sauce
- 1 teaspoon salt
- ⅛ teaspoon pepper
- 8 slices bread

Combine above ingredients and spread on slices of bread. Broil for 8 minutes at moderate heat and serve immediately.

Cheese Hamburgers.
(Serves 4 to 5)

- ½ pound chuck or round steak, ground
- ½ cup corn flakes
- 1½ cups milk
- ⅛ teaspoon pepper
- ½ teaspoon salt
- ⅓ cup catsup
- 2 tablespoons fat
- 3 tablespoons flour
- 1 tablespoon prepared mustard
- ½ pound grated American cheese

Combine beef, ¼ cup milk, ⅛ teaspoon salt and the pepper and catsup. Form into six patties and saute in 1 tablespoon of fat. Melt remaining fat in saucepan Stir in flour and mustard, then remaining milk and salt. When smooth, add cheese and cook until it has melted. Arrange hamburgers in a baking dish and pour sauce over them. Bake in a slow oven for 15 to 20 minutes.

If your choice of main dish is a salad, select a good protein food like eggs or chicken. Here are suggestions:

Egg Salad Bowl.
(Serves 6)

- 1 clove garlic, optional
- 1 small head of lettuce
- 1 bunch watercress
- 1 cucumber, sliced
- 1 bunch radishes, sliced
- ½ cup celery, diced
- 6 hard-cooked eggs

French Dressing.

Rub inside of large bowl with garlic. Break lettuce into chunks. Add all other ingredients to bowl and toss together lightly with French dressing (just enough to hold together). If a more hearty salad is desired, serve topped with strips of cheese, cold tongue or ham.

Chicken Salad I. Mix together the following: 1 cup diced, cooked chicken, 1 cup diced, cooked tongue, ½ cup chopped celery, ½ cup sliced, stuffed olives, and ¾ cup salad dressing or mayonnaise.

Chicken Salad II. Toss together the following: 2 cups diced, cooked chicken, 1 cup minced celery, 1 chopped green pepper. Marinate in French dressing. Drain and mix with mayonnaise. Serve in lettuce cups with pineapple spears.

Released by Western Newspaper Union.

LYNN SAYS:
Here are Tips For Picnics

Fried chicken which may be eaten with the fingers is an excellent food for picnics. Wrap each piece individually in waxed paper, place light meat on one side of the basket, dark meat on the other side, and then dole it out.

Meat loaf is another good main dish for picnic. It is easy to carry in the loaf pan in which it was baked.

Good accompaniments for the fried chicken lunch: Pineapple cole slaw, small cherry tomatoes, pickles or olives, fruit salad made of large pieces of fruit, or ambrosia.

Make hamburgers of a larger size when going on a picnic as appetites are bound to be big. To make cheeseburgers, take along some wrapped slices of American cheese, and when the "burgers" are almost done, place cheese on top and remove from fire just after it has melted.

Word to the Wise

Once when the popular wit and after-dinner speaker, Chauncey M. Depew, was president of the New York Central railroad he began to receive numerous and vociferous complaints concerning the sadly deteriorated quality of the station restaurant at Utica. But more important matters kept him from remedying the situation. That was, until he received the following letter:

"Dear Mr. President: You are the finest after-dinner speaker in the world. I would give a great deal to hear the speech you would make after you had dined in the restaurant in your station in Utica."

Depew had the station fixed up pronto!

Automobile Production

During 1946, only ten countries made motorcars and trucks, totaling 3,971,200 vehicles of which 77.5 per cent were produced in the United States.

MALE HORMONE* PRESCRIBED FOR WANING VIGOR IN MEN

*METHYL TESTOSTERONE (℞) is bringing new hope to thousands of men worrying because of waning power, nervousness, uncertainty and loss of initiative induced by fear.

Recent magazine articles hailed Methyl Testosterone (male hormone) as a promise to older men in extending the prime of life. It was referred to as one of the necessary life-giving vital sparks that supply drive and energy, provided their doctors determined they are suffering from a deficiency of this male hormone substance.

As national distributors of Methyl Testosterone for oral use, we are cooperating with physicians everywhere in filling prescriptions. We are specialists in the marketing of Vitamins, Pharmaceuticals and Biologicals. WRITE TODAY.

Mail the Coupon for Free literature, case histories and prices of Male Hormone for personal use.

FREDERICK HERRSCHNER, Dept. 53A National Distributor, 411 So. Wells St., Chicago 7, Illinois.

Capitol Hill Hears Earnest Request

Senate Chaplain Marshall Offers Challenging Prayer

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON. — Many words spoken beneath the high-arched dome of the capitol become first page news. But seldom quoted are the words which appear beginning with the third paragraph of the first page of the Congressional Record. However twice recently they were quoted — and widely They were preceded by two first paragraphs which for the past 10 years have varied only as to the proper names and hour mentioned therein:—

Baukhage

"The senate met at 11 o'clock a. m. on the expiration of the recess."

"The chaplain, Rev. Peter Marshall, D. D., offered the following prayer:"

(Then came "paragraph three," including the part of the prayer offered for that day that appealed to me):

"Forbid it, Lord, that we should walk through thy beautiful world with unseeing eyes. Forgive us, our Father, for taking our good things for granted, so that we are in danger of losing the fine art of appreciation. With such dire need in every other part of the world, make us so grateful for the bounties we enjoy that we shall try, by Thy help, to deserve them more. Where we are wrong, make us willing to change, and where we are right, make us easy to live with."

I repeated that last paragraph on my broadcast because one of my associates had called it to my attention that morning. Since then I have been getting letters from all over the country asking for copies of that prayer Earlier (though I had not noticed the items) Time magazine had carried a story about Chaplain Marshall, and Newsweek magazine had quoted part of another prayer:

"Help us to do our very best this day and be content with today's troubles, so that we shall not borrow the troubles of tomorrow. Save us from the sin of worrying, lest stomach ulcers be the badge of our lack of faith. Amen."

I think my choice is a fairer sample of Marshalliana. But both selections reveal one characteristic of the doctor's utterances, which perhaps is a reason for his popularity. He is able to reduce religion to the simplest and most understandable terms—his similes (like those of his Teacher) are taken out of our daily life.

Peter Marshall is an interesting person as well as a popular preacher.

Immigrant Boy Fulfills Ambition

Dr. Marshall's personal history is reminiscent of early Horatio Alger. He came to this country from a foreign land because he believed America was the land of opportunity. But his story is unique in this: He came, not with the dream of "making his fortune," but to fulfill an ambition for neither wealth nor power, but simply to get a theological education.

He was born in Coatsville in Lanarkshire, Scotland. His father died when he was little, and Marshall was raised by his mother and stepfather, who sent him to public school and later to a technical institution. On graduation, he took a position in a tube-manufacturing concern.

But he wanted to be a minister, and he decided it would be easier to obtain an education for this calling in the United States. He came to this country in his early twenties; found work in New Jersey, but soon had an opportunity to go to Alabama where he joined the business department of the Birmingham News. With the help of some friends who became interested in this pleasant Scottish boy with the intriguing burr and the inspired goal, he was able to enter Columbia Theological seminary, from which he was graduated in 1931.

He held two pastorates in Georgia, and made the acquaintance of the young lady who is now his wife. In 1937, he was called to the historic "Church of the Presidents" in Washington, a church which has numbered among its worshippers John Quincy Adams, Andrew Jackson, William Henry Harrison, James Buchanan, Andrew Johnson, Millard Fillmore, Grover Cleveland, Theodore Roosevelt and Abraham Lincoln, whose pew, left as it was when he used it, is a shrine for tourists.

Dr. Marshall was elected chaplain of the senate on January 4 of this year, and it might be well to record a bit of recent history as a background to his selection.

Dr Ze Barney Phillips was chaplain of the senate for 15 years—from 1927 to 1942. When he died, many senators had favorite candidates for his job. They "auditioned" them, just like radio announcers—although the ministers didn't know they were being auditioned, and no senator would admit such a thing.

From among the candidates, Dr. Frederick Brown Harris, Methodist, emerged victorious, gossips say, because he delivered the shortest prayer. Later on Dr. Harris' prayers became longer, a common phenomenon among senate chaplains according to some of the old timers in congress. What they don't add is that in the speech-makingest body in the country, the affliction may be contagious.

Traditionally, filling of the chaplain's post is a majority party prerogative, and so when the Republican 80th congress convened, after disposing of the question of Senator Bilbo's qualifications, Senator Wherry arose to offer a resolution that Dr. Marshall be elected chaplain of the senate.

The Rev. Peter Marshall, D.D., senate chaplain, offered a prayer that probed deep into the consciousness of the nation's busy, harassed legislators.

But Wherry's proposal touched off an argument occupying nine close-typed columns in the Congressional Record. (No chaplain would dare deliver a sermon THAT long.)

Democratic Sen. Alben Barkley maintained that Dr. Harris had done a fine job and should be retained. He added that politics should not be permitted to touch the office of senate chaplain. He opined that Republicans were "offering a very poor example for the time when the Democrats resume control of the body two years from now." (1948—!?!)

Republican Senator Bridges was shocked at the implication that politics might be involved. Why, he protested, he didn't even know Dr. Marshall's politics.

But the Republicans had their majority, Dr. Marshall got the job, and as far as I can learn, nobody has regretted the choice.

There are some Washingtonians who have read and listened to this Scottish boy whom America has awarded for achievement in a calling in which there are often few earthly awards, who feel that his presence in the Lincoln church is quite as "appropriate" as his appointment as chaplain of the senate. They feel that if the ghost of the Great Emancipator ever slips into his old pew of a Sunday, he smiles in approval of the simple, earthy truisms, not too unlike his own, which come down from one pulpit in that friendly Scottish burr, with the same terse impact with which they echo from the rostrum of the senate.

THREE YEARS AFTER DESTRUCTION . . . It has been just three years since American and Allied troops stormed the beaches of Normandy D-Day to begin the invasion of Europe. Streets like this one in Caen, France, raged with bullets and mortar shells, and it would have been impossible then for a little girl to walk along the sidewalk carrying bread for the family's dinner. But now the war looks far away.

NEWS REVIEW

Shipping Crisis Impends; Predict High Feed Prices

Fears of a minor crisis in railway shipping in mid-July have been expressed by federal transportation experts in view of an apparent slowdown in frieght car construction.

Contributing factors are mounting industrial production coupled with increasingly heavy wheat export movements, and officials predict that the "minor crisis" could swiftly develop into a major transportation block unless steps are taken to ease the traffic slowdown or prevent it from occurring.

With fate of the now financially embarrassed Office of Defense Transportation still undecided, the Interstate Commerce commission has been requested to assume full responsibility for continuing orders requiring full loading of boxcars in the event that congress does not extend the life of ODT beyond its June 30 expiration date.

Meantime, ODT has sent investigators to freight car building companies to probe reports that allocated steel tonnages have not gone entirely into the 10,000-a-month car construction program.

Reports for the first half of May indicated that only 1,751 freight cars were built, 81 short of the number constructed during the corresponding period in April.

Explanation offered by the car builders is that inadequate steel supplies and strikes within the industry have been responsible for the grave decline in freight car construction. That view, however, is discounted by federal officials who point out that the government forced the steel industry to provide the necessary 200,000 tons of steel for the 10,000-a-month goal.

FEED PRICES: *To Stay Up*

Prospects for the 1947 feed crops will be an important influence on feed prices, according to a department of agriculture report.

The very strong foreign demand for grain is expected to continue to support prices through 1947 and into 1948; although if production of feed is as large as in recent years, feed prices probably will decline, at least seasonally, in the last half of 1947.

Corn prices this summer, the report predicted, will average higher than the June, 1946, ceilings, but lower than in the summer of 1946 after price controls lapsed.

The department's survey went on to reveal that reports in early May indicated that approximately 832 million bushels of 1946 corn would be marketed this season. That figure would be 50 per cent greater than the 1938-42 average and 14 per cent above the previous record sales from the 1944 crop. Farm sales of other feed grains from 1946 crops also ran generally larger.

SWINGBACK: *Braden Quits*

Spruille Braden, longtime advocate of and principal force behind this country's hard-handed attitude toward Fascist-inclined Argentina, has resigned as assistant secretary of state in charge of Latin-American affairs.

To succeed him in that post, President Truman was expected to nominate Norman Armour of New Jersey, top-flight career diplomat. Armour previously served as American envoy in the Argentine and is well known and liked there. Latin-American reaction to his appointment was expected to be highly favorable.

Armour

Acceptance of Braden's resignation by President Truman was generally regarded as a strong implication that the United States is ready to swing back to a policy of appeasement in Latin America. It was anticipated that the changed attitude would take the form of "just a little appeasement" of Latin-American Fascist dictators, particularly Juan D. Peron, president of Argentina.

Braden

Braden, long a foe of Peron and his methods, told Mr. Truman in a letter that personal responsibilities compelled him to return to private business.

Departure of Braden from the state department followed closely on the heels of his being overruled by the administration on two basic issues in inter-American relations: Supplying of arms to Latin-American nations and formation of a military alliance with other republics in the western hemisphere.

SLIM CHANCE

Survey Indicates No Depression

WASHINGTON. — Chances of a depression in the near future appear slim, in the opinion of a committee of congressmen studying the nation's economy.

In its report, the joint senate-house economic committee disclosed that most of the 583 persons who answered a survey expect a "mild recession" this fall. The committee concluded, however, that "answers to the economic questions do not give any real support to the theory that we are nearing a depression."

The survey showed "general agreement" that prices of most types of goods will fall and wage rates will rise between now and January 1, the report pointed out. Businessmen are unduly pessimistic about other people's trade prospects while encouraged about their own, it added.

Hearings on the nation's economic future will be commenced next week by the committee, which is headed by Sen. Robert A. Taft (Rep., Ohio). Taft said the committee wants to examine businessmen, economists, labor leaders, farm leaders, industrialists and contractors on "what they believe is happening in our American economy, with particular reference to the current price situation."

Taft said he intends to ask the committee later to study the effect of potentially large foreign loans on the domestic economy.

Earlier Taft had declared that he believed President Truman and the Democratic administration had abandoned efforts to bring prices down in favor of "heavy lending" abroad. He contended such lending would keep domestic prices up.

LIFE'S A 'SONG'

Strange Town of Vetville Planned for Disabled G.I.s

WNU Features.

LOS ANGELES. CALIF —Life should be "a song" for hundreds of disabled war veterans if plans of Harry Revel, popular song writer, materialize.

His plan, which has received the enthusiastic backing of ex-servicemen, civic officials and business leaders, embraces the founding of a town of Vetville solely for disabled veterans

It would be a strange town, judged by the ordinary concepts of city planning

A town of houses with extra wide doorways to accommodate wheel chairs, of sidewalks and ramps instead of curbs, of one story buildings with no stepups.

A town with modern factories providing jobs that crippled fighting men can do; with back yard workshops; with land for farming; with its own civic center, hospital, open air theater, motion picture house, swimming pool, schools and churches.

A town in which a thousand handicapped ex-G.I.s for $5,000 each can have their own homes and raise their families, living their lives under the most favorable circumstances.

The inspiration for the unique town came to Revel while he was entertaining servicemen during and since the war With a 10 by 15 foot scale model, he has been able to give others an accurate picture of the proposed city.

The model shows eight houses to the block. Back yards open into a central recreation area. Public buildings are on a wide main street running through the center of the town.

Revel will endeavor to raise money for the project through public gifts and benefit shows. Both fund raising enterprises and actual construction of the village will be in the hands of a committee comprised of civic, religious and screen personalities.

Hearty endorsement of the project has come from Veterans' Administrator Omar Bradley and from veterans themselves.

Typical of the reaction of handicapped veterans was that of Ed Sweeney, an ex-marine paralyzed from the waist down, who is a patient in Birmingham Veterans' hospital in Van Nuys:

"The boys in the hospital feel that Vetville is a wonderful thing. We can be together there and work for our living."

A national bank has promised to finance veteran loans Several corporations, including a spark plug manufacturer and a nail polish maker, have agreed to locate factories in Vetville.

Home Fires Impel Cat To Complete 600 Mile Jaunt

RACINE, WIS.—Although it took two years and a 600-mile hike to do it, Boots, a wandering tom cat, finally has returned to the home of his owner, Mrs. Raymond McCullough.

Two years ago Mrs. McCullough shipped Boots, a gray maltese, to the home of her mother, Mrs. E J. Mosher, at Albion, Pa. Boots arrived there all right, but remained only one month and then disappeared.

The McCulloughs long ago gave up hope of ever seeing the cat again. But one night Mrs McCullough looked out the window and saw Boots sitting on the sill When Mrs. McCullough raised the window, the cat leaped into the house and made for his favorite spot back of the sofa A saucer of milk completed the homecoming festivities.

Report Cards Poor; She'll Pass Anyway

NATICK, MASS.— She's deficient in reading, writing, spelling, arithmetic and geography, but her chances of promotion from the sixth grade are good

The "she" in this case is Lady, a dog that attends classes daily at Nathan Rice school here. Like all her classmates, Lady gets report cards regularly from Miss Helen Murphy, the teacher.

Despite her I. Q. troubles, Lady may get out of the sixth grade because her young master, William Genova 11, is doing considerably better at his studies. The one redeeming feature of Lady's report cards is that she had a straight A in conduct for 32 weeks.

Stand Back, Ladies!

CHEYENNE, WYO. — A bill requiring women to stand five feet away from bars when drinking in public was introduced at the present session of the state legislature.

Retired Railroad Man To Run Model Train

PHILADELPHIA.—After 45 years as a railroad man, Allen R. Wilson has decided to retire so he can devote more time to his hobby. From now on he will operate his miniature railroad, including 400 feet of track, several locomotives and plenty of cars He even has a railroad bridge, a reminder of the years he spent designing them for the Pennsylvania railroad.

"Off We Go" AVIATION NOTES

DUAL EVENTS

Bozeman, Mont., will rank as a hub of aviation June 20-22, with planes coming in from every portion of the state, surrounding states and Canada to attend two big air events.

Montana Flying Farmers and Ranchers association will hold its annual convention at Montana State college June 20-21. On the following day Northwest Airlines will inaugurate flight service to Gallatin field with special ceremonies.

The flying farmer program will include a tour of the college to inspect agricultural work now being done, a display of army planes and of light airplanes suitable for farm and ranch work, and a speaking program covering planes, hangars and the many uses being made of planes.

* * *

Launching an aerial war against coyotes after the animals had made heavy inroads on farm livestock, Loren McDonald, H. F. Baker and Frank Tarter of Fredonia, Kas., have bagged 70 coyotes as a spare-time project. Baker, a veteran hunter, recalls his first shot from a plane, when he "missed at 10 feet." Now his marksmanship is as accurate from a plane as from the ground.

* * *

AVIATION ADVANCES

Flying has made rapid strides in northern Middlesex county, N. J., since its inception only a quarter century ago. Four new commercial airports and a sea base have been opened, most of them as a result of the postwar interest in aviation. The new fields are North Brunswick, Woodbridge, Ziegfield and Forsgate airpark while the sea plane base is at Perth Amboy. Hadley airport, established in 1935, now ranks as one of the busiest in the state.

With aviation drawing many new cohorts, more than 650 persons in the county now are flying. The list includes instructors, commercial, private and student pilots. Figures show that there are approximately 130 ships at the various air bases.

* * *

An increasing number of small towns are providing airport facilities for benefit of local flying enthusiasts and visiting pilots. The need for this service is pointed out forcefully by the Slayton, Minn., Herald, in an editorial, which says in part: "The town will fall far behind the procession if it doesn't look out. A bond issue or a government grant isn't needed to fill the bill. About all required is a little initiative and organization."

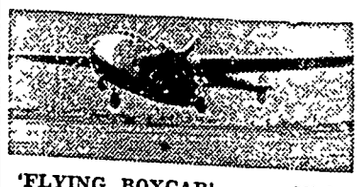
* * *

STILL GETTING AROUND

American pilots got around during the war and they're still going places overseas. A check of foreign airlines has disclosed that flying rosters in many lands are dotted with names of former American military airmen.

Air France has 20 American pilots, co-pilots and navigators while Scandinavian Airlines system recently added 15 ex-army airmen to its roster. Linea Aeropostal Venezolana has eight American pilots and engineers. Chinese National Aviation corporation and Panagra use mixed American and foreign personnel.

* * *



'FLYING BOXCAR' . . . Nicknamed the "flying boxcar," the Fairchild Packet cargo plane is designed to transport heavy military cargo or airborne infantry. Scheduled for long over-ocean hops in the Pacific, the twin-engined plane has a range of 4,000 miles, cruising speed of more than 200 miles per hour and maximum cargo payload of nine tons.

* * *

RESCUE MISSION

A delayed report from the interior of northern Canada has informed army air forces headquarters of the dramatic flight of an AAF Douglas C-54 Skymaster several thousand miles over the northern wastes to drop food supplies to a group of starving Eskimos discovered by a Royal Canadian mounted policeman. Constable Andrew Wilvert returned from a 30-day tour of northern Canada to report a small colony of Eskimos marooned at Petersen bay.

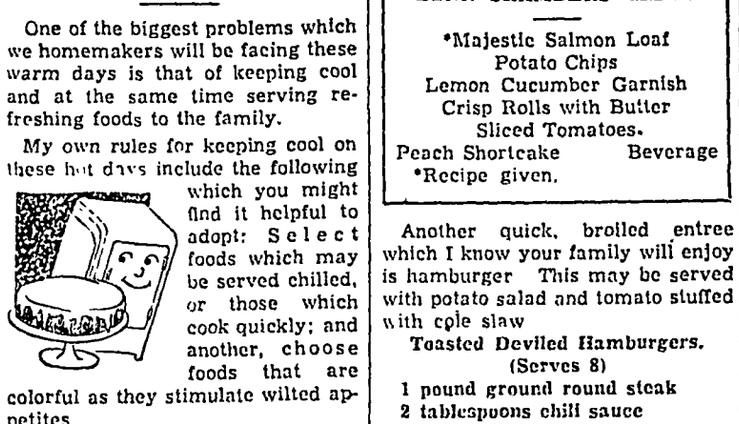
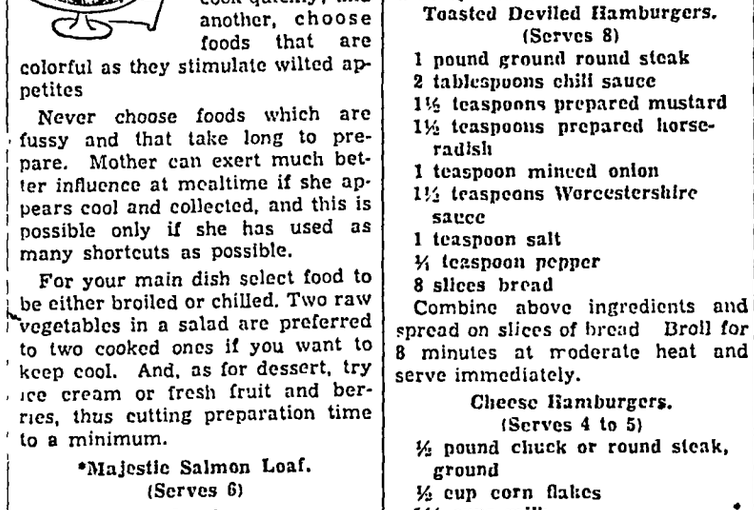
The backfield stars of Army's t 1946 football team are shown as they paraded at the United es Military Academy at West Point to receive top athletic awards. t to right are Glenn Davis, Felix ("Doc") Blanchard and Arnold ter—halfback, fullback and quarterback, respectively. They are ready for duty as second lieutenants.

ENADE TO AN ALLIGATOR . . . Robert Bullerman, keeper at Brookfield, Ill., zoo, blows a B-flat two octaves below middle C his French horn in the forlorn hope that it will incite this bashful le alligator to give with a mating bellow. Bullerman failed, but quartet of French horn masters did the trick.



HOUSEHOLD MEMOS... by Lynn Chambers



Serve Simply; Keep Cool
(See recipe below.)

Refreshing Meals

One of the biggest problems which we homemakers will be facing these warm days is that of keeping cool and at the same time serving refreshing foods to the family.

My own rules for keeping cool on these hot days include the following which you might find it helpful to adopt: Select foods which may be served chilled, or those which cook quickly; and another, choose foods that are colorful as they stimulate wilted appetites

Never choose foods which are fussy and that take long to prepare. Mother can exert much better influence at mealtime if she appears cool and collected, and this is possible only if she has used as many shortcuts as possible.

For your main dish select food to be either broiled or chilled. Two raw vegetables in a salad are preferred to two cooked ones if you want to keep cool. And, as for dessert, try ice cream or fresh fruit and berries, thus cutting preparation time to a minimum.

***Majestic Salmon Loaf.**
(Serves 6)

2 cups canned salmon
2 packages lime gelatin
¼ cup vinegar
1½ cups boiling water
1¼ cups cold water
3 tablespoons lemon juice
1 teaspoon salt
2 cups finely shredded cabbage
3 hard-cooked eggs, sliced

Place flaked salmon in bottom of loaf pan or mold. Dissolve gelatin in boiling water Add cold water, vinegar, lemon juice and salt. Pour half of the warm gelatin over the salmon and chill When set, fill mold with alternating layers of shredded cabbage and sliced eggs. Cover with remaining gelatin, chill until set. Unmold on crisp lettuce; garnish with potato chips, sliced cucumbers and lemon.

These broiled lamb steaks don't take long to cook, so they will be a boon to the hot weather homemaker. The potatoes may be cooked ahead of time (or use leftovers) and broiled along with the meat to heat and become golden brown. Carrots are a colorful addition to the menu, and you may use the canned variety to save cooking time. Dress them up by melting butter and adding a small amount of mint jelly to it, and pour over the carrots before serving

Broiled Lamb Steaks.
(Serves 6)

6 shoulder lamb steaks, cut 1 inch thick
3 tablespoons olive oil
6 tablespoons lemon juice
1 minced onion
1 teaspoon salt

Mix olive oil and lemon juice Add onion and salt and marinate lamb steaks in this mixture for two hours before broiling. Preheat broiling oven. Place steaks on rack three inches from heat. Turn oven regulator on high. When one side is nicely browned, season with salt and pepper and turn. When second side is browned, season and serve immediately Allow 6 to 8 minutes for each side

LYNN SAYS:
Here are Tips For Picnics

Fried chicken which may be eaten with the fingers is an excellent food for picnics. Wrap each piece individually in waxed paper, place light meat on one side of the basket, dark meat on the other side, and then dole it out.

Meat loaf is another good main dish for picnic. It is easy to carry in the loaf pan in which it was baked.

LYNN CHAMBERS' MENU

*Majestic Salmon Loaf
Potato Chips
Lemon Cucumber Garnish
Crisp Rolls with Butter
Sliced Tomatoes.
Peach Shortcake Beverage
*Recipe given.

Another quick, broiled entree which I know your family will enjoy is hamburger This may be served with potato salad and tomato stuffed with cole slaw

Toasted Deviled Hamburgers.
(Serves 8)

1 pound ground round steak
2 tablespoons chili sauce
1½ teaspoons prepared mustard
1½ teaspoons prepared horseradish
1 teaspoon minced onion
1½ teaspoons Worcestershire sauce
1 teaspoon salt
⅛ teaspoon pepper
8 slices bread

Combine above ingredients and spread on slices of bread Broil for 8 minutes at moderate heat and serve immediately.

Cheese Hamburgers.
(Serves 4 to 5)

½ pound chuck or round steak, ground
½ cup corn flakes
1¼ cups milk
⅛ teaspoon pepper
½ teaspoon salt
¼ cup catsup
2 tablespoons fat
3 tablespoons flour
1 tablespoon prepared mustard
¼ pound grated American cheese

Combine beef, ¼ cup milk, ¼ teaspoon salt and the pepper and catsup. Form into six patties and saute in 1 tablespoon of fat. Melt remaining fat in saucepan Stir in flour and mustard, then remaining milk and salt. When smooth, add cheese and cook until it has melted. Arrange hamburgers in a baking dish and pour sauce over them. Bake in a slow oven for 15 to 20 minutes.

If your choice of main dish is a salad, select a good protein food like eggs or chicken. Here are suggestions:

Egg Salad Bowl.
(Serves 6)

1 clove garlic, optional
1 small head of lettuce
1 bunch watercress
1 cucumber, sliced
1 bunch radishes, sliced
½ cup celery, diced
6 hard-cooked eggs
French Dressing.

Rub inside of large bowl with garlic. Break lettuce into chunks. Add all other ingredients to bowl and toss together lightly with French dressing (just enough to hold together). If a more hearty salad is desired, serve topped with strips of cheese, cold tongue or ham.

Chicken Salad I. Mix together the following: 1 cup diced, cooked chicken, 1 cup diced, cooked tongue, ½ cup chopped celery, ½ cup sliced, stuffed olives, and ¾ cup salad dressing or mayonnaise.

Chicken Salad II. Toss together the following: 2 cups diced, cooked chicken, 1 cup minced celery, 1 chopped green pepper. Marinate in French dressing. Drain and mix with mayonnaise. Serve in lettuce cups with pineapple spears.

Released by Western Newspaper Union.

Good accompaniments for the fried chicken lunch: Pineapple cole slaw, small cherry tomatoes, pickles or olives, fruit salad made of large pieces of fruit, or ambrosia.

Make hamburgers of a larger size when going on a picnic as appetites are bound to be big. To make cheeseburgers, take along some wrapped slices of American cheese, and when the "burgers" are almost done, place cheese on top and remove from fire just after it has melted.

Word to the Wise

Once when the popular wit and after-dinner speaker, Chauncey M. Depew, was president of the New York Central railroad he began to receive numerous and vociferous complaints concerning the sadly deteriorated quality of the station restaurant at Utica. But more important matters kept him from remedying the situation. That was, until he received the following letter:

"Dear Mr. President: You are the finest after-dinner speaker in the world. I would give a great deal to hear the speech you would make after you had dined in the restaurant in your station in Utica."

Depew had the station fixed up pronto!

Automobile Production

During 1946, only ten countries made motorcars and trucks, totaling 3,971,200 vehicles of which 77.5 per cent were produced in the United States.

MALE HORMONE* PRESCRIBED FOR WANING VIGOR IN MEN

*METHYL TESTOSTERONE (R) is bringing new hope to thousands of men worrying because of waning power, nervousness, uncertainty and loss of initiative induced by fear.

Recent magazine articles hailed Methyl Testosterone (male hormone) as a promise to older men in extending the prime of life. It was referred to as one of the necessary life-giving vital sparks that supply drive and energy, provided their doctors determined they are suffering from a deficiency of this male hormone substance.

As national distributors of Methyl Testosterone for oral use, we are cooperating with physicians everywhere in filling prescriptions. We are specialists in the marketing of Vitamins, Pharmaceuticals and Biologicals. WRITE TODAY.

Mail the Coupon for Free literature, case histories and prices of Male Hormone for personal use.

FREDERICK HERRSCHNER, Dept. 53A National Distributor, 411 So. Wells St., Chicago 7, Illinois.

Crazy Hat Wins Refrigerator!
One of those "Breakfast in the morning" radio shows came to Capitol City last week, and Sarrah Carey won first prize for wearing the craziest hat in the audience. It was a full-sized refrigerator! (The prize, not the hat.)
"Glad them hats of hers paid off at last," says Ed, treating the whole thing like a joke. But you could see he was proud of Sarrah.
From where I sit, there's another thing Ed can be proud of: the way he's put up with those hats of Sarrah's, with never a criticism; just as she's put up with Ed's pip the other little freedoms he e
They've got that refrige home now, stocked with beer we're going over tonight to d toast—not just to Sarrah's hat ing first prize ... but to a ha married couple, who've learn live with one another's differ in tastes—whether it's a tast hats or beer!

Knee-High Corn In Iowa July Fourth This Year

AGAIN PAST WEEK AND DELAY HANCOCK COUNTY CROPS

ys and Warm Nights ded Now To Produce A Corn Crop For 1947

h Iowa enjoyed just a ays the past week that shot the growth of corn d, but this all ended Saturday evening when ial rains and cooling at- ere followed with cool r ever since.

ever, there are some good corn fields on higher and drained ground, but is is ted that 70 per cent of orn acreage needs more deal weather the balance summer to make a fair rop.

ughout the county only 65 per cent of the corn and 50 per cent of the beans been cultivated the second There still remains about cent of the bean acreage planted.

ll grains are heading out ook good Haying got off good start during the few ays last week and will be d crop if weather remains able for curing.

re are quite a few good g fields of beans, however, rn will not be "knee-high" e Fourth this year.

K BEGINS ON NEW ER STATION FOR COOP.

e Hancock County Coop Association is building a service station in Klemme e site of their present sta- which will be torn down. rk on the new station got way the latter part of the when the concrete footings e walls were poured. e Coop. has also expanded business at Garner by pur- ng the Shell Service Station ighway 18 and State street rner.

e Klemme station will be ructed of building tile and and will be modern in respect.

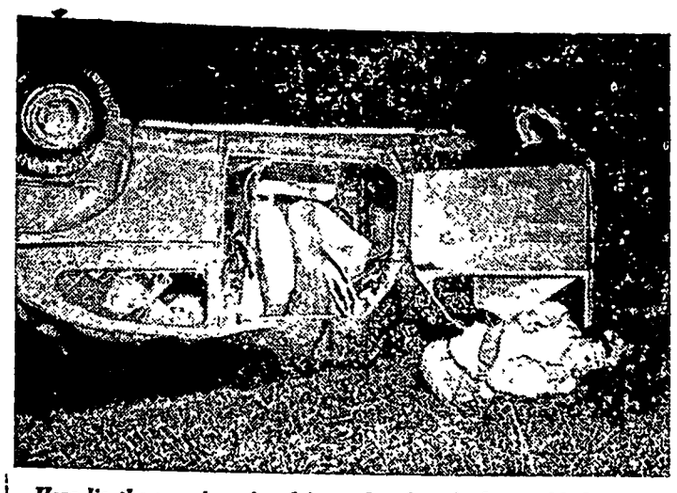
Darlene Etchen and Luella Priebe will attend the Leadership Training Camp at Iowa Falls and Mildred Meinders, Iris Rosendahl and Elizabeth Goll will attend the Leadership Training Course at Grinell. Both of these courses will be during the month of August.

Return From Camp Quest

Maralee Ridder, LaNelleHarvey, Shirley Bisom, Shirley Beier, Elaine Neuberger, Iris Schaefer, Jo Ann and Janice Hummel, Larry Stille, Roger Howard and Maurice Jacobs who attended Camp Quest Methodist Camp on Lake Okoboji, last week returned home Saturday afternoon. The group report a most enjoyable time. Novella Bredbenner, who was on the teaching staff, and Mrs, L. A. Ridder, who acted as counsellor, and had spent the week there also returned home Saturday John Chambers, Dwight Hummel and Mrs. Vern Bisom drove to Lake Okoboji and got them.



Here lie the remains of a driver who thought he could drink and still drive a car. Racing down the highway at a dangerous speed, his car wandered off the edge of the pavement, dragged on the sandy shoulder, and was wrenched into a spin. Drunken drivers are potential murderers of every other motorist who comes near them on the road. They were involved in more than 5,000 fatal accidents last year. National Conservation Bureau safety specialists say even one or two drinks slow up reactions, make judgment unsure, increase chances of accident three to four times.

Lyndon Kilgore Heads Legion Post For Coming Year

LIBERTY 4-H PRESENTS FARM BUREAU PROGRAM

The Avery Sunbeams met at the home of Mrs Leonard Kaduce Seven members answered roll call by giving their hobby of chief interest.

Talks were given by Iris Rosendahl, Lillian Wille, and Joan Lowenberg

Mrs. Leonard Kaduce gave a demonstration on removing varnish and refinishing furniture

The next meeting will be held at Joan Lowenbergs July 15th.

There's Danger In Mud On Hogs

Iowa hog raisers have another disease to worry about this year, "mud fever."

It's not exactly a disease, but Dr. K W. Stouder, Iowa State College veterinarian, says farmers should be careful about letting young pigs nurse from sows whose udders are covered with mud.

The mud taken in by suckling pigs gets into the intestional tract and becomes impacted The simplest way of controlling this is to keep sows out of mud holes

Stouder says there is little, if anything, that can be done for pigs which have already become impacted

There are other good reasons for fencing off or filling in mud holes in the hog lots.

Sows caked with mud easily become overheated. Stouder warns that heavy sows should be kept free of dried, caked mud to avoid serious damage in hot summer weather

Stagnant water harbors disease-carrying bacteria Draining or filling in the pools allows sunshine to kill the bacteria and reduces the possibility of hogs or other livestock picking up disease.

Flooded Areas To Get Quail

Seven hundred and thirty-six adult quail from the State game Farm near Boone are being released to the wild in the southern quail range. Many areas, especially in the river bottoms, were badly flooded with a resulting loss of birds. The quail to be released are all surplus mated pairs and are not needed at the game farm for egg production. All birds have been leg-banded and anyone finding bobwhite quail with an aluminum band is asked to report the band number either to the local conservation officer or to the Conservation Commission offices in Des Moines.

Pink And Blue Shower

Mrs. Esther Barz and Mrs. Fred Barz entertained some ladies at a pink and blue shower Tuesday afternoon in honor of Mrs. Louis Jurgemeyer at the Fred Barz home.

Lunch was served by the hostesses and Mrs. Jurgemeyer received many nice gifts.

Christian Lau Clan Numbers 460 Living Descendants

ANNUAL LAU REUNION HELD SUNDAY IN MINN.

Descendants Of Christian Lau, Civil War Veteran Meet

The first Christian Lau family reunion was held 10 years ago in memory of Christian Lau, a Civil War Veteran. Sunday five generations again met to honor him as we have each year, even thru the war years when we met in groups in different states on the same day, as June 27, 1865 was the day Christian Lau returned home from war. The reunion Sunday, June 29, 1947 was held in Odd Fellows Grove in Northfield, Minnesota. Ninety members being present.

All eleven children of the Martin Lau family were present Mr and Mrs. Guy Chalfaut of Spencer, Iowa; Mr and Mrs. Henry Terry and family, Mr. and Mrs. Frank Gibson and family, Mr and Mrs. Lloyd Lau and family, Mr and Mrs. Martin Lau and family; Mr. and Mrs. Fred Lau and family; Mr. and Mrs. Henry Lau and family, Mr and Mrs. Woodrow Lau and family, Mr and Mrs. Gust Swedenborg and family and Mr and Mrs. Milford Canedy all living in Minnesota.

Of the Chris Lau family from eastern Iowa those present were Mr. and Mrs. Floyd Lau, Mr and Mrs Herbert Lau and Nancy of Elkader, Iowa; Mr and Mrs. Harold Lau of Guttenberg, Ia; and Mr and Mrs Bob Lau and family of Garnaville, Iowa.

Of the Will Lau family present Mr. and Mrs Dan O'Brian and Children of Ausin, Minn., Mr and Mrs. James Berns and children of Garbar; Mr and Mrs. Wm. Schubert of Rockford, Mr and Mrs Herbert Schubert and family of Garner and Mr. and Mrs Albert Schmidt; Mr and Mrs Eugene Kluckhohn Shannan and David of Klemme

Those attending of Henry Lau family were Marjorie Lau, Mrs. Martha Bredbenner and Novella; Mrs Lille Koerner and Kermit Mrs. E. J Arnold and Wilbur, Mrs Delores Ridder, Maralee and Dennis and Terry Koerner all of Klemme

Only Mrs. Martin Lau of Cannon Falls of her generation was present. Mrs. Lena Reusch and Mrs. Dora Greiman were unable to be present, but sent their greetings. Mrs. Lena Reusch writing "My wish is that the Lau reunion continue as long as there is a Lau" Our only 6th generation member was not present.

After the picnic of dinner including plenty of ice cream, a program of music and singing by the little folks was enjoyed

Delores Ridder read the report of Lau boys in service and there were 6 at the present time Bruce Arnold, Calvin Schmidt, Verne Greiman from this community Richard and Donald Lau of Eastern Iowa and James Mitchell of California. Forty-two boys having received discharges and one, Kenneth Lau, of Grand Rapids, Minn, was killed in action.

Novella Bredbenner gave the report on the 20 new babies in past year giving their names and parents, only 4 of the 20 babies were present and all four were members of the Will Lau family With these 20 new baby members our Lau family now numbers 460.

Calvin Schmidt was the only marriage. Two deaths were reported, Mrs. Albert Lau of Tracey, Minn. and Ben Buehlmeyer of Klemme.

During the business meeting the old officers carried over. Ben Greiman, President; August Lau, Vice-President; and Martha Bredbenner as Secretery and tha Bredbenner as Secratery and

It was voted to have next years reunion in Eastern Iowa; the place to be chosen by the Chris Lau family of Eastern Iowa.

By Martha Bredbenner

The Barz clan held a picnic at the Klemme Park on Sunday. A number of families came with well filled baskets for a good dinner which was followed by visiting Those present were

Mr and Mrs. Will Barz of Garner, Mr and Mrs. Fred Barz. Harvey Barz and family; Marvin Barz and family, Ronald Barz and family; Eugene Greiman and family, Mrs. Esther Barz; Grandma Wille; Edward Barz, Mr and Mrs. Milvern Barz; Edmund Josten and family; Raymond Barz and family; Evert Barz and family of Waterloo; Mr. and Mrs. Emil Barz of Dunkerton; Mrs. Lena Schroeder; Rev. Grosshuesch and family, Mrs. August Ritterhaus and two daughters of Menno, South Dakota; and Les Hartbeck and family.

THOMAS REUNION HELD HERE SUNDAY

Brothers and sisters of J. C. Thomas and their families held a reunion and picnic dinner at the Thomas home here Sunday Dinner was served cafeteria style and the picnic dinner was enjoyed in the Thomas yard

Those present besides Mr. and Mrs. J C. Thomas were. Mr and Mrs Oscar Thayer and three sons of Dougherty, Mr and Mrs. LeRoy Rowson of Hampton, Mr and Mrs. J M. Thomas and four daughters of Hampton; Mr and Mrs. Gerald Ersland, son and daughter of Clarion; and Mrs. Jim Courtney of Dows.

Stromer Family Reunion Held Sunday At Hueneman Home

The annual reunion of the decendents of the late Charles and Anna Stromer was held Sunday, June 29, at the Victor Hueneman home.

The reunion was held on the fiftieth wedding anniversary of the late Mr and Mrs Henry J Stromer.

Those present were Mr and and Mrs. Julius Priebe of Klemme, Mr. and Mrs. Paul Stromer, Bernita and Merlin, Rapid City, South Dakota; Mr. and Mrs. Rudy Bienert and Franklin of Forest City; Mr and Mrs. Fernon Griggs, Jay, Jane, and Donald Troutner, of Miller; Mr and Mrs. Fred Schmidt, Irene and Marvin, Mr William Schmidt; Mr. and Mrs. Herman Schmidt and Luverne; Mr and Mrs. Paul Goll; Erwin Priebe; Mr. and Mrs. Dean Rasmus and Judith; Mrs. Tillie Hueneman; Mr. and Mrs. Victor Hueneman, Miriam, Lois, Abigail, Rachel, and Eunice, all of near Klemme and Garner.

Former Klemme Family Experiences Flood At Waterloo

Evert Barz came from Waterloo Saturday to spend a week's vacation in the Klemme Community, visiting relatives and friends. Mrs. Barz and the children have been here for a few weeks.

Evert relates that he had some experience in the recent flood when water covered his yard and came within a couple of inches of floor joists. Water poured into the basement and the current was so swift that the water came in one window and went out through another one on the opposite side. He had to screen the window on the outgoing side to keep canned fruit from washing away down the river. His neighbors said they had never seen the water anywhere near that high.

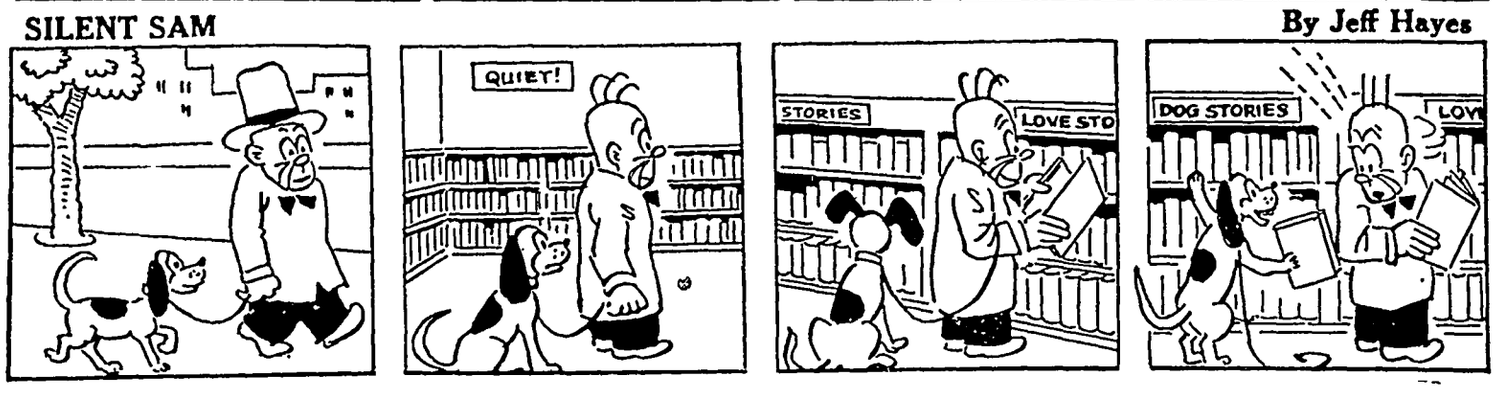
SILENT SAM

By Jeff Hayes



Sportlight

by GRANTLAND RICE

THERE is always an argument about the size of some record crowd—the greatest football crowd—baseball crowd—boxing crowd, et cetera But the record usually is set every Memorial Day in Indianapolis.

The 500-mile auto race at the Indianapolis speedway is the major lure in sport, where the estimated crowd runs from 140,000 to 170,000 spectators, which is no light outpouring of human beings for one day's event.

Grantland Rice

The thrill of the speedway lure is the thrill of danger. The test of skill and stamina is high enough, but the thought of what might happen to the human soul and body at any given second has the call.

If there had only been space enough, I still believe that an Army-Notre Dame football game in 1945 or 1946—especially 1946—would have broken all records.

Col. Biff Jones of West Point feels certain that the two teams could have played to 500,000 people, possibly more. The appeal for this game especially was far beyond the demand for any heavyweight fight or world series ball game.

Few off hand, could name the biggest crowd that ever saw a baseball game. It was a night game in Berlin, during the Olympic games of 1936. I happened to be there. The attendance was announced at 96,000. It was certainly over 90,000, which is some 15,000 or 20,000 more than any ball park in this country could handle.

It also was one of the worst ball games ever played, looking down to the lowest zone in a class-X circuit.

Biggest Boxing Crowds

The two Tunney-Dempsey fights, at Philadelphia and Chicago, in 1926 and 1927 lead all fight crowds. The Philly show in the vast Sesqui Centennial stadium drew more than 120,000 spectators.

Soldier field in Chicago holds football's record crowd, around 120,000.

The 17,000 reported at Cleveland last summer for the National Open was the largest golf crowd I ever saw on one day, although I understand the All-American golf shows in Chicago have reached 50,000.

Golf crowds are the gamest of the bunch. They take the major beatings. When any crowd passes 10,000 the spectator might as well retire. All he can see is 10,000 backs.

We have been trying to do some figuring on baseball's attendance for 1947.

Last season set new major league records, with something to spare, as the Yankees alone passed the 2,300,000 mark and most of the teams beat the 1,000,000 score.

With the two races as close as they have been, the fading spring would have given both leagues a large margin if it hadn't been for the most miserable weather one can recall.

Double-Headers Coming

More than a few teams have had many of their big days and nights either rained, snowed or frozen out. This will lead to a record list of double-headers later on.

But no one can say how long many teams, still in the race, will be in sight of the leaders after the middle of July. Once the home team becomes firmly lodged deep in the second division, the wild rush to the turnstiles too often is halted.

The Yankees may still equal or pass their 1946 record mark by remaining in the fight. The Giants, who drew over a million with a tailender last year, should add at least 500,000 admissions to their 1946 count, and probably pass the Dodgers with something to spare.

Yankees, Giants, White Sox and Tigers have the only four ball parks that can handle over 50,000 and all four should have close to record seasons with the teams they have.

The Phillies passed the million count last year and hope to repeat with a hustling, scrappy outfit. The Athletics, with an improved team, also should be an improvement over the past, where more than a few Philadelphia fans have grown weary and melancholy at peering at a tailender year after year. The Cardinals passed the million mark for the first time in 1946, but their groggy start, plus too many rainy days and nights, may cut this count down. Especially, if said Cards fail to win again.

Mize's Hitting

There seems to be some astonishment in certain parts that a portly veteran by the name of John Robert Mize can use a bat so well. The astonished ones might recall the fact that the same Mr. Mize, born in Demorest, Ga., 34 years ago, has been a solid hitter throughout his long career.

Standing six-feet-two, with a displacement around 215 pounds, maybe more, Mize always has had the physical bulk needed to get distance.

Household Hints

Hold a piece of cardboard against wallpaper to protect it from stains while waxing baseboard.

—•—

Women can drive nails! But they're easier to drive if you rub them over a cake of soap first.

—•—

Add two tablespoons of lemon juice to one quart of boiling water to keep cauliflower white.

—•—

You may get quick obedience out of scolding or spanking your child, but the surest kind is obtained by taking time to understand why a child behaves as he does and letting him come to trust you.

—•—

When putting elastic in children's panties, sew a hook on one end and an eye on the other. Makes for easy laundering.

—•—

To help restore fluffiness to blankets, add one tablespoon of glycerine to the rinse water for each pair of blankets.

—•—

When filling jars and tumblers with jelly, use a gravy-boat. It can be readily dipped into the hot liquid by means of the handle, and the long spout will fit into almost any size jelly tumbler, preventing waste and spilling.

cups with water, if necessary. Mix well. Bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute.

Remove from fire and stir in fruit pectin. Stir and skim by turns for 5 minutes, to cool slightly and prevent floating fruit. Pour quickly and top with paraffin at once

Blackberry Jam.

4½ cups prepared fruit
6½ cups sugar
1 box powdered fruit pectin

To prepare the fruit: Crush completely, one layer at a time, about 2 quarts of fully ripe blackberries. If desired, sieve half of pulp to remove some of the seeds. Measure berries into large saucepan.

To make the jam: Measure sugar and set aside. Place saucepan with fruit over hot fire. Add powdered fruit pectin and stir until mixture comes to a hard boil. At once stir in sugar. Bring to a full rolling boil and boil hard 1 minute, stirring constantly. Remove from heat, skim, ladle quickly into glasses. Paraffin at once.

True marmalades are really soft fruit jellies, and are wonderful to use for spreads when lunch box problems come up during fall and winter. Have a few choice jars on hand to take care of the situation.

Cherry-Raspberry Conserve.

3 cups pitted cherries
1 cup chopped pineapple
1 cup raspberry pulp
4 cups sugar

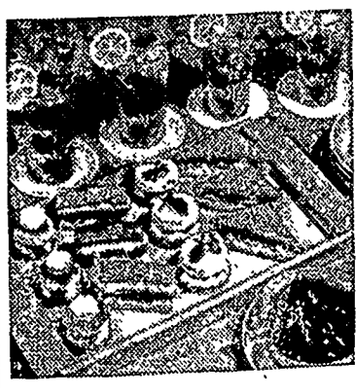
Run cherries and pineapple through food chopper. Add raspberries which have been thoroughly crushed, and sugar. Heat slowly until sugar dissolves, then boil rapidly until thick. Pour into hot, sterilized jars and seal at once

When you make jam or jelly, it's a good idea to check and prepare the jars in advance Get some help with the fruit or berries, if it's at all possible Have all ingredients measured out before you start cooking, as you will have to be right on the spot to watch out for scorching With these tips in mind, the preparation will take on a simplicity you never dreamed possible.

Cherry Marmalade.

2 oranges
1 quart pitted cherries
4 tablespoons lemon juice
3½ cups sugar

Run oranges through food chopper. Cover with water and boil until soft. Cool. Add cherries, lemon juice



You can put jams and jellies to use this summer by making light sandwich refreshments from them to serve with cooling fruit juices. Fruit juices also may be canned for later use as jelly.

and sugar. Boil to jellying point. Pour into jars and top with paraffin at once.

Raspberry-Currant Marmalade.

2 quarts raspberries
1 quart currants
9 cups sugar

Measure berries and currants after stemming and cleaning. Crush currants. Cook slowly until juice flows freely. Add raspberries and heat slowly to boiling. Add sugar and stir until dissolved. Boil rapidly to jellying point. Pour quickly into hot, sterile jars and seal with paraffin at once.

Note: The currants are cooked longer than the raspberries because they are more firm and do not lose color as quickly as the more delicate fruit.

Released by Western Newspaper Union.

Test for acid by tasting. If it lacks, add some lemon juice.

Fully ripe fruits make the tastiest jellies, but most of these have insufficient pectin to make jelly. It is best to use one-half ripe berries and one-half not-so-ripe ones.

If you like a spiced jelly, drop a bag of mixed spices into the juice while it is first cooking.

Use wide-bottomed pans for cooking the jelly so that the juice will cook quickly and not lose too much of its color while cooking.

THE FICTION CORNER

THIRD STRIKE CALLED!

By JACK KOFOED

This Week's Best Fiction

THE sun slanted into the bull pen where High Pockets Kelley was warming up, and caused beads of perspiration to stipple his brick-colored forehead like raindrops. He threw the ball listlessly because there wasn't a chance in a million that he would get into the final game of the World Series His teammate, Slats McKeever, had held the Giants to three hits, and the Yankees led one to nothing going into the final inning

"Something always happens to me" Kelley said, "and it is seldom anything to write home about. As far back as I can remember, I have been the unluckiest guy in the world. When I was only seven years old I met Sally Ryall "

"If you call that bad luck," snorted Pete Howard, "get me a load of it"

High Pockets put an extra little zip on his fast ball

"That's right but you only got the start of it" he said "We're from Ishpeming, Michigan, and a lot of houses out there have board fences along the back yard I tried to make a hit with Sally by walkin' on one of them and fell off and busted a couple of ribs When I got my first job in the Northern Michigan League, she came to see me work. I tore a nail off a finger of my pitchin' hand and they knocked me out of the box in two innings But that wasn't the worst of it. We had signed a new first baseman named Frederick Longstreth McGee . "

High Pockets banged the ball viciously into his glove "Yeah, but look what luck does to me Fred wasn't supposed to report until the next day, but he's just dumb enough to get his dates mixed and showed up in time to meet Sally What's Clark Gable got that he hadn't got? Not a thing And me six-feet-four, and with a pan that stopped practically every clock in Ishpeming "

"So you lost Sally to him, eh?"

"Not yet. If my luck in love is as bad as it is in everything else, I probably will When we came up to the majors, McGee was signed by the Giants Five minutes after he put on the sliding pads, Smith's legs went bad and there was McGee the regular first baseman. The Yankees took me and all I had to beat out for a job were Jones, Pearson, Talbot and Wirtz "

"You complain too much," said Pete, "look at me That Connelly will go on catching till I've got a beard way down to here All I get to do is warming up these bums."

High Pockets considered that unimportant He had his own troubles.

"Sally talks that way, too. She works for a psychiatrist named Golenpaul, and he says I'm obsessed by the belief that luck is the dominatin' factor in my career. Well, ain't it? Lookit this series now. Here we come to the last game, and every pitcher on the staff except McKeever and me is as healthy as if they had the cholera. And what happens? Slats makes 'em eat out of his hand while I'm here in the bull pen. The boss is wavin' for you. Luck!"

Howard laughed, but there was no mirth in it.

"If you gab less and look more, maybe you wouldn't feel that way McKeever's lost his stuff Moore singled and Wilson walked and there's Lake at the plate now If he gets a piece of one, goodbye ball game! Uh-huh, he walked, too. And the boss is wavin' for you "

Kelley stuffed his glove in his hip pocket and pulled his cap further down over his sunburned forehead

"What happened?" he asked, dazedly.

"Good luck," he echoed scornfully. "If I strike out the side, I'll bet Connelly misses the last pitch and the winning runs come over."

McKeever was still waiting at the pitcher's box with all the infielders around him when Kelley shuffled up. "Somebody's makin' an awful mistake," said High Pockets "Lesner knows how unlucky I am 'Does he want to lose this series?"

Slats glared at him

"If the rest of the staff wasn't on the waitin' list of the hospital for joint diseases, you wouldn't even be here Forget that luck stuff It's not as important as the hop on your fast one "

"That's what you think," Kelley said. "But I'll take a double order o luck. My girl says there ain't any Laugh that off And for a real break—Frederick Longstreth McGee is battin' next. What a guy! He could trip over a cat and fall into a gold mine. This sure is a spot for a guy who ain't pitched much more this season than Shirley Temple has."

McKeever's gaunt, red face expressed the deepest disgust.

"Well, you better come outta this game with somethin' better than a bad luck alibi, or New York won't be big enough to hold the two of us "

He turned on his heel and strode back to the bench.

The infielders took their positions and High Pockets stood in the middle of the diamond with the ball in his hand and remembered how he had fallen off the fence and how those Northern Michigan fellows had pinned back his ears, and knew in his heart that he wasn't lucky enough to get one past McGee.

He better, though—if he failed he could not excuse himself to Sally. She wouldn't listen to that bad luck stuff any more She would say he was given the greatest break of his life and had not been man enough to take advantage of it. Besides, High Pockets felt that if he let McGee hit, he'd be delivering groceries for old man Hemingway back in Ishpeming next Summer instead of drawing salary checks from the Yankees.

Connelly was signaling. Kelley didn't know what the catcher was calling for A curve? A fast ball? A dipsy do? What did it matter, anyway? Whatever he threw McGee was going to hit.

The plate umpire took off his mask and bellowed, "if you can pull yourself out of that trance, Kelley, how about working at your trade? I don't want to stay here through the whole football season!"

Well, there wasn't anything else to do. Then High Pockets wound up, his mind on Sally . . . and bad luck . . and the instant the ball left the tip of his fingers he knew it didn't have anything on it but the stitches, and it was straight as a ruler and big as a balloon. He saw McGee pull back his club . . . and then there was a whack of wood against leather . . . and that was all he remembered.

High Pockets woke up in a nice clean hospital bed with a nurse taking a thermometer out of his mouth. Pete Howard stood nearby.

"The doc says you're all right," said Pete "It's lucky you got a head like a wrestler, or they'd be tuning up the harps for you now."

High Pockets twisted his neck. There was a little ache in the back of his skull, but not much.

"What happened?" he asked.

Howard seemed embarrassed.

"Well, McGee hit a line drive that bounced off your noggin into Stone's hands and Lou made a triple play unassisted."

Kelley sat straight up in bed. "Holy Moses! The first break I ever had in my life, and we win the World Series with it! I'll never crab any more Wait till I see Sally!"

"I wouldn't bother, if I were you," Pete said, moving toward the door. "Women are awfully funny. Sally said nobody ever got a worse break in luck than Fred McGee, and before she marries him she's going to tell Dr. Golenpaul he doesn't know what he's talkin' about."

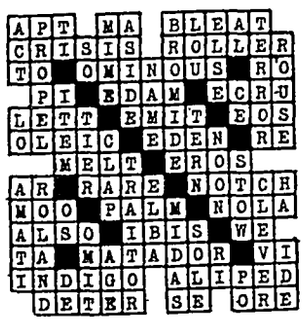
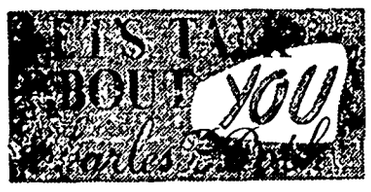
Answer to Puzzle Number 19



Series H-47



Suppose You Had Six Months More

He handicapped himself all his life because all his life he had been on the wrong side of the fence in his thinking In other words, he was negative in his thoughts and in his outlook on life, rather than positive A person like that can't be very successful or happy, as you very well know.

And he wasn't young—he was past forty. And yet I watched a miracle happen in that man's life, watched him transform from a man who was negative about everything into one who was positive about everything.

"I owe everything I've done to some advice I got from an old friend I had admired from childhood," he told me when I asked him to outline his method. He told me to make believe that I had just six months more to live, just six months more. It was June when I saw him. 'Just pretend you won't be here January 1,' he advised. Then he said, 'In that case, what would you do with those remaining six months?' I thought for a moment, for I hadn't ever been asked a question as portentious as that. Then I told him: 'Why, believe me, I'd live! I'd crowd as much into those six months as I possibly could!' "

It gave him a new life really!

What a wonderful thing it would be for everyone if he or she could imagine the same thing and try living a full and complete life for just six months. Why no one would ever be content to live a less happy, less complete, less full life!

DELEGATES TO ATTEND 4-H BOYS' SHORT COURSE

Field trips to Iowa State College experimental farms, a chance to hear outstanding speakers, recreation and other educational activities are in store for the five Hancock County 4-H boys and 1 leader, who attend the annual state 4-H boys' Short Course at Iowa State College, June 30 to July 2, according to Paul Henderson, county extension director.

Delegates who will represent their local clubs at the state meeting are: Gene Ostendorf, Goodell, Avery Twp; Charles Sheets, Britt, Bingham Twp; Harold Pueggel, Garner, Concord Twp; Verle Lenz, Garner, Ell Twp; Arnold Prohaska, Garner, Garfield Twp; Paul Zrostlik, Garner, Liberty Twp; Leaders who will accompany the boys are; Donald Greiman, Garner, assistant leader in Ell township and Edgar Dorow, county extension youth assistant.

This year's short course program will be built around the theme "Learning to live in a Changing World," Henderson said. This is the same as the theme for the 4-H Girls' Convention concluded recently

Features speakers on the 3-day program include Allan B. Kline, president of the Iowa Farm Bureau Federation; Ray Tuner, in charge of 4-H work in the Central States area for the United States Department of Agriculture, Extension Service, and H. H. Kildee, dean of agriculture and director of the Agricultural Extension Service at Iowa State College

Much of the time of the delegates, Henderson said, will be spent on trips to study the work of the college, in agricultural research Places to be visited include the dairy, horticultural, agronomy and agricultural engineering farms. Training also will be provided on points in livestock judging, in improved methods of using labor and in recreation.

The annual business meeting of the clubs will be held the second day Election of new officers from a slate of eight candidates will take place at this time

Scheduled for the first evening meeting is a variety show It will include a style show of correct and proper dress for various occassions with emphasis on correct color combinations and quality in clothes. Models for the garments to be furnished by merchants of Ames will be members of the campus 4-H club of Iowa State.

On the same program will be a 4-H moving picture "Where the Roads Turns Right," a demonstration of baton twirling and musical numbers.

Delegates to the National 4-H Club Camp, held in Washington, D C, June 11 to 18 will make their first report of the camp to the Boys' Short Course. The delegates will also hear messages from Miss Esther Whetstone, state 4-H Girls' leader, the newly elected president of the Iowa 4-H girls, Mary Joe Cornelison of Ringold County; Robert Crom, Chapin, president of the campus 4-H club; and Wayne Blahauvietz, Harris, president of the Iowa Rural Young People's Assembly.

Bingham Boosters 4-4 Club Met

Jean Ann Nelson entertained the Bingham Boosters 4-H club at her home Thursday, June 19th Five members and one leader answered roll call naming a famous women and telling why she is famous. Two visitors were present.

The program consisted of a talk on how to make dressing tables, book shelves, and writing desks out of a commode, by Marjorie Cooper

Jean Ann Nelson demonstrated and told about the proper framing and hanging of pictures. A complete and interesting report of the 4-H District Camp at Clear Lake was given by La Vaune Verlo.

Each girl made a portfolio for pictures studied this year, with the instruction of their leader, Mrs. Andrew Verlo.

The girls made plans for a club picnic at Pilot Knob, June 25th, followed by skating at Forest City in the evening

TOP GRADE EGGS WIN

Iowa poultry producers are losing 14 million dollars a year from eggs docked because of lowered quality.

Worse than that, points out County Extension Director Paul Henderson, Iowa farm flock owners run the risk of eventually losing their entire industry to commercial producers if egg quality is not progressively improved during hot weather periods.

Heat effects eggs as quickly as it does milk Every hour an egg is left in summer heat means a greater loss in quality

To keep quality high, Henderson says eggs must be gathered two or three times a day. They should be put in a wire basket and placed in a moist cellar, with temperatures below 60 degrees as soon as possible

Leaving the eggs in wire baskets over night aids air circulation and makes cooling more rapid Sending eggs to market twice a week removes any unnecessary risk of lowered quality

Dirty eggs are another problem this year. Extension Poultryman W R. Whitefield says putting a strip of lathe on each side of nest boards and sprinkleing powdered gypsum in the newly formed trough decreases the number of eggs muddied in the nest The gypsum obtainable at most lumber yards coats the muddy feet of the hens and keeps the mud from coming into contact with the eggs

Having one nest for each five hens and keeping nests well filled with straw or husks also helps. Hens should not be allowed to run in the barnyard and should be kept out of poultry yards during rainy periods.

If roosters have not been sold or penned off from the laying flock, this should be done as soon as possible. Infertile eggs keep best.

DDT EFFECTIVE CONTROL FOR GRAPE FLEA BETTLE

Some reports of damage to vineyards in Iowa from grape flea bettle have been received this year by Iowa State College entomologists.

The small jumping bettles are about one-fifth of an inch long In the spring they start to feed upon opening grape leaves. The females soon lay their eggs on the loose bark of canes or on the upper surface of the leaves. Small, dark brown to blackish spotted grubs hatch and feed on the surface of leaves and on clusters of blossom buds. The second generation of adult bettles appear in July or August. They feed on grape leaves until the approach of cold weather

DDT is the most effective control measure, reports Harold Gunderson, Iowa State College entomologist. He recommends 2 pounds of 50 percent wettable powder in 100 gallons of spray for each acre Or 20 pounds of 5 percent DDT dust or 1 percent rotenone dust per acre will do the job

Other recommended control measures are bordeaux mixture or arsenate of lead spray when the grubs are present on the leaves. The arsenate of lead should be mixed at the rate of 2 pounds for every 50 gallons of water, or 6 teaspoonfuls to 1 gallon of water.

Also useful in control are the cleaning up around vineyards in the fall and the raking and burning of fallen leaves at that time.

If vines are bothered by the grape leaf hopper, DDT applied as recommended for the grape control, Gunderson said.

BUY SECTION FOR $100,000

George W. Ross and Imogene Ross of Watseka, Ill., recently completed a deal whereby they became the owner of a section of land in Orthel township. The land was purchased from the Metropolitan Life Insurance Co. and consideration was listed at $100,000.

SOAP TREATMENT GOOD FOR IVY POISONING

In addition to fried chicken and potato salad, every family picnic basket should include a bar of ordinary soap. Kitchen or laundry soap is probably the best first aid for poison ivy, say health authorities at Iowa State College

To help relieve the irritation caused by the ivy, scrub the affected part with soap three or four times under running water. The soap will aid in removing the poison which rests first on the outside surface of the skin. Special scrubbing under the fingernails and between the fingers is advised but not with a stiff brush, which will only serve to rub the poison in further Severe cases of poison ivy should be treated by a doctor.

Easily recognized by its three dark green leaflets, poison ivy can cause trouble by other means than actual contact with the plant. Often just handling the clothing or articles that have touched the plant will produce irritation. A volatile, oily substance issued from the plant has poisioned sensitive persons despite the fact they stayed a safe distance from the plant.

Poisoning from the plant is usually noticed from 2hours to 5 days after contact and takes the form of itching or burning sensations, reddening of the poisoned surfaces and possibly some swelling Small blisters may form later.

Poison ivy thrives best in this part of the country along fence rows and at the edge of paths and roads, mingling with other shrubbery.

BARN MAY BURN IF HAY GOES IN WET

Can't Be Stored Safely With More Than 30 Percent Moisture Content

When a haymow suddenly bursts into flame it's too late to save the barn, but Henry Giese, Iowa State College agricultural engineer, pointed out this week that there are ways of preventing hay fires.

Moisture content of the hay, density of packing and provision for ventilation are the factors which determine whether or not spontaneous combustion is likely in a haymow, said Giese.

The United States Department of Agriculture recommends that moisture content should not exceed 30 percent when the hay is stored, and says that mows containing 10 tons or less are not likely to heat to a dangerous degree.

Chopped hay, because of its greatness density, will not ignite as rapidly as long hay, since the supply of oxygen is restricted

What To Do

Hay in barns is more subject to heating than hay in stacks. Giese says doors and windows in the barn should be opened to allow warm, moist air to escape

Salt has not proved satifactory in keeping hay from spontaneous ignition.

Most hay fires occur about 1 month after harvest. They shaw a peak in Iowa during July.

Evidence of the heating can be noted either in the temperature of the hay itself, or in a strong burning odor. Later a visible vapor may be seen.

When these conditions are noted, Proceed with extreme caution, Giese advises. Do not remove all of the hay at once. That would provide the oxygen necessary to cause it to burst into flame.

Sometimes the difficulty is only with a small quanity of the hay. It can be removed if care is used.

Do not walk on the hay It can be removed if care is used.

Take Temperature

A rod pushed down through the hay, or horizontally from the sides, may help locate the hot spots. Inexpensive dairy thermometers, lowered on a the hay, can also be used If string through pipes thrust into the temperature reaches 159 degrees it is likely to go on to the danger point. At 212 degrees heating is almost certain to continue until there is a blaze.

When removing hay from the barn it is best to call a fire department from a nearby town so that water will be available Don't throw water on the hay unless it bursts into flame since this invites trouble from spontaneous ignition of hay not previously affected

Occasionally dry ice in large quantities has been used to lower temperatures and provide carbon dioxide to smother combustion. Liquid carbon dioxide, available in cyclinders at any soda fountain, has also been used.

Pipes can be driven into the hay, and the carbon dioxide discharged into them in limited quantities. This is not an expensive process, Giese points out, even though it be continued for several hours. It is much cheaper than replacing barns of hay.

After the hay has been cooled, and possible combustion smothered by the carbon dioxide, the affected hay can be removed from the barn.

Ell 4-H Boys Hold Monthly Meeting

The Ell 4-H boys met Monday evening, June 23 at the home of Doran Lackore with 14 members present.

A tour was planned for sometime in July.

Verle Lenz was chosen as delegate to the 4-H boys Short Course and Convntion at Ames, June 30 to July 2. Jack Greiman was chosen as alternate.

A committee was chosen to organize a soft ball team for the Sports' Festival. The team would like to schedule games with other clubs in the county.

There was also a discussion of table manners.

HANCOCK COUNTY BOARD PROCEEDINGS

2ND ADJOURNED JUNE MEETING

Garner, Iowa
June 23, 1947

The Hancock County, Iowa, Board of Supervisors, met in session on above captioned date, pursuant to adjournment with Supervisors F. J Schoun, John Chambers and Geo. Th Gerdes, present

The minutes of the last meeting were read and approved as read.

This being the 23rd day of June A D., 1947, a date heretofore fixed for the hearing on the proposed establishment of Drainage District No. 147, a sub-district of DD No. 105, petitioned for by Wm Smith et al, the hour for said hearing having arrived, the report and amended report of the engineer, recommending such establishment being on file, the proof of publication of notice of hearing being on file and the board being fully advised such hearing was held as scheduled

The petition, report of the engineer and objections to such establishment were read by Auditor Fred C Missal, and objections and proponents were given an opportunity to discuss the necessity and feasibility of the establishment of the drainage ditrict and objections thereto, petitioned for by Wm. E. Smith et al as recommended in the report and amended report of the engineer

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa acting for and in behalf of Drainge District No 147 a sub-district of DD No 105 petitioned for by Wm. S Smith et al that said district be and the same is hereby established as recommended in the report of the engineer and shall henceforth be known as Hancock County, Iowa, Drainage District No. 147

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption, was seconded by George Th Gerdes, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Geo. Th Gerdes, and John Chambers, aye Nays None Whereupon the chairman declared the resolution duly adopted

On motion and second, Engineer William Henschen is appoited construction engineer to supervise the construction of Drainage District No 146 and his bond as such engineer is hereby fixed at $250 00

This being the 23rd day of June A D., 1947, a date heretofore set for a letting on the construction of DD No. 146, the hour for said letting having arrived, the proof of publication being on file and the board being fully advised, said letting was held as scheduled The chairman of the Board proceeded to open all bids on file and after duly considering all bids on file, the board does find the bid of Schram Brothers of Titonka Iowa, to be the lowest and best bid on labor and the bid of the Concrete Products Corporation of Humbolt to be the lowest and best bid on material

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of Drainage District No 146 that the bid of Schram Brothers of Titonka, Iowa for labor and the bid of Concrete Products Corporation of Humbolt for material are accepted as the lowest and best bids for the construction of DD No. 146 and contracts are hereby awarded to Schram Brothers of Titonka, Iowa, for labor and to Concrete Products Corporation of Humbolt, Iowa, for material All other bids are hereby rejected.

Chairman John Chambers is hereby authorized to execute said contracts in behalf of Hancock County Iowa.

BE IT FURTHER RESOLVED that Wm Henschen, Walter Kay and Wm Boehnke are hereby appointed a commission to classify lands and assess benefits in DD No 146 and report to this board at the earliet convenience.

The foregoing resolution was offered and read by Supervisor Geo Th Gerdes, who moved its adoption seconded by Supervisor Schoun whereupon the chairman placed the motion of its adoption upon roll call the vote is F J Schoun Geo. Th Gerdes and John Chambers, ayes Nays, None. Whereupon the chairman declared the resolution duly adopted

On motion and second the bond of Wm. Henschen Engineer, on DD No. 26, is approved.

On motion and second the contract with Schram Brothers for labor on the construction of DD No 146 is approved

This being the 23rd day of June A D., 1947, a date heretofore set for a hearing on the changes in assessment made by the County Board of Review on June 9th A D 1947, the hour for said hearing having arrived, the board proceeded to organize as a County Board of Review as commanded in Section 385 Code of Iowa, 1946

There being no objections oral or written to the proposed changes in valuations made on June 9th and no objections appeared at said hearing

BE IT THEREFORE RESOLVED by the Bord of Supervisors in and for Hancock County Iowa acting as a county Board of Review that all valuations, be carried on the tax lists of Hncock County Iowa, as reported by the several assessors in Hancock County Iowa as amended by the County Board of Review on June 9th A D, 1947 confirmed on June 23rd A D 1947

Improvement Certificate numbers 1 and 2 are approved for Gilbert F Guenther and number 3 to Herman and Mary C Harth on Drainage District No. 8, Hancock County Iowa

On motion and second the board adjourned to July 2, A. D 1947 at 9 o'clock A. M

It Pays To
Trade in Klemme

BECAUSE . . . .

You often get better values from home folks whom you know.

It is easy and convenient to make returns or exchanges.

Get replacements in case of breakages.

Get friendly advice concerning the merchandise you buy.

Get prompt delivery service.

Get full use of your "charge it" credit.

Get little services—a piece of string—package wrapped—a nut replaced—knife sharpened—handy use of telephone—park a package, emergency service outside store hours.

YOU HELP BUILD A BETTER KLEMME BY making your dollars work at home helping your home merchant become a better merchant—better citizen—more generous contributor to community needs and bigger taxpayer to help support your town. Helping your home merchant helps Klemme grow.

We need your business, we want your trade, we ask you to help us give you better service.

AROUND IOWA

INTO THE RIVER

One of the "narrower" escapes reported in the recent floods was that of Fred Morse and son Franklin, of Humeston. While crossing the Wapsipicon river near Anamosa, their truck was swept from the bridge by the stiff current. They climbed to safety on top of the truck and were rescued by boat.

OPERATION ALLIGATOR

What happened to a postoffice crew at Algona shouldn't happen to a dog, report the Kossuth County Advance One of the mail clerks was opening a sack of mail and out slithered an alligator, which was being shipped from some one down south by parcel post, to an Algonian. The reptile caused a good deal of commotion in the postoffice. Several of the clerks have now sworn off drinking — er, buttermilk; or anything.

WOUNDED

While shooting at a can floating in the Rock River, Alfred Koster, 13, hit a girl on the opposite bank with a .22 calibre bullet. The girl, Dorothy De Jong, was wounded in the hip but will recover.

RUNNING WATER

A new spring of cold fresh water has started flowing on the farm home of Rae Scott, near Harlan Mr. Scott is not pleased. The new spring is located in his garage To have running water in this building was not part of his plans, the owner says.

SAME DAY

At Williamsburg, Oscar Pettibone, passed away on June 10, a few hours after the death of his nephew, Frank Wallace, at North English. The uncle was 84 years of age, the nephew 71.

BURNED LEG

Beverly Nordstrom, 9, of New Hampton, stepped into a hole caused by the rains last week, came out with a badly burned leg. The water had undermined the earth around a hot pipeline, and the resulting steam caused second and third degree burns on Beverly's leg.

SLUGGED EDITOR

Editors hardly ever get "slugged" any more, although at times our readers may feel like it. But at Sioux Rapids last week, W. E. Farrel, editor of the Bulletin Press, was struck behind the right ear while seated at his desk and robbed of $21.

CAVE-IN

Russell Kingsburg, War Veteran of Defiance, was buried in a 12-foot ditch near Bancroft while working with a dragline there recently. One cave-in buried Mr. Kingsburg up to his chin. As workers sought to dig him out, a second cave-in covered him completely It took 45 minutes to recover the body

FRED AUSBORN RAISES STRAWBERRIES LARGE AS GOLF BALLS

Every once in awhile Fred Ausborn, east of Klemme, brings in a bunch of strawberries to the Times Office. Tuesday Fred brought another quart of berries as large as golf balls which he picked from his ever-bearing patch.

For a couple of years Fred has supplied us with his berries as late as Thanksgiving. His strawberry plants are of no particular variety and seen to have sort of run hog-wild from the original patch It would not surprise us if Fred came along one of these days with berries as big as pumpkins.

New Drugs Check Pneumonia Following Injury to Chest

Pneumonia, following injury to the chest, can be prevented with large doses of penicillin or sulfadiazine, according to Dr. Edward Phillips, writing in the Journal of the American Medical association. Dr. Phillips presents his observations on 73 patients treated for pneumonia following injury to the chest.

The author cites two investigators who demonstrated by animal experimentation how a blow to the chest, with or without fracture of the ribs, can produce injury to the lungs. The blow stimulates the vagus nerve, which extends from the cranium to the lungs, to contact the bronchial tubes which results in a partial collapse of the lung. This collapse area becomes infected because it lacks aeration.

Injections of atropine into the veins, which paralyzes the terminal fibers of the vagus nerve, will prevent or minimize the chances of collapse and infection following injury to the chest, states the author. Large doses of penicillin and sulfadiazine will sterilize the lung area.

Additional facts regarding the 73 patients follow:

In 54 patients (74 per cent) pneumonia developed only on the same side as the injury.

The majority of patients had a mild type of pneumonia.

Over 92 per cent of pneumonia cases occurred within six days of the injury.

Over 50 per cent of the patients recovered within one week.

Three patients died with a resultant mortality rate of 4.1 per cent.

Buy Less Expensive Food To Cut Family Meal Costs

To cut food costs without lowering the nutritional value of family meals, buy the less expensive grades where such a choice is possible. Standard packs of canned vegetables or fruits are just as high in food value as choice or fancy packs, but are less expensive. Grade B and C eggs are perfectly good for many purposes, and commercial and utility grades of beef can be prepared appetizingly with lower cost than the more expensive grades.

Evaporated or dried milk can be substituted in many dishes when it is cheaper than fresh milk. Canned citrus juices are frequently cheaper than fresh fruit and can furnish the meal's requirements of vitamin C. Tomatoes, raw cabbage and turnips also provide a good supply of this vitamin.

Foods that are in season are usually the best buys, and such old standbys as carrots and potatoes are nearly always good bargains. Whole-grained or enriched flour and cereal provide extra food value at little or no additional cost. Not only is molasses an inexpensive substitute for white sugar, but it also contains valuable iron.

Return the milk bottle to the refrigerator immediately after using.

IT'S OFF-FLAVOR SEASON FOR MILK

Weeds in Pasture Will Often Cause Bad Odors and Flavors in Milk

Objectionable flavors and odors, likely to appear in milk and cream this time of year, may be the result of cows eating highly flavored weeds and feeds, says Iowa State College extension dairyman A. W. Rudnick.

Flavors and odors absorbed by a cow from highly flavored feeds and weeds are more noticeable in the milk just after it is drawn and usually do not increase with time.

If there are off flavors and odors in the milk, eradicate the weeds from the pasture, Rudnick suggests. If time does not permit a thorough search of all the fields where cows are grazed, mowing will often control the weeds causing the objectionable flavors and odors.

Pasture "Flavors"

Weeds are not the only cause of milk tainting Any green, luxuriant pasture may impart undesirable flavors unless cows are removed a few hours before milking time, Rudnick warns.

Rape seriously affects the flavor of milk and should never be used as a pasture for dairy cattle

Cows should be removed from the pasture 3 or 5 hours before milking when using rye pasture

Stagnant Water

Cows should be kept out of stagnant water and mud Drinking stale water may cause rapid curdling of milk even though it has been properly cooled and cared for Bacteria picked up in muddy water will produce a bitter, musty flavor in the milk and cream.

Fencing off or filling in is recommended for getting rid of stagnant pools.

Milk and cream having objectionable flavors and odors should not be mixed with milk produced by the rest of the herd

SELLS SWISS BULL

C E LaFavre, Klemme Iowa, has recently purchased the registered Brown Swiss bull, Mischke's Colonel, 75412, from Lynn Mischke, Churdan, Iowa,, according to a report from Fred S. Idtse Secretary of the Brown Swiss Cattle Breeders' Association, Beloit, Wisconsin

CHECK SEPARATOR IF FAT LOSSES ARE EXCESSIVE

Whenever skimmilk shows more than 02 percent butterfat, farmers are losing money through wasted cream, says Iowa State College extension dairyman A. W. Rudnick.

Fat loss in excess of 02 percent is avoidable. Where losses are greater the cream spearator and the operator should be checked.

The most common causes of excessive fat in the skimmilk, according to Rudnick, are:

Using a separator that is not absolutely clean.

Not flushing out the bowl with hot water before turning in the milk.

Disks or other ports within the bowl that are bent, have rough surfaces or are badly worn. Rudnick says the bowl should always be sent to the factory for rebalancing when in need of new parts or other repairs.

Leaky or no float.

Bent spindle, loose neck bearing, or any other factor that will cause the bowl to wabble.

Separator not sitting level; height of bowl not properly adjusted.

Speed of bowl too low. Using an electric motor does not guarantee the proper speed, Rudnick points out.

Abnormal milk such as high acid or mastitis.

Rudnick points out that leaving more than .02 percent fat in the skimmilk, even though it appears insignificant on a day-to-day basis, adds up to quite a sizable amount over a year's time.

For example, he says, allowing 1 percent butterfat (98 percent avoidable loss) to go into skimmilk in a year takes more than $200 out of the cream check at current butterfat prices.

"SHE DOESN'T SPEND MUCH TIME WASHING DAIRY UTENSILS ANY MORE"
"NOT SINCE SHE'S USING WETTING AGENTS"
WETTING AGENTS SAVE TIME

FOR TIME SAVED . . .

Two Minutes To Wash Separator

It can be done! Use a wetting agent, and follow these five steps:

1. Rinse supply tank with a cup of warm water, and pour a pint of warm water over float.
2. Put a tablespoon of wetting agent in supply tank and add a pail of warm water. Let it run through separator.
3. Brush the supply tank inside and out and wipe off the front of the separator.
4. Dismantle the machine, wash parts and place them in supply tank.
5. Pour a kettle of boiling water over all parts, drain and hang up to dry.

Wetting agents make washing of milking machines and other utensils easier.

U. S., Russia Fight Diplomatic Battle

'Truman Doctrine' Termed Preventive Against Conflict

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON.—There is no imminent danger of war between the United States and Russia.

You've heard that before, and as far as I know, it is true.

There is a diplomatic struggle going on between the two countries, the scope and importance of which few people realize.

When I say "important," I mean important in all senses but one—human life — in which a real, shooting war is important. Certainly involved are the other two factors in the trinity of rights to which Americans believe they are heir—liberty and the pursuit of happiness

Baukhage

This has been clear to observers in Washington whether they merely look with their eyes at the external evidence, or scent with news-noses the currents which are wafted over transoms and under the big oak doors of the sanctum sanctorum of the sanctissimi.

Sharp words have tumbled over one another since the first verbal barrage, which was the Presidential message of March 12, 1947, sometimes described as embodying the "Truman Doctrine." May I remind you of a few of the barbed shafts in that message?

"The very existence of the Greek state is today threatened by the terrorist activities of several thousand armed men, led by Communists, who defy the government's authority at a number of points, particularly along the northern boundaries . . ." said the President.

"One of the primary objectives of the foreign policy of the United States is the creation of conditions in which we and other nations will be able to work out a way of life free from coercion. . . .

"We shall not realize our objectives, however, unless we are willing to help free peoples to maintain their free institutions and their national integrity against aggressive movements that seek to impose upon them totalitarian regimes. This is no more than a frank recognition that totalitarian regimes imposed on free peoples, by direct or indirect aggression, undermine the foundations of international peace, and hence the security of the United States. . . .

"The peoples of a number of countries of the world have recently had totalitarian regimes forced upon them against their will. The government of the United States has made frequent protests against coercion and intimidation, in violation of the Yalta agreement, in Poland, Romania, and Bulgaria. I must also state that in a number of other countries there have been similar developments. . . ." (He knew what was in the Hungarian cards.)

"One way of life is based upon the will of the majority, and is distinguished by free institutions, representative government, free elections, guarantees of individual liberty, freedom of speech and religion, and freedom from political oppression. . . .

"The second way of life is based upon the will of a minority forcibly imposed upon the majority. It relies upon terror and oppression, a controlled press and radio, fixed elections and the suppression of personal freedoms."

Strong words, those—all quoted from the Truman message

Congress Follows Words With Action

Then came deeds. Congress implemented the President's message by authorizing the loan of three hundred millions to Greece and one hundred millions to Turkey.

Missions were sent at once to both countries.

The United States concluded with Britain arrangements for an economic merger of their respective zones in Germany regardless of Russian (and French) failure to go along.

Then came the expected coup d'etat in which the Communists, with the Red army backing them and the aid of the Communist-controlled secret police, took over the anti-Communist government of Hungary. Immediately there followed these steps:

A message of congratulation and support was sent to the Premier of Italy, Alcide de Gasperi, then in the process of forming a government without Communist co-operation and against Communist opposition.

Negotiations leading to the "unfreezing" of Italian property (including money) in this country were announced at the same time.

Hungarian credits here for surplus property supplies were cut off. There were indications that a loan earmarked for Hungary would be cancelled.

A Hungarian-Russian transport company was told that its planes no longer could fly over the American zone in Germany.

Senator Vandenberg made his ringing speech in the senate declaring that Soviet pressure on Hungary demanded a trial before the forum of the United Nations."

The United States pressed for settlement of demands on Yugoslavia for planes shot down by Yugoslavia last summer.

These and other steps which undoubtedly will be taken before this article is in print, and still others in the making, are part of a vigorous foreign policy by which we mean to block Communist aggression wherever it appears in the world In other words we have undertaken a form of positive activity in the foreign field, the scope of which has never been paralleled in our history.

Supporters of this policy (the majority of congress) believe it is a preventive, not an aggressive step.

They do not believe it is a foreign policy which von Clausewitz, the German military authority, described as something the "extension" of which is war. They believe it can stop, will not start, military conflict.

Possible War Of Extermination

The policy is based on this theory, as nearly as I can absorb it from the people who know:

Unless economic conditions are restored to normal throughout the world, chaos will result, communism will engulf Europe, and eventually the clash between communism and democracy as we understand it, will mean war between Russia and the United States. Since it now is believed that Russia will have the atom bomb in from four to ten years (cf. report of the President's advisory commission on universal training), such a war would mean extermination, if not of the human race, certainly of civilization as we know it.

Granted this is true, the spread of communism in Europe (and elsewhere) must be checked now because:

If either France or Italy goes Red, Russia will not co-operate in a joint peace agreement for Germany and Austria. Without such agreement, Europe cannot be restored to normal. Chaos and communism will follow.

If Russia is stopped in her tracks —if we can prevent her from moving south into Greece, Turkey and the Middle East, and west of the line she holds at present from her German zone south through the Balkans to Greece, she will be forced to stop aggression in Europe; forced to co-operate with the western powers for her own preservation.

That as I understand it, is what some people call the "Truman Doctrine." It isn't quite fair to give it such an exclusive label when it never could have been put into effect without the yeoman service of men like Vandenberg and the other bi-partisan support it has received.

This does not mean that we have "lost faith in democracy" or its ability to compete in a fair field with communism. It means we are going to see that a fair field is maintained; that Russia will not be permitted to create chaos or to draw on the type of force and terror she has used so far (latterly in Hungary), to enforce her way of life upon the world.

NEWS REVIEW

Sugar Rationing Halted; Retail Meat Prices Soar

IT'S OVER:
Sugar Is Back

For the first time since April 28, 1942, Americans, and especially housewives, could go shopping without ration coupons as the government called a halt to the rationing of sugar for households, restaurants and hotels.

Secretary of Agriculture Clinton Anderson announced the move, explaining that it was made possible by the appearance of larger supplies of sugar than previously had been thought available.

Price controls on sugar, as well as rationing of the product for industrial use will continue, however. All sugar controls are scheduled to expire October 31 unless congress dictates otherwise.

Three reasons which acted to bring about an end to sugar rationing were:

1. Allotment by the International Emergency food council to the United States of 350,000 tons of sugar from Cuba in addition to that which was allotted earlier in the year.

2. Presence of still more surplus sugar in Cuba, which will help cut down demands from other parts of the world.

3. About 200,000 tons of Javanese sugar now will be offered to world users.

UP AGAIN:
Meat Prices

Rapid, and in some cases unexplained, advances in the retail prices of meat have been reported from many sections of the country.

Some of the reasons offered for the price jumps were: Seasonal influences, higher feed costs, heavy foreign purchases. In a number of instances, however, packers admitted that they were puzzled over the sharp increase in retail prices.

Steak, which sold for 70 to 80 cents a pound six months ago, was being listed as high as $1.25 in Scranton, Pa., and a dollar in New York. In Chicago, retail meat prices experienced a general increase of 10 cents or more on popular and scarce cuts in mid-June.

There was one bright prediction, however: When the autumn beef run begins, prices are expected to drop as much as 25 per cent.

HARSH WORDS:
Note to Russia

The United States has accused Russia of using threats and coercion to instigate the recent Communist coup d'etat in Hungary.

A strongly worded note to the Soviet union charged the Soviet commander in Hungary with violating terms of the Yalta agreement which guaranteed that liberated nations would retain their sovereignty.

Implicit, but not specifically stated, in the note was a warning that the United States will call for a United Nations investigation of the circumstances under which Hungary's democratic regime was overthrown and Communist rule installed.

Main proposal embodied in the protest was that the United States, Great Britain and Russia make a joint investigation of the political situation in Hungary. Russia previously rejected two earlier American requests for such a probe.

The U. S. position is that Hungarian Premier Nagy was forced into exile and was compelled to resign in order to make way for the Communist seizure of power.

PUSHBUTTON:
Look, No Hands

"Pushbutton" automatic flight, a new field in aviation, was ushered in when a pilotless four-engine army transport plane landed at Wilmington, Ohio, after a 2,000-mile trip from Long Beach, Calif., during which no member of the crew touched the controls.

It was the longest flight of its kind to be completed wholly by means of the pushbutton automatic system, not to be confused with drone planes or remote control flight.

In the automatic flight set-up, all necessary flight data was fed electrically into a master control panel from within the plane itself.

Advocates Training

Dr. Karl T. Compton, chairman of commission on universal military training, told congress that plan for UMT was "conceived as a means of safeguarding liberty and not as a means of preparing for war."

FAVORABLE FORECAST

Wheat Crop To Hit New Peak

WASHINGTON.—Despite the wet, cold spring, a record-shattering wheat crop of 1,409,800,000 bushels is indicated this year, according to the department of agriculture forecast based on conditions as of June 1. The inclement weather, particularly in May, was unfavorable for planting of some feed grains but wheat, the forecast pointed out.

The prospective wheat crop, largest on record, compares with 1,275,000,000 bushels forecast a month ago and 1,155,715,000 bushels harvested last year, a record up to that time. The 10-year average production is 843,692,000 bushels.

The government forecast showed the winter wheat prospect to be 1,093,071,000 bushels and 316,822,000 bushels for spring wheat.

The wet spring was responsible for a reduced acreage of oats, the report said, and a crop of only 1,247,333,000 bushels is in prospect. This compares with 1,509,867,000 bushels harvested last year.

No estimate was made of the corn crop as it is too early in the season for a reasonable degree of accuracy, but the report said that the abnormally cool, wet weather of May caused 20 to 25 per cent of the corn acreage to remain unplanted on June 1, which is rather late.

An unequalled winter wheat crop is in prospect for all of the Great Plains area, and Texas, Oklahoma, Kansas, Nebraska and Colorado expect record production, the report said. While growth and development of the crop was delayed by a cold wet spring in all but the Pacific coast states, losses from wet weather have been slight to date.

In the earliest sections of Texas and Oklahoma harvest got under way around June 1, at least 10 days later than last year.

Major spring wheat states had fairly favorable weather conditions early in May, which enabled growers to plant close to their intended acreage, although seeding was somewhat later than usual. The crop went into the ground several weeks later than usual in the Dakotas and Minnesota, where about three-fourths of the acreage is grown, but the plantings were under favorable moisture conditions.

PEACETIME MISSION

Weekend Fliers Are Main Cog In Marine Corps Air Reserve

WNU Features.

"Week-end fliers," they're generally dubbed, but these Leatherneck volunteers play an integral role in the marine corps aviation reserve program. The marine air reserve again is ready to resume its peacetime mission, corps officials emphasize in reporting on its first year of activities, which ends on July 1.

As the initial step in launching the organized reserve program 12 months ago, 20 Leatherneck fighting squadrons composed of week-end fliers were activated Since then a total of 24 fighting squadrons have been formed.

Motivated by the principle that the reserve is the force needed in an emergency, no effort is spared to make the reserve a combat-ready unit, according to Brig Gen. C. F Schilt, commander of the marine air reserve training command.

"Every flight has been conducted to further the pilot's military proficiency," General Schilt insists. Training for enlisted men commenced with the first drill period and has been organized on every level of skill from basic training to aircraft engineering, he adds.

For their annual summer maneuvers, the marine week-end fliers will congregate at Cherry Point, N. C., and El Toro, Calif., from August 14 through August 29. The 12

RESERVE FLIERS
Ready for Combat

east coast squadrons will assemble at Cherry Point while the 12 west coast air reserve units will participate in the El Toro maneuvers.

The maneuvers are designed to co-ordinate all individual and squadron training with problems of close air support of marine ground units. While close air support will be the primary function, air defense will play an important secondary part.

Although the fighting squadrons were activated first, two other phases of the marine corps' postwar program also have been emphasized. They are formation of the marine ground control intercept squadrons and training of the volunteer reserve.

The ground control intercept squadrons, successors to the air warning squadrons of World War II, are equipped with radar and communications gear with the mission of detecting enemy aircraft and controlling friendly aircraft to intercept enemy planes.

Training of members of the volunteer reserve has been conducted on marine air stations at both El Toro and Cherry Point. Reserve units are receiving training as funds and facilities permit.

This Proves There's No Perfect Crime'

NEW CASTLE, DEL.—As New Castle's night police force consists of only one patrolman, two burglars thought they had figured out the perfect crime.

They broke into a grocery store directly across the street from the state police station, where they could watch Patrolman Francis J. Hewlett sitting at his well-lighted desk.

However, Hewlett spied the burglars and telephoned the state police barracks five miles away. "Two men just broke into Platt's grocery, right across the street," he said "They can see me, so if I make a move they'll scram."

Ten minutes later the burglars, still watching Hewlett, were startled when state policemen pounced on them.

Leaves Legs Behind

PITTSBURGH, PA. — Someone walked away and left his legs behind. Police report finding two artificial legs complete with socks, garters and shoes. The legs, they said, had been worn recently.

F. F. A. Boys Build Shop From Salvaged Lumber

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

Participating in observance of National Air Week, South Dakota Flying Farmers will make a statewide aerial pilgrimage over 100 towns this weekend Col Joe Foss of Sioux Falls, national guard air squadron leader and former marine ace, will lead the air cruise of at least 50 planes. . With Clyde Ice, the state's pioneer aviator, in charge, a new flying service has been opened at the Pierre, S D, airport, recently returned to city control from the army Two of Ice's flying sons, Cecil and Charles, will assist in operating the school and charter service. . . The slogan, "Air Power Is Peace Power," was emphasized at the first national air power conference of the Rocky Mountain Empire held in Denver under auspices of the American Legion Headline speakers were Gov. Lee Knous; Brig. Gen. Leon W. Johnson, commanding the fifteenth air force; Brig Gen Frederick H. Smith Jr, commanding general of the Civil Air patrol, and Rear Adm. Irving M McQuiston, adviser on naval reserve to chief of naval operations. . . With 27 charter members, flying enthusiasts of Manchester, Iowa, have formed the Manchester Flying club. Aviation interest in the community has increased steadily since establishment of a flying field. . . A fleet of 28 privately owned airplanes carried a group of fishermen from Storm Lake, Jefferson and Des Moines, Iowa, to Bemidji, Minn., for a weekend of fishing.

• • •

Dusting farm crops by airplane has become an important business in Idaho, Oregon and Washington. In these three states more than 200,000 acres of farm crops were dusted by plane during the past year.

• • •

UNIQUE OPERATION

One of the nation's most unique flight operations is going into its third year of successful service. John Riedl, manager of the Heywood-Gull Lake airport at Nisswa, Minn., recently completed two years of power line patrol for Minnesota Power and Light company.

During that time he has flown 25,000 miles in a Piper Cub, flying a few feet above the 100,000 volt lines, which run north to the Mesabi iron range over heavily wooded country. In contrast to foot patrols, which required six weeks to inspect the company's lines, Riedl and his observer, John Mattson, make regular trips over the entire line every other week.

Damage from lightning, forest fire, windstorms and fallen trees are among the causes of power failure which must be watched. Most frequent trouble spotted by the aerial observers, however, is broken insulators atop the 60-foot poles which have been shot at by trigger-happy hunters.

• • •

NOT A CRASH! . . . This might have been a crash—but wasn't. A coast guard helicopter is deliberately landed in the sea, where no land plane should be, to test the newly developed emergency flotation gear. The equipment makes it possible to land on the water or on marshy ground.

• • •

ENGINEERS TAKE TO AIR

Highway engineers are making increased use of aerial photography to aid location of new traffic arteries and to cut survey costs, according to the American Public Works association. New aerial survey techniques, perfected during the war, are producing highly accurate maps, which also are being used to determine best routes for arterial highways through and around cities, to aid in traffic flow and congestion studies, and even to determine types of soil along proposed rights-of-way.

Kidneys Must Work Well
For You To Feel Well
24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.
If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.
Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains; getting up at nights, swelling.
Why not try *Doan's Pills*? Used the country over. *Doan's* stimulate the function of the kidneys and help them flush out poisonous waste from the blood. They contain nothing harmful. Get *Doan's* today. Use with confidence. At all drug stores.
DOAN'S PILLS

CLEAR CASE OF THE JITTERS . . . New York subway riders who wonder every evening whether the subways will be *running* to take them to work in the morning can take consolation from this picture of two officials of the New York transport workers union who appeared on the verge of hysteria as they presented demands for higher pay. Fingernail chewer is Austin Hogan and to the right is Mike Quill, president of the TWU.

ACCUSED . . . Charged by American authorities with committing "dreadful" atrocities against captured prisoners of war in Japan, Tomoya Kawakita, American-born Japanese, was arrested in Los Angeles for treason. An American soldier whom Kawakita is said to have mistreated recognized him and put G-men on his trail.

MAN OF ACHIEVEMENT . . . "Worker Father of the Year" is an appellation any father might well envy, so John Van Hoose of Richardson, Ky., can be excused for showing a little pardonable pride over being given that honor by the national Father's Day committee. Van Hoose, shown here being interviewed by two ladies of the press, is the father of 15 living children and the grandfather of an additional 15.

TO HEAD MISSION . . . Dwight P. Griswold, former Republican governor of Nebraska, has been named by President Truman to head U. S. mission to administer American aid to hard-pressed Greece.

PATIENCE ON A PORCH ROOF . . . Scenes such as this one which occurred at Ottumwa, Iowa, were common for a time throughout the vast flooded areas of the Middlewest. Hardest hit city, however, was Ottumwa where thousands of persons were driven from their homes when the Des Moines river overflowed its banks to inundate most of the town. Along the Mississippi, farm lands were flooded from Keokuk, Iowa, down to St. Louis.

MINISTER . . . This picture of Selden Chapin, minister-delegate to Hungary, was taken as he entered the White House for a visit with President Truman, and probably to talk about Hungary.

ASKS MORE PAY . . . Engaging in serious discussion of money matters are (left to right) Secretary of State George C. Marshall; Sen. Styles Bridges (Rep., N. H.), chairman of the senate appropriations committee, and William Benton, assistant secretary of state. Marshall asked the committee to restore all but five million of the 90-million-dollar house cut in state department funds which he said should not be whittled down at this particular time.

BROTHERHOOD . . . Radio songstress Kate Smith received 1947 American brotherhood arts and sciences citations for her work. The award was given by the National Conference of Christian and Jews.

HOOVER REPORTS . . . FBI Chief J. Edgar Hoover was called before senate judiciary committee to explain why FBI's investigation of primary election fraud in Kansas City was not carried to completion.

SUNDAY SCHOOL LESSON

Moral Integrity in Our Everyday Lives

LESSON TEXT FOR JULY 6—Job 1:1; 27 1-5, 31 19-28

MEMORY SELECTION—My righteousness I hold fast, and will not let it go: my heart shall not reproach me so long as I live.—Job 27 6.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute, Chicago.

MODERN problems may well be solved by the principles found in Old Testament Scripture. Man is essentially the same as he always has been; sin and temptation to evil have only changed their outer trimmings. Above all, the Word of God is eternal in its validity and effectiveness.

We learn from Job and his experiences that it is possible so to live by the grace of God, that he can be pleased with our lives. That is an encouraging fact. Job was just a man, but he was a man who was

I. Upright and Good (1:1).

SOME liberal critics of the Bible have tried to prove that Job was not a real man, but other Scripture makes it clear that the words "there was a man" (v 1) states a fact. (See Ezek. 14:14 and 20; James 5:11)

He was a man with a large family, with great flocks and herds, and so a man of business, and the husband and father in a growing and active household. But in it all he was upright, and a good, God-fearing man.

Many make excuses for their failure to serve the Lord. They say that their business duties and relationships make it just about impossible. Others say that family situations and responsibilities keep them from service and worship of the Lord.

The experience of Job explodes all such excuses and squarely faces us with the fact that it is possible to live for God in the midst of the very circumstances of modern life.

II. Tried and True (27:1-5).

AFTER Job had lost his property, his children and even his health, three of his friends came to comfort him. But they only added to his sorrow by accusing him of being sinful, and suffering only what he deserved.

Job in these verses is replying to them We note that in his ignorance of God's purposes, he accused God of being cruel to him (27.2; 30 21). This matter was later to be straightened out with the Lord.

But even now when he did not understand God's dealings, and stood there sick and destitute, he maintained his integrity. He would not turn from the Lord, nor would he be led off into wickedness

It is possible for a man to be beaten and bruised and bewildered, and still true to the Lord. Let's never forget that!

III. Kind and Fair (31:19-23).

JOB had been a rich man, but had not let his own prosperity dim his eye so that he could not see the need of his poor neighbor. He was not among those who, because they are well fed, can see no point in all the fuss about the hungry people round about.

There is something very fine and worthy of our imitation here. It is so easy to take what we have as a special favor from the Lord, to be retained and used by us, when we ought to recognize it as a matter of stewardship for the Lord.

A vital part of real moral integrity is the right use of possessions. Many a man or woman who has passed all the other tests with flying colors comes to grief at this point.

IV. Spiritual and Faithful (31: 24-28).

THERE were plenty of temptations in Job's day, as there are now, to depart from the worship of the true God to other modes of devotion.

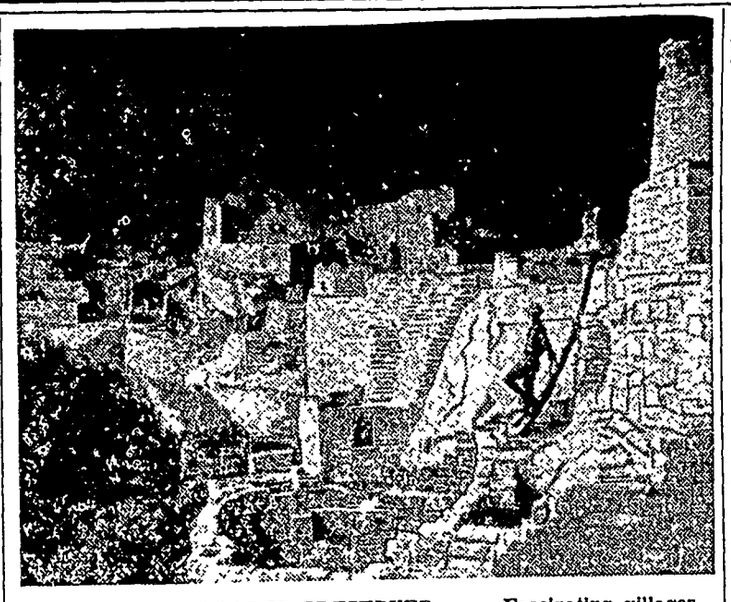
The worship of the sun was common, and Jeremiah 44:17 shows that it continued for generations In fact, what shall we say of the world-wide devotion to astrology in our day.

Then there was the temptation to worship gold. How up-to-date that is, for do we not have millions who worship "the almighty dollar," yes, even if they do not have it.

To all such temptations Job said a resolute "No." He would not even permit his innermost heart to be enticed secretly (v. 27). He stood true for the God he loved and served.

Who will question that one of our greatest needs in the world today is for men and women who, by the grace and blessing of God, will live good and upright lives, true to the Lord, and sacrificial, in real loving-kindness to men. God give us men, yes, that kind of men!

Released by Western Newspaper Union.



ANCIENT VILLAGES PRESERVED . . . Fascinating villages, built by Indians centuries ago in inaccessible caves perched high in canyon walls, are preserved in Mesa Verde National park. The cliff cities, of which Cliff Palace (above) is typical, are noted for their size and excellence of building techniques.

NOT ONLY SCENERY

Rain Forests, Cliff Cities Show Diversity of Parks

WNU Features.

"National Parks" has become a synonymous phrase for superlative scenery, but there are also many other diverse interests represented in the national park system of the United States. In Olympic National park in Washington, for example, are unusual "rain forests," where, as a result of a mild climate and abundant winter rains, a tropical appearing jungle has been created far north in the temperate zone Here also is the home of the rare Roosevelt elk, for the protection of which a part of the park was established as a national monument as early as 1908

On the other hand, far to the south of the Olympics in the southwestern corner of Colorado Mesa Verde National park preserves the ruins of a once flourishing civilization which was brought to an end by a lack of rainfall. The national parks also include two areas famous for their health-giving springs—Hot Springs National park in Arkansas and Platt National park in Oklahoma.

The Olympic mountains are known to thousands of veterans of World War II who returned to Puget sound ports from the Pacific theaters From far out at sea these glistening snowy peaks were the first welcoming sight of home Mount Olympus, nearly 8,000 feet in height, and a score or more of other ice-capped mountains are included in the 1,325 square miles of Olympic National park Occupying the heart of a great peninsula, this park is surrounded on three sides by water, the Pacific ocean on the west, the Straits of Juan de Fuca to the north and Puget sound on the east. Within a few hours of Seattle and Tacoma are virgin forests, alpine meadows, deep blue lakes and sparkling trout streams, which constitute one of the finest unspoiled wilderness areas in the United States.

National Parks
Eighth
In a Series

The rain forests are found in the lower valleys on the western slopes where from September 1 to June 1 there is an average annual rainfall of 142 inches, nearly 12 feet. In these rain forests are Douglas firs, measuring up to 17 feet in diameter and 221 feet in height.

There are many miles of foot and horseback trails in Olympic National park and a motor highway encircles the peninsula. From this main highway other roads radiate for short distances into the park.

• • •

IN THE CORNER of Colorado where the Rocky mountains meet the arid highlands of the Southwest there rises a high flat-topped table-shaped mountain. Early Spanish explorers called it the Mesa Verde, for the table top, heavily forested with pinon and juniper, was always green. On this green mesa and in its caves and canyons peaceful farming Indians lived for 1,300 years, cultivating the soil and built their villages or pueblos. To preserve the ruins of these fascinating villages, Mesa Verde National park has been established. The area of the park is 80 square miles.

According to archeologists the Indians came to America from their Asiatic homeland by the northern route thousands of years ago and for many centuries lived as roving hunters. About the beginning of the Christian Era certain of early hunters arrived in the region of the Mesa Verde. They liked the security afforded by this high mountain with its peculiar cliffs, and settled down to farm. First inhabitants of the Mesa Verde were known as Basket Makers for, while they made excellent baskets, they had no pottery. nor did they use the bow and arrow They lived in open caves and hunted with the throwing stick. Later they learned the art of pottery making, acquired bows and arrows and built simple pit houses.

About the time that Charles Martel was defeating the Moors at Tours, or roughly in the Eighth century, a new people joined the Basket Makers on the Mesa Verde and together they made remarkable cultural progress. On the mesa top they built hundreds of villages, some with buildings of mud and others of stone. They improved their pottery and began the weaving of cotton cloth.

These people apparently were peace loving, and in the 11th century about the time that William the Conqueror was landing in Britain, they also were beset by enemies. Many of them, therefore, moved off the open mesa top and constructed their villages in inaccessible caves located high in canyon walls. These villages, many of them well preserved today, are astonishing both for their size and excellence of building techniques.

Toward the end of the 13th century, a 24-year-long drouth forced these people to abandon their cliff cities and move to more favorable lands.

• • •

HOT SPRINGS National park, located in a mountainous region of central Arkansas, contains in its thousand acres 47 mineral hot springs reputed to have therapeutic value These springs were known to the Indians and early Spaniards, and were used by them. Within the national park are free campsites and there is a free government bathhouse for people who cannot afford to pay for private baths.

• • •

PLATT NATIONAL park, containing bromide and sulphur springs, is located at the town of Sulphur, Okla. Small in area, this park is known chiefly by those for whom the waters are prescribed The park is provided with free campgrounds and picnic areas, and overnight accommodations may be found in Sulphur.

VIRGIN FOREST . . . Large spruce trees abound along Hoh river in Olympic National park, one of the finest unspoiled wilderness areas in the country.

Primitive Area Is 'Last Frontier'

LEWISTON, IDA. — Preservation of the 1,800,000 acres of primitive area in north Idaho as the last frontier in the United States "for all time to come" is the objective of the U. S. Forest service.

Generally reputed to be the wildest region in America, the Selway Bitter Root primitive area embraces Bitter Root, Nez Perce, Clearwater and Lolo National forests. Travelers can enter the area either by plane, a western pack train or by hobnail boots, plus plenty of good old-fashioned determination.

R. H. Rutledge, Idaho regional forester, summed up the plans when he said: "We wish to hold and maintain frontier conditions such as our forefathers met with mystery, romance, freedom of use and inspirational qualities unimpaired and preserved for future generations."

Let's Have a Party With Games, Tricks

Parties that Click

WHO said the summer's no time for parties? Make yours a hot-weather hit with cool drinks, light refreshments and some quiet games.

* * *

Pencil and paper games are appropriate for summertime. So are magic tricks and fortune-telling stunts. Word games are popular, too, because they can be played while sitting down

To give a really successful party, send for our booklet No 60. Send 25 cents (coin) for "Games for Good Parties" to Weekly Newspaper Service, 243 West 17th St., New York 11, N. Y. Print name, address, booklet title and No. 60.

ASK ME ANOTHER ?

A General Quiz

1. What fighter earned the most in a single match?
2. For what other country does U. S. A. stand besides the United States of America?
3. Who sold drugs before there were drugstores?
4. Do bees like saccharine?
5. How many people in India go barefoot?

The Answers

1. Gene Tunney, who received $990,000 as his share of the receipts from his second match with Dempsey.
2. The Union of South Africa.
3. The grocers.
4. No, it is tasteless to bees.
5. About 290,000,000 or over 80 per cent of the population.

CAREFUL CONSERVATION OF BAIT MINNOWS URGED

With the seasons on all fish now open, the State Conservation Commission is urging anglers to conserve bait minnows. In many areas there is an acute shortage of minnows for bait, and part of the trouble has been caused by taking more than are and by careless handling in bait buckets and minnow boxes. Commercial bait dealers are governed by definite laws designed to prevent waste, and the Conservation Commission feels that all sportsmen, if they realized the seriousness of the minnow situation in this state, would cooperate more fully in a minnow conservation program Minnow seiners are urged to take only as many as they have immediate use for or for which they have adequate storage tanks All small minnows should be returned to the water as quickly as possible, and no streams should be seined too heavily.

Bait seiners are reminded that, except for commercial dealers, a minnow seine may not exceed 15 feet in length and must have a mesh not smaller than one-quarter inch bar measure or larger than one-half inch bar measure It is to be remembered that minnows for food supplies for game fishers are necessary and minnow conservation is as important as the conservation of any other wildlife resource

The Conservation Commission has closed 39 state owned lakes minnow seining in an effort to increase the natural food supply in these lakes.

The following are closed for the 1947 season: Spirit, West Okoboji, East Okoboji, Upper Gar, Minnewashta, Center Silver, Marble, and Hottes lakes in Dickinson County; Lost Island, Five Island, and Mud lakes in Palo Alto County; Clear Lake in Cerro Gordo County; Storm Lake in Buena Vista County, Black Hawk Lake in Cac County; North and South Twin lakes in Calhoun County; Upper and Lower Pine lakes in Hardin County; Blue Lake in Monona County; Lake Manawa in Pottawattamie County, Brown's Lake in Woodbury County; Silver Lake in Deleware County; Beeds Lake in Franklin County; Swan Lake in Carroll County; Springbrook Lake in Guthrie County; Lake of Three Fires in Taylor County, Lake Ahquabi in Warren County; Red Haw Hill Lake in Lucas County; Lake Keosauqua Lake in Van Buren County; Lake Macbride in Johnson County, Backbone Lake in Delaware County; Echo Valley Lake in Fayette County; Mill Creek Lake in O'Brien County; Union Grove Lake in Tama County; High Lake in Emmet County.

Attended Wedding In Minnesota

From where I sit ... by Joe Marsh

The Picnic Was a "Hug" Success!

Our local Wild Life League went on a picnic Saturday, and I went along to cover it for the Clarion. Monday, folks kept stopping me, and saying: "Must have gotton out of hand, that picnic!"

"Nonsense," I says. "It was mighty pleasant and congenial. Just beer and hot dogs, cheese and cider." And then they show me the headline reading: "WILD WIFE PICNIC HUG SUCCESS."

Of course it was Elmer, my typesetter, who had made the misprints: But is my face red! It's only because folks are so temperate and well-behaved in our town, that they could afford to take the whole thing as a joke.

From where I sit, even a newspaper editor's entitled to a few mistakes. And since I reported that they served a moderate beverage like beer, I'm sure nobody thinks the picnic was the least bit wild, or anything but a huge success—and I mean *huge!*

Joe Marsh

harles W. Bock, Former Klemme Man Fatally Injured

arles Bock Killed In Elevator Fall At Kansas City

Charles Bock, 24, former Klem- youth was killed early Mon- y morning when he fell into elevator shaft in the building here he was working at Kan- s City.

Charles was a Veteran of orld War II, is married. He as employed part time in the evator where he was killed, as attending a vocational train- g school.

OBITUARY

Charles William Bock was rn March 27, 1923 at Klemme, wa, the eldest of five sons rn to his parents, Phillip and nna (Laschen) Bock.

An elevator accident at the ore where he worked in Kan- s City, brought his life to a ose on Monday morning, July 1947.

Most of the 24 years of his fe were spent in Klemme, his ome town.

He was baptized by Rev. A. . Depping, when but a few eeks old, and during his child- ood years attended Sunday chool and received religious in- truction at the Klemme Evan- elical and Reformed Church. He became a member of this hurch by Confirmation in 1939.

Charles attended our public chool and graduated from the Klemme High School in the ear 1942. While attending high chool, Charles also worked art time in the Times Print hop.

And then came the war, and Charles was called to the colors n June 1943 He served n the nited States Army for 34 nonths, 13 months of which was verseas. He was honorably dis- harged in February 1946.

After the war he found em- loyment with the Mark's Fur- niture Co in Montgomery, Ala- bama, and it was there that he met Miss Odell Peoples and they were married August 15, 1946.

A few months ago Charles and Odell moved to Kansas City, where Charles helped in a store and also attended night school.

He leaves to mourn his tragic passing his wife Odell, his par- ents, Phillip and Anna Bock and four brothers, Lawrence, Carol, Roger and Willis. And other more distant relatives and friends.

Garfield 4-H Present Farm Bureau Program

The Garfields Boys' 4-H club under the direction of Clarence Chizek, local leader, presented an entertaining program to a Farm Bureau meeting of 50 people at Garfield School No. 5, Thursday evening, July 3. Har- vey Engstler, Garfield Town- ship Farm Bureau president, presided.

Charles Jackson, County Organ- ization Director, discussed the expanding services of the Farm Bureau and the problems they entail. Edgar Dorow, County Extension Youth Assistant, des- cribed his work with the boys' 4-H clubs this summer.

The following 4 H members participated in a minstrel show: Cletus Liska, Arnold Prohaska, Raymond Prohaska, Gilbert, Hor- ecka, Donald Formaned, Junior Rayhons, Edwni Chizek, and Eugene Horecka.

Gary, Cynthia, and Susan Hauge presented several songs accompanied by their mother, Mrs. Galen Hauge. Accordian solos were played by Helen Engstler.

ROCKWELL BEATS KLEMME

The Rockwell baseball team defeated Klemme 8-3 in a game played at Rockwell the Fourth of July.

Phone your news to 12.

MUCH LIVESTOCK, LOW FOOD SUPPLY

More livestock to feed next fall and winter, a smaller grain crop this year to do the job, but a larger carryover from the 1946 crop—these were the items which stood out this week in the livestock and feed situation

Here is the outlook as seen by R. C Bentley, Iowa State Col- lege agricultural economist

Iowa's 1947 spring pig crop is up 3 percent. For the country as a whole, the increase is 1½ percent.

Intentions for fall farrowing in Iowa point to an increase of 15 percent in number of sows to farrow For the country as a whole, the increase is 9 percent.

Cattle on feed in Iowa April 1 were 15 percent above last year, and for the nation they were up 13 percent above 1946

In April and May this year 61 percent more stockers and feed- ers came into Iowa than in the same two months last year

Crop Prospects Drop

On the other hand, crop proc- pects deteriorated week by week through the spring and early summer Outlook for Iowa corn as of June 21 was only 85 per- cent of normal, the Iowa Crop Reporting Service said

The damage from rain, floods and cool weather probably won't be entirely repaired no matter how good the weather may be later in the season Bad as con- ditions are, Bentley points out that good growing weather will change the picture considerably He also says that the heaviest corn producing sections of the state have received the least damage thus far

Although livestock numbers are up, the corn supply, too, was larger April 1 than at the same date last year In Iowa corn stalks on farms April 1 were 63 percent larger than the same date a year earlier For the country as a whole the supply was 25 percent larger

Corn Market

While demand for corn has been strong throughout the spring and early summer, move- ment has been considerably re- stricted First high moisture held up the movement, then a shortage of cars. More recently crop prospects have caused the farmers to hold their corn

Not long ago the Commodity Credit Corporation announced it would accept wheat on corn commitments. With a record crop of wheat coming to market this may mean much corn will be taken off the list for export.

Lard prices are off, and the fats and oils situation is likely to improve considerably This means that hogs will probably not be fed to much heavy weights as they were during the past winter and spring

While preliminary estimates of corn to be sold off farms the 1946 crop is the largest in the past 10 years, the volume put under government loan was also the largest since 1942. With crop prospects as they are now much of this corn may be releas- ed for feeding, according to Ben- tley.

HELLO, FOLKS!

Mr and Mrs. George Neitland are the parents of a baby girl born at the Garner Nursing home Monday, July7 th The little miss weighs 6 lbs and 13 ounces.

Is your subscription paid in advance? Check your date, please.

The driver who killed himself and also the driver of another car in this shambles had stubbornly persisted in driving when he was fatigued after too many hours on the road. As his car came over the bridge, his weary brain blanked out for a split second, his hands relaxed on the wheel. His car grazed the bridge abutment, skidding across the road, and crashed into an approaching automobile. Motor- ists for their own safety, and for the sake of others on the road, have no right to drive when overtired. National Conservation Bureau safety specialists advise: don't wait until you are tired; pull off the road at intervals; drink a cup of coffee, take a few moments' rest.

Cultivate Your Corn Properly And Increase Your Profits

HERE ARE TIPS ON CORN CULTIVATION

Disk Hillers and Sweeps Are Big Help In Fighting Weeds This Year

Whipping weeds in corn is a tough problem this year

Most corn is late and often choked with weeds. Farmers are rushed by other urgent field jobs, so cultivation must be speedy and weed control well done

Tests made by Iowa State Col- lege specialists indicate that un- til corn is 8 to 10 inches high, weeds do not hurt the crop if the weeds can be destroyed then.

When fields are unusually wet better results are obtained by first cultivating with the sweep cultivator The rotary hoe and the weeder are not very effec- tive in killing weeds when the soil is heavily crusted or after the weeds get very big

Second Cultivation

For the second cultivation, sweeps may not throw enough soil to cover fast-growing weeds in the corn row Replacing the front pair of sweeps with disk hillers will throw in more dirt and smother out some weeds which could not otherwise be killed

One pair of disk hillers, ad- justed to throw soil into the corn, and four sweeps per row make the best combination The disk hillers do a good job of covering weeds in the row without cutting deep enough or close enough to seriously injure corn roots Disks also have the advantage of not clogging with trash or vine weeds.

Scrapers should be used on the disks. With scrapers attach- ed, the disks raise the soil to the height at which the scrapers are set. This prevents covering of corn

For very weedy conditions and especially for destroying morn- ing glories two pairs of disk hill- ers and one pair of sweeps per row are recommended Set the front pair of disks close to the row This throws soil away from the corn The second pair of disks throw soil into the corn, and the sweeps cover the remain- ing space between rows. Scrap- ers should be used on the second pair of disks.

Final Cultivation

The equipment found to be most effective for the final cul- tivation consists of one pair of disk hillers and two pairs of sweeps per row. This is the same as is used for the second cultivation except that disk scrapers are not necessary.

Disk hillers are essential for drilled or contoured corn This year using disk hillers on check- rowed corn will eliminate the need of immediate cross-culti- vation. They'll give farmers time for other pressing field work.

For second or cross-cultivation on checked corn one pair of disk hillers should be used. Use scrapers on the disks if neces- sary to prevent covering the corn plants The last cultiva- tion may be with the same equip- ment except that scrapers are not needed.

Nice Field Of Corn

After the Editor made the re- mark that corn would not be knee high by the fourth several farmers have been challeng- him So the other evening we had a few minutes time and took a spin out around town and saw many nice fields, and the Editor has to acknowledge that many fields did surpass the old pre- diction mark of knee high by the Fourth Of course we saw many fields not so high, but coming along nicely, and if the old weather man is good the rest of the summer days, north Iowa will have some fine corn.

Incidentally, if you want to see a splendid field of corn, just drive past Clarence Neu- berger's out south of Klemme It is on a hill side and has good drainage and it is by far the high- est field we inspected the other evening

SWAMP ANGEL AND DEVILS GET TIMES OUT THIS WEEK

Getting The Paper Out Under Difficulties

The boss is conspicious by his absence at the shop this week as he is flat on his back having suffered a hemmorhage Satur- day evening

Bill Montgomery and Elwood Geary are doing the mechanical end while Mrs. R A Jorgenson is taking over the office work and writing the news this week.

The paper may be a bit late under the circumstances but we hope our readers will not mind too much Hope to be back on the job soon —The Editor

R. C. Ball Club Losses Two Games In Past Week

During the past week the R. C ball club lost two games, they lost to Clarion 19 to 20 in two extra innings and to Clear Lake 19 to 4 The next game on the R C diamond will be on Monday, July 14, and will be against General Mills of Bel- Mond On the 17th of this month the Albert Lee team will be the guests of the R C club.

GIRL SCOUT NEWS

The Girl Scouts held their regular meeting Monday even- ing We opened our meeting with roll call The meeting was held at the home of Mrs. Trum- bell We had election of officers, Marjorie Lau, President; Shirley Bisom, Vice-President; Maralee Ridder, Scribe, and Sondra Brid- ges, Treasurer

We reviewed what we had done the last few meeting

We talked about gathering paper and going on an overnight hike. Mrs. Trumbell treated us in honor of Marjorie's and Mara- lee's birthdays.

League Schedule

Home Games:
July 13, Hampton
Aug. 3, Latimer
Aug. 17, Popejoy

Games Away:
July 20, Geneva
July 27, Clear Lake
Aug 10, Rockwell
Aug. 24, Hansell

Annual Schlei - Beier Reunion Held At Liberty Church

The annual Schlei-Beier re- union was held Sunday, July 6, at the Liberty Church. After the picnic dinner the following short program was enjoyed·

Songs by Janice, JoAnn and Jimmy Beier. Marimba solos "Largo," "Bells of St. Marys," and "Repaz Band" by Marcille Josten. Pinao solo by Gloria Haefner

During the business meeting it was decided to keep the old officers and to meet at the same time and place next year.

Those present at the reunion were Mr. and Mrs. Ed. W Weis- brod, Fenton; Mr. and Mrs. Ed. Schlei, Fenton; Mr. and Mrs. Marold Schlei, Gary Dean of Fenton; Mr. and Mrs. Elwin Schlei, Evalon and Elaine, Fen- ton; Mrs. Ida Ridder and Walter, Leland, Mr and Mrs. Frank Ward, Leland; Mr. and Mrs. Har- old Ridder, Nora Springs; Mr. and Mrs Wm. Kulper, Waterloo; Miss Lydia Beier, Waterloo; Mr and Mrs Wm. Ridder, Waterloo; Mr and Mrs. Robert Budlong, Titonka; Mr. and Mrs. Edwin Josten and Marcille; Mr. and Mrs. Emil Beier; Mr and Mrs. Ben Ridder and Elwyn; Mr and Mrs Kermit Schlei and Daryl, Mr and Mrs. Emil Beier and family; Mr. and Mrs. Loren Gast and Kathryn; Mr. and Mrs. Wilbur Haefner and family all of this community.

Memories of Ben Buchlmeyer

He lived alone for many a year,
With no one to comfort and no one to cheer.
In a humble cottage not far from town,
But he was no man to care for renoun.
Early in the morning while the dew was wet,
He'd go to town and some grocer- ies get.
He was kind to his neighbors one and all,
and usually would help when ever they'd call.
He'd dig in their gardens and lawns he'd mow,
He seemed to love nature and to watch things grow
His own, yard he'd give the best of care,
And no stray weeds were allow- to grow there.
Early in the morning before the day break,
Lantern in han and shovel he'd take.
And down the walk for a block or two,
He'd shovel the snow while the North wind blew.
At shoveling coal he never would shirk,
He'd never complain no matter the task,
And a very few folk a fee he would ask.
To the dumb animals he ever was kind,
A better friend they Ne'er could find.
The cats would come at his beck and call,
And he had a home and food for the all.
Some may gather their silver and gold,
And grab all the wealth their hands can hold.
But he was content with his humble lot,
And he worked and slaved for all he got.
Now that he's gone they miss him tis' true,
For there are no others his work to do.
For his Master has beckoned and he's answered the call,
And he's gone to the home pre- paired for us all.

Get Your Combine Ready For Oats and Bean Harvest

WAYS TO FIGHT MOSQUITOES

Wondering what to do about those big, vicious mosquitoes which have appeared after the heavy rains in recent weeks?

Paul Henderson, County Ex- tension Director, says there are some pretty effective methods of battling mosquitoes First thing is to drain as many stag- nant pools in your neighborhood as possible Pools are the breed- ing places for mosquitoes

When stagnant water cannot be drained, its surface can be covered with a thin film of old crankcase oil.

Another good weapon is DDT Spraying the surface of pools and surrounding shrubs with one or two quarts of 5 percent DDT oil solution per acre is a big help

Over large areas, mosquito control can be accomplished on a community basis by using an aerosol generator or an airplane An airplane can dust DDT at the rate of two-tenths of a pound per acre This will kill adult mosquitoes but won't hurt help- ful insects or wildlife.

A 50 percent wettable DDT powder used as a spray (1 lb. in 10 gallons of water) at the rate of 1 or 2 quarts per animal will protect livestock from the mosquitoes.

For your protection at home you still can't beat screens. If screens are treated with 5 per- cent DDT oil solution, they not only hold out the mosquitoes, but also kill those with whom they come in contact.

Finally, there are modern in- sect repellents which are effec- tive in case you have to walk around outside in mosquito in- fested areas. Henderson says there are many different kinds of commercial insect repellents, some of which are much better than others. The U. S Army uses a formula which contains indolane, Rutgers 612 and dime- thyl phthallate If you find one with those ingredients, it's apt to be one of the best.

Household Hints By Mary Jane

Several have requested that I write a household hint column again. Since these are busy days for everyone, and many do not find time to read or listen to the radio hints, I will try and publish some and would suggest you start a scrap book at once and cut them out each week from the Klemme ' Times and place them all together and you will know where to turn to as you wish to refer to same.

Tis Jelly and Jam time - so here is one to try - after filling your glasses of jelly take a piece of sterilized string or cord (place in boiling water, take out and dry) and cut it long enough to go across the top of glass, yet long enough to hang about two inches over each side Then pour your hot paraffin right over the string and jelly - being sure the string stays in place - let cool - and cover and put away for later use, when you can take off the cover and pull the string with both hands and your paraf- fin will come off easily.

In renewing your veil on your last summer's bonnet - press with a meduim hot iron between waxed peper, or another way since sugar is not rationed - wash veil in lukewarm water which has one tablespoonful of sugar dissolved in it. Then press with an iron, and it will look like new.

TUNE UP COMBINE NOW FOR HARVEST TIME

Before Starting To Work On Machine, Read Through Instruction Book

Small grain harvest is not very far away and Dale Hull, Iowa State College agricultural en- gineer, says it's now time to get out the combine for a thorough check before it is put to work.

"Read your instruction book first," Hull advises there are plenty of things about a combine that can be forgotten in a year's time. The instruction booy has all the necessary information on cylinder speeds, cylinder clear- ances for various crops, chain and sprocket combinations to se- cure better threshing and sepa- rating action, and straw rack speeds, as well as suggestion for setting fans, shoe motion and sieves.

A complete cleaning of the combine is Hull's recommenda- tion as the best start to actual checking. Rust and dirt can be cut with kerosene, and the whole machine washed down with a hose to get rid of weed seed It is best to clean the com- bine after working a weed-in- fested field and before going to the next job

Tough Grain

With heavy rainfall this year there may be an abundance of tough grain, and power will be important If you have a com- bine with an auxiliary engine, be sure to check it over If the machine is driven from a power take-off, Hull suggests running the tractor engine slightly rich to give it an advantage when the going is heavy.

The cylinder is the most im- portant part of the threshing unit. On the toothed type cyl- inder the shaft could have a 1-64 inch end play. Greater play may cause the cylinder and concave teeth to strike. Bent teeth should be straightened. Broken and worn teeth should be replaced. On bar type cylin- ders the bent and worn bars should be replaced to secure threshing efficiency necessary in damp and weedy grain.

Cylinder Speed

Cylinder speed is important, too. The instruction book is again the best guide. But with tough grain it may be necessary to run the cylinder faster than recommended to get the grain. In general, each type of crop re- quires a different speed.

Unthreshed heads in the straw, or cracked or hulled grain is most often due to improper cyl- inder speed Running cylinders too slow will not knock all the grain from the straw Turning cylinders too fast will crack or hull some of the grain.

There are plenty of other mov- ing parts to a combine. Each requires inspection for wear and for smooth operation. Many should be adjusted. A few may have to be replaced

Grain Loss

Harvesting at the correct time is important to prevent shatter losses. Nearly all other losses while combining can be traced to improper machine adjustment

Cutter bar losses result when the cutter bar is run to high sickle and guard plates are dull or the reel is working improper- ly.

Threshed beans lost behind th machine may mean that the rac speed is too high or too low, tha there is overloading with stra or weeds, or overthreshing a the cylinder. It may also mea that sieves are closed too muc or the openings clogged, or tha the wind blast is too strong c improperly directed.

Poor cleaning comes from to wide sieve openings, overloa ing sieves, or not enough win

Honorary Degrees for 1947

Cropsy, Thaddeus Z. (statesman, pinochle shark and stamp collector extraordinary): For conspicuous conduct in considering the atomic bomb The moment you heard about this you fell on your knees and have remained there much of the time ever since, asking forgiveness for the human race and praying that mankind may wake up before it is too late You at no time expressed any pride of discovery Help yourself to any degree in the house

—•—

Bippett, Carol W. (business mogul sword - fisherman and two fisted drinker): For originality and courage Asked to pose for your photo as a Man of Distinction you showed up in old clothes, no necktie and with a 24-hour beard Furthermore you brought a can of beer Accept with our compliments one of the larger Grade A degrees, with a box of cigars

—•—

Woollgrift, Chauncey K. (rhymester of sorts, petunia fancier and golf duffer): What a man! Getting a contract at a fabulous sum to write jingles for a soup, you listened to the darned things over the air, tore up the contract and called for a national revolt. Your slogan was "A Limit to How Low a Man Will Stoop for Money" You may pick up your degree or see the secretary about a cash equivalent.

—•—

Mizzlewurt, Fedink R. (district attorney, conscientious public servant and decent member of society): You are one of the outstanding public servants associated with law enforcement in America At no time have you posed grinning ear to ear with a criminal. On a recent occasion when newspaper photographers asked you to stand beside a throat slitter and register affability you threw them out via the nearest window Your idea seems to be that there is nothing funny in crime Take a degree out of the top drawer and five chances on a new sedan, a television set and a raccoon coat.

—•—

Potts, Godfrey T. (economist, gin rummy expert and collector of ox yokes): In every case where anybody at any gathering raised the question, "Do you think we are in for a recession?" you replied tartly, "How the blazes would I know Your guess is as good as anybody's" Furthermore you do not pretend to understand inflation fully Asked to write a series of articles clarifying it, you laughed and went for a ride on the flying horses instead. What do you need? We must have it somewhere around the college.

Creamed Tuna in Potato Nests!
(See Recipes Below)

First Aid for Lunch

only I had a good list of main s and desserts for company eons," said a friend of mine tly, "but it always seems I tuck with things and can't think something the girls really

good solution for the above em is to keep a card file of complete menus for such occasions. Be certain to try out the foods before the company date comes along so you will be thoroughly familiar with the preparaand then everything will run thly.

you don't want to plan the menu pletely, then select just the dish and fill in the salad and table with whatever is in son.

na a la King in Potato Nests.
(Serves 6)

ups milk
tablespoons flour
tablespoons butter
teaspoon salt
6 teaspoon pepper
teaspoon Worcestershire sauce
cups canned tuna fish
tablespoons chopped pimiento
cup tiny mushroom caps

ald milk in double boiler. Make aste of the melted butter and and add to hot milk, stirring thick and smooth. Add seags and cook 15 minutes. Flake fish into large pieces and mix white sauce Add pimiento and hrooms.

tato Nests: Peel 4 mediumd potatoes. Cut into tiny strips thwise. Heat in a small amount t but do not brown. Remove fat, sprinkle with salt and arge in nests inside large muffin Press potatoes firmly against of pan and bottom. Bake in a (450-degree) oven for 15 min. Serve hot tuna fish mixture risp, hot potato nests.

Lattice Rhubarb Pie.
Pastry
2 cups cut up rhubarb
Flour
1 cup sugar

ine pie pan with pastry. Wash peel rhubarb; cut in small ces Flour

ces until they quite white, n add sugar. x well and ce in pastryd tin. Cover h lattice strips crusts and e in a 450-dee oven for 10 minutes, then in a degree oven for 30 minutes. combination of yellow and green attractive for working into a cheon combination, especially en it involves favorites like cken and lime chiffon pie!

cken Loaf With Mushroom Sauce.
(Serves 6)

cups diced, cooked chicken
cup soft bread crumbs
cup chopped, cooked celery
tablespoons finely chopped pimiento
tablespoon minced parsley
teaspoon salt
teaspoon paprika
eggs, well beaten
cup milk
tablespoons butter or chicken fat

Combine ingredients, mixing well

LYNN CHAMBERS' MENU

*Chicken Loaf with Mushroom Sauce
Green Peas with Pearl Onions
Tomato Salad
Orange-Honey Rolls Beverage
*Lime Chiffon Pie
*Recipe given.

and pour into a greased loaf pan. Bake in a moderate (350-degree) oven for 35 minutes or until firm. Unmold carefully on platter and garnish with parsley Pour mushroom sauce over loaf.

Mushroom Sauce.

4 tablespoons butter
4 tablespoons flour
2 cups milk
½ teaspoon salt
¼ teaspoon paprika
⅔ cup cooked or canned mushrooms

Melt butter and blend with flour and seasonings Add milk gradually and cook over low heat, stirring constantly, until thick and smooth. Add mushrooms and cook two minutes longer. Serve hot over chicken loaf.

Lime Chiffon Pie.

1½ teaspoons plain unflavored gelatin
⅓ cup cold water
4 eggs, separated
⅛ teaspoon salt
1 cup sugar
4 tablespoons lime juice
Green coloring
Grated rind of 1 large lime
1 cup whipping cream, whipped
Baked 9-inch pie shell

Soften gelatin in cold water. Place in top of double boiler, the egg yolks, ½ of the sugar, salt, lime juice and rind. Cook over boiling water until thick and smooth, stirring constantly Remove from heat, stir in gelatin and cool. When slightly thickened, fold in stiffly beaten egg whites to which remaining sugar has been added. Turn mixture into baked pie shell and chill in refrigerator for one hour. Spread or flute whipped cream over top.

A simpler combination than either of the two given thus far is this one of baked tomatoes and banana tarts:

Baked Stuffed Tomatoes.
(Serves 6)

6 medium sized tomatoes
1½ cups shrimp or crab meat, flaked
¾ cup thick cream sauce
¼ teaspoon mustard
1 teaspoon salt
Fine bread crumbs
Butter
Paprika

Scoop out tomato centers and mix half the pulp with shrimp or crabmeat, cream sauce and seasonings. Fill tomato shells with mixture. Cover tops with fine bread crumbs, dot with butter and sprinkle with paprika. Bake in a hot (450-degree) oven for 20 minutes.

Banana Cream Tarts.
(Serves 6)

4 bananas
2 tablespoons sugar
¼ teaspoon vanilla extract
¾ cup whipping cream
6 baked tart shells
6 tablespoons shredded coconut

Fold sugar and vanilla into whipped cream. Slice bananas into tart shells. Cover at once with whipped cream and garnish with coconut.

Released by Western Newspaper Union.

NN SAYS:
ve Meat in Ways
t Tempt

Make appetizing luncheons out of tover scalloped dishes by addpieces of leftover meat to them. k with corn, beef with green ns, lamb with tomatoes, etc., are good appetites satisfiers.

Veal a la King takes on special mour if it's dressed up with slivd almonds and mushrooms. This y be served in patty shells or a odle ring.

To make bread crumbs flavorful for use as toppings, grind them fine and brown them in meat drippings.

When you're serving roast pork or pork chops with dressing, add that special touch to the dressing by using a few chopped spinach leaves.

When making biscuits, do something different and roll the dough out in a rectangle; spread with orange marmalade and roll as for jelly roll. Cut and baked slices in oiled pan for pinwheel biscuits.

The FICTION Corner

REWRITE MAN

By HILDA PHELPS HAMMOND

MARTY HENDRICKS tapped his pencil on the desk and glanced nervously at the wall clock. Only twenty minutes more before the dead line for the afternoon Star and not a story worth a rap had come in over the telephone! Not that Marty Hendricks usually worried about what kind of story came in over the wire He had always had magic in h s fingers—magic that let him take the dryest bit of news from police stations or fire houses and re-write it into a regular Arabian Nights tale But today things had been different Today Marty Hendricks had overheard a conversation between the city editor and the Chief and his whole world had crumbled

"Say," the Chief had said as Marty paused a moment outside his half-open door to sharpen a pencil. "What's wrong with Marty? He used to be the best re-write man in the whole South. Could take a story over the wire and turn it into a piece that made a sob sister out of every woman. But he's gone to pieces—hasn't written a good story for months."

This Week's Best Fiction

"I've noticed that myself," the city editor answered as Marty's heart thumped "Guess he's gone stale Twenty-five years at a rewrite desk will do that to a man"

"Well, he'll have to spruce up or give up the job," the Chief growled. "There's a young man asking for that job and they say he's a dandy If Marty doesn't perk up we'd better put him back on some light work and get that young fellow"

The conversation had trailed on, but Marty had not listened to any more of it. His hands were trembling as he found his way back to his desk and there was a lump in his throat that he couldn't swallow no matter how hard he tried He, Marty Hendricks, the best re-write man that the Star had ever had, about to be ditched

He sat down at his desk and tried to think what it would mean to Sarah Ann if he lost this job. Sarah Ann was a good wife—a mighty good one She could make a dollar go farther than any other wife he knew, but even Sarah Ann had a hard time getting all the things the kids needed out of his salary And if that was cut, no telling how they'd be able to manage Six kids—they ate up a lot, six kids did! And now that Marty Junior was reading for college they had to put a little aside every month. Yes six kids were an awful lot—TOO MANY," he thought as he glanced down at the snapshot pressed under the glass top of his desk. There they were—Sarah Ann and the six of them

He turned his eyes away from the snapshot and glanced at the wall clock. If a story would only come—just one story that would let him show the Chief what he could do! Ah—there was the telephone now!

He remembered there was a bicycle and a boy at his house, too.

He picked up the receiver and cleared his throat. "Hello," he said "Yes— . . An accident at St Charles Avenue and Adams? . . Yes, I've got it. What's that? .Boy ten years old . . . no hope . . a bicycle and a car . yes . . . whose boy? Don't know yet? . . . I see ."

He put down the receiver and pulled his typewriter towards him. His fingers reached for the keys . . . Ten minutes to the dead line now . . . he'd have to hurry. He'd have to make it a good story . . . this might be the last story he'd ever re-write if he didn't make it good!

HIS eyes strayed again to the snapshot beneath the glass. Ten years old . . . why, that was just the age of little Andy! Perhaps the boy looked like Andy . . . perhaps he had blue eyes and red cheeks and a nose that turned up. His fingers began to play upon the keys of the typewriter—lightly as though someone else were writing. Funny, he thought, that the words should slip off the keys so fast now . . he didn't even have to think. The story was writing itself . . . writing itself this way:

"He might have been mine. That's what every man and woman in New Orleans should think when they read about the ten-year-old boy who will never ride a bicycle again It happened at St. Charles Avenue and Adams Street in the City of New Orleans, but it happens every day in every city of America. It was only a second-hand bike—but the boy must have thought it as handsome as any bicycle that ever came out of a department store His father probably didn't want him to have it and his mother probably didn't want him to have it either. But mothers and fathers have soft hearts and so this mother and father couldn't bear to say 'no' to him, although their heads must have told them that they were fools to send a child of ten into that line of traffic.

"The bicycle was painted red and the handlebars were still silvery when they found the pieces. But the wheels of the bicycle were as crumbled and twisted as the body of the small boy The police haven't reported yet who was to blame for the accident but WE know. It was the fault of all of us—the fault of modern civilization which allows cars and trucks and little lads on bicycles to ride together on the same streets He might have been your kid—and he might have been mine What are we going to do about it?"

Marty stopped a moment and reread the last line It was a funny line to end a story with, he thought—a wrong line, perhaps The Chief might not like it. He started to change it, but he couldn't. First of all, because he couldn't think of anything else to say and then, too, because he was in a great hurry all at once He snatched the paper from the typewriter and fairly ran to the city editor's desk.

The city editor's eyes traveled over the page "Pretty good," he announced when he had finished reading it "A little too much editorial flavor to it, but you've perked up Marty . . . why, where's he gone?"

For Marty Hendricks HAD gone. He had made the elevator in nothing flat and he was already shooting down in the lift. He wasn't wondering how the city editor liked the story—and he wasn't caring whether the Chief liked it or not. He was remembering that there was a second-hand bicycle at his house—a bicycle that was painted red and had silvery handle bars "Of course, there were thousands of bicycles like that in New Orleans," he told himself as the elevator stopped and let him out But he had to be SURE . Sure that he and Sarah Ann still had time to take that bicycle out of circulation!

Jobs weren't important, Marty Hendricks thought as he ran along the street and hailed a passing street car Not a bit important compared to a boy with blue eyes and rosy cheeks and a turned up nose He could get another job—but he couldn't get another kid like Andy Not anywhere in the whole world! And six kids weren't too many! "No, Sir," said Marty Hendricks to himself as he swung on to the car step "Six kids are JUST EXACTLY RIGHT!"

How to Make New Friends

We had just moved into a new house in a new neighborhood in a new town, a little Western city without any of the advantages of a more erudite community. The second day we were there she came bearing gifts, a glass of jelly she had made from wild chokecherries the autumn before

She was just a little country woman. She had always lived there She hadn't ever been more than fifty miles from home, had never seen a railroad train or an airplane had been only once to the movies.

But I never met one of more cosmopolitan personality, of broader vision or of more supreme happiness. You couldn't be with her for more than an hour without catching the spirit of her infectious laugh, of her rare and rollicking good humor or some of the spirit of her amazing charm

Yet she was a woman who had lived all her life without "advantages"

One evening as we sat on the porch I questioned her closely about her philosophy of life and the genesis of her personality And I believe that what she told me will go with me as a source of inspiration and help as long as I live I also believe it may likewise help you.

All her life she has merely made it a point to make a new friend of every new person who moves into the community It was the reflection of her friendship toward others that made her eyes shine, her conversation sparkle with good fellowship and the humor that endeared her to everyone within a radius of a hundred miles. She drew you like a magnet. Her charm was irresistible.

And all she had done was to make a new friend!

I suppose in her life that some persons had taken advantage of her friendship. I suppose she had been cheated and robbed as I have, as you have. Maybe you and I have become a little bit embittered because of it. Not she. She found the new friends she won outweighed the loss of those who were faithless to her trust.

If you will assume that everyone is your friend, and try to make new social contacts every day, it will do some mysterious and very good things to your personality.

It will make your personality warm and friendly, and will draw persons to you from every walk of life.

Far better than any academic rules of psychology is the simple rule of the mountain woman which I learned as dusk fell and the rabbits came out to play: "If you want friends, you have to show folks you are a friend. I guess that is all there is to it."

WA USING AIRPLANES FOR DUSTING, SPRAYING

Iowa is taking to the air to otect itself from disease and ects which destroy crops and dermine human health.

Airplanes are being used in inasing numbers in crop dustg and spraying. They have al- been used in spraying or sting areas to control flies d mosquitoes.

A recent check by Harold nderson, Iowa State College tomologist, showed that 18 anes are doing dusting or spray ork in the state. Commercial rvices have been established Shenandoah, Clear Lake, mes, Greene, Newton, Knoxlle, Marengo, Wheatland and uscatine.

SAVE GRASS OR LEGUME CROP BY MAKING SILAGE

Crop ordinarily grown for hay can be put up for silage easily and successfully by either of two methods. Ensilage made by either method compares satisfactorily with hay in feeding value An added advantage is that the grass or legume crop can be saved even though bad weather will not permit field curing

The newest method, known as wilting, differs from others mainly in that the fresh-cut crop is left in the swath until it has wilted to a moisture content of between 58 and 68 percent. This moisture content makes it unnecessary to add preservative materials.

Another requirement, according to experiments carried on by the Bureau of Dairy Industry, U S. D A, is that the crop material be chopped fine and packed firm enough to exclude most of the air.

When the crop cannot be wilted to the desired dryness because of climatic conditions, the wilting effect can be obtained by adding 5 to 15 percent of dry hay to the material as it goes through the silage cutter.

A pamphlet issued at Iowa State College by dairymen C. Y Cannon and Arthur R. Porter shows that adding some preservative according to the wetness of the silage eliminates the necessity of accurately estimating the moisture content. Adding the preservative insures against spoilage

Cannon and Porter feel that either method should produce a palatable feed, high in vitamin A content, if proper precautions are taken during the ensiling.

OFFER SOYBEAN SEED

Hancock County Triple A and extension officials have a list of a number of farmers who have early maturing soybean seed for sale Many acres will have to be replanted and farmers in need of soybean seed are urged to get in touch with the Triple A or Farm Bureau office

Klemme, Iowa

Soil Conservation District Commissioners Meet July 2

Hancock County Soil Conservation District Commissioners held their June meeting at the district office in Garner on July 2 The meeting was held late because Vernon Moss, local technician for the Soil Conservation Service was attending the Regional Training Center at LaCross, Wisconsin.

Present at the meeting were S A. Barber, Ben Riemer, W J Rasmusson, Vernon Moss, L C Kuester and Paul Henderson

Kuester reported that an additional soil scientist was being assigned to the work group for a short time and would spend 7 days inapping in the county beginning July 17.

Air flight sponsered by the Iowa Aeronautical commission was discussed. Ben Riemer volunteered to represent the commissioners on the flight Probem areas designated as possibilities for observation were Crystal Lake rolling are, and to follow down the Iowa River to observe high water along the river and areas affected by the high water.

Field Days at Clarinda and Fort Dodge were discussed Commissioners agreed that both were too far away to attend this year Henderson mentioned the field day at Kanawha on July 17, which was much closer and of definite interest to people of this county.

Requests for assistance 107 to 113 inclusive were presented by Moss and approved by the commissioners.

The next meeting was scheduled for July 30.

Gives Correct Way To CAN or Freeze Beans

Snap beans that are picked before the seeds have matured are the best for freezing Cut them into desired lengths or leave whole according to preference.

Before packing beans into the container for freezing, wash in cold water and scald in continuously boiling water for 3 minutes, says Jewel Graham, entension nutritionist, Iowa State College. Pack in container and cover with a salt water solution made of 1 tablespoon salt dissolved in 1 quart cold water.

Homemakers who plan to can snap beans will want to note the new processing time Quart glass jars of beans need 25 minutes processing at 10 lbs. pressure in the pressure canner, while pints now require 20 minutes The beans should be washed, trimmed and cut into 1-inch piecs. Cover with boiling water and boil for 5 minutes before packing If tin cans are available, pack beans to within ¼ inch of the top and fill to top with the cooking liquid. Seal and process No. 2 cans for 25 minutes at 10 pounds pressure, No. 2½ cans 30 minutes.

FOURTH BIRTHDAY

Mr and Mrs. C. A. Larsen, grandparents of Mary Ellen Isvik, had a delicious birthday dinner for her on the Fourth of July. Others present were Mr and Mrs. Marvin Isvik and La Vohn Caroline, and Junior Larsen, her other grandparents, Mr. and Mrs. Isvik of Jewell and a cousin, Bryan Crumpton, and Mrs. Ella Schneider were present. The table was beautifully decorated with a red, white and blue birthday cake, which was enjoyed by Mary Ellen She received many nice gifts to help her remember the day.

P. H. Halfwassen Entertained At Birthday Dinner Sunday

Mr and Mrs. Menno Albers entertained some of their relatives to dinner Sunday at their farm home east of Klemme Those attending were Mr. and Mrs. Martin Halfwassen of Belmond; Mr. and Mrs. Henry Halfwassen and Nancy Jo and Billy of Meservey; Mr. and Mrs. John Halfwassen and Darwin and Colin of Alexander; Mr and Mrs. Koelder and Arlys and Elwood; Mr. and Mrs. L. H. Koelder, Bernice and Harvey of Latimer; Mr. and Mrs. Henry L. Halfwassen and son Mark; Mr. and Mrs. P. H. Halwassen and daughters Lee and Bea of Chapin and Johnny Meents, Antone Halfwassen of Latimer.

With food prices so high even the vegetarians are beginning to beef.

Kanawha Plan Pathology Field Day July 17th

Effects of seed treatment on helminthosporium in Clinton oats will be shown at the Botany-Plant Pathology field day July 17th at the Northern Iowa Agricultural Experiment Association farm at Kanawha.

According to word received this week County Extension Director Paul Henderson, seed treatment has proven only a partial control of the disease However, Hancock County farmers will be able to see results for themselves at the Kanawha field day.

Some new varieties of oats will be on exhibition during the day as well as large fields of Clinton. Iowa State College botanist C. S. Reddy will discuss characteristics and adaptabilties of the new varieties.

Flax varieties and seed treatment results will be showing up well by July 17. Experimental work of different seed treatment dosages has been made and findings on this will be reported

Weed spraying demonstrations are scheduled for the day Effects of different sprays on oats and flax fields will be shown Plant pathologist E. P Sylwester will identify any unknown weeds for farmers who bring specimens, Henderson says.

Another important feature of the program is the barley breeding tests, including new varieties adapted to Iowa conditions. An additional attraction for the Kanawha farm visitors will be the talks on the economic outlook in agriculture by qualified speakers.

Hancock County Boys' 4-H Club Send Delegates To Ames

Five Hancock County boys' 4-H clubs sent delegates to the state 4-H Boys' Short Course at Iowa State College, Ames, June 30 - July 2.

The boys and the townships they represented were. Verle Lenz, Ell; Harald Pueggel, Concord, Gene Ostendorf, Avery, Paul Zrostlik, Liberty; and Carles Sheets, Bingham Edgar Dorow, County Extension Youth Assistant, accompanied them

The Short Course was attended by 800 4-H boys and leaders from all over Iowa. It was organized around the theme "Learning to Live in a Changing World." The boys were given glimpses of new developments in various phases of agriculture and rural life.

At the college agronomy the boys saw the effects of various applications of fertilizers and the plots where new small grain varieties are being developed The horticulturists demonstrated the practicability of grafting tender apple varieties on hardy stocks to resist severe weather

The boys saw how the milk cows and calves are cared for at the college dairy farm. They were shown desirable and undesirable types of beef cattle, swine, and sheep by the Animal Husbandry Department, as well as demonstrations of both draft and light horses.

Prominent speakers who addressed the boys and their leaders were Allan Kline, president, Iowa Farm Bureau Federation; H H. Kildee, dean of agriculture at Iowa State College; and Ray Turner, of the United States Department of Agriculture, Extension Service

State officers elected for the coming year are Bob Smith, Marshall County, president; Richard Lomen, Winneshiek County, vice president; Dale Hoover, Mahaska Count, secretary-treasurer; and Jack Lang, Powesmiek County, historian.

It was not all work and no play for the delegates. There were session of learning new games and of playing some of the popular sports. Each assembly was begun by singing under the inspirational leadership of Tolbet MacRae, professor of music at Iowa State College. Entertainment at the evening meetings included a Preview of Progress by General Motors Corporation, a style show, and music on a homemade instrument by Earl Dean, Mason City.

Each delegate will report what he was and learned to his own club, and his home community.

The price of Iowa farm land continued to rise during the 6 months ending June 1. The average price per acre rose to $157 during this period. This is $8 per acre more than was paid in December 1946.

Atomic By-Product Used For Scientific Plant Study

Using radioactive iodine supplied by "Manhattan District," Oak Ridge, Tenn., three department of agriculture scientists report experiments with a synthetic radioactive chemical that gives new light on 2,4-D as a weed killer. These tests are explorations in working out answers to some of the many questions that puzzle science in connection with 2,4-D and other growth regulating substances. This new research tool is identified by the initials "INBA"—the first standing for the iodine.

Applied to a leaf of a young bean plant the INBA moves through the plant and concentrates in partly expanded leaves at the growing point and severely checks their growth. Applied similarly to a barley plant, INBA likewise concentrates in the young leaves but apparently does not injure the plant much. The radioactivity makes it possible to use a delicate instrument—an electrometer—to trace the INBA moving in the plant in a manner similar to that used to trace iodine and other elements in animals.

In some respects INBA acts similarly to 2,4-D, which has developed in a few years from a laboratory novelty to have enormous practical value, particularly as a weedkiller. Like 2,4-D, the INBA has a selective effect, injuring the broad leaf beans but having only slight effect on the grassy barley. In applying this by-product of atomic bomb research to plant study, the investigators are looking forward to the possible use of INBA and other closely related growth regulators in practical crop production. Fortunately INBA is fairly easy to synthesize in the laboratory, and radioactive iodine can readily be obtained. Radioactive iodine has a "half life" (loses half its radiant power) of 8 days, which is longer, than many radioactive chemicals.

U. S. Resumes Shipment Of 'Golden Weed' to China

Renewed postwar shipment of ginseng, the "golden weed," from the United States to China recalls one of the earliest chapters of American foreign trade. The withered root is regarded by orientals as a panacea for many ills, although American scientists have said that it has no therapeutic value As late as 1940, China received more than a million dollars worth from American sources.

The first ship that sailed directly from the United States to China—the "Empress of China," out of New York in 1784—carried more than 20 tons of ginseng It was growing wild in the woods of New England and along the Hudson river banks.

The weed was scarce in the orient, where it was highly prized. Once ginseng was worth its weight in gold, and for a long time it remained a royal monopoly in China It was found in Manchuria, in what were considered imperial preserves, and was collected by specially detailed soldiers of the imperial army.

Bacteria Releases Oil

The possibility of using certain types of bacteria to increase the recovery of oil from subterranean deposits is suggested in a patent issued to Dr Claude E. ZoBell, associate professor at the University of California. While testing various kinds of bacteria for their ability to modify crude oils, Dr ZoBell observed in March, 1943, that certain cultures released droplets of oil from test tubes filled with calcareous material prepared to simulate underground oil-producing formations. Further laboratory experiments showed that bacteria can release oil from oil-bearing sediments by (1) dissolving calcareous materials, (2) crowding off the oil physically, and (3) by producing surface-active substances, literally "bacteria soap."

Frozen Pastries

Frozen pastry is more tender than fresh pastry, according to Dr. Faith Fenton, who has been doing research on frozen pies for the college of home economics and school of nutrition at Cornell. If you bake your pie before you freeze it, it's better to thaw it in the oven at 350 degrees for 15 minutes rather than thawing it in the refrigerator or at room temperature The experiments showed that unbaked pies thawed at room temperature or in the refrigerator before baking tended to have a soaked, under-done undercrust. For best results, Miss Fenton suggests placing the solidly frozen pie in a 450 degree oven for 35 minutes and then to bake it at 350 degrees for 15 minutes.

Fire Losses

Destruction by fire in the United States neared record levels during 1946, with total losses estimated at $561,487,000, an increase of 23.3 per cent over losses of $455,329,000 in 1945. The 1946 losses, the highest in 20 years, approached the highest figure ever recorded in the U. S., $561,980,751 in 1926. Losses during December, 1946, set a new record for a single month. They were estimated at $58,094,000, an increase of 30 per cent over November, 1946, and 17.4 per cent over December, 1945, and were the highest recorded since the National Board of Fire Underwriters began tabulating losses on a monthly basis in 1929.

Dairy Herd-Improvement Ass'n Monthly News Report

John Ward, Supervisor for the Hancock County Dairy Herd Improvement Association reports 25 herds tested with 349 cows in milk and 31 cows tested. The average production per cow, including dry cows, for the 349 tested was 903 lbs. of milk and 31.3 lbs. butterfat. There were 16 herds completed during the month of June. Some of the 305 day lactation records completed during the month were: A Grade Gurnsey owned by Richard Schubert, Britt, Iowa, in 305 days produced 8,583 lbs. of milk and 366 6 lbs. butterfat. Two Grade Holsteins owned by Roy Jacobs, Klemme, Iowa produced in 305 days 12,499 lbs. milk and 412.9 lbs butterfat, and 11,138 lbs. milk and 380.0 lbs. butterfat. Three Registered Holsteins owned by Fern Huling, Britt, Iowa produced the following in 305 days, 10,821 lbs milk, 340 2 lbs. butterfat, in 305 days 13,308 lbs. milk, 480.8 lbs. butterfat, in 275 days 12,392 lbs milk and 364 0 lbs butterfat Three Grade Holsteins owned by Albert Abele, Garner, Iowa produced the following in 305 days, 11,244 lbs. milk and 441 7 lbs butterfat, in 305 days 17,271 lbs. milk, and 526 1 lbs. butterfat; in 275 days, 11,390 lbs. milk and 416 4 lbs, butterfat

MORE ORCHARD SPRAYS NEEDED

With recent cool, rainy weather, apple scab has developed very seriously even in some sprayed orchards. Apple trees should be kept covered with spray until hat, dry weather kills the scab gungus, so warns County Extension Paul Henderson. He says that this season has been ideal for the growth of most plant disease. Cherry leaf spot is turning the cherry leaves yellow, and in some cases defoliating the trees. On the insect side, the rains have,, in general, lessened their numbers and have retarded their development. Codling moths are slow, but where there were many wormy apples last year, they are causing damage now In those orchards with no fruit last year, or in 1945, codling moths will not be very numerous.

In northern and central Iowa where the apple maggot caused considerable loss last year, sprays should now be applied to check the damage Henderson explains the way to tell the difference between codling moth and maggot damage is in this way The codling moth eggs are layed on the leaves or fruit, and the worms eat through the skin and work around the core The maggot eggs are layed under the skin and the maggots tunnel in all directions through the flesh, filling the apple with brown streaks.

Henderson suggests that fruit growers apply one or two sprays during July Where maggot is a pest and codling moths are not too numerous, use lead arsenate in the spray given below If codling moths were quite bad last year, use DDT with the spray In the first case, use 1½ lbs lead arsenate, 1½ lbs. hydrated lime and 3 lbs. wettable sulfur to 50 gallons of spray. In the second case, use 3-4 lbs of 50 per cent wettable DDT plus 1 lb of lead arsenate, plus the 3 lbs wettable sulfur

Spray all aples, plums, pears and cherries (after the fruit has been picked' For maggot control 2 sprays are preferred, about July 10th and 20th If only one is used, apply about July 15th For codling moth, spray at once and again in about 2 weeks, if many worms are noticed going into the fruit.

COMMITTEE ON SOLDIER RELIEF ADOPTS BUDGET

The Hancock County soldiers' relief committee met at the court house in Garner Monday afternoon and adopted its annual budget which calls for a levy of $10,000 for soldiers' relief for 1948.

Hancock County supervisors re-appointed Chester Rice of Garner as a member of this board for 3 years The other members are Rufus C Welter, Corwith, and Daniel E. Williams, Britt.

Unwanted Pacific Atoll Now Valuable Air Station

Tiny Palmyra, the low atoll 1,100 miles southward from Honolulu, used to be an "island without a country," says the National Geographic society.

Whaling ships often sought the atoll's limited shelter in the early 19th century. One of the earliest visitors was the American ship Palmyra in 1802. At various times thereafter, the tropical pinpoint was claimed for the United States, for Great Britain, for the one-time Hawaiian kingdom, and by private individuals for themselves

Declarations by Hawaii in 1862, by Great Britain in 1889, and by the United States in 1912 were sovereign claims among many private ones All lapsed, however, because the atoll was not worth holding By 1936, the trans-oceanic phase of air transport had arrived, and the United States raised the Stars and Stripes over Palmyra, prospective way station on the New Zealand air route

More than 50 islets make up Palmyra's land total of 250 acres They are links in the five-mile-long horseshoe-shaped platform of coral and hard sand that encloses three separate lagoons Largest islands, Cooper, on the north, and Eastern, on the east, cover less than 50 acres each.

Britain Changed Calendar in 1752 and Lost a Week-End

When England changed New Year's Day from March 25 to January 1 in 1752 and adopted the Gregorian calendar, thousands of Englishmen suffered a prolonged "lost weekend." According to the Encyclopaedia Britannica, the change in the calendar made it necessary to wipe out 11 days of the year, which was done by declaring that the day after September 2 was September 14, not September 3. This brought England into step with the Catholic countries, which had adopted the Gregorian calendar in 1582.

During the early Middle ages, March 25 was considered the first day of the new year by most Christian peoples, but in Anglo-Saxon England, the Britannica points out, New Year's Day fall on what is now Christmas—December 25 At the time of the Norman Conquest of England, however Wilham the Conqueror ordered that the year should start on the first of January, possibly, it is believed, because his coronation was scheduled for that date.

Still later, England reverted to the custom observed by the rest of Christendom and began her year on the 25th of March, and that date remained the first of the legal and ecclesiastical year until 1752, when the calendar was adjusted to the Gregorian system which is still in use today.

Major Cause of Blindness

The single most important cause of blindness is cataract. It accounted for almost 25 per cent of the cases in a sampling of 20,000 blind adults. Congenital cataract accounted for 15 per cent of the cases among a large group of blind children. A cataract is an opacity of the crystalline lens—all or part. The lens is behind the pupil It is the part of the eye that focuses rays of light on the retina When the cataract is fully developed light will not pass through the lens but is reflected back. This makes the pupil of the eye—ordinarily black—look white. The onset of a cataract seems to be closely tied up with a person's general condition. Teeth, sinuses, blood, glands—trouble in these or in almost any other part of the body may be behind the trouble in the eyes Or the trouble may be centered in the eye itself as the result of eyestrain or an accident.

New Heaters

Long-awaited improvements in room and home heating now are coming to us in disguise, judging from the new oil space heaters. Instead of looking like stoves used to look and having the embellishment, the gingerbread and the gadgets you might expect, these new heaters have been designed to the taste of an interior decorator Streamlined, finished in modern tones, available in numerous sizes, they are built to fit, unobtrusively, in room settings and to harmonize with furniture and home decorations. But design, according to the manufacturers, is only one feature of the 1947 model oil heaters. Having the advantage of assured supplies of a clean, economical fuel, the heaters operate on the vaporizing, "pot-type" burner principle in which the oil itself does not burn, but instead the oil vapor which is mixed with air to produce an even and easily controlled flame.

New Plastic Eye

New plastic artificial eyes for one-eyed persons have been developed by the optical industry These new artificial eyes move in unison with the good eye, and by new methods of coloring they have a life-like appearance. Colors of iris and sclera are matched. Even the vein markings are duplicated. The curvature of the cornea of the good eye is measured, as is also the diameter of the pupil in daylight, not facing the sun. All the outstanding features of color and shape of the normal eye can be duplicated in the new plastic eyes.

Study Shows Quaint Use of Words in Different Regions

"Look at the nimshi on the tikiteet" is a rare Yankee expression meaning it's the girl on the sofa, according to Falk Johnson, who has done research on regionalisms in the American language. A North Carolinian now teaching at Northwestern university, Johnson became interested in expressions used in the midwest and carried his study further to cover terms and phrases found in various parts of the nation.

What do you think of when some one mentions a kettle? In the middle west, Johnson has learned, the housewife usually is referring to a sauce or stew pan, but "down south," the word is more likely to refer only to a vessel with a top and a spout, such as a teakettle. And then there are overshoes. In Mr. Johnson's native state, they are rubbers, but in the middle west they're galoshes.

In the northern states, gravy is the thickened liquid from meat, but in the south it's any meat juice, whether thickened or clear. Among the most interesting regionalisms are those synonyms for seesaw. Outside the south, it is often called a "teeter-totter"; in New England, a "dandleboard"; and in only one spot in the nation, Block Island, off the coast of Rhode Island, the natives call a seesaw by the descriptive name, "tippity bounce."

Proposes New Theory for Study of Protein Virus

A new theory of protein synthesis, which may solve the mystery of the structure of viruses and thus open the way to conquest of some of man's deadliest diseases, including cancer and polio, was announced by Dr. Dorothy Wrinch of Smith college.

Pointing out that viruses have been shown to be complex nucleo-proteins, Dr. Wrinch declared that the native protein is now recognized as the "key molecule in health and disease." Nevertheless, she said, although it is known that a protein functions in a living being through its atomic pattern, that pattern so far has defied discovery, and until it is determined "physiologists and pathologists and biologists in general must continue to grope in the dark."

Although she emphasized that laboratory synthesis of a functioning protein might remain far in the future, she expressed the hope that a "blueprint" of protein structure could be obtained by application of her theory, which suggests building up a new molecule by moulding its various surfaces on the surface patterns of existing protein molecules, just as a waffle's surface is moulded on the surface of a waffle iron.

Laundering Tests

Laundering tests made at the Montana experiment station show that in general soap and detergents do an equally good job in washing all-wool and all-silk fabrics, but that soap is superior for cotton, linen, rayon, or mixtures of cotton and wool. Fibers differ in chemical nature, silk and wool being protein from animal sources, and cotton, linen and rayon cellulose from plant sources. Soap, because of its alkaline content, cleans plant fibers better. For washing all-wool blankets, detergents proved better, but blankets of 75 per cent wool and 25 per cent cotton washed better with soap. Detergents were not successful with woolen baby clothes because although they removed soil they did not remove food stains. Silk stockings washed successfully with either soap or detergents. Although colors did not fade as quickly with detergents, cotton and rayon dresses, and table linens developed a soiled, grimy appearance when washed with non-soap compounds in the Montana experiments.

Weather Favors Russ

Russia's upsurge in world affairs seems to coincide with the present rise in earth temperatures, Dr Clarence A. Mills of the University of Cincinnati says. Since 1850, temperatures have been increasing. With the upturn in warmer winters, we have seen the awakening of a new giant among the northern nations of the earth, one exceeded only by China and India in its population numbers, Dr Mills explained. Long winters of benumbing cold had always held Russia back, he said. Now more nearly optimal coolness allows her energies freer flow Few of us realize that Stalingrad, one of Russia's southern cities, lies at about the latitude of Winnipeg, and that Russia has the largest human mass to be benefited by the present prolonged upthrust of earth temperatures.

Icy Winds

Few of Spitzbergen's mountains are more than a mile high, but their sharp spires or cones, glittering with snow and ice, make the islands scenically beautiful. Many fjords indent the shores, and glaciers fill valleys and often run down into the fjords themselves. Two-thirds of West Spitzbergen, largest of the five islands and a number of barren, rocky islets that make up the group, is covered with ice all year. There are no trees, but hardy flowers blossom quickly in midsummer A warm current from the North Atlantic washes the western shores and moderates the climate.

Iowa Has 27 of Nation's Leading Soybean Counties

Twenty-seven Iowa counties are among the 100 leading soybean-growing counties in United States, according to figures from the 1945 Census of Agriculture issured by Director J. C. Capt, Bureau of he Census, Department of Commerce.

These 27 Iowa counties reported 21,326,237 bushels of soybeans harvested for beans in 1944 This was 55 percent of Iowa's 38,593,034 bushels of soybeans harvested for beans and 11 percent of the Nation's 187, 725,831 bushels of soybeans harvested for beans.

In 1944 Hancock County ranked 78th in the nation with 673, 072 bushels. Cerro Gordo rank-49th with 811,348 bushels.

No newspaper in another town is going to help fight your home town's battles.

Wider Vista of U. S. Policy Hinted

Nation May Be Embarking On Major 'Peacefare' Effort

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—It was a sizzling day in the capital. The town moved slowly like a lazy setter stretching and hunting the shade. Even the trees were half asleep. The air pushed hard against your brow and cheeks. The asphalt yielded to one's footfalls like brown grasses in a trodden field.

But we had to attend the regular press and radio conference of the secretary of state Nature languished, but we knew the dispatch room was spluttering and sparking in sharp shudders with the news of an anguished world. America we sensed (but didn't understand quite how) was embarking on a colossal undertaking

We walked down the air-cooled corridors of this new state department building which in wartime housed the brass hats of the high command. For those working for peace, it is a little depressing to pass those stark murals depicting war at its worst—or best, which is probably the same thing.

We were still interested in the implications of the statements on foreign policy. Each statement pulled a little wider the curtain on the theater which was neither a theater of war nor a theater of peace. Again and again the questions came in like darts. Efforts to pierce what we all felt was a screen concealing vistas much wider than the formal statements had yet revealed.

Baukhage

Was there a greater plan lying behind this program for aid to stricken countries — the program outlined by Secretary Marshall at Harvard? The question was asked although we knew that even if the secretary had a vision wider than ours, he could not reveal it—yet.

His answer, frank enough under the circumstances and not unexpected, was that if there was some further plan behind the one already revealed piecemeal, he was not going to talk about it.

He did reveal that Russia was not outside the pale of America's rehabilitation efforts — in theory at least. This was surprising to some who had studied President Truman's, Marshall's and Ben Cohen's most recent statements, and yet not so surprising as we recalled the nature of other talks, not public, which had hinted at larger things.

Is this a real effort to achieve a fair understanding with Russia? (Rapproachement is the diplomatic word)

Words.

I am wondering whether those unspoken words of the secretary of state could possibly describe the immensity of America's task, the task which is envisioned in the plans which Secretary Marshall "would not talk about."

I say this because I have learned a new word which, it seems to me, might bear within it a vital, a hopeful concept. Like Hauptmann, in "The Sunken Bell" when he said: "Tear! All the gladness, all the sorrow of the world sparkles within it."

Think of the dynamic quality of other words: Fame—Riches—Fair Play—Charity—Honor!

This new word of mine (which Marshall might have used, had he known it) is "peacefare."

It was used in a paragraph of a "letter to the editor" in the New York Times The writer was A. M. Meerloo, wartime chief of the psychological branch of the Dutch war ministry and a member of the inter-Allied psychological study group in England. This is the paragraph:

"In those (wartime) days, when the success or failure of the war was at stake, psychologists and specialists in allied fields mobilized every weapon at their command to wage psychological warfare. Why cannot we now, when the peace is at stake, mobilize as carefully for psychological peacefare?"

All right, there you have it—"peacefare." Not simply "psychological" peacefare now, but economic and political and moral peacefare. That is what I am hoping and praying the unspoken plan of Secretary Hull will embody.

A hard, long, expensive campaign. But one launched not against anybody but for everybody; a campaign to stop war to save humanity.

I say "everybody" because Marshall pointed out that he envisioned Russia as a part of this plan for the economic rehabilitation of Europe. Without this economic rehabilitation, there can be no rehabilitation of the body politic or the body (and soul) moral.

It must be a campaign to banish fear—fear of the atomic bomb which we possess for the moment; fear of the far more terrible weapons of destruction that any madman might put to use.

It is a campaign to banish the hate bred by fear. A campaign to nourish the body so that bodily things may be forgotten and man may pursue his spiritual destiny toward freedom, toward decency, toward a world where the major effort is dedication to the common good.

Nothing like this has ever been attempted before. Nations have loaned money for the purpose of earning a neat dividend or to wring some political advantage from an impecunious princeling or bankrupt government. Many fair promises and high sounding ideals have been written into covenants signed only to be broken when opportunism dictated a reverse English.

But here is something new and different. Something rather bright and idealistic has been added, what we hope is an honest effort to wage peacefare, to outroot the malice of the few, in the spirit of charity toward all.

It may be all eyewash, I know. I've seen a lot of castles fall. But my feeling is that if we get out of the scoffer's seat for a moment, if we drop the cynic pose and put peacefare into the national vocabulary, we may make it work.

Building Plans Spur Inquiries

I don't know how interested you readers have been in my reports of what American ingenuity in different communities has done to make brick (and other building material for veterans' homes) without the straw (of readily available materials and labor) which we seem to lack in this otherwise rich and prosperous land of ours. But I can tell you that a lot of people who thought they could go and do likewise were heard from.

Yakima, Wash., whose achievement was the first described in this column, has had requests for information from 41 cities and 18 states. Nearby communities have sent people to Yakima to get first-hand information in person. Delegations have come to Yakima from Spokane, Seattle, Walla Walla, Ephrata, Pasco, Prosser, Ellensburg and Bremerton in Washington, and from Portland and Pendleton in Oregon.

The Salem plan, under which the city is subsidizing the conversion of extra space into new apartments, has drawn comment from a number of other Massachusetts towns. Gloucester already has copied part of the plan, and inquiries have come in from five other cities in the Bay state, and from state offices of Amvets, VFW and American Legion.

The veterans' co-operative which has been so successful in building moderate cost housing in Albuquerque, N. M., has been busy answering questions, too. Requests have come from Houston and Amarillo, Tex., from Syracuse, N. Y.; Chicopee, Mass.; Las Cruces, N. M.; Great Falls, Mont.; Erie, Pa.; Berkeley, Calif.; Oklahoma City. Detroit and elsewhere.

The success of Rochester, N Y., in providing living space has brought in an impressive list of queries from other communities which haven't yet solved their housing problems. Chambers of commerce in Bristol, Tenn., and Farrell, Pa , and in half a dozen New York and Massachusetts towns have inquired. Twenty-nine banks in 14 states and one in Canada have written in for details. Housing committees in Ann Arbor, Mich., and San Antonio, Tex., have asked for the story, as have a dozen other committees in cities nearer to Rochester.

The stories I printed were only a few of the many communities which had the will that finds the way. I wish I could print them all.

DESIGNED FOR THE LIVING . . . First up the ramp to the new model paraplegic house, built as a special housing unit at Halloran hospital on Staten Island, N. Y., is Louis Novelli of Machnaqua, Pa. He is being wheeled by Michelle Parker, Red Cross nurse. Plans of the unit will be made available to any paraplegic who desires to build his own home.

NEWS REVIEW

New Farm Plan Studied; Fruit Crop Favorable

FARM CONTROLS:
Opposition Grows

American Farm Bureau federation, powerful farm group which sponsored most of the agricultural legislation now in force, is considering recommendations for total abandonment of all farm price and crop controls by the government.

Edward A. O'Neal, president of the federation, said the board is not satisfied with the old AAA, established during President Roosevelt's first term. He revealed that a better agricultural program than the one the farmers now have is being sought. The AAA authorizes payments to farmers for reducing acreages in the basic crops of wheat, corn, cotton, rice, tobacco and peanuts.

O'Neal

Farmers from the North and Northwest have consistently apposed federal subsidies, and sentiment was reported to be growing among the producers for letting farm products seek their own price level as a permanent policy.

In the South, however, cotton and tobacco growers are known to be satisfied with the situation as it stands, favoring tight controls if prices start to slip.

One of the federation's economists predicted at least a 10-year period of good prices for farmers at levels slightly below those prevailing now.

FRUITED PLAINS:
Apple Outlook Rosy

Despite a late spring and some frost damage in eastern fruit areas, prospects continue generally favorable for this year's crop of apples and other deciduous fruits, a department of agriculture report has disclosed.

The 1947 strawberry crop is estimated to be nearly a fourth larger than the 1946 crop, but still a tenth below average. However, the peach crop in 10 early southern states is expected to set a new record of more than 25 million bushels this year, the third successive large crop from those states.

In California, the sweet cherry crop of 29,000 tons is 15 per cent smaller than last year, but still 16 per cent larger than the 1938-44 average. California's 92,000-ton plum crop is slightly below 1946.

TRAINING:
Hearings Begin

Although congress is scheduled to adjourn July 28, the senate armed services committee has voted to proceed with hearings on universal military training.

But in a formal statement the committee added that if a report cannot be made ready by July 28, it will attempt to have a report prepared for congress when it convenes again.

Decision of the senate group was reached as the Very Rev. Edmund A. Walsh, a member of President Truman's universal military training commission, told a house committee that "the politburo in Moscow is not going to adjourn for the summer as its forces creep across Europe."

Father Walsh said that America is definitely on the Soviet agenda of conquest, and Russia will be ready to start her "shooting war" as soon as her atom bombs are in production.

TAX PLANS:
To Think Over

Congress has been presented with four tax-revision plans to think over until it gets ready to have another go at the income tax problem.

The treasury department has given the house ways and means committee studies of four plans to equalize federal income taxes on married couples in all 48 states.

One of the proposals would save 4,900,000 couples three-quarters of a billion dollars annually by giving those living in 38 states the same "income splitting" rights now enjoyed by couples living in 10 states which have community property laws.

Secretary of the Treasury John Snyder has indicated that the administration considers the proposed plans to be among the "right kind" of changes in the tax setup.

FARM ROYALTY . . . This dimpled, smiling beauty is Vicky Ostrowski, 19 - year - old farmer's daughter, who was chosen "Dairyland Queen" at the annual Dairyland Festival in Watertown, N. Y. A real farm girl, she drives a tractor, milks the cows and helps with other farm chores.

WIDESPREAD INCREASES

Relief Cases Double 1945 Low

WASHINGTON.—As evidence that public assistance problems are becoming critical throughout the nation, American Public Welfare association reveals that general relief caseloads have reached a level more than 50 per cent above the low point of 1945.

Current unemployment is centered among unskilled workers who have been displaced by skilled veterans, according to the report. Marked increases in unemployed rolls have been reported from 22 major labor centers.

Minnesota's family relief caseload increased 35 per cent in 1946, "a sharp incline which current signs indicate is typical of many states," the association said.

Several state legislatures have granted bigger state relief funds to meet the rising need. Pennsylvania boosted assistance for 1947-1948 to $30,600,000, an increase of $10,000,000 from the 1945 appropriation. Monthly relief costs in the state for May were $1,260,000 compared to a total of $520,000 in June, 1945, and the monthly caseload increased more than 60 per cent.

Highest current increase in cities is reported in Washington, where general assistance rolls increased 60 per cent between March, 1946, and March, 1947, the report declared. Unemployment benefits in New York City have increased ninefold, from 23,212 in August, 1945, to about 203,000 at the present time, it was asserted.

Total general relief caseload for the nation in February was 344,000 compared with 258,000 a year earlier. In a year general relief costs increased 97 per cent in Delaware, 90.8 per cent in Wyoming, 75.8 per cent in Ohio, 67 per cent in California and 55 per cent in Indiana, the report disclosed.

WHAT'S IN A NAME

Colorful Nicknames Abound In Underworld, FBI Learns

WNU Features.

"Cotton Patch Molly," "Bowlegged Bessie," Iron Foot Florence," "Butcher Knife Lizz," "High Ball Lill," "Mustache Annie!" These probably aren't the type of nicknames which the typical American woman would choose for herself, but they are among the colorful and unusual appellations by which female characters of the underworld are known.

This is revealed by the identification division of the Federal Bureau of Investigation, which utilizes nicknames as means of tracking down criminals in its relentless drive against law violators Files on nicknames palm prints, footprints and general appearance data are maintained by the FBI for identification purposes to supplement its collection of fingerprints, largest in the world.

Indicative of the FBI's thorough and systematic effort to maintain complete data on members of the underworld mob, the file contained 469,515 nicknames at the start of the year During the past year 47,580 nicknames were added to the list.

Although an individual may change his real name many times, as a general rule his nickname sticks, FBI agents point out in emphasizing the effectiveness of this means of identification. This has been found particularly true in cases involving check forgers, impersonators and extortionists.

The women have no corner on the unique nicknames found in FBI files. Also included in this category are such cognomens as "Alibi Good Kid," "Am I Blue," "Barrell House Shorty," "Beef Stake Bob," "Blue Shirt Slim," "Chew Tobacco Lewie," "Gold-Tooth Frenchy," "Liver Lip," "Sweet Cakes" and "Whoop Em Up Willie."

Notorious public enemies of the 1930s are recognized more often by their nicknames than their true names. The given name of "Babyface" Nelson was Lester M Gillis. "The Owl" was in actuality Basil Hugh Banghart. "Pollynose" Kator, a member of the Touhy gang, was

'FATSO' AND 'POLLYNOSE'
Nicknames Stick

the nickname of August John Lamar. Roger Touhy was commonly known as "Black" Roger. Joseph Raymond Negri, associate of "Babyface" Nelson was dubbed "Fatso."

Members of the Barker-Karpis gang also had their nicknames. "Ma" Barker was the name accorded Kate Barker by her sons and their underworld pals. Arthur Barker was known as "Doc." Alvin Karpis was nicknamed "Old Creepy" because of his cold stare and precision in carrying out his crimes. Charles Arthur Floyd was widely known as 'Pretty Boy."

A criminal may receive a nickname because of some physical characteristic, unusual personality trait or criminal specialty. "Cockeye Mary" was labeled as such by her underworld pals because of her facial appearance. Another criminal's extensive vocabulary prompted the nickname of "Dictionary."

"Sweet Lips" did not live up to his name, FBI agents ascertaining that he had been in custody of police several times for offenses ranging from vagrancy through counterfeiting. The nickname, "Wildflower," also proved misleading. The individual bearing that name was arrested for assault.

In many instances law enforcement agencies will have little, if any, information about a wanted criminal except perhaps a nickname and a smattering of descriptive data. When this information is forwarded to the FBI, a search through the nickname file sometimes results in an identification.

"Kentucky Red" was the only name known for an individual who was selling drugs in New York City FBI nickname files furnished his correct name, descriptive data and his whereabouts at the time.

Nicknames have not been confined to the criminal element. "Machine Gun" Kelly originated a nickname for the special agents of the FBI when they apprehended him in a dawn raid at Memphis, Tenn., on September 26, 1933. "Don't shoot, G-men, don't shoot!" he cried.

This name caught the fancy of the public as well as that of the underworld. To this day FBI agents are known as "G-men."

Youth To Mow Lawn As Penalty for Prank

COLUMBUS, OHIO.—Mrs. Frank Bangert is getting her lawn mowed all summer by a not too willing boy of 13. Because he had been denied the right to string a toy telephone line across Mrs. Bangert's property, the boy had stuffed a 17-inch garden snake into her home through the front door mail slot. A juvenile court judge assessed the unusual punishment

"Off We Go"
AVIATION NOTES

Airport Chatter

Fliers from several Midwestern states participated in the first all-Upper Peninsula tour conducted under auspices of the Michigan state department of aeronautics. The flight covered 289 miles, stops being made at eight cities. . . . Ten charter members have signed up for the recently-organized Decorah Flying club at Decorah, Iowa The club has purchased an Aeronca Chief plane. . . . Dedication services for the new Worthington, Minn., airport are scheduled July 5 and 6. More than 120 private plane owners have been invited to participate in the ceremonies. . . Plans for a series of district meetings and flight breakfasts were perfected at the annual meeting of Flying Farmers of Iowa, held at the Ames municipal airport. The statewide organization, founded March 18, 1946, at a meeting on the Iowa State college campus, now numbers more than 500 members from some 70 counties. . . . An air show will be among the headline attractions at the American Legion summer jubilee at Harper, Kas , July 16-19.

Aerial Detective

Mark up another use for the airplane in agriculture

W V Allington, plant pathologist of the department of agriculture, is using an aerial survey to spot evidence of a fungus disease—brown stem rot—that is reducing soybean yields in the Midwest.

Allington, who is stationed at the regional soybean laboratory at Urbana, Ill., uses his privately-owned plane to make aerial photographs of soybean acreage over a wide area In the pictures, plants in infected fields show up much lighter in color than those in non-infected fields By comparing his aerial pictures with road maps, Allington locates the fields where the fungus infection appears to be most serious.

* * *

Girl Scouts have taken to the air in a big way. More than 5,000 Girl Scouts receive preflight training and flight experience as members of 315 Wing Scout troops in 42 states and Hawaii. "Wing Scout" is the name of the organization's own Cub plane, presented to them by William T. Piper. It is the only airplane owned and used by a national youth-serving agency.

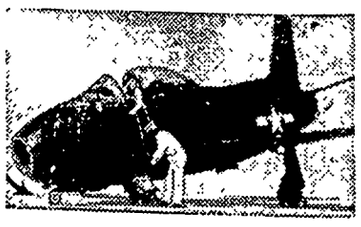
* * *

Civic Cooperation

Climaxing an unprecedented example of practical cooperation between two cities, dedication ceremonies were held for the joint municipal airport at Arkansas City and Winfield, Kas. The two progressive communities in a rich oil and agricultural belt of southeastern Kansas buried the hatchet to acquire Strother field, former AAF fighter training base, as a joint project in August, 1946 Facilities offered by the field permitted the two cities to secure a new industry, the Fairchild personal planes division.

Gov. Frank Carlson of Kansas made the dedicatory address at a program which featured an elaborate air fair Starting with a dawn patrol breakfast, the day's program included an exhibition and demonstration of personal planes, military aviation display, model airplane demonstration, flights by women pilots and fliers over the age of 40, parade and trap shoot.

* * *



'KNEELING DOWN' . . . A bending nose gear which enables a fighter plane to "kneel down" on the crowded deck of an aircraft carrier is a feature of one of the navy's fastest airplanes, North American Aviation's all-jet XFJ-1. The equipment is devised to facilitate handling of the fighter on the ground and stowage on deck.

SUNDAY SCHOOL LESSON

Seeing God in Our Present World

LESSON TEXT FOR JULY 13—Job 38: 1-7, 16-18, 22, 28, 31, 41.

MEMORY SELECTION—The hearing ear, and the seeing eye, the Lord hath made even both of them.—Proverbs 20: 12.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute, Chicago.

"THE earth is the Lord's and the fullness thereof; the world, and they that dwell therein" (Ps 24:1) The man who knows the Lord recognizes that the material and the spiritual world are both God's, and that there is in the final analysis no dividing line between the secular and the sacred.

To keep our thinking straight about the story of Job, we quote an excellent summary by Dr. B L. Olmstead: "Our lesson today stresses the works of God as seen in nature The longer lesson of a few chapters (Job 38-41) consists of the whole of the Lord's answer to Job out of a whirlwind after the dialogue with the three friends is completed and after a youthful bystander, Elihu, had undertaken to give Job an answer (chs. 32-37).

"While Elihu was speaking, a storm came up and Elihu used it to portray the greatness, mystery and unsearchableness of God (ch. 37). Elihu uttered many truths, but he did not rid himself of the error that Job was suffering for his sins. When he had finished, the voice of God was heard out of the storm"—(Arnold's Commentary).

We find in the selected Scriptures of our printed lesson—

I. The God of Creation (vv. 1-7).

JOB'S friend Elihu had made a rather good speech, but he had missed the real point of Job's testings. So the Lord rebukes him as one who darkens counsel "by words without knowledge."

How aptly that expresses much that is going on in our day Brilliant men, leaders in science, economics and government, but without the true knowledge which comes from a simple faith in God, are now filling this already confused world with millions of words

Yes, words, words, words, that really darken the truth about God and his plan for the world. They flow from the radio, the press, the pulpit, from everywhere, and only add to the confusion.

God now brings Job to his feet (v 3). He is to stand up like a man and answer God. Where was he when God laid the foundations of the world? If he is so wise, perhaps he knows how God suspended the world in space? Perchance he would like to get out his little measuring line and try to put the plans of the Almighty through the little channel of his human brain!

These are questions that the professed leaders of our day need to answer, and they need also to come (if by any chance they could humble themselves) to the place that Job did (40:4): "I will lay my hand upon my mouth."

Job is also reminded that the God of creation is also

II. The God of Life (vv. 16-18).

THE God who put the springs in the bottom of the sea, and who has measured the breadth of the earth, is also the God who controls life and death.

Men have tried down through the ages to search out the secret of life, and at times they have talked as though they had discovered it. Then one discovers that they have just wrapped up their inability to fathom it in some new scientific words, and we still have not taken that matter in our own hands.

That may well be a real blessing, for only the infinite God has the wisdom to determine the limits of man's days, and the manner of his entry into the gates of death. How good it is to leave such matters in his mighty but tender hands!

That leads us to our next point. He is

III. The God of Order (vv. 22, 28, 31, 41).

HE MAKES the millions of snowflakes in thousands of intricate patterns—no two alike, but all in marvelous geometric patterns. Can Job understand that—in fact, can you and I understand how he does it?

Who feeds the birds? Who keeps the stars moving in such order that man can calculate their movements down to the very minute? What about the rain, the hail, the lightning? Look at the animals and their marvelous adaptability to their surroundings.

The man who thinks all these things are the results of chance, or who talks about "the laws of nature," only reveals the utter smallness of his own mind, and his complete lack of comprehension of the Almighty God.

HIGHEST PEAK ON CONTINENT . . . Mighty Mount McKinley rears its snow-covered head high into the clouds, reaching an altitude of 20,300 feet above sea level. The peak is the major attraction of Mount McKinley National park, one of the two parks located outside the continental limits.

STUDY IN CONTRASTS

Lush Tropics, Frozen Arctic Embraced in Overseas Parks

WNU Features.

Two of the great national parks, which belong to the people of the United States, lie in our territories overseas—Hawaii National park on the islands of Hawaii and Maui in the Hawaiian archipelago and Mount McKinley National park in Alaska. These two parks present a study in contrasts. Hawaii, within the tropics, basks in perpetual spring. Its forests with lush ferns 40 feet high are gay with birds of brilliant plumage. McKinley, on the other hand, enjoys a brief summer season of warmth, and during most of the year sleeps in Arctic silence Here in winter some of the birds and small animals even don white habits to travel like spectres over the snowy landscape

National Parks Ninth In a Series

Hawaii National park was established by act of congress on August 1, 1916, and was placed under administration of National Park service which also was created in the same month Main features in the park are two spectacular volcanoes, frequently active, Kilauea and Mauna Loa on the island of Hawaii, and one of the world's largest dormant volcanoes, Haleakala on the island of Maui The total area within the two sections of the park is about 275 square miles.

Kilauea, probably older than its neighbor, towering Mauna Loa, creates the impression of being a crater in the side of the higher mountain, although it is itself a mountain with an altitude of 4 090 feet This illusion is the result of a broad depression at its top and of its gentle slopes, caused by lava flows from many lateral vents Within the depression is a vast pit, Halemaumau or "House of Fire" which often contains a boiling, bubbling mass of molten lava whose surface fluctuates from bottom to rim

Until 1924 molten lava was usually visible at any time in Halemaumau, but activity since then has been spasmodic. Its risings are accompanied by brilliant fountains and inflows of liquid lava, and its lowerings by tremendous avalanches which send up enormous dust clouds.

To the west of Kilauea rises the vast dome of Mauna Loa whose summit crater, Mokuaweoweo, is included in the national park Included also is a broad connecting belt between the two volcanoes. Mauna Loa thrusts it great bulk 13,680 feet above the surrounding Pacific By eruptions in its summit crater and by flank outbreaks it is constantly adding to its mass

In action Mauna Loa is even more spectacular than Kilauea, and steam vents continually send feathery clouds into the air Extending northeast and southwest from the summit are volcanic rifts with many deep rents formed by earthquake and eruption as well as many brilliantly colored spatter cones, some 200 feet in height Twice since 1880 the City of Hilo at the base of the volcano has been threatened by great rivers of lava which have flowed down the sides of the mountain.

• • •

HALEAKALA SECTION of Hawaii National park is on the island of Maui This volcano derives its name, which means "House of the Sun," from a legend about the Polynesian demigod Maui, who climbed to the top of Haleakala, ensnared the rays of the sun, and forced it to travel more slowly in its course so that his mother might have sufficient time to complete her day's work. Haleakala, now rising more than 10,000 feet above sea level, was once a much higher mountain. A collapse of the dome, many years ago, formed a great crater 7½ miles long and 3 miles wide, with walls over 1,000 feet high.

Within these gorgeously colored walls lies a superb volcanic spectacle. Covering the floor are giant red, black and orange cinder cones which, although hundreds of feet high, are dwarfed by the immensity of their surroundings. The crater has a circumference of 21 miles and an area of 19 square miles.

Both sections of the park are reached from Honolulu by island boat or airplane From Hilo, port of Hawaii island, one may rent an automobile for the trip to Kilauea or take a regular bus.

• • •

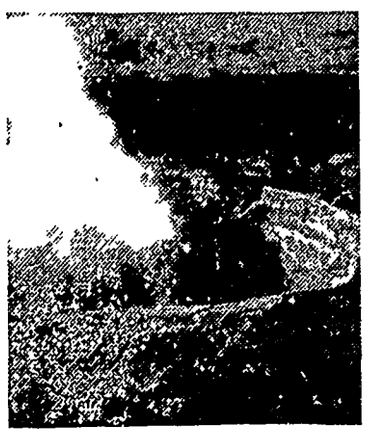
MOUNT McKINLEY National park, situated in south-central Alaska, was created by act of congress in 1917 It contains an area of a little more than 3,000 square miles. Principal scenic feature of the park is mighty Mount McKinley, highest peak on the North American continent. This majestic mountain rears its snow-covered head high into the clouds, reaching an altitude of 20,300 feet above sea level, and rises 17,000 above the timber line. On its north and west sides McKinley springs abruptly from a plateau only 2,500 to 3,000 feet high.

For two-thirds of the way down from its summit Mount McKinley is enveloped in snow throughout the year. Denali, "home of the sun," was the name given to this impressive mountain by the early Indians.

Near Mount McKinley are Mount Foraker, with an elevation of 17,000 feet, Mount Hunter, 14,960 feet, and Mount Russell, 11,500 feet. Great glaciers fed by the high snow fields of this mountain range flow many miles both to the north and to the south.

During the park season, which extends from June 10 to September 10, with more than 18 hours of daylight each day, there is a wealth of flowering plants The park is also the home of many interesting animals and birds

Prospective visitors to Mount McKinley National park probably will make the trip to Alaska by steamer from Seattle To use the war constructed Alaska highway through Canada requires a special permit from the Canadian government, and permits are not yet granted to motor tourists. Business men, settlers and bus passengers may apply for permits to L. E. Drummond, Traffic Control Division, Alaska Highway, Edmonton, Alberta.



VAST PIT . . . Halemaumau or "House of Fire" is a vast pit in the crater of Kilauea volcano, Hawaii National park.

Vandals Cause Damage in Parks

WASHINGTON.—Carelessness on the part of visitors annually causes untold damage in the national parks, according to Newton B. Drury, director of National Park service.

Careless damage by visitors, he adds, has been noted in such widely different places as the Statue of Liberty national monument and Yellowstone National park.

Vandalism at the Statue of Liberty is discouraged by a new coat of washable paint which will not absorb lipstick and a wire enclosure around the stairway designed to prevent writing on the statue.

"Unfortunately," Drury continues, "similar protection cannot be given the delicate hot spring and geyser formations in Yellowstone. Debris thrown into the pools in some cases actually causes explosions that have destroyed pools."

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try *Doan's Pills*. *Doan's* help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. *Ask your neighbor!*

KLEMME LOCAL NEWS

Mrs. Frances Swalve, Mrs. Louise Rosendahl, Mrs. Rose Fritzel called at the Emil Beier home Sunday evening.

Mrs. Mary Waterman went to Mrs. Fred Radloff's home on Wednesday evening to visit over the Fourth. She returned home on Monday.

Mr. and Mrs. Keith Stille from Corpus Christie, Texas came on Wednesday to visit with relatives and freinds in the Klemme community.

Mrs. Vern Bisom and children were at Mason City Thursday of last week, having dental work done before school begins this fall.

Mrs. Joe Lawhorn of Garner is doing work and caring for Mrs. Antonia Keraus, who recently came home from the Garner Nursing Home

Mr. and Mrs. Curley Lucas and children and Mr. and Mrs. Henry Keeper spent Monday visiting at the Raymond Keeper home in Mason City

Bernice and Francis Tanner and Romona Tanner of Clear Lake and Mrs. W. E. Tanner of Goodell are vacationing with a trip to the west coast.

Mrs. Paul Grange of Mason City was visiting with a few Klemme friends Monday afternoon, while in town a short time.

The Hancock County Farm Bureau board of directors met at the Farm Bureau office on Tuesday evening. Claims were allowed and plans made for the annual achievement show.

W. L. Baggs, cashier of the Hancock County National Bank returned Sunday from a two week's business trip to eastern states where he completed a bankers training course.

Dean Nerdig, vocational agricultural teacher in the Garner schools for several years, recently resigned his position and will not return for the next school year.

Mr. and Mrs. Curley Lucas and family left Tuesday for their home in California, where they will make plans for moving their belongings to Ogegon, where they expect to farm.

Many of our Klemme folks celebrated at Clear Lake July Fourth. It was a big day and the entertainment was well planned until about nine o'clock in the evening, when the clouds rolled around and gave them a real down pour, and many of the folks looked like drowned rats.

Rev. Earl Josten and John Josten came from Des Moines last Wednesday and John is preparing his personal belongings making ready to enter the County Home for rest cure. John is coming along fine since his recent operation, and we hope he will enjoy his stay at the Home J. A. Chambers took him over there on Monday of this week.

Norman Eckes of Long Paire, Minnesota and Woodrow and Ronald Montgomery of Motley, Minnesota came Friday to spend the week end at the Owen Nuehring home. They returned to Minnesota Sunday afternoon, except Ronald Montgomery, who will spend several weeks visiting relatives. Woodrow and Ronald Montgomery are brothers of Clifford Montgomery.

Mr and Mrs. V. W. Pehrson and son Russell from Ames visited at the J. C. Thomas home over the week end.

Mr. and Mrs. V. W. Pehrson and Mr. and Mrs. J. C. Thomas drove to West Bend Friday to see the Grotto.

Mr. and Mrs. Clair Kilgore of Fort Wayne, Indiania, visited at the Joe Burgess home over Sunday.

Herman Paul, custodian at the County Home, was in Klemme Saturday evening visiting with his many friends.

Mr and Mrs. Lyle Wilcox of Ames were supper guests Saturday evening with Verle Keraus and family at Garner.

Otto Keraus, printer of Osage, spent the Fourth holidays in the Klemme and Garner vicinity with relatives.

Fred A. Arnold, who has been confined to his home because of illness recently, is able to ride up town and visit around the street again.

Mrs. Henry Medau's friends will be gland to know she is able to be out to church and around town again, after her recent operation.

Dorothy Ellingson, who attends beauty school in Des Moines, came home Thursday evening and visited at the parental Adair home until Sunday evening.

Mrs. Vivian Mace and Reverdy went to Des Moines Saturday and attended the Mace reunion held there Sunday. They returned to Klemme again Monday

Miss Ruth Stille, who is employed in Des Moines, came home and visited at the Lester Stille home over the Fourth.

Miss Peggy Coobs, who attends CCC at Des Moines, spent the week end at the Ben Coobs home.

Master Dick Dulmes went to Grundy Center Sunday where he always spends part of his summer vacation with his Aunt Ada and Grandma Mary Mutch But we think the main attraction at Grundy Center, is the delightful pool they have for the young folks, and Dick will be able to swim just like a fish before the summer is over, and dive from the highest diving board.

Mrs. Lloyd Paris, sister of Mrs A. L. Kingery, came Wednesday and visited until Thursday evening in Klemme. Her husband flew down from Armstrong to the Wicks Flying Field and she went back with him. While at the field that evening, Dick Dulmes, Graydon Barz, Emily Johnson and Mrs. A. H. Dulmes all enjoyed having a ride with Mr. Paris.

BICYCLE TRAVELER

Edgar Mueller, who is a son of a friend of Mrs. Clara Barz's visited in Klemme Thursday and Friday last week, on his way west. He is an Instructor in Television, and is taking a three months trip to the west coast, traveling on his three speed bicycle. He hails from Milwaukee, Wisconsin and is twenty nine years old and is out for a lark He carries a sleeping bag and when weather permits he sleeps outdoors. If necessary to stop at a tourist camp, he has it over the ones traveling by car, as he can safely take his conveyance right inside the cabin.

He expected to average one hundred miles a day, but coming to Klemme he made 75 miles average, over the Wisconsin hills. It is on the hills, that his three speeds comes in nicely, as he can go as fast up hill, or down hill, or on the level accordingly. He has a bell on his bicycle instead of a horn.

His English type bicycle weighs thirty pounds and he carries twenty five pounds of luggage. He has caused much merriment along the way, as truck drivers stop him and visit, and many of them have given him their addresses, as they want him to write and tell them if he really makes the trip out to the coast and back, peddling away.

From where I sit ... by Joe Marsh

Fish Bites Woman!

Willie Wells was coming home from Seward's Creek the other evening with a string of trout, when a stern looking lady (visitor at the Boxwood Inn) stops him, and tells him a man his size could be better occupied than catching fish.

Willie tells her off real good-naturedly by saying: "Perhaps you're right, but if these fish had kept their mouths shut, they wouldn't be here." (At that, says Willie, laughing out loud, she looked just as if a fish had bit her!)

Blabbing mouths never cause anything but trouble. Nobody knew the facts would ever criticize Willie's right to go fishing one day off—any more than we are to deny his right to come home to a mellow glass of beer.

From where I sit, the slow to criticize—and the quick to recognize another's tastes, the better we'll get along together — whether those tastes apply to beer or fishing.

Joe Marsh

Buy It While We Have It!

There is no doubt in our minds that there will be a shortage of farm equipment this next year and not only that but we believe at a higher price. We recommend that you give thought along that line and take the opportunity now and buy the following equipment that is available and priced right.

NEW FARM TRAILERS
WOOD WAGON BOXES
STEEL WAGON BOXES
ONE ROW CORN BINDER
MOUNTED AND PULL TYPE
TRACTOR PLANTER
PLOW TWO BOTTOM SLAT 12"
MANURE LOADERS PRICED FROM
$175.00 To $265.00

TWINE TWINE TWINE TWINE TWINE TWINE

Have you given thought to the wonderful prospect of your oat crop? Our advice on the twine situation is buy yours now and not go through the same shortage as you have in the past. Get yours while we have some on hand.

THE FOLLOWING USED EQUIPMENT WILL BE SOLD AS A UNIT . . . 1941 IHC H Tractor with new HM 238 cultivator and new No. 24 corn picker. This tractor was completely overhauled, has new 11-38 Firestone tires, new paint and GUARANTEED for 30 days.

1937 F30 In first class condition with 229 cultivator and No. 22B two row mounted corn picker.

The above equipment is in A1 condition and should help some farmer to get the crop out of the way at a price which is fair.

re Department Made Run Sunday To Fight Flames

AZE AT NORTHERN LUMBER CO. PUT OUT JUST IN TIME

mme Fire Department Did od Job In Squelching Flames

fire was discovered at the rthern Lumber Co. office on nday shortly after 1:00 p. m. en Henry Smid, an employee the company had gone into office for some personal beginngs when he smelled smoke d called in Erwin Lau who was ssing by and an alarm was rned in.

The fire department responded ickly and found that the blaze s in the basement of the ice. The flames had progressed so far that the office floor s hot. It was necessary to p holes in the floor and an er wall in order to put out fire which had gained headway

t is thought that the fire had ginated from a kerosene ter heater near the furnace. ville Stokesbary, bookkeeper, d been in the office about noon d had checked the heater at time it was working o. k. oyd Sherwood, manager, stated that in another 10 minutes e fire might have gotten out control had it not been discovered as the flames had nearburned through the floor and s working toward the north ng under the office. The mage resulting will be mostly a matter of labor replacing or joists and beams.

Ladies Enjoy Picnic Supper

A group of ladies enjoyed a nic supper at Mrs. Edna ada's home Friday evening. ose present besides Mrs. Tha- were Mrs. Frank Sandry, Mrs. ances Swalve, Mrs. Mary aterman, Mrs. Herman Bridges, rs. Martha Bredbenner, Mrs. ara Stille and Miss Lydia Bock. ll enjoyed a fine time.

The Work Circle of the Klemme Methodist Church will meet hursday, July 17th at the church ith Mrs. John Johnson and Miss ary Swanson as hostesses.

HANG ONTO 1947 TAGS

Motorists are asked to hang nto their 1947 Iowa license lates because for the most part ey will have to do for two ears, the Iowa department of afety says.

New plates will be issued next ear only for motorcycles, nonesident automobiles, farm trailrs and truckers who pay their icense fees on the installment asis.

Validation tags for attachment to the 1947 plates will be ssued for all automobiles and all rucks on which the license is aid in advance for the full ear.

Iowa has been forced to use his system for the first time because of the shortage of the roper type of steel.

Mr. and Mrs. Melvin Schlei Building New Home In Klemme

Mr. and Mrs. Melvin Schlei, who were married recently, have started construction on a new home in the southeast part of Klemme on a lot just east of the Harvey Hubbard home.

Their new home is quite modernistic, featuring a long living room and balcony bedroom. Under the balcony will be located the kitchen, bathroom and utility room. The house will be well lighted and ventilated with a large number of windows.

Construction is going right along and the house is already enclosed.

GARNER WOMAN DIES OF STROKE

Widow of Former Iowa Legislator Summoned

Funeral services were held for Mrs. C H Nelson at the United Presbyterian church on Tuesday at 2 p m with the Rev Doctor J W. Pollock in charge Interment was in Concord township cemetery southwest of Garner

Mrs Nelson was born in Garner November 16, 1873, and was educated in the schools of that vicinity On November 8, 1890, she was married to C H. Nelson who died February 29, 1944. Three sons also preceded their mother in death, one in infancy, Harry in 1910 and Earl in 1946.

Surviving are 2 sons Ray of Garner and Elmer of Bemidji, Minn.; 2 daughters, Mrs. W J Anderson of Klemme and Mrs. E. W. Bradwell of Garner There are 8 grandchildren.

Mrs. Nelson suffered from a stroke last Wednesday and died at her home Sunday afternoon.

Her husband was a former representative from Hancock County and served several terms in the Iowa legislature He was widely known for his community activity and in the field of co-op elevators and insurance At the time of his death he was president of the Hancock County National Bank at Garner

Mr. and Mrs. Nelson observed their golden wedding anniversary in 1940

METHODIST GIRLS ATTEND CAMP AT LAKE OKOBOJI

The second delegation from the Klemme - Liberty church left Sunday to attend camp at West Lake Okoboji. This camp is known as Camp Methoji and is for the high school students The theme will be "We Test Our Lives By Thine."

Mrs Wesley Patterson accompanied the following Klemme and Liberty girls as chaperone and will be in charge of the group: La Vonne Beier Beverly Beier, Gloria Haefner, Madelin Lundy, Darlene Schultz, Helen Pringnitz, Shirley Stille, Rose Schaefer, Isabelle Gibbs and Marjorie Lau.

The girls will be in camp for a week and will enjoy a full program of religious work, games, swimming and entertainment.

COWS NEED MORE GRAIN WHEN PASTURES DRY UP

High-producing cows will need more grain in their ration as pastures dry up and grass quality falls.

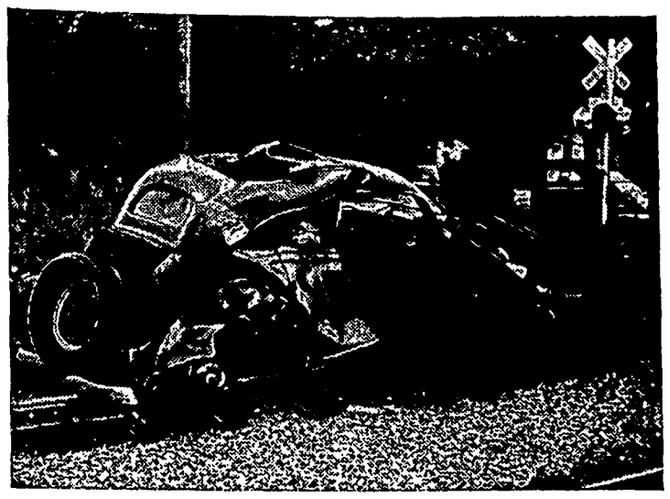
Cows producing a pound of fat a day should have 1 pound of grain for each 5 to 7 pounds of milk produced even when pastures are greenest. Now, with bluegrass going into a dormant stage and other grasses and legumes furnishing less nutrients, more protein is necessary.

Requirements vary with dryness of the pasture and productivity But feeding 1 pound of grain for each 4 pounds of milk produced daily should meet requirements this year, says Floyd Johnson, Iowa State College extension dairyman.

With grain at a premium, silage makes a valuable supplement for late summer pasture. also, such soiling crops as green alfalfa, soybeans and green corn may be used, but they require considerable labor.

Sudan grass can be utilized by the time it is 18 inches high. Farmers who planted about 6 weeks ago can turn in on sudan any time. By doing this they can supplement pastures that are doing poorly.

There's more safety in numbers than there is in figures.



The driver of this car disregarded a plainly marked warning sign and crossed the tracks directly into the path of a passenger train. His machine was swept up like a leaf and raked over the tracks. The driver and two occupants were killed. Signs, lights and bells are placed at crossings for the protection of motorists. Yet 2,000 were killed last year, and 70,000 injured, because they did not trouble to stop, look both ways, and listen for the warning whistle.

Earle Smith New Owner Of Christie Garage

KLEMME BUSINESS CHANGED HANDS MONDAY

Earle Smith New Owner Of The Christie Garage And Service Station

Monday a deal was closed in whereby Earle Smith, farmer northeast of Klemme, purchased the Verner Christie Garage and Standard Service from Mr Cristie, who had operated the past two years.

Two years ago Mr Christie built the fine building on the corner opposite from Wellemeyer's which Mr Smith purchased. In the deal Mr Smith acquires the building the heavy equipment of the shop. He will take possession of the business Monday

Mr Christie stated that he had no definite plans for the immediate future Mr Smith will continue farming but will quit this fall and move into town. He expects to be in charge of the business as his time permits for the present.

CRYSTAL 4-H BOYS STUDY PROJECTS ON TOUR

The Boys 4-H club of Crystal township conducted a tour of members projects on Wednesday, July 9

Boys who went on the tour were Fred Korte, Jr., Phillip Orthel, Marvin Schauf, and Otto Larson, Jr They were accompanied by their leader, Raymond Hobbs, and Edgar Dorow, county extension youth assistant.

Judging, fitting, and showing of dairy calves and pigs were studied and demonstrated A picnic lunch and sports were enjoyed at Crystal Lake Park during the noon hour

R. C. Club Will Play Albert Lee Softball Team Thursday

On Thursday evening of this week the R C club will play the Albert Lee, Minnesota softball team on the R C. diamond. The Albert Lee team made a tour through Missouri last year and judging from this they should be able to give a good exibition of softball On Monday night of next week Hayfield will be guest of the R C team Both of these games will start at 8:30 P. M.

Last Thursday the R. C team played the hatchery team at Clarion in a wild marathon of runs. R S came out on the long end of a 25 to 14 score. Earlier in the week R. C. bowed to Kanawha to the tune of 10 to 9

KEEP CLINTON FREE OF OTHER GRAINS, WEEDS

Clinton oats should be kept clean and stored in a safe, dry place after harvesting

Because top-grade Clinton is still not plentiful, precautions need to be taken to keep it free of other grains and weed seeds.

Clean bins out carefully before the oats are put in, plug all holes and cracks, especially those adjoining other small grain bins; and shake out workman's pant cuffs before moving from other grains into the Clinton.

Combines and threshers must be thoroughly cleaned out before Clinton is harvested. In combining, be careful along the edges of fields not to clip other small grain and take it into the machine

As Iowa State College plant pathologist E. P Sylwester points out, mixing in only a few foreign seeds can make a lot of difference in the quality of oats within a few years.

KEEP CASTRATED PIGS OUT OF MUD

It Will Help Reduce Chance Of Lockjaw and Other Soil Infections

Recently castrated pigs should be kept on clean grass pasture to reduce danger of lockjaw infection.

Putting pigs into unsanitary lots where they can get dirt into the wounds should be avoided says Dr K. W. Stouder, Iowa State College extension veterinarian.

Possibilities of picking up lockjaw, gas gangrene or pus germs, which are all present in the soil, are much greater in bare lots and mud wallows than on clean green pastures. Even letting pigs lie in large water troughs increases the chances of infection.

Make Incisions Long

Farmers who have not yet castrated spring pigs should be careful to make incisions long enough to allow proper draining of the wounds. Stouder says infection and tumors are often the result of short, small incisions He recommends making the cut long enough so that the lower end will not be visible when the pig stands.

A large wound stays open better and is not likely to become infected. Making a longer cut does not increase hemorrhage.

Tumors result from failure to cut or break the cord high enough up in the canal Along cord, left in a small incision which cannot drain, easily becomes infected. This causes the tumors so often seen on young pigs.

Remove Tumors

The growth can be removed. However, removal usually requires a veterinarian's attention. Tumors should be taken care of as soon as possible, otherwise the pig fails to grow well, does not make a good gain, and will be docked when marketed

Pigs are most easily casterated when they are very small If castration of spring pigs has not yet been done, Stouder recommends doing it right away. Summer pigs can be handled easily and will recover more quickly if the job is done while they are only a few weeks old

Klemme Defeated Hampton

The Klemme Merchants downed Hampton here Sunday 15 to 2.

Easy Street is just a blind alley.

Balance Of Main Street Will Be Improved With Black Top

KLEMME SCHOOLS WILL SPONSOR PICNIC FOR GRADE STUDENT

All Children From Fourth Through Ninth Grades Are Invited

The Klemme Schools will sponsor a picnic Thursday afternoon, July 17th, for all of the boys and girls of Klemme and the surrounding community, to be held at the Clear Lake State Park on the south shore

All boys and girls in both the Klemme and rural schools who will be enrolled in the Fourth Grade and through the Ninth Grade are invited to attend

The children will be taken to the Park in school buses and will be accompanied by Rev Calvin Grosshuesch, Supt. A L. Kingery, and Harvey E Barz. Any other adults or parents who care to go along with the children are welcome to do so

Boys and girls who wish to go on this picnic should be at the school house by 2 30 p m. Each child is asked to bring 25 cents for the picnic lunch Any child who wishes to go swimming must bring his own bathing suit and a written permission from his parents. There will be no charge for swimming.

A big time is being planned and all grade pupils should plan to attend You need not be a pupil of the Klemme grade school to go with the crowd.

Iowa Farms Homes Are Among Best Equipped

Iowa farm homes are above average in facilities for making home work easier, says Ray Wakeley, Iowa State College sociolgist.

Figures from the 1945 census of agriculture indicate that three-fifths of Iowa farm families have sink with a drain Slightly more than two-fifths are reported having a mechanical refrigerator and four-fifths a powered having a mechanical refrigerwasher

This puts Iowa farm homemakers above average in the ownership of these labor-saving devices.

LOTS OF LIGHTNING

Lightning has been playing havoc around Iowa At Lake View last week, Elwyn Danielson was struck by a bolt while visiting on the porch with some friends. The lightning tore one sleeve off his shirt, stopped his watch and injured one leg, necessitating the use of crutches. Near Adel, five high-grade whiteface cows gathered under a tree for protection and all were killed by a bolt which struck the tree.

COUNCIL ACTS TO IMPROVE STREET EAST OF PAVING

Property Owners Met With The Council On Street Improvement

The long awaited improvemnt program on Main Street now seems to be getting under way as the Town Council took some definite action on the project at their meeting Monday night, which was attended by a goodly number of property owners along the street.

The plan is to black-top the Main street from the pavement and east to the end of the street. Before this can be done a survey will be made to determine drainage, the road content will be analized to get the right proportion of gravel and clay to make a good road bed; a lot of dirt will probably have to be excavated and hauled away as the road bed appears to be too high Following the building of the road bed, black top can then be spread.

Property owners along the street plan to have a curb put in with a gutter to carry off the water.

Other streets will also be improved as funds accumulate for the work, so that eventually Klemme should have a fine street system

Members Of The Jolly Workers Club Meets

The members of the Jolly Worker club met at the home of Anna Conners July 9th 15 members were present and Mrs. Pete Trampel was a visitor. Mildred Gruis and Jenny Nelson read interesting letters they had received from our family in Holland. Some pictures were also shown. In their letters they expressed a big need for soap of all kinds and hose and thread were also very scarce. So the club is packing another box and sending it to them. After the minutes of the last meeting were read by Luella Boelman the meeting was dismissed by our President, Lily Pearson A social hour was enjoyed and a lovely lunch was served by Anna Conners with Dorothy Helps as cohostess. The August meeting will be held at the home of Alvina Helps with Irene Waddingham as co-hostess.

Klemme Boy Wins Garner Ball Game On Steal

Eddie Grosshuesch, who was playing with the Garner Legion team at Garner against the Kanawha Legion team, was a "one man ball team"

Eddie was given a walk, stole second base, then third base and on a bad pitch again stole to home plate, winning the game 1 to 0.

HANCOCK COUNTY SCD BEGINS FARM PLANNING

The first farm planning meeting was held with Group 1 in Avery township at the home of Mr. and Mrs. V. A. Cook on Thursday evening, July 10th. Soil Conservation Survey maps were distributed to those present Moss explained the meaning of the soil, slope and erosion symbols and land classifications shown on maps. Appointments were made with Mrs. Vivian Mace, Harry Ostendorf and John Lauen for the following week to start work on their farm plans. Farm plans for M. C. James and V. A. Cook though incomplete were presented and discussed. These plans, the first in the county, are complete except for the drainage plans. Surveying has been started for completing this part of the plan.

In jail everything is free except you.

American Legion Youth Center
Opens Wednesday Eve., July 23

The Youth Center will be open to all boys and girls in school and to the graduated class. Age limit 18 years and under.

Youth Center will be open every Wednesday night from 8:00 p m. til 11.00 p m. Big opening next Wednesday, July 23rd ! !

We invite all parents to come down and watch. Your children will be safe at the Youth Center and probably having a good time.

Youth Center will furnish dancing, ping-pong playing and bowling.

Membership cards will be issued next week the first night. No dues, no charges, all dancing, bowling and ping-pong free - - free !

There will be four or more Legion men present every Youth Center night; they will help the boys and girls with games, etc., and keep things going smooth.

Membership Cards Issued FREE !

Dancing, ping-pong and bowling free ! !

Household Hints By Mary Jane

Did you know you can take a piece of raw potato and rub all over your waffle iron (after heated slightly) and your waffles will not stick to the iron.

A safe and quick way of washing a blouse is after it has been washed clean, roll it in a bath towel to absorb the water. Let stand an hour or so and then press with a medium hot iron. If you want it quicker some day lay wet blouse in bath towel and put in sack (grocery bag) and put the sack in a medium heated oven for a few minutes and the heat will dry it sufficiently so you can iron right away.

CED Scans Reasons for Failures

Impartial Groups Attempt Study of Business Flaws

By BAUKHAGE
News Analyst and Commentator.

WASHINGTON.—The favorite game in Washington today is a new version of "button, button, who's got the button."

Only for "button" read: Depression, recession, shakedown, readjustment or what have you—if you have anything.

Sen. Robert Taft, as chairman of congress' joint committee on the economic report, had a questionnaire sent out to a long list of business men. The gist of the report seemed to be that there was going to be a business recession, but it was going to be in the other fellow's business.

Frequently it is too much faith in the other fellow's failings and too little regard for one's own that causes business failures. This is especially true of small businesses. Locating some of these "failures" and preventing them was the job recently undertaken and reported on by the Committee for Economic Development, a non-government, nonpartisan group which makes studies of this nature.

Baukhage

Just as this organization was completing its work, another somewhat similar group was setting a task for itself in the hope of straightening out some of the other kinks in the business world. This was the National Planning association, which is out to discover how the many firms which steadfastly year-in and year-out maintain good relations with their employees do the trick. Both propositions are highly interesting.

CED Furnishes Fair Reports

The Committee for Economic Development has for its chairman Paul Hoffman who, in private life, is president of Studebaker corporation. Directing its research and policy division is Raymond Rubicam, the well-known advertising man.

This organization is highly respected. It has a staff of top-notchers doing the research, and its members lean over backwards to be non-partisan. In fact, at a news conference called here to discuss the report's findings, one reporter became pretty riled because he couldn't get Hoffman to comment on the tax situation, one of the hot-spot political issues of the moment.

There are two reasons why CED's latest report (on small business) is significant. One: Like all CED reports, it represents the cooperative efforts of top men in the highly practical field of business and top men in the field of science—political economy; a cooperative effort whose sole purpose is to make America a better place in which to live. There are no axes to grind.

The second reason the report is important to all of us is that today more than ever, in a world of competing ideologies, the perpetuation of our democracy, our system, depends upon the fostering of small business.

Although small business needs assistance, that assistance is difficult to proffer, because small business isn't an "it"—it is three and a half million small business men, all highly individualistic; all as independent and hard to influence as a monkey at the top of a cocoanut palm. And these disunited, sink-or-swim, cock-of-the-walkers make up 98 per cent of the firms operating in this country today.

As the CED report puts it:

"Small business is more virile and more durable than might be deduced from the hue and cry heard for many years as to the disadvantages under which it labors. Nonetheless, small businesses are confronted with special problems and difficulties that are very real. It is vital to all business and to all citizens that conditions unfavorable to small business be remedied wherever possible."

The report finds that the problems of the small business man fall into four categories: management, financing, taxes and competitive opportunity There are very definite ways in which the business man might be helped in solving these problems, particularly the problem of management. The CED report mentions these: Through advice and counsel from his suppliers; through guidance available from the large trade associations; by means of programs instituted by his own community, through special services which could be provided by established counselling and market research agencies within the means of the small enterprise; more extended research supported by business men and foundations; special courses in universities, colleges and secondary schools, and expansion of the present services offered free by the department of commerce. These are graphically illustrated in the diagram.

Meeting Needs Of Business

But the greatest problem is how to place before the highly-individualistic, hard-to-get-at small business man the facts, both as to his needs and how to satisfy them. That is up to the individuals in each community who will take enough interest to read the report (available without charge from the Committee for Economic Development, 285 Madison avenue, New York City) and bring it to the attention of the local business men's clubs, chambers of commerce and similar groups.

The other proposition which is in the making, and which likewise has a purely objective aim, is being carried on by the National Planning association, which is also a non-political, non-profit organization. The NPA states as its purpose: "Planning by Americans in agriculture, business, labor and government."

Its study, which will probably take a year, is entitled "The Causes of Industrial Peace under Collective Bargaining."

The project is under direction of two special committees composed of both NPA members and non-members. One is a sponsorship committee composed of 40 business and labor leaders. The other is the research committee made up of 26 experts in the field.

The idea was explained to a group of us by Clinton Golden, who will direct the research.

Golden explained that what his committee was after was a different approach to the question of labor-management relations.

NEWS REVIEW

Labor Act Is Effective; Weather Hits Corn Crop

Verging on mental and political exhaustion after a bitter, two-day fight, weary senators voted 68 to 25 to override President Truman's veto of the Taft-Hartley labor bill.

The action, sustaining a walloping 331 to 83 house vote to pass the bill over the veto, came on the heels of a final presidential plea to Sen. Alben Barkley (Dem., Ky.) to muster all possible forces in the senate "to prevent this bill from becoming law."

Opponents of the measure needed 32 votes to uphold the veto, and they waged a desperate, last-ditch battle to attain their objective. Final result, however, was a smashing defeat for Mr. Truman at the hands of the Republican-controlled congress.

Highlights of a tooth-and-tongue opposition fight to delay the senate vote as long as possible in order to gain support was an all-night session during which Sen. Glen H. Taylor (Dem., Idaho) held the floor for eight hours and 20 minutes and Sen. Wayne Morse (Rep., Ore.) talked for 10 hours and two minutes. It was the longest filibuster in modern congressional history.

The Taft-Hartley act, which constitutes a wholesale revision of the Wagner act of 1934, was termed by President Truman in his veto message a "shocking piece of legislation." He asserted that the measure would "cause more strikes, not fewer," and would put the country a long step on the dangerous road toward "a totally managed economy."

"This legislation would encourage distrust, suspicion and arbitrary attitudes," the President told congress.

PROTEST STRIKES

With the Taft-Hartley act in force only a few hours, scattered protest strikes suddenly blossomed into a full-scale walkout of 180,000 soft coal miners, At least 41 mines were closed in 10 states. The walkout appeared to be a spontaneous reaction on the part of the miners to the new labor law.

FLOODED OUT: *No Bumper Crop*

Experts who recently predicted a three billion bushel corn crop this year were hastily revising their estimates in the light of continuing torrential rains and widespread floods which have transformed much of the Midwest into a soggy mass of mud.

Damage has been particularly heavy in Iowa, extending from one end of the state to the other. Flooding of river bottom lands is only part of the loss.

Thousands of acres of crops have been washed out, and the loss is considered irreparable. It is too late to replant with anything except forage crops and possibly buckwheat if seed is available.

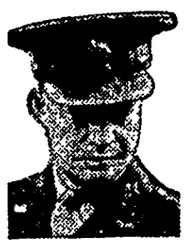
On upland farms, ponds and lakes overflowing their boundaries also will cut seriously into corn yields. All in all, a bumper corn crop is considered extremely unlikely, even with a favorable growing season up to October.

Some authorities have begun to believe that the government's grain export program should be re-examined in view of conditions existing on the nation's farms at present.

IKE RESIGNS: *Goes Academic*

General of the Army Dwight D. Eisenhower has resigned as army chief of staff to accept the presidency of Columbia university in New York, effective early next year.

His decision to step out as top man in the nation's military hierarchy to take the academic post was announced in a statement by Maj. Gen. Floyd L. Parks, chief of the war department's public relations division. The statement said that Eisenhower accepted the Columbia presidency with the approval of the President and the secretary of war. His resignation will become effective "at such time as his superiors may release him from active duty in the army."



Eisenhower

The man who mapped the strategy which brought victory to Allied forces in Europe in World War II will retain his rank as a five-star general for life and continue to receive a compensation of about $15,000 a year.

Initial speculation on a successor to General Eisenhower as chief of staff centered on Gen. Omar N Bradley, now Veterans' administration chief, who commanded the army ground forces in Europe during the war Other high-ranking generals under consideration for the position were Gen. Jacob L. Devers, army ground forces chief, and Lt. Gen. J. Lawton Collins, chief of army public information.

Bradley

As president of Columbia, Eisenhower will be the successor to Nicholas Murray Butler who retired in 1945 and is now Columbia's president emeritus. The general has also been elected a member of the university's board of trustees.

RAPID GROWTH

Industry Expands in Far West

NEW YORK.—The Far West section of the United States has grown greatly in recent years in population, income, industrial stature and international importance, according to a study in the Index, a quarterly publication of the New York Trust company, just published.

"World War II," the study says, "telescoped into a few years an industrial expansion in the Far West which might have taken several decades to accomplish even at the relatively fast rate of development some parts of the area had been enjoying."

The war, it is pointed out, brought new factories and facilities to the region, accelerated development of its raw materials, expanded its power supply and increased its population, thereby adding both to its market potential and its labor supply. With its vast store of natural resources and its rapidly increasing population, the Far West looks forward to a continuing postwar industrial growth through development of new products and new markets."

The seven states included in the study are Arizona, California, Idaho, Nevada, Oregon, Utah and Washington.

"The Far West," according to the article, "made the largest relative gains in population and income of all the areas of the United States during World War II, and has grown faster than the nation as a whole since 1939, increasing its population by 31 per cent as compared with a 7 per cent increase for the entire United States. Factory jobs in the Far West in the same period rose 68 per cent as compared with 46 per cent for the nation. In food production, the increase in the Far West amounted to 25 per cent as compared with 23 per cent for the United States as a whole.

"Continued expansion of industry appears to be of primary importance to the progress of the Far West," the article concludes. "Its abundant natural resources, its climate, its forest riches, its excellent harbors and its scenic beauties have been the chief contributing factors to its rapid growth in the past. To accommodate and support a population increase in the future comparable to that enjoyed so far in this century and particularly in the World War II period, would seem to require the broader economy which its sustained industrial growth is furnishing."

GUARDIANS OF PAST

Hallowed Sites Preserved In National Park System

WNU Features.

National Park service has become one of the great trustees of American history and tradition. In the system of national parks today are more than 80 sites hallowed by the events that have transpired there or by deeds which have been memorialized in marble and stone. Almost every phase of America's past finds expression in one or more of these sacred areas, where National Park service is endeavoring to present American history in a simple, straightforward manner in order that it may be readily understood and correctly interpreted by every visitor

National Parks Tenth In a Series

At most of the more important sites a program of educational service to the public has been established with competent historians in charge. Guides will be found in many of the areas as well as museums with interpretative and study collections. At other areas guide service has been supplemented or supplanted by self-explanatory maps, literature, outdoor signs and trailside exhibits.

Historic sites in the national park system fall roughly into six different groups or periods—Colonial, Revolutionary, Era of the Early Republic, War Between the States, Winning of the West and the recent Age of Industrial Expansion.

• • •

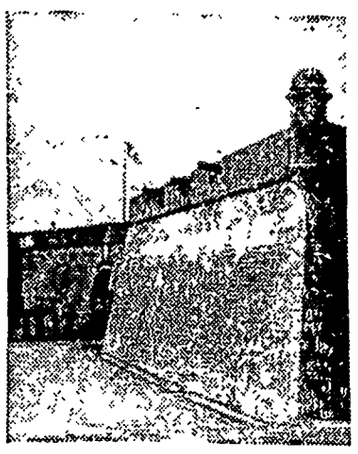
THE COLONIAL period is represented by the Castillo de San Marcos and Fort Matanzas national monuments at St. Augustine, Fla., Fort Raleigh national historic site in North Carolina, Colonial national historical park in Virginia, Fort Frederica national monument in Georgia, George Washington birthplace national monument in Virginia and Fort Necessity national battlefield site in Pennsylvania.

The Castillo de San Marcos, moated and bastioned, was begun in the 17th century to defend the oldest settlement made by Europeans on land now included within the United States.

From the battlements of this fort today one may look across Matanzas inlet and out to sea. With a bit of imagination one may see there the proud galleons homeward bound to Spain with the treasures of Peru, or the Golden Hind, which brought Sir Francis Drake in 1586 to plunder the Spanish town, or the ships of General Oglethorpe, who in 1740 laid siege to St Augustine

On Roanoke island to the north, on what is now the coast of North Carolina, is the site of Sir Walter Raleigh's "lost colony" Here, each summer, is presented in pageantry the drama of the ill-fated first attempt of the English to plant a colony on the North American continent.

Still further north on Jamestown island in Virginia is the site of the first permanent English settlement. Fort Frederica national monument on St. Simon's island, Georgia, represents the English struggle with the Spanish for dominion of the South Atlantic coast.



CASTILLO DE SAN MARCOS *Oldest U. S. Defense*

On the banks of the Potomac river in Virginia is George Washington's birthplace national monument, and in Pennsylvania, near Farmington, a reconstructed pioneer fortification marks the site of Fort Necessity and the scene of the opening battle of the French and Indian war.

• • •

THE GREAT Revolutionary war battlefields of Saratoga in New York and Yorktown in Virginia are included in the national park system as well as the site of Washington's winter encampments at Morristown, N. J.

Other important Revolutionary battlefield sites in the national park system are: White Plains in New York, Guilford courthouse and Moore's creek in North Carolina, Kings mountain and Cowpens in South Carolina.

• • •

LISTED AMONG the more interesting and significant sites which belong to the first 75 years of the republic are Fort McHenry national monument and historic shrine at Baltimore, Md., birthplace of the "Star Spangled Banner," the Lee mansion national memorial at Arlington, Va., which was the home of Gen. Robert E. Lee and is typical of the plantation days of the old South.

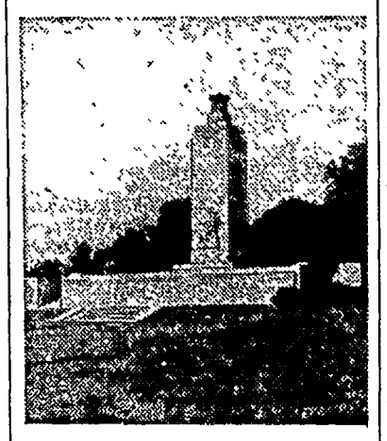
Of interest also is the birthplace of Abraham Lincoln near Hodgenville, Ky. Here at Abraham Lincoln national historical park in a magnificent memorial building is preserved what is thought to be the log cabin in which Lincoln was born.

• • •

NEARLY ALL of the great battlefields of the War Between the States are now under jurisdiction of National Park service.

By visiting them in chronological succession one may acquire a thorough understanding of the events of this vast internal struggle.

The better known battles of this war of which the sites are included in the national park system are: The first and second battles of Manassas in northern Virginia, Antietam in Maryland, Gettysburg in Pennsylvania, Shiloh in Tennessee, Vicksburg in Mississippi, Chickamauga and the Atlanta campaign in Georgia, Chattanooga in Tennessee, and Fredericksburg, Chancellorsville, Spottsylvania, Richmond, Petersburg and Appomattox in Virginia.



GETTYSBURG *Dedicated to Peace*

• • •

THE GREAT WESTWARD movement began long before the War Between the States and continued for many decades after In this phase of history one finds in the national park system the Jefferson national expansion memorial at St. Louis, Mo., the Meriwether Lewis national monument in Tennessee, which contains the grave of the explorer who led the Lewis and Clark expedition through the northwest to the Pacific coast, and the Scotts Bluff national monument in Nebraska, a famous landmark on the Oregon Trail.

There are also the frontier military posts of Fort Laramie in Wyoming and Pipe Springs in Arizona, the site of the Whitman massacre in Washington and the site of Custer's last stand in Montana.

In the West also, in the Black Hills of South Dakota, is the amazing memorial carved in the granite of Mount Rushmore to the memory of the four presidents, Washington, Jefferson, Lincoln and Theodore Roosevelt.

• • •

REPRESENTING MORE recent times are the Statue of Liberty national monument in New York harbor, the memorial at Kill Devil hill, North Carolina, marking the site of the first airplane flight by the Wright brothers, the Vanderbilt mansion and the home of Franklin D. Roosevelt at Hyde Park, N. Y.

Representing the world of tomorrow is the proposed national monument to mark the site of the first atom bomb explosion in New Mexico.

The most recently acquired national historic site is the Adams mansion at Quincy, Mass. This mansion, a part of which dates back to 1739, has been the home of two presidents and many statesmen and writers, and its history flows continuously through the whole American scene from earliest days of the republic to the present.

• • •

A complete list of national historic sites may be obtained by writing the Director, National Park Service, Department of the Interior, Washington 25, D. C.

Accident Rate in Parks Soars

WASHINGTON.—Stressing the necessity for better observance by the public of safety regulations, Newton B. Drury, National Park service director, reported that the accident rate among visitors to the national park system jumped 28 per cent during the first six months of the present year.

Fatal accidents in all of the 169 areas of the national park system during 1946 totaled 29, Drury revealed, adding that the figure represents a rate of 0.131 per 100,000 visitors.

Contrary to popular belief, falls from heights in the rugged country characteristic of most of the national parks accounted for only 14 per cent of the 1946 fatalities. Drowning was responsible for 66 per cent of the fatal mishaps, and in many instances the victims were swimming alone.

JUST FOR LAUGHS

Quick Reflex

An inquisitive tourist upon a man driving a team mules. "Has a mule ever kicked you?" he asked.

"No," drawled the other, sometimes he kicks the where I recently was."

Needs Adjusting

Repairman—Good morning, I'm from the gas company. I stand there's something in the tha' won't work.

Woman—Yes, he's upstairs.

Through Hunting

Clerk—What kind of license you want—a hunting license?

Chap—Nope, I've been hunting long enough. I want a marriage license.

He'da Dunit

Foreman—Now, then, hurry

Worker—All right, boss, Rome wasn't built in a day,

Foreman—Maybe not, but wasn't foreman on that job!

Short Romance—He thought was devastating, but he found was only so to his bank roll.

Overgrown

Joe—Speak a little louder please.

Moe—What's the matter, an ear phone?

Joe—Nope, a haircut.

Watch Your Kidneys
Help Them Cleanse the Blood of Harmful Body Waste
Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.
Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!
DOAN'S PILLS

EY STARTED THE WHOLE AFFAIR . . . Co-authors of the much-bated labor bill which occasioned one of the hottest battles in mod-n congressional history are Rep. Fred A. Hartley (Rep., N. J.) ft) and Sen. Robert A. Taft (Rep., O.). Sponsors of the labor re-m measure are shown here as they met on the senate side of the pitol to discuss the final showdown on the bill which took place in e senate.

OK, GIRLS, A REAL ARABIAN PRINCE . . . Three girl students the Bayside, L. I., high school appear reasonably thrilled over eting a genuine Arabian prince. He is Prince Nawaf Ibn Abdul iz (but what's the initial?), the son of King Saudi of Arabia. Prince waf, all decked out in his regal raiment, visited the school in order get a rough idea as to how American youngsters receive their ucation.

OSSUMS FOR PLAYMATES . . . It isn't every boy who has eight ossum (or 'possum) pups for pets, possibly because it isn't every who would want that many. But Jimmy Harris, 12-year-old son Mr. and Mrs. Robert Harris of near Geneseo, Ill., thinks it's great . Some of the eight are shown here as they cling to his clothing perch on his head. They were captured, with their mother.

M HEMISPHERE, MARSHALL URGES . . . Secretary of State rge C. Marshall was the first of a number of top-ranking civilian military officials called to testify before the house foreign af-s committee on President Truman's proposal to arm the nations he western hemisphere.

CHILD PRODIGY . . . Paola Caffarella of Genoa, Italy, is only 10 years old, but already she has distinguished herself as a concert pianist. She will leave Italy soon for a series of concerts in the United States.

NO PRINCE CHARMING . . . When Albert F. Lange of North Arlington, N. J., stepped off plane in London, he announced that he had arrived in England to marry Princess Elizabeth. Officials promptly shipped him back to the United States. Lange said he has seen the princess in a mist in his dreams ever since he was five.

DOESN'T LIKE CLOTHING . . . Not a cloth eater is this royal walnut moth, enlarged to about three times its natural size. Just emerged from its shell-like pupa, this moth will have a wingspread of five inches.

ASSISTANT SECRETARY . . . Charles Saltzman, vice-president of the New York stock exchange, has been named by President Truman as assistant secretary of state in charge of occupied areas affairs. He succeeds John J. Hilldring.

ANOTHER WAR VETERAN . . . An old campaigner from the Spanish-American war, now a patient of the Old Soldiers' home, William H. Robbins ate ice cream and cake at garden party.

SUNDAY SCHOOL LESSON

Light on the Problem Of Human Suffering

LESSON TEXT FOR JULY 20—Job 1:6; 2 7-10, 19:7-10; 42 1-5; James 5:11.

MEMORY SELECTION—Thou therefore endure hardness, as a good soldier of Jesus Christ.—II Timothy 2:3.

EDITOR'S NOTE: Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute, Chicago.

HUMAN suffering—what a problem it is to all of us, in greater or smaller measure. From the broken heart of men and women comes the question "Why?"

We cannot always answer, nor do we fully know the meaning and purpose. We must often simply put ourselves and our loved ones into the hands of God, trusting him to bring us into assurance and victory.

There are some things we can know, and they are most helpful. The book of Job reveals much concerning the background of suffering and its uses and advantages. It is not all loss and pain. God does not forget his people in their hour of trial.

Job had suffered the loss of property, family, and was now personally afflicted by sickness of his body. His friends who came to comfort him had added to his troubles by their pious platitudes about suffering being the result of sin (cf. John 9:3), and so on.

There was enough truth in what they said to make it hurt, and so we are doubly glad we are given a look behind the scenes We learn that this was not a struggle between God and Job, nor even between Satan and Job. We see

I. The Battle Between God and Satan (Job 1:8).

READ the entire story here and you will see that Satan, when faced by God with the godly example of Job's life, threw down a challenge. He declared that the only reason Job loved God was because he received so much good out of it, because God protected him.

The issue was clearly drawn; the question was whether God was able to keep a man in the midst of trial and suffering. Was His grace sufficient for the dark hours of life as well as the happy and bright ones?

Having stripped Job of all his possessions, and left him childless and heart broken, Satan had to admit failure up to that point. But he sneeringly slandered both Job and God by saying that Job was not concerned about these other things so long as his own body was unharmed (2:4, 5).

So the Lord permitted him to afflict Job's body, and we see the conflict raging in

II. The Battleground—the Life of Job (2:7-10; 19:7-10).

THE mystery of God's permissive will enters into the picture here, and we learn too that Satan, while a mighty being, has limits to his power. God may give him liberty to test his people, but it is never with the thought that they will fall; rather to prove that they can stand true come what may.

Was any mortal ever more afflicted than Job? We find him finally an outcast, sitting on an ash heap, scraping the awful sores upon his poor body.

Job did have his times of questioning and doubt (19.7-10). He felt at times that God had forsaken him. He misunderstood the providences of God. But through it all he held on to his faith in God. He could do without his possessions (1:21). God could even take his life and he would say, "Though he slay me, yet will I trust him." He saw beyond the grave, for he knew that if his body were destroyed he would still see his Redeemer.

What more sublime expression of faith could a man make than to say in his hour of seeming despair, "I know that my Redeemer liveth."

How did it all come out in the end? That is our last point.

III. The Outcome—Victory for God in Job (42:1-5, James 5:11).

JOB had to come to the end of himself. Judging himself to be unworthy (42 6), he repented of all his own self-righteousness and cast himself upon the mercy of God God then vindicated him and restored him to a place of blessing and usefulness.

The answer then to our problem is this—God is able to keep to the uttermost those who put their trust in him (Heb. 7:25) through the grace he gives. Suffering may be in his permissive will for our own self-judgment and growth in grace. But back of it all is the assurance that God knows about it, he has not turned away; that in due season, if we faint not, we shall see victory.

Ultimately, the question is not whether we can stand or not, but whether God is able to keep us in the midst of the onslaught of the world, the flesh and the devil.

Released by Western Newspaper Union.

HOBBY PAYS OFF . . . Two Atlanta school children examine a new school design, built in miniature by R. F. Snyder, Atlanta business man. Snyder's model-building avocation resulted in this revolutionary school design which has been converted to full-scale construction of rural schools in the South.

NO MORE 'HOOKEY'

Inventive Salesman Perfects Revolutionary School Design

ATLANTA, GA.—An inventive salesman who is neither parent nor educator paradoxically has devised a rural school from which even the most recalcitrant children may be less loathe to play "hookey" in future.

He is R. F. (Russ) Snyder, Atlanta businessman, who teamed up his business with a hobby to produce a school design in miniature that has since been translated into full-scale construction. The feature calculated to hold the interest of pupils is that classrooms are almost as "outdoors" as the play-yard.

Several months ago Snyder attended the southeastern school conference in the interests of Libbey-Owens-Ford Glass company and came home with an idea buzzing in his head.

"Most kids don't like to stay indoors," he reasoned, "especially when the weather is nice outdoors. So why not bring the outdoors in to them?"

He sat up nights for two months, he says, building in his workshop a two-room school model.

"I opened up the walls to all outdoors with the biggest windows possible And I found that twice or three times more daylight could be supplied to some of the desks than in traditional school design. Daylight has an important bearing on children's eyesight.

"The sun, you know, also can be used to help heat the school during cold months And the large windows dispel that cooped-up feeling and give spaciousness to rooms"

Snyder set up his completed model in the company's display rooms and invited Atlanta architects and educational officials to inspect it. Enthused with his idea, he began addressing architects' meetings throughout the state and explaining his plans to parents' organizations and child welfare groups.

His school model featured a whole wall of glass to the south, with the roof extended to shield the big window against the sun in the extremely hot school months Opposite, without sacrificing blackboard space, he placed a clerestory window high up under the roof to admit north light.

In the north room, he reversed the window arrangement and glazed the south clerestory window with heat-absorbing and glare-reducing glass to assure balanced lighting.

Today, rural schools patterned after Snyder's design to "engineer" the greatest possible amount of daylight into classrooms are actually under construction in the South.

Snyder has a quotation, too, from one of the world's authorities on lighting to bolster his theory:

"If from the age of five years," it says, "children did their reading and performed their other tasks of near vision in the abundant light of a window in daytime, there would be fewer wearing or needing eyeglasses when they finished school."

He figures he may have a hand in putting a good many of the nation's children in that "abundant" light in the years to come.

Personality Course Offered in School

NEW YORK, N. Y —Personality courses, designed to teach students how to acquire a "pleasant manner," are being offered in 27 vocational high schools here.

The program was started on recommendation of employers who said that "a far greater percentage of persons lose their jobs because of personality difficulties than because of inefficiency," George F. Pigott Jr., assistant superintendent, explained.

Even Faces Are Red At This Fire Alarm

ANGELS CAMP, CALIF. — Although the whole volunteer fire department, 20 men strong, rushed out to Charles Kendall's blazing house trailer, the vehicle was a total loss. The boys forgot to bring the fire trucks. The trucks had been moved to an auxiliary building and the volunteers, seeing the old garage empty, assumed earlier comers had taken the trucks.

"Off We Go" AVIATION NOTES

Airport Chatter

Establishment of an "air-age" class in Kent, Wash., high school is planned from proceeds of the city's first Sky Fair, staged at the Kent airport under auspices of the Lions club. Highlights of the program included formation flying by 30 navy planes, stunt flying, an air style show for women, exhibitions of aircraft and military equipment, parachute jumps and a helicopter demonstration. . . . Colorado communities seeking airport improvements will be aided by a new state program calling for state contributions to help the local communitities match federal funds allocated under the 1947 airport program Despite budget cuts, Colorado still is eligible for about $250,000 of federal grants Communities seeking airport improvements are Trinidad, Gunnison, Rifle, Monte Vista and Greeley A tour of the U. S. dryland field station at Akron, Colo., was arranged for Colorado flying farmers The farmers and ranchers, most of whom piloted their own planes, were guests at a flight breakfast after their arrival in Akron.

• • •

A lawsuit on file in Santa Monica, Calif., court accuses helicopter pilots of using their machines to peep at women sun bathers "attired either scantily or not at all" at a swank beach club. The suit, seeking an injunction against the flying "peeping Toms," named as defendant the Los Angeles Airways, Inc., whose helicopter mail route passes near the club.

• • •

Military aviation appropriations after World War I made possible the first air mail service, the start of aerial forest patrol, crop dusting and aerial mapping.

• • •

ANOTHER FIRST . . . Miss Ann Kirk Shaw, 23, of Southport, Conn., who is shown at the controls in the cockpit of a helicopter, ranks as the first woman to solo a "flying windmill."

• • •

Need Small Fields

To accommodate the personal flier who has use for light planes as a means of transportation, a "tremendous" number of little airports are needed throughout the nation, according to William T. Piper, plane manufacturer and "father" of light plane flying. Piper reports that personal flying is increasing in the Middle West, where farmers and ranchers have found that it solves their transportation problems in the spaces where roads are few and weather equable.

Practical Instructions For the Home Nurse

Giving First Aid

ACCIDENTS are bound to happen in any household. Be prepared! It's a rare summer day that at least one of the children doesn't come home with a wound of some kind.

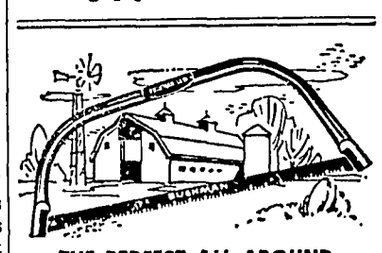
It tells how to meet emergencies, nurse a bed patient, care for the new baby, and more Send 25c (coin) for "Practical Instruction for the Home Nurse" to Weekly Newspaper Service, 243 West 17th St., New York 11, N Y. Print name, address, booklet title and No. 81.

Odd 12-Foot Alphorn Calls Cows, Announces Worship

A quaint, deep-toned alphorn, 10 to 12 feet in length, is still in use in certain parts of the Alps for two purposes—to call the cattle home at milking time and to announce the evening worship hour.

This peculiar Swiss instrument, of ancient origin, is mentioned in chronicles as far back as the Ninth century It is made of wood, bound with bark fiber, and its wide mouth rests on the ground. In appearance it is as a huge smoking pipe.



THE PERFECT ALL-AROUND SAW FOR THE FARM

BUSHMAN SAWS WITH SWEDISH STEEL BLADES

The amazing cutting ability of the Bushman Saw makes it especially useful for all-purpose work on the farm—rough work—cutting fence posts—trimming trees—smooth, fast cutting, perfect balance.

IOWA FORECAST INDICATES 40 PER CENT CUT IN CORN

The devastating effect of the June rains on Iowa's corn crop was disclosed when a 40 per cent decrease in the state's 1947 corn production from last year's record yield of 661,233,000 bushels was forecast.

The Iowa crop and livestock reporting service predicted a 396,950,000 bushel yield for this season on the basis of July 1 crop conditions. A 40-bushel yield per acre is forecast—20 bushels below last year's average.

The 1947 estimate also is below the 1936-45 average of 451,458,000 bushels and will be the least yield since the drouth year of 1936 when 190,434,000 bushels were harvested.

The prospective decrease, the service said is due to reduced acreage, mainly poor growing conditions in June, relatively poor percentage stands and to the probable heavy loss of yield per acre caused by water standing in fields.

The acreage for harvest is expected to be about 9,924,000 acres, almost 10 per cent less than the harvested acreage in 1946. The planted acreage was estimated at 10,400,000 acres but the service said more fields undoubtedly have been abandoned since planting. Some replanting continued past the first of July where the first planting had been flooded out.

The service predicted that nearly 1,000,000 acres of this year's corn was likely to be cut green and to be used for fodder, grazing and silage.

ERNEST HENSCHEN

Klemme, Iowa

The switch to soybeans after it became too late to plant oats and corn has been "rather sharp," the service said reporting that approximately 1,464,000 acres had been planted to soybeans compared with 1,556,000 last year. No production estimates were made.

Oats production was estimated at 214,896,000 bushels for 1947 compared with 220,478,000 last year and flaxseed production was estimated at 910,000 bushels compared with 525,000 last year.

The acreage of all hay was estimated at 3,445,000 acres or about 5 per cent above last year.

Corn stocks on hand as of July 1 amounted to 180,879,000 bushels or 29 per cent of the 1946 crop, the service reported. This was the largest July 1 carry over since 1942.

Oats stocks on Iowa farms July 1 totaled 44,036,000 bushels or about 1,000,000 bushels less than a year ago.

Soybean stocks on farms July 1 totaled 4,049,000 bushels or 7 per cent of the 1946 crop.

The service commented that a total of 196,450 bushels of corn had disappeared from farms between April 1 and July and said this figure was the highest of record for this period.

"Generally heavy feeding operations, delayed pasture growth and spring weather all increased feed requirements," the service said.

EROSION WARNING SIGNS SHOWING UP IN COUNTY

Warning signs of soil erosion are showing up around Hancock county this season.

Yellow and brown spots on slopes are erosion danger signals.

Rain has been especially bad this spring in carrying soil off. Wind and rain working together have carried off rich topsoil, leaving subsoil exposed in an ugly hillside scar.

This erosion never seems to be doing any visible damage. But a look at a rolling cultivated field just after a hard rain will show many small fingers, or rills, extending up the slope. These rills down which many tons of topsoil have been washed by the running water are smoothed out in cultivation.

The loss goes practically unnoticed—and the process repeats itself.

It is this continuous repetition of rilling and washing that eventually exposes the yellow subsoil.

As long as up-and-down farming of slopes continues, the slopes will continue to wash. Finally the whole field will go, leaving nothing but unproductive wastes.

Contour farming can do a lot to save that topsoil.

Results of experiments at the soil conservation experiment station, Clarinda, showed that contour cultivation reduces soil losses by 50 per cent. The records, kept over a period of 17 years, also showed strip cropping, practiced in conjunction with the contour cultivation, reduced soil losses by an additional 20 per cent.

So, if you want to leave your children a farm instead of a wasteland, look to the yellow slopes—and start practicing soil conservation before it's too late.

Large Crowd Attended Annual Ell Township Picnic In Klemme Park

A large number of families attended the annual Ell Township Farm Bureau picnic held in the Klemme park Sunday.

The Ell ladies are good cooks and there was enough food for another picnic if necessary.

Klemme Is Growing

Klemme is growing! There are now several more houses in Klemme than there were at the beginning of the year, and several more new houses are now being planned to be built this year, or early next year.

In addition Ernest Henschen has built a large garage to house his oil trucks, and the Hancock Co. Coop. Oil Assn. has under construction a new super-service station.

Replacing the front pair of cultivator sweeps with disk killers will throw more dirt into the row and smother weeds that are getting too big to handle.

Mechanic Injured Friday

Cliff Adair received a severe burn on his forearm while he was working at Larson's Highway service Friday. Cliff was removing the cap from a car radiator which was boiling when the cap suddenly let loose and the steaming hot water struck his arm, causing a severe burn.

FEARLESS FARMER IS A FOOLISH ONE

Needless Accidents Occur From Too Much Hurry, Too Little Care

The safe way of farm living is the adult way.

With Farm Safety week scheduled July 20-26, Norval Wardle, Iowa State College farm safety specialist, said this week that the "fearless farmer" was the "foolish farmer."

It's hardly a sign of cowardice to show some respect for a bull.

Inexperienced or foolhardy folks are the ones who make heedless jumps from hayloads.

Trying to prove you can "take it" sometimes leads to heat exhaustion.

Mature, thinking people, those of good judgment, go at farm tasks in the safe way.

Safe Way Simple

You don't have to be a farm safety specialist to see the advantage of doing farm tasks in the safe way. Such methods always correspond to the work simplication methods advocated by farm management specialists and agricultural engineers.

The best way to do a job, they say, is to plan in advance, then go about it in logical steps without undue hurry.

It not only saves time but it saves a lot of energy, and often steers the worker clear of injury.

Some people try to save time by hurrying, by operating machinery too fast or putting an extra load on it. That has resulted in a lot of broken bones and wounds, many serious, some fatal.

Accident Pattern

No one has ever determined the number of hours of time lost or the amount of pain and sorrow Iowa accidents have caused. Nor has it ever been found which are the biggest causes of accidents. In assuming direction of the state's farm safety program, Wardle said it would be one of his first tasks to determine the "accident pattern" in Iowa.

If that pattern follows those of most other states it likely will show that of all accidents around the farm, falls are the most numerous. These include falls in farm homes as well as those which come while at work.

Next most important cause of farm accidents is machinery, and the third big classification is animals.

Wardle says it's hard to tell how many accidents are prevented by a little care—but it's easy to determine when you are living safely.

LET CLINTON, BENTON STAND TILL DEAD RIPE

Heating in the bin may result if Clinton and Benton oats are combined before they are "dead ripe."

Both varieties ripen unevenly. They are likely to have secondary tillers or suckers still in the milk stage when the rest of the heads seem dry. Heavier kernels and fewer hulls also make handling more difficult.

To offset this increased danger of grain damage, direct combining of standing grain must be delayed until the average moisture content of all kernels is 13 per cent or less.

Fields which have many suckers along with a heavy undergrowth of grass and weeds should be windrowed. Combining from the windrow can then be done after the grain has more completely dried out.

"In either case," says Iowa State College agronomist Joe L. Robinson, "it is a good idea to take a sample of the heads to a local elevator for a moisture content analysis. If they show more than 13 percent moisture, wait a few days before starting to harvest.

Combining of Clinton or Benton should not be done early in the morning or in the evening when dew is on the grain. Fields should be given plenty of time to dry out after a rain.

Shattering is not excessive in either of the varieties, and losses from allowing the grain to ripen longer should be slight, Robinson says.

ALBINO GOPHER

While ridding his land of rodents, Walt Nosekable of Mills County turned up an unusual pocket gopher, white in color instead of the usual brownish gray.

Hancock 4-H Boys Learn To Give Demonstrations

Twenty 4-H boys and club leaders of Hancock County have studied the presentation of demonstrations at the Farm Bureau Office, Garner, Monday evening, July 7. Avery, Amsterdam, Bingham, Concord, Garfield, and Liberty townships were represented.

James Boehnke and Maynard Dorow of Concord Township presented the demonstration on cattle grub control with which they won recognition at both the North Iowa Fair and the State Fair in 1946. The 4-H boys observed this demonstration to learn the procedure in giving a demonstration.

Pointers in selecting, preparing, and giving demonstration were discussed by Edgar Dorow, county extension youth assistant.

The purpose of 4-H demonstrations is to teach improved ways of doing farm jobs; demonstrations have proved to be a more effective way of teaching than the mere telling of printing of directions for doing the job.

Demonstration teams are organized to bring new methods to 4-H Club members as well as to the community. These teams will perform before community clubs, Farm Bureau, and other meetings.

The demonstration teams are now preparing for competition at the County Achievement show to be held at Garner, August 11 and 12.

FARM INCOME IS ABOVE 1946
Little Change Expected In Livestock Prices

The agriculture department reported that farm income, including government payments, was above 25 per cent higher during the first half of this year than in the first 6 months of 1946.

Total cash receipts were estimated at nearly $12,000,000,000 compared with $9,600,000,000 in the same period of last year.

The greater part of the increase reflected higher prices. Most farm products were under price ceilings a year ago.

Receipts from livestock and livestock products were about $7,900,000,000, up nearly 40 per cent over the same period of 1946. The largest gain—60 per cent—came from meat animals because of much higher prices and some increase in marketing.

Receipts from dairy products showed an increase of about 30 per cent Poultry and eggs, 10 per cent.

Receipts from crops totaled close to $3,800,000,000, up nearly 20 per cent over the first half of last year Most of the gain was in grains and tobacco.

Looking to the last half of the year, the department said prices received by farmers are expected to decline seasonably as marketings from 1947 crops influence, markets. Feed grains, however, are expected to remain high, due to prospects of a smaller corn crop.

Prices of eggs and several dairy products, on the other hand, are likely to rise moderately during the summer months, the department said Little change is expected in prices of livestock and other livestock products.

IOWA FARM LAND VALUES AT HIGHEST SINCE 1925

Iowa farm land values are now at the highest level since 1925.

The Iowa crop and livestock reporting service announced that the index of the state's farm land values advanced 13 points during the year ended March 1 and stood at 134 per cent of the 1912-14 average

The all-time high in Iowa land values was reached 1920 when the index reached 213 per cent or 79 per cent above today's levels.

STATE HOSPITAL TO INCREASE SERVICE

Gerhardt Hartman, superintendant of the University Hospital at Iowa City, announces that because of an appropriation made by the recent General Assembly the hospital will increase its services to about a third more patients than were served last year when 18,496 people were admitted for treatment and surgery. The benefits of this increased service will be felt in every part of Iowa.

Auto Club News Drive carefully Don't insist on your rites.

SPRAY TOMATOES WITH FIXED COPPERS

It will be "time well spent," for gardeners to spray their tomatoes with fixed copper solution within the next few days.

With as much cool, wet weather as we have had this year, there is bound to be some early blight and Septoria leaf spot showing on tomatoes. While neither disease will completely "knock out" a crop, spraying with any of the fixed coppers will effectively control the disease and increase the tomato yield.

Bordeaux, a commercial copper, easy to get, inexpensive and, according to Iowa State College botanists, it does about as good as any of the fixed coppers.

The spray should be mixed according to directions. It works best applied when the plant is dry so that all the spray solution will stay on the foliage where it belongs.

Closes Tavern Here

L. A. Ridder, who has been in business in the Baack building for the past 17 years, the fore part of the week closed his business and moved out his stock. Mr. Ridder plans to again enter business at a later date

Klemme Youth Center Open every Wednesday night. All free.

OFFICES MOVED

The office of the county engineer was moved from its 2nd floor location to the room in the basement formerly occupied by the Hancock county O P A. office The county nurse who has had her office in the basement of the court house has been moved to the room being vacated by the engineer A new room will be provided for the county assessor in the basement of the court house.

AROUND IOWA

CAR RAMMED

When it was rammed from the rear one day last week, a car driven by Raymond Rath, Oelwein, was knocked into a ditch. His gasoline tank exploded and burned, bringing instant death to Mr. Rath. His wife was knocked clear and escaped with minor injuries.

FIRST RIDE

At Milford, Frank Olson waited until he was sixty years old to take his first plane ride, then made it a good one by flying with his nephew up to Brainerd, Minnesota, to attend a sale

LOTS OF SNAKES

Walking and working in Ryan woods, north of Monona, will be a lot safer in the future thanks to Bill Thomas, of a wood-cutting crew. Since April, he has killed 42 rattlesnakes The largest with 14 rattles, measured four and one half feet in length with the head and tail removed

FELL ON LIVE WIRE

Tripping on a live wire while fighting a fire cost the life of Lloyd King, of Deep River, recently He was unable to pull free from the 2300 volt line. George Dale seized a rake and pulled the wire away from Mr. King but the victim died shortly afterwards.

RED PAINT

A car belonging to Robert Davey of near Mt. Pleasant got a free paint job in that city one day last week along with Mrs. Davey. The car was parked near a paint-spraying machine, with the window down. A young lad examining the spray truck pulled a lever to see what would happen, spraying the red barn paint over the car and Mrs. Davey

TOWN SPRAYED

Marengo's city-wide campaign to control flies and mosquitoes started off with a city-wide spray from an airplane piloted by Paul Hursh. Flying at 150 feet Hursh, drenched the town with DDT It took him about an hour and a half.

Dear Seen Near Goodell

Albert Schmidt, Fred Albers and son John, saw a deer three miles east and 1 mile south of Goodell near the Lieuen farm Thursday The men had stopped their cars and were visiting when they saw the deer come across a field.

Prescribes Rest as Best Remedy for Rheumatic Fever

Although there is no specific medication for rheumatic fever, the leading cause of death in children, the serious disease is best treated by a long period of rest.

"It is the heart damage that destroys or shortens life in this disease, striking children between the ages of five and twenty," according to Dr. Fred Hiss of Syracuse university. "The fever, the pallor, the sweating, the severe joint pains and all the other signs may and usually do completely disappear when the disease becomes inactive, but not so with the heart involvement. There we frequently have a permanent scarring of the valves and damage to the heart muscle."

"At the present time, we have no specific medication for this disease and, like tuberculosis, it is best treated by a long period of rest," Dr. Hiss declared. "Because of this fact and because most of the cases begin at a time when a child is trying to get his education, it seems highly desirable to have these children in a separate hospital or convalescent home where they can carry on their education even though they are confined to bed, or their activities are greatly restricted. The period of rest is very variable, and it may be anywhere from one month to several years, depending upon the duration of the activity of the rheumatic infection."

Workmanlike Home Sewer Keeps Machine Well Oiled

The workmanlike home sewer, whose machine whirrs smoothly, keeps an oil can handy and uses it after each day's work or after 8 or 10 hours of use.

For oiling, use household machine oil, the kind that is packaged by gasoline companies or manufacturers of sewing machines Squirt a drop in each oil hole and each bearing—that is, wherever one surface rubs against another or turns within another. Don't forget to oil any little block of felt or ball of wool that feeds oil to the shuttle race If there is no felt or wool, wipe a thin film of oil on the race with a cloth on your finger. But never oil the tensions of the machine.

In routine oiling, a drop is plenty for more than one reason. Excess oil runs off and is wasted, and excess oil not wiped off collects dust. Too much oil on the shuttle race or needle can cause stitches to skip. When oiling is finished, run the machine a minute or two to work the oil into bearings It is also routine good care to slide out the needle plate occasionally and blow away any lint under it, or to remove the lint with a dry brush. This is one of the worst lint-catching places on the machine, and when lint and dirt pack down, cleaning becomes hard work.

Whip Colds

To increase resistance to colds: Plan three meals a day to include all the essentials of good nutrition. Special care should be taken to include foods rich in vitamin C daily. These are oranges, grapefruit, fruit juices, tomatoes and raw cabbage. Cod liver oil is a rich source of vitamin A, which will help to increase resistance to infection. Getting over-tired is one of the surest ways to set the stage for getting a cold because body resistance is temporarily lowered. When clothing and feet are damp or the body is chilled, resistance to infection may be lessened. Fresh air is essential to good health. Outdoor activity will stimulate circulation and increase appetite.

Removing Decals

The use of Scotch tape to remove the water-set type of decalcomanias from furniture without marring the surface is advised by "Fullerton's Farm and Home," which outlines this procedure: 'Simply smooth down a strip of the tape on top of the decal and then peel the tape back. The decal comes up with the tape. Fingernail polish remover is another method. It will soften the lacquer that is sometimes over the surface of the decal. Then, a razor blade can be used to remove the old decoration but care is needed to avoid marring the finished surface with the blade. An alternative to the use of fingernail polish is the use of denatured alcohol to soften the lacquer, but any solvent used must be confined to the surface of the decalcomania itself. Any scraping must be done with the utmost care to preserve the finished surface under the decalcomania. If the surface is dulled or marred in removing decalcomanias, careful retouching or refinishing of the surface will be necessary.

FIND WATER UNSAFE IN MANY IOWA FARM WELLS

Unsafe well water is not at all uncommon on Iowa farms.

Seven out of every 10 samples of well water taken from farms near Washington, Iowa, did not meet purity test standards, a district health engineer recently reported. In Hancock, County 17 of 44 wells supplying rural schools were considered unsafe.

Surveys of the United States Department of Agriculture have indicated that three out of four farm wells in the nation are unsafe. This does not mean that those drinking the water will contact typhoid fever It does mean they are likely to contract dysentery, summer complaint or other illnesses, says Harold Beauty, Iowa State College agricultural engineer.

He explains that there are 2 chief causes of well pollution. They are the location and the type of well

A shallow well of the dug or bored type placed so that surface water can flow toward it is almost sure to be contaminated, he says Wells should be above the farmyards, outdoor toilets and septic tank distribution systems, and they should be 100 to 200 feet away from them

A dug or bored well is more easily contaminated than a drilled well. In wells that are dug or bored, surface water often seeps through the brick or rock walls of the lining. Many of these walls also have poor curbs and platforms.

To remedy such troubles, Beaty advises a solid layer of concrete placed around the upper 10 or 15 feet of the well wall, and a tight concrete platform Even if the well is in a bad location, such measures often relieve contamination.

In electrically operated systems, contamination sometimes comes from water in the pump pit draining back into the well. Pits containing pump units should be drained The pump unit is best mounted on a platform of concrete a foot or so above the pit floor The well casing should extend up into the pit to prevent seepage back into the well.

More complete information on well construction and pumping units can be found in Bulletin AE-514, entitled "Planning the Farm and Home Water System" Copies can be obtained by writing the Agricultural Extension Service, Iowa State College, Ames.

COUNTY EMPLOYEES GET PAY INCREASE

At a meeting of the Hancock County board of supervisors the board granted a 5 cent an hour increase to road maintenance men and increase ranging from $10.00 to$15 a month were given to top foreman, janitor, engineer and employees, and certain clerk in the county offices.

WHATEVER happens, one way or another, the ring party of the year will take place in Chicago, with Tony Zale and Rocky Graziano at the head of the receiving line.

These two gave the big party of 1946, last summer in New York. They turned in one of the greatest ring shows of all time, and you can turn the clock back to Abel and Cain or David and Goliath.

R. Graziano

Few appreciate the number of great fighters who have figured in past middleweight championships The list is one of the most brilliant in boxing history. It includes Jack Dempsey, the nonpareil, from 1883 to 1895. After that we find such names as Bob Fitzsimmons, Tommy Ryan, Kid McCoy, Philadelphia Jack O'Brien, Stanley Ketchel, Billy Papke, Frank Klaus, Harry Greb, Tiger Flowers and Mickey Walker

Here you find many of the three-starred names of ring history. These men have written chapters that never will be forgotten by those who follow the leather throwers. Dempsey — Fitzsimmons — McCoy — Ketchel — Greb — Walker; slip us six greater names from the roped-in sector of sport.

No one can yet class Zale or Graziano with the six leaders we have named. We doubt that either belongs with these six masters, although Dempsey is well beyond our day and time. But the old-timers of other years have told us he belongs around the top. Certainly no one can argue the worth of Fitzsimmons, McCoy, Ketchel, Greb and Walker. They also could handle heavyweights, especially Ruby Robert, one of the great fighters of all time, a boxer and terrific puncher with middleweight legs and a heavyweight body, still a great fighter at the age of 45.

Best Since Walker

We doubt very much that Zale or Graziano would have any great amount of luck against those mentioned above. But the two, Zale and Graziano, are a big improvement over those who have come along since the Toy Bulldog, meaning Mickey Walker, traded his boxing gloves for an artist's brush.

Zale and Graziano proved this part of the argument in a meeting that had even more action than the stars of the past ever turned in. Melodrama may not mean skill or class. But it happens to be something the public likes to see, when it is ably handled.

In 1939, the middleweight stew included a weird mixture under the names of Solly Kreiger, Al Hostak and Ceferino Garcia. They were merely fillers-in.

In 1940, Zale arrived as the NBA crown holder. Tony has been wearing the middleweight crown ever since, including a long war lapse from 1941 up through 1945.

While Zale was in war service a young, hard punching roughneck by the name of Graziano came along like a Midwestern tornado. Graziano was blessed with one great ring asset. He could punch. He was never any too smart and he was never much of a boxer. He was never particular about observing any rules, as he proved in his meeting with Marty Servo, whom he fouled and almost wrecked.

In a way Graziano was something a softened-up ring needed. He was rough, tough, a braggart, but after all a fighter and a puncher. He was also a crowd pleaser, and a valuable entry at the gate.

Rocky had built up a bigger part of his reputation at wrecking opponents who were badly outweighed. He wasn't so hot when it came to a matter of pound for pound.

Tony Can Take It

In his meeting with Zale the challenger did about everything, except remove Zale's headpiece. When I saw Rocky nail Zale with a full right to the jaw, saw Tony go through the bottom rope, apparently bleeding at every open pore around the head in one of the early rounds, the fight seemed to be over.

But Zale got up and kept coming on. The defending champion continued to take a terrific beating. His eyes seemed glazed and his knees were wobbling. Here was about as game an exhibition as anyone ever had seen in the ring.

Zale was dazed and dizzy. He had taken the heaviest artillery Graziano could throw. And then suddenly, after a body attack, it was Graziano who crumpled to the floor and took the count.

This closed out one of the most dramatic meetings the ring ever has seen, looking back to the days of Jem Mace or John Lawrence Sullivan.

Zale, a first-class boxer, surprised one by inability to keep his chin and features away from Rocky's right hand. But Zale surprised one even more by his unbelievable ability to soak up all this punishment and still have enough left for a body knockout.

A quiz with answers offerin information on various subjec

1. What man, one-time governor of Tennessee, abandoned civilization and was adopted as the chief of the Cherokee nation?
2. Did the ancient Egyptians worship bugs?
3. How much water does Old Faithful, the geyser in Yellowstone park, discharge at each eruption?
4. What is the distance around the lip of the Liberty bell?
5. How thick is a bolt of lightning?
6. The United States is divided into how many time zones?
7. Where is the longest railroad in the world?
8. Which city, Los Angeles or New York, covers more land?
9. Does a fish ever see the fisherman trying to catch him?
10. How does cement harden under water?

The Answers

1. Sam Houston.
2. Yes. They worshipped a beetle called a scarab, which they painted on tombs, carved in stone and used as models for jewelry
3. About 15,000 gallons.
4. Twelve feet.
5. From the thickness of a hair to five inches in diameter.
6. Four: Eastern, central, mountain and Pacific.
7. In Russia. From point to point the Trans-Siberian railroad is approximately 8,000 miles long including branches.
8. Los Angeles, 452.2 sq miles, New York, 365.4 sq miles.
9. Yes. Fish can see obj above the water and on the s when the water is still.
10. Drying out does not m cement hard. It set and hard because of a chemical reactio which takes place as well i water as in the air.

Week of Saluting

When India's Chamber of Princes holds a meeting in Delhi, each of its 121 royal members is saluted, upon arrival, by the number of guns that indicates his rank, the total being nearly 1,500 cannon shots which require a week to fire.

move brown stains from tea- by rubbing with dampened to which has been added baking soda. Wash off in water and dry. This prevents ine from coming off the china.

es are more sterile if you them in soapy suds, rinse in hot water by pouring it over and let them dry on the drain-

LYNN CHAMBERS' MENU

*Baked Beans with Hamburger
Relishes Rolls *Dutch Hot Slaw
Beverage *Frozen Fruit Salad
Cookies

*Recipes given.

***Baked Beans With Hamburger.**
(Serves 4)

2 tablespoons fat
⅓ cup sliced onions
⅔ cup diced celery
½ pound chuck beef, ground
2⅔ cups canned, baked beans
2 teaspoons Worcestershire sauce
¾ teaspoon salt
⅝ teaspoon powdered sage
⅓ cup water or tomato juice

Heat the fat in a skillet. Then add onions, celery and beef, and cook, uncovered, for 10 minutes. Add remaining ingredients and heat thoroughly.

You'll want to make good use of garden vegetables; and nothing would be more welcome at church or pot-luck supper than some of your freshest vegetables, seasoned beautifully and cooked to perfection.

Spinach, Bacon Dressing.
(Serves 4)

2½ cups hot, cooked spinach
4 strips bacon
2 tablespoons vinegar
1 tablespoon sugar
1 teaspoon salt
⅛ teaspoon pepper
½ teaspoon prepared mustard

Dice bacon and saute in skillet until golden brown. Add remaining ingredients, except spinach and heat thoroughly. Then add to spinach, toss and serve at once.

Make your desserts easy but delicious by selecting one of these two:

***Frozen Fruit Salad.**
(Serves 6)

1 orange
2 slices pineapple
¾ cup Royal Anne cherries
1 banana
2 canned pear halves
¼ cup blanched, chopped almonds
¼ cup maraschino cherries
½ cup boiled salad dressing
½ cup whipping cream

Remove rind and skin from orange and cut fine. Chop other fruits and combine with nuts. Add dressing and fold in whipped cream. Freeze in tray of automatic refrigerator until firm.

Lemon-Egg Pie.
(Serves 6)

4 egg yolks
1 cup sugar
Grated rind of 1 lemon
4 tablespoons lemon juice
¼ teaspoon salt
Meringue:
4 egg whites
¼ teaspoon salt
½ cup sugar
9-inch baked pie shell

Blend first five ingredients. Cook over simmering water, stirring constantly until thickened, about 15 minutes. Remove from heat. Prepare meringue by beating egg whites until stiff, then adding salt and sugar gradually. Beat until glossy and firm. Fold yolk mixture into meringue. Pour into baked pie shell. Bake in a moderate (325-degree) oven until delicately browned, about 20 minutes.

Released by Western Newspaper Union.

Soaking pots, pans and casseroles on which food has burned or dried makes them much easier to wash. If the condition is serious, boil some soap suds in the pan slowly for a few minutes to loosen the food.

Avoid excessive use of soap and soaking when cleaning heavy dark cast iron skillets. Restore finish by coating with fat.

Pipe cleaners are ideal for cleaning many parts of the range that are inaccessible otherwise. Keep them handy.

THE FICTION CORNER

KITTENS HAVE CLAWS

By FAITH ELLEN SMITH

"YOU'VE got to go after them," Doris said. She sat on the upholstered wall seat, opened her bag, took out her vanity case and her cigaret case. "That's the trouble with you You're mousy"

"I'm what?" Nan asked. She sat on the stiff, hard chair on the other side of the little table and took off her gloves. They were white gloves, rubbed shabby by repeated cleanings.

"Mousy!" said Doris. "Mousy girls never get anywhere. Remember what I said that first day we saw Ralph going up in the elevator?"

"You said, 'There's the man I'm going to marry, unless he's got a wife and ten kids'"

Doris studied her reflection in the mirror of her vanity Her hand, long, crimson nails gleaming, patted the crisp blonde waves beneath her small hat. A large diamond on her finger kindled to green and orange flame under the subdued lights of the dining room "Well, he had a wife and one kid, but I did it, didn't I? Do you suppose I got him by sitting still and wishing for him?"

"No," Nan said.

"I used my head I found out he worked for J B. Simpson. I made up to the Simpson crowd when I met them in the washroom and took to calling for that dumb egg of an Adams girl for lunch. I got introduced to him——"

"I remember," Nan said.

"I worked to get that man. If I hadn't, I wouldn't have an apartment on East Sixtieth Street and this set of summer furs that cost fifteen hundred dollars and my own car—and a house in the country next fall, when Ralph gets his promotion . . Now, about this man——?" she said

"What man?" said Nan. Color of a newly open wild rose flooded her face. Her childishly honest brown eyes were starry.

"How should I know what man? I haven't seen you since I had you to the wedding six months ago. A girl that's attractive to men and shows some initiative might be married in six months But of course you're the kind that will drag along waiting for him to wake up and know you're on earth until he marries somebody else You wouldn't be so bad, at that, if you took a little pains with yourself and got some decent clothes"

Nan, who had started to slip off the coat of her suit, buttoned it again The lining she remembered, had ripped a little on the shoulder.

"And you'd be a good bet for some man who wanted a sensible, economical wife that didn't mind housework."

"Thank you," Nan said.

"You would! I never could learn to boil water; but the way you used to cook and scrub and fuss around when we lived together——! Well, it's lucky I had what it takes to get a fellow that can afford a servant. . . . But, of course I'm younger than you are."

"Eleven months," Nan said softly.

". . . Just a baby, really. Ralph always calls me Babe. . . . Did I tell you he's in line for the vice-presidency?"

"Is he?"

"Sure of it, my dear! J. B. depends on him for everything. He and J. B. are like that. . . . Remember the fellow came up to the apartment with him the week before we were married?"

"Of course Why wouldn't I?"

"Well, you moused around as if you were only half there. Hardly opened your mouth all evening That was J. B."

"Was it?"

"There you go! That's just what I mean. You don't take any interest. Now if this man——"

"But what makes you think there is a——"

"It's written all over you, darling. You're in love. I never saw a worse case"

Nan's big brown eyes lowered to her glass. She became peony-red.

"Well, if you don't see fit to confide in your best friend, that's your business. But you let me tell you this for your own good. If he's worth having, don't let some other girl beat you to it! You will, though. You're all set for being a neat little old maid, living on a pension and loving a pet cat——"

"I don't like cats," Nan murmured.

Doris extended a toeless suede sandal and a slender, silk-clad leg. "Cats!" she said. "Look at that run."

"I see it," Nan said.

"Ralph bought me an angora kitten for my birthday. The darn thing must have been at these stockings.

"I'll have to dash in somewhere and get another pair and put them on. You come with me, and you can have these. They'll do for you, if you're careful mending them."

"I can't come with you," Nan said.

"You can't? Why not?"

"I've got a—a kind of a date."

"A date with that man, of course! Where?"

"Oh—never mind."

"There's the man I'm going to marry—unless he's got a wife and 10 kids now."

"Don't be silly! I'm dying to see him. I'll drive you there."

"You needn't bother. It isn't far. Just back to the office."

"Oh!" Doris said "Waiter, bring the check. We're in a hurry. . . . Didn't I tell you? Nobody but you would think of slaving away at the office on a lovely Saturday afternoon. You ought to call your man and make him take you to the movies. You ought to keep after him. . . . Ready?"

"I'm ready," Nan said.

They walked out of the dim cocktail lounge into the sunny freshness of the afternoon.

"I guess I'll get my stockings over there at Bryand's," Doris said. "We have charge accounts at all the big stores If I buy them at some little shop I'll have to pay for them myself, and they cost five dollars. You don't mind if I don't drive you to the office, do you?"

"I don't mind at all," Nan said. extending her hand. "Good-bye, Doris."

"I'll give you a ring," Doris said. "You must come up to dinner some night when I haven't company and tell me all about your romance. I'll be seeing you."

Nan walked the two familiar blocks to the familiar building but she did not go up to the office where she worked She took the elevator to the floor below it and stepped out into the spacious reception room of the J B. Simpson company. She walked past the deserted information desk toward the private offices and tapped lightly on one of the doors with the tips of her gloved fingers. A man's voice called, "Come in!" She went in.

The man got up from behind a big desk and came to meet her. He was tall and becomingly gray-haired. There were laughter wrinkles around his keen eyes.

"You're late, Nan," he said.

She put her arms around his shoulders and lifted her face for his kiss. "I've been with Mrs. Jenkins."

"Who in seventeen kingdoms is Mrs. Jenkins?"

"You know. The girl I used to live with. The one that married Ralph Jenkins."

"Oh!" he said.

"How is Ralph Jenkins, by the way?"
